

## **IBM posts leadership 2-processor and 12-core result on two-tier SAP SD standard application benchmark**

*IBM® System x® 3650 M3 and DB2® 9.7 also achieve overall leadership 2-processor result on two-tier SAP® SD standard application benchmark running SAP enhancement package 4 for SAP ERP 6.0*

June 22, 2010 ... IBM® today announced a leadership 2-processor and 12-core result on the two-tier SAP Sales and Distribution (SD) standard application benchmark. The result of 5,100 SAP SD benchmark users was achieved on the IBM System x3650 M3, configured with two Intel® Xeon® X5680 processors, and using the IBM System Storage™ DS4700 and running IBM DB2 9.7 and the SAP enhancement package 4 for the SAP ERP application Release 6.0.

The x3650 M3 achieved 5,100 SAP SD benchmark users with 0.98 seconds average dialog response time, 27,870 SAPS, measured throughput of 1,672,000 dialog steps per hour (or 557,330 fully processed line items per hour), and an average CPU utilization of 98 percent for the central server. (1)

This result sets an overall world record for 2-processor and 12-core systems and also for 2-processor systems using SAP enhancement package 4 for SAP ERP 6.0, beating HP's result of 5,075 SAP SD benchmark users. The HP ProLiant DL380 G7 was similarly configured. (2)

The x3650 M3 was configured with two Intel Xeon X5680 processors, 3.33GHz with 256KB L2 cache per core and 12MB L3 cache per processor (2 processors/12 cores/24 threads), 96GB of memory, 64-bit DB2 9.7, Microsoft® Windows® Server 2008 Enterprise Edition, and the SAP enhancement package 4 for SAP ERP 6.0. The server accessed the DB2 9.7 database on the storage managed by an IBM System Storage DS4700 disk system.

Results for the x3650 M3 are current as of June 22, 2010. For the latest SAP benchmark results, visit [www.sap.com/benchmark](http://www.sap.com/benchmark).

(1) This benchmark fully complies with the SAP Benchmark Council regulations and has been audited and certified by SAP AG (certification number 2010025). Details can be obtained from IBM and SAP. The benchmark was performed at IBM in Research Triangle Park, NC, USA, by IBM engineers.

(2) Statement of comparison is based on highest-performing system using two Intel Xeon X5680 processors and running SAP enhancement package 4 for SAP ERP 6.0. Configuration of the HP ProLiant DL380 G7 on the two-tier SAP SD standard application benchmark: 2 processors/12 cores/24 threads, Intel Xeon Processor X5680, 3.33GHz, 256KB L2 cache per core, and 12MB L3 cache per processor, 64 GB main memory, Windows Server 2008 Enterprise Edition, SQL Server 2008, SAP enhancement package 4 for SAP ERP 6.0. A result of 5,075 SAP SD benchmark users was achieved. Certification number 2010019.
