

# Lenovo ThinkSystem SR250 V2

Powerful 1U server for your  
evolving needs

## High performance and security

High security without lagging, the Lenovo ThinkSystem SR250 V2 doesn't sacrifice performance when keeping your network safe and running. This single-processor rack server in a compact 1U form factor is built to Lenovo's high standards for maximizing uptime for expanding businesses or edge deployment and includes Intel® SGX designed to secure application code and data.

With an increase in performance of up to 17% above previous generations, the next-generation Intel® Xeon® E-2300 Processor, provides high performance while maintaining an affordable price point.

## Flexible, scalable, and manageable

The ThinkSystem SR250 V2 provides flexibility and ease of management for your growing business. With multiple configuration options including TruDDR4 memory, GPU support, and an array of storage options, it can handle your current workloads and easily scale to meet future demands. Ideal applications include IT infrastructure, web serving, virtualization, and edge workloads.

The ThinkSystem SR250 V2 includes the Lenovo XClarity Controller and Administrator, designed to standardize and automate foundational server management tasks and centrally manage your servers, storage, and networking with ease.

## Energy-efficient powerhouse

When your business needs an energy-efficient server to handle large workloads and only have a small footprint available, the ThinkSystem SR250 V2 is an ideal solution.

The ThinkSystem SR250 V2 provides enterprise-level, 8 core performance while using no more than 95W CPUs. It's shorter-depth rack accommodates the space-constrained environments found in many SMB's, remote/branch offices, and edge applications.
