

# Lenovo Converged HX2310-E and HX2710-E Appliances Product Guide (withdrawn product)

Lenovo Converged HX Series Nutanix Appliances are designed to help you simplify IT infrastructure, reduce costs, and accelerate time to value. These hyperconverged appliances from Lenovo combine industry-leading hyperconvergence software from Nutanix with Lenovo enterprise platforms that feature Intel Xeon processor E5-2600 v4 product family.

The Lenovo Converged HX2000 Series Express appliances are tailored specifically for various types of workloads for small and medium sized businesses. The HX2000 Series appliances include leading edge Nutanix Xpress software to deliver a simplified, cost effective solution that helps lower total-cost-of-ownership and enables smaller organizations to focus less time on infrastructure management.

The Lenovo Converged HX2000 Series include Lenovo Converged HX2310-E (1U rack-mount) and HX2710-E (2U 4-node [2U4N] rack-mount) appliances that are shown in the following figure.

Figure 1. Lenovo Converged HX2310-E (top) and HX2710-E (bottom) appliances

## Did you know?

The Lenovo Converged HX Series appliances are built on industry-leading Lenovo servers that feature enterprise-class reliability, management, and security.

The Lenovo Converged HX Series appliances deliver the industry's most feature-rich hyperconverged infrastructure to enterprise datacenters, bringing the benefits of web-scale technologies to enterprise applications through enterprise storage, data protection, infrastructure resilience, management and analytics, and security.

## **Key features**

The Lenovo Converged HX Series Nutanix Appliances deliver the industry's most feature-rich hyperconverged infrastructure to enterprise datacenters (shown in the following figure). Nutanix brings the benefits of web-scale technologies to enterprise applications through enterprise storage, data protection, infrastructure resilience, management and analytics, and security.

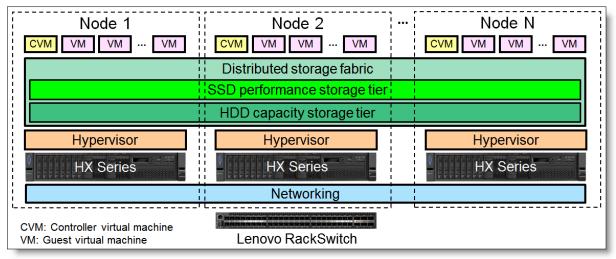

Figure 2. HX Series hyperconverged infrastructure

The Lenovo Converged HX Series appliances offer the following key features:

• Enterprise storage

The Lenovo Converged HX Series Nutanix Appliances deliver enterprise data storage as an ondemand service by employing highly distributed software architecture. The Nutanix Software eliminates the need for traditional SAN and NAS solutions, and delivers a rich set of software-defined services that are entirely VM-centric, including snapshots, high availability, disaster recovery, deduplication and more.

- Inline and post-process compression at the sub-block level increase effective storage capacity by up to four times.
- Redirect-on-write snapshots and writeable clones at the granularity of a single VM increase efficiency.
- Distributed caching of VM data improves performance in multi-reader scenarios, such as VDI with linked clones.
- Inline deduplication in the read cache and post-process deduplication in the capacity tier improve performance and effective capacity.
- Powerful acceleration capabilities such as caching, automatic data tiering and data locality speed storage performance.

• Data protection

The Nutanix Software offers a natively integrated solution for data protection and continuous availability at VM granularity. It gives administrators an affordable range of options to meet the recovery point objectives (RPO) and recovery time objectives (RTO) for different applications.

- Unlimited local backups using VM-centric snapshots and integrated workflows delivering RPO in minutes.
- Natively integrated solution for disaster recovery enables simple VM-centric backup, recovery and replication with application-level consistency.
- Built-in Cloud Connect hybrid cloud technology enables seamless backup of data to public cloud services.
- Metro availability feature provides continuous availability of data across different sites during planned maintenance or disasters through synchronous replication.
- Support for Microsoft Volume Shadow Services (VSS), VMware vStorage API for Data Protection (VADP), and seamless integration with third-party backup providers.
- Infrastructure resilience

The platform for the Lenovo Converged HX Series Nutanix Appliances is fault resistant, with no single point of failure and no bottlenecks. The system uses a shared-nothing architecture, where all data, metadata and services are distributed to all nodes within the cluster, and is built to detect, isolate and recover from failures anywhere in the system. Lenovo hyperconverged appliances deliver always-on operation, and can survive system hardware, software and hypervisor issues and maintain 100% availability to applications and data.

- Intelligent data placement in different physical failure domains, or availability domains, (for example, separate racks or power sources) delivers greater fault tolerance.
- Data and metadata replicated across multiple nodes provide user-defined resilience against hardware failures.
- Multiple copies of data ensure 100% data availability in the event that a Nutanix controller VM is unavailable due to failure or maintenance.
- Automatic integrity checks during reads and silent at-rest error detection for data consistency.
- Management and analytics

The platform for the Lenovo Converged HX Series Nutanix Appliances marries web-scale capabilities with an intuitive user-centric management experience to simplify every aspect of the IT infrastructure lifecycle. Nutanix Prism provides a single pane of glass to monitor and control one or more Nutanix clusters, with simplified workflows and rich automation for common administrative tasks.

- Elegantly simple management framework with intuitive workflows delivers radical simplicity and powerful control to IT management.
- Single pane of glass delivers centralized visibility and management of multiple Nutanix clusters across the world.
- Rich automation and intuitive workflows simplify deployment, provisioning, orchestration and maintenance of Nutanix clusters.
- End-to-end visibility of VMs, nodes and disks and the ability to visually diagnose potential issues gives administrators total infrastructure control.
- Programmatic control of every aspect of cluster management, including deployment, upgrades, data protection, and performance management enables powerful automation.
- Streamlined management for hypervisor and virtual machines on Nutanix.

• Security

Nutanix software combines powerful features, such as two-factor authentication and data-at-rest encryption, with a security development lifecycle that is integrated into product development to help customers meet the most stringent security requirements.

- Security incorporated into every step of the software development process enables verifiably secure software releases.
- Two-step authentication using a client certificate and username/password, along with cluster lockdown, provides protection against unauthorized access.

### **Components and connectors**

The following figure shows the front view of the HX2310-E appliance.

# System specifications

The following table lists the system specifications of the Converged HX2310-E appliance.

| Components            | Specification  |
|-----------------------|--|
| Form factor           | 1U Rack-mount (Machine Type 8693).   |
| Processor             | <ul> <li>Two processors of the Intel Xeon processor E5-2600 v4 product family:</li> <li>Up to 10 cores per processor (2.2 GHz core speeds)</li> <li>Two QPI links up to 8.0 GT/s each per processor</li> <li>Up to 25 MB cache per processor</li> <li>Up to 2133 MHz memory speed</li> </ul> |
| Chipset               | Intel C612.  |
| Memory                | 24 DIMM sockets. Support for 16 GB and 32 GB TruDDR4 2400 MHz RDIMMs.  |
| Memory<br>capacity    | Up to 512 GB with 16x 32 GB RDIMMs.  |
| Memory<br>protection  | ECC and Chipkill.  |
| Drive bays            | 7x 2.5-inch SAS/SATA hot-swap  |
| Storage<br>capacity   | Up to 12 TB (HDD) + 1.6 TB (SSD)   |
| Storage controller    | 1x N2215 (12 Gbps SAS/6 Gbps SATA)   |
| Network<br>interfaces | <ul> <li>Optional dual-port 10 GbE SFP+ (Intel X520) or 10GBASE-T (Intel X550-T2) adapter.</li> <li>4x integrated RJ-45 Gigabit Ethernet 1000BASE-T ports (BCM5719).</li> <li>1x Ethernet (RJ-45) for systems management.</li> </ul>   |
| Boot drive            | 1x Embedded 64 GB SSD (6 Gbps SATA DOM) connected to the onboard PCH SATA controller.  |
| I/O expansion slots   | <ul> <li>Two PCIe slots. The slots are as follows:</li> <li>Slot 1: PCIe 3.0 x16; low profile, half-length (for the 10 GbE network adapter)</li> <li>Slot 4: PCIe 3.0 x8 (dedicated for an internal storage controller)</li> </ul>   |
| Ports                 | <ul> <li>Front: 2x USB 2.0 and 1x DB-15 VGA.</li> <li>Rear: 2x USB 3.0 and 1x DB-15 VGA.</li> </ul>  |
| Cooling               | Calibrated Vectored Cooling with seven redundant hot-swap system fans; two fan zones with N+1 fan redundancy.  |
| Power supply          | Two redundant hot-swap 900 W AC (100 - 240 V) High Efficiency Platinum power supplies.   |
| Video                 | Matrox G200eR2 with 16 MB memory integrated into the IMM2.1. Maximum resolution is 1600x1200 at 75 Hz with 16 M colors.  |
| Hot-swap parts        | SSDs, HDDs, power supplies, and fans.  |
| Systems<br>management | UEFI, Integrated Management Module II (IMM2.1) (based on Renesas SH7758) with Advanced Upgrade, Predictive Failure Analysis, light path diagnostics, Lenovo XClarity, and Nutanix Prism.   |
| Security<br>features  | Power-on password, administrator's password, Trusted Platform Module (TPM) 2.0-ready.  |
| Software              | Nutanix Acropolis: Xpress edition.   |
| Hypervisors           | <ul> <li>Nutanix Acropolis Hypervisor (default factory preload).</li> </ul>  |
|                       | • VMware ESXi 5.5 Update 3, 6.0 Update 1, and 6.0 Update 2 (optional factory preload).   |
|                       | <ul> <li>Optional support for Microsoft Windows Server 2012 R2 Datacenter Edition (Hyper-V)<br/>(field-installable option only).</li> </ul>  |

Table 1. HX2310-E appliance specifications

| Components           | Specification  |
|----------------------|--|
| Hardware<br>warranty | Three-year or five-year customer-replaceable unit and onsite limited warranty with selectable service levels: 9x5 next business day (NBD), 24x7x4, and 24x7x2. |
| Software maintenance | Three-year or five-year software support and subscription (matches the duration of the selected warranty period).  |
| Dimensions           | Height: 43 mm (1.7 in), width: 434 mm (17.1 in), depth: 734 mm (28.9 in)   |
| Weight               | Maximum configuration: 19.3 kg (42.5 lb)   |

The following table lists the system specifications of the Converged HX2710-E appliance.

| HX Series enclosure: 2U Four-node (2U4N) rack-mount.         Processor       Two processors of the Intel Xeon processor E5-2600 v4 product family: <ul> <li>Up to 10 cores per processor (2.2 GHz core speeds)</li> <li>Two QPI links up to 8.0 GT/s each per processor</li> <li>Up to 2133 MHz memory speed</li> </ul> Chipset       Intel C612.         Memory       16 DIMM sockets. Support for 16 GB and 32 GB TruDDR4 2400MHz RDIMMs.         Memory       Up to 512 GB with 16x 32 GB RDIMMs.         capacity       ECC and Chipkill.         protection       FCC and Chipkill.         protection       for the HDD) + 1.6 TB (SSD).         capacity       1x H701-L (6 Gbps SAS/SATA)         Storage       1x H701-L (6 Gbps SAS/SATA)         Storage       1x H701-L (6 Gbps SAS/SATA)         Network       • 2x 1 GbE RJ-45 ports (default; Intel 1350-AM2 mezz card), or 2x 10 GbE SFP+ ports (optional; Intel X520 mezz card), or 2x 10 GbE SFP+ ports (optional; Intel X520 mezz card), or 2x 10 GbE SFP+ ports (optional; Intel X520 mezz card), or 2x 10 GbE SI-45 ports (optional; Intel X50-T2 PCIe adapter)         • 1x Ethernet RJ-45 ports (default; Intel 1350-AM2 mezz card), or 2x 10 GbE SFP+ ports (optional; Intel X520 mezz card), or 2x 10 GbE PCIe adapter)         • 1x Ethernet RJ-45 ports (default; Intel I350-AM2 mezz card), or 2x 10 GbE SFP+ ports (optional; Intel X50 mezz card), or 2x 10 GbE PCIe adapter)         • 1x Ethernet RJ-45 ports (default; Intel I350-AM2 mezz card), or 2x 10 GbE | Components             | Specification  |

## **Factory-integrated models**

Factory-integrated models of the Converged HX Series appliances are configured by using one of the following configuration tools:

- Lenovo Enterprise Solutions Configurator (LESC): http://lesc.lenovo.com
- System x and Cluster Solutions Configurator (x-config): http://lesc.lenovo.com/products/hardware/configurator/worldwide/bhui/asit/

During the configuration process, you are selecting one of the base models first, and then you are adding components (processors, memory, drives, and network adapters) to the selected model according to the output from the Nutanix Sizer tool: http://services.nutanix.com/

**Note:** You are required to engage a Lenovo representative in the project that includes the Lenovo Converged HX Series appliances.

The following table lists the base models of the Lenovo Converged HX2000 Series appliances.

### Table 3. Base models

| Description                | Machine Type-<br>Model |
|----------------------------|------------------------|
| HX2310-E Nutanix Appliance | 8693-ACA               |
| HX2710-E Nutanix Appliance | 8689-ACA               |

The following table lists the default configurations of each appliance.

| Model    | Intel Xeon<br>processor | Memory                         | Storage controller | Drives  | NIC      |
|----------|-------------------------|--------------------------------|--------------------|---|----------|
| HX2310-E | 2x E5-2620 v4           | 128 GB<br>(8x 16 GB<br>RDIMMs) | 1x N2215           | 6x 1 TB 2.5" HDDs<br>1x 480 GB 2.5" SSD<br>1x Embedded 64 GB SSD (hypervisor) | 4x 1 GbE |
| HX2710-E | 2x E5-2620 v4           | 128 GB<br>(8x 16 GB<br>RDIMMs) | 1x H701-L          | 5x 1 TB 2.5" HDDs<br>1x 480 GB 2.5" SSD<br>1x Embedded 64 GB SSD (hypervisor) | 2x 1 GbE |

Table 4. Default configurations

The Lenovo Converged HX2310-E appliances ship with the following items:

- System documentation
- Gen II Universal Slides Kit
- Enterprise 1U Cable Management Arm (CMA)
- Two 2.8 m IEC 320-C13 to C14 rack power cables

The Lenovo Converged HX2710-E appliances ship with the following items:

- System documentation
- Rail kit (enclosure only)
- One 2 m 2x IEC 320-C13 to C14 rack power cable (Y-cable) (enclosure only)

It is possible to perform a hardware upgrade after the initial deployment, such as adding more memory or network adapters, by purchasing the hardware upgrade option listed in the following table.

Table 5. Hardware upgrade option

| Description        | Part<br>number | Quantity |
|--------------------|----------------|----------|
| Nutanix HW Upgrade | 01KT971        | 1        |

**Configuration note:** You should request a quote for the Nutanix HW Upgrade part number from Lenovo and provide additional details on the existing installation and planned upgrade.

### **TopSeller models**

TopSeller models of the Converged HX Series appliances are pre-configured bundles that cannot be upgraded with additional options. TopSeller models are region-specific; that is, each region may define their own models, and not all models are available in every region.

Product availability: HX Series TopSeller models are available only in North America.

**Note:** You are required to engage a Lenovo representative in the project that includes the Lenovo Converged HX Series appliances.

The following table lists the TopSeller models of the Lenovo Converged HX2000 Series appliances.

| Table 6. | TopSeller models |
|----------|------------------|
|----------|------------------|

| Model<br>number | Intel Xeon<br>processor | Memory                         | Storage controller | Drives   | NIC                   | Support |

The currently shipping TopSeller models include the following items:

- System documentation
- Slide Kit G4
- Enterprise 1U Cable Management Arm (CMA)
- Two 2.8 m IEC 320-C13 to C14 rack power cables

## Processors

The Lenovo Converged HX2000 Series appliances ship with two processors. The following table lists the processor options that are available for selection.

Table 7. Processor options

| Description   | Quantity | HX2310-E | HX2710-E |
|---|----------|----------|----------|
| Intel Xeon Processor E5-2609 v4 8C 1.7GHz 20MB Cache 1866MHz 85W  | 2        | Υ        | Y        |
| Intel Xeon Processor E5-2620 v4 8C 2.2GHz 20MB Cache 2133MHz 85W  | 2        | Υ        | Υ        |
| Intel Xeon Processor E5-2630 v4 10C 2.2GHz 25MB Cache 2133MHz 85W | 2        | Υ        | Y        |

### Memory

The Lenovo Converged HX2000 Series appliances support Lenovo TruDDR4 memory. TruDDR memory is selected, tested and tuned to maximize performance and reliability, and it enables extended memory performance features to support memory speeds that exceed industry standards.

The HX2310-E and HX2710-E appliances support up to 16 DIMMs (8 DIMMs per processor). Each processor has four memory channels, and there are two DIMMs per channel.

Note: HX2310-E appliance has 24 DIMM slots, however, it supports only up to 16 DIMMs.

The following memory protection technologies are supported:

- ECC
- Chipkill

The following table lists the memory options that are available for selection.

### Table 8. Memory options

| Selection option | Description  | Quantity | HX2310-E | HX2710-E |
|------------------|--|----------|----------|----------|
| 64 GB            | 16GB TruDDR4 Memory (2Rx4, 1.2V) PC4-19200 CL17 2400MHz LP RDIMM | 4        | Υ        | Υ        |
| 128 GB           | 16GB TruDDR4 Memory (2Rx4, 1.2V) PC4-19200 CL17 2400MHz LP RDIMM | 8        | Υ        | Υ        |
| 256 GB           | 32GB TruDDR4 Memory (2Rx4, 1.2V) PC4-19200 CL17 2400MHz LP RDIMM | 8        | Y        | Υ        |
| 512 GB           | 32GB TruDDR4 Memory (2Rx4, 1.2V) PC4-19200 CL17 2400MHz LP RDIMM | 16       | Υ        | Y        |

The following table lists supported memory configurations and maximum operating speeds for the HX2000 Series appliances.

|                                      |   | Maximum memory speed                       |  |  |
|--------------------------------------|---|--|--|--|
| Memory DIMMs per<br>capacity channel |   | 1866 MHz memory controller<br>(E5-2609 v4) | 2133 MHz memory controller<br>(E5-2620 v4, E5-2630 v4) |  |
| 64 GB                                | 1 | 1866 MHz                                   | 2133 MHz   |  |
| 128 GB                               | 1 | 1866 MHz                                   | 2133 MHz   |  |
| 256 GB                               | 1 | 1866 MHz                                   | 2133 MHz   |  |
| 512 GB                               | 2 | 1866 MHz                                   | 2133 MHz   |  |

Table 9. HX2000 Series maximum memory speeds

## Internal storage

The Lenovo Converged HX2000 Series appliances support the internal drive bay configurations that are listed in the following table.

Table 10. Internal drive bay configurations

| Model    | Hot-swap front drive bays (main storage)                     |                    | Hypervisor boot drive                      |                        |  |
|----------|--|--------------------|--|------------------------|--|
|          | Quantity, form factor, drive types                           | Storage controller | Quantity, form factor,<br>drive type       | Storage<br>controller  |  |
| HX2310-E | 7x 2.5-inch:<br>6x NL SATA HDDs + 1x SATA SSDs               | 1x N2215           | 1x Embedded 64 GB SSD<br>(6 Gbps SATA DOM) | Onboard<br>6 Gbps SATA |  |

| 1600 GB          | Intel S3610 1.6TB Enterprise Mainstream SATA G3HS 2.5" SSD | 1        | Υ        | Y        |

### **Network connectivity**

The Lenovo Converged HX2310-E appliances provide four-port 1 GbE network connectivity. The onboard 1 GbE network interface controller (NIC) that is based on the Broadcom BCM5719 chip provides four 10/100/1000 Mb Ethernet ports with RJ-45 connectors. Optionally, two-port 10 GbE network connectivity can be configured for the HX2310-E by selecting the Intel X520 adapter that provides two 10 GbE ports with SFP+ connectors or Intel X550-T2 adapter that provides two 10 GbE ports with RJ-45 connectors.

The Lenovo Converged HX2710-E appliances provide two-port 1 GbE or 10 GbE network connectivity. The 1 GbE mezzanine card that is based on the Intel I350-AM2 network interface controller (NIC) chip is selected by default and provides two 10/100/1000 Mb Ethernet ports with RJ-45 connectors.

The optional Intel X520 10 GbE mezzanine card that is based on the Intel 82599 NIC chip can be configured for the HX2710-E instead of the 1 GbE mezzanine card to provide two 10 GbE ports with SFP+ connectors. Alternatively, two-port 10 GbE network connectivity can be configured for the HX2710-E by selecting the Intel X550-T2 PCIe adapter that provides two 10 GbE ports with RJ-45 connectors.

The following table lists the 10 GbE network adapter options that are available for selection.

**Note:** The Intel X520 and X550-T2 adapters cannot be intermixed in the same appliance, that is, either X520 or X550-T2 adapter can be selected for the appliance, but not both adapter types.

|  | Quantity<br>(min / max) | HX2310-E | HX2710-E |
|--|-------------------------|----------|----------|
| I350AM2 OCP Mezz 2 Port 1GbE RJ-45                           | 0 / 1                   | Ν        | Υ        |
| Intel X520 Dual Port 10GbE SFP+ OCP Mezz (SFP+ connectors)   | 0 / 1                   | Ν        | Y        |
| Intel X520 Dual Port 10GbE SFP+ Adapter (SFP+ connectors)    | 0 / 1                   | Υ        | Ν        |
| Intel X550-T2 Dual Port 10GBASE-T Adapter (RJ-45 connectors) | 0 / 1                   | Υ        | Y        |

Table 14. Network adapter options

The following table summarizes features of the 10 GbE network adapters used in the Lenovo Converged HX2000 Series appliances.

Table 15. 10 GbE network adapter features and specifications summary

| Feature         | 1350             | X520                              | X550-T2                   |
|-----------------|------------------|-----------------------------------|---------------------------|
| Form factor     | OCP Mezzanine    | PCIe low profile or OCP Mezzanine | PCIe low profile          |
| Controller chip | Intel I350-AM2   | Intel 82559                       | Intel X550                |
| Host interface  | PCIe 2.0 x8      | PCle 2.0 x8                       | PCle 3.0 x4               |
| Port interface  | 1 GbE            | 10 GbE                            | 10 GbE                    |
| Number of ports | 2                | 2                                 | 2                         |
| Port connector  | RJ-45            | SFP+                              | RJ-45                     |
| Port speeds     | 10/100/1000 Mbps | 10 Gbps                           | 100 Mbps, 1 Gbps, 10 Gbps |

The SFP+ adapters require SFP+ transceivers or direct-attach copper (DAC) cables that must be ordered separately (two SFP+ transceivers or DAC cables per adapter). The following table lists supported SFP+ transceiver and cable options.

Table 16. SFP+ transceivers and cable options

| Description                                    | Part<br>number | Feature<br>code | Quantity<br>per adapter |  |  |  |
|--|----------------|-----------------|-------------------------|--|--|--|
| SFP+ transceivers - 10 GbE                     |                |                 |                         |  |  |  |
| Lenovo 10GBASE-SR SFP+ Transceiver             | 46C3447        | 5053            | 2                       |  |  |  |

## **Hypervisors**

The Lenovo Converged HX2000 Series appliances support the following hypervisors:

- Nutanix Acropolis Hypervisor (AHV)
- VMware ESXi 5.5 Update 3
- VMware ESXi 6.0 Update 1
- VMware ESXi 6.0 Update 2
- Microsoft Windows Server 2012 R2 DataCenter Edition (Hyper-V)

### Notes:

- The HX Series appliances ship with Nutanix AHV (default) or VMware ESXi (optional) preloaded.
- Microsoft Hyper-V is supported as a field-installable option only.

## Software

The Lenovo Converged HX2000 Series appliances ship with Nutanix Xpress Software edition, which offers a rich set of features for cluster of up to four nodes (three nodes minimum are required per cluster).

The following table lists features that are available in the Nutanix Xpress software edition.

| Feature  | Nutanix Xpress software edition |
|--|---------------------------------|
| Enterprise storage                                   |                                 |
| Cluster size   | 4 nodes max                     |
| Online cluster grow/shrink                           | Yes                             |
| Heterogeneous clusters                               | No                              |
| VM-centric snapshots and clones                      | Yes                             |
| Volume groups  | No                              |
| Data tiering   | Yes                             |
| Inline compression                                   | Yes                             |
| Inline performance deduplication                     | Yes                             |
| MapReduce compression                                | Yes                             |
| MapReduce deduplication                              | Yes                             |
| Erasure Coding (EC-X)                                | No                              |
| VM Flash Mode (Pin to SSD)                           | Yes                             |
| Infrastructure resilience                            |                                 |
| Data path redundancy                                 | Yes                             |
| Redundancy factor                                    | 2 (Fixed)                       |
| Availability domains                                 | No                              |
| Data protection                                      |                                 |
| Asynchronous replication and disaster recovery (DR)  | Yes                             |
| VSS integration                                      | Yes                             |
| Time Stream (Converged local backups)                | Yes                             |
| Cloud Connect (Backup to public clouds)              | Yes                             |
| Multiple site DR (many to many)                      | No                              |
| Metro availability                                   | Yes                             |
| Synchronous replication and disaster recovery        | Yes                             |
| Security   |                                 |
| Client authentication                                | Yes                             |
| Cluster lockdown                                     | No                              |
| Data-at-rest encryption                              | No                              |
| Management and analytics                             | · · ·                           |
| Prism Starter (Single- and multi-cluster management) | 2 sites max                     |
| Pulse (Automated service agent)                      | Yes                             |
| Cluster health                                       | Yes                             |
| One-click upgrades (Nutanix OS and Hypervisor)       | Yes                             |
| Rest APIs  | No                              |

| Feature                       | Nutanix Xpress software edition |  |  |
|-------------------------------|---------------------------------|--|--|
| Virtualization                |                                 |  |  |
| VMware vSphere support        | Yes                             |  |  |
| Microsoft Hyper-V support     | Yes                             |  |  |
| Built-in Acropolis Hypervisor | Yes                             |  |  |
| VM operations                 | Yes                             |  |  |
| Intelligent VM placement      | Yes                             |  |  |
| Virtual network configuration | Yes                             |  |  |
| Host profiles                 | Yes                             |  |  |
| VM high availability          | Yes                             |  |  |

## Systems management

The Lenovo Converged HX2310-E appliances support the following systems management tools:

- Integrated Management Module
- Light path diagnostics
- Lenovo XClarity
- Nutanix Prism
- Lenovo XClarity Energy Manager

The Lenovo Converged HX2710-E appliances support the following systems management tools:

- ThinkServer Management Module
- Lenovo XClarity
- Nutanix Prism

### Integrated Management Module (HX2310-E appliances)

The Lenovo Converged HX2310-E appliances contain Integrated Management Module II (IMM2.1), which provides advanced service-processor control, monitoring, and alerting functions. If an environmental condition exceeds a threshold or if a system component fails, the IMM2 lights LEDs to help you diagnose the problem, records the error in the event log, and alerts you to the problem. The Integrated Management Module Advanced Upgrade comes standard with the appliances, and it provides a virtual presence for remote management capabilities of the appliances.

The IMM provides remote appliance management through industry-standard interfaces:

- Intelligent Platform Management Interface (IPMI) Version 2.0
- Simple Network Management Protocol (SNMP) Version 3
- Common Information Model (CIM)
- Web browser

The remote presence feature provides the following functions:

- Remotely viewing video with graphics resolutions up to 1600x1200 at 75 Hz with up to 23 bits per pixel colors, regardless of the system state
- · Remotely accessing the appliance using the keyboard and mouse from a remote client
- Mapping the CD or DVD drive, diskette drive, and USB flash drive on a remote client, and mapping ISO and diskette image files as virtual drives that are available for use by the appliance
- Uploading a diskette image to the IMM memory and mapping it to the appliance as a virtual drive

### ThinkServer Management Module (HX2710-E appliances)

The Lenovo Converged HX2710-E appliances have an integrated ThinkServer Management Module (TMM) baseboard management controller (BMC) for configuration, systems management, and remote control.

The remote presence (remote KVM and media) is a standard function of the TMM. The remote presence feature provides the following functions:

- Remotely viewing video with graphics resolutions up to 1024 x 768, regardless of the system state
- Remotely accessing the server, using the keyboard and mouse from a remote client
- Mapping the CD or DVD drive, diskette drive, and USB flash drive on a remote client, and mapping ISO and diskette image files as virtual drives that are available for use by the server
- Uploading a diskette image to the TMM memory and mapping it to the server as a virtual drive

The HX2710-E appliances also support IPMI 2.0 for out-of-band management through the dedicated RJ-45 systems management port. Supported interfaces include:

• Command-line interface (IPMI Shell)

The command-line interface provides direct access to server management functions through the IPMI 2.0 protocol. Use the command-line interface to issue commands to control the server power, view system information, and identify the server. You can also save one or more commands as a text file and run the file as a script.

• Serial over LAN

Establish a Serial over LAN (SOL) connection to manage servers from a remote location. You can remotely view and change the UEFI settings, restart the server, identify the server, and perform other management functions. Any standard Telnet client application can access the SOL connection.

### Light path diagnostics (HX2310-E appliances)

The Lenovo Converged HX2310-E appliances include basic light path diagnostics, which includes system LEDs on the front of the appliance and LEDs near the monitored components (for example, the DIMM error LED on the system board).

The Lenovo Converged HX2310-E appliances also include a next-gen light path diagnostics LCD display panel. With LCD display, customers have quick access to system status, firmware, network, and health information.

### Lenovo XClarity

Lenovo XClarity is a centralized systems management solution that helps administrators deliver infrastructure faster. This solution integrates easily with Lenovo System x M5 and X6 rack servers, Converged HX Series appliances, and Flex System, providing automated agent-less discovery, monitoring, firmware updates, configuration management, and bare metal deployment of operating systems and hypervisors across multiple systems.

Lenovo XClarity is an optional software component for the Lenovo Converged HX Series appliances which can be used to manage firmware upgrades outside of the Nutanix Prism software.

### Notes:

- Lenovo XClarity Administrator can be downloaded and used at no charge to discover and monitor HX Series appliances and manage firmware upgrades for them.
- An optional Lenovo XClarity Pro subscription license available in the configurator provides software support for XClarity Administrator and XClarity Integrators for the duration of the selected warranty period. If Lenovo XClarity software support is required, the XClarity Pro option must be selected.
- For the HX2710-E appliances, Lenovo XClarity only supports discovery, inventory, and monitoring. Other functions, including firmware updates and secure connectivity, are not supported.

Lenovo XClarity Administrator is available from Lenovo at no charge, and it offers the following features:

- · Auto-discovery, inventory, and monitoring of Converged HX Series appliances
- · Firmware updates and compliance enforcement
- External alerts and notifications via SNMP traps, syslog remote logging, and e-mail
- · Secure connections to managed endpoints
- NIST 800-131A or FIPS 140-2 compliant cryptographic standards between the management solution and managed endpoints
- Integration into existing higher level management systems such as cloud automation and orchestration tools through REST APIs, providing extensive external visibility and control over hardware resources
- An intuitive, easy-to-use GUI
- Scripting support with Windows PowerShell, providing command-line visibility and control over hardware resources

In addition, Lenovo XClarity Administrator offers two software plug-in modules (Lenovo XClarity Integrators) at no charge:

- Lenovo XClarity Integrator for Microsoft System Center
- Lenovo XClarity Integrator for VMware vCenter

Lenovo XClarity Integrators allow administrators to manage physical infrastructure from leading external virtualization management software tools from Microsoft and VMware.

Lenovo XClarity Integrators offer the following additional features:

- Ability to discover, manage, and monitor Lenovo server hardware from VMware vCenter or Microsoft System Center
- Deployment of firmware updates to Converged HX Series appliances from the virtualization management tool
- Non-disruptive server maintenance in clustered environments that reduces workload downtime by dynamically migrating workloads from affected hosts during rolling server updates or reboots
- Greater service level uptime and assurance in clustered environments during unplanned hardware events by dynamically triggering workload migration from impacted hosts when impending hardware failures are predicted

### **Nutanix Prism**

Nutanix Prism gives administrators a simple and elegant way to manage virtual environments. Powered by advanced data analytics and heuristics, Prism simplifies and streamlines common workflows within a datacenter eliminating the need to have disparate management solutions.

Nutanix Prism is a part of the Nutanix software preloaded on the appliances, and it includes the following components:

- Prism Starter: Provides ability to configure, manage, and monitor a Nutanix cluster and centralized management of multiple local and remote Nutanix clusters.
- Prism Pro (Optional software license): Enables efficiency evaluation, capacity planning, expansion recommendations, custom dashboards, and advanced search capabilities.

The Prism Pro software license is purchased separately by using one of the software license options listed in the following table.

#### Table 18. Prism Pro software license options

| Description                        | Part    | Owentites |
|------------------------------------|---------|-----------|
| Description                        | number  | Quantity  |
| Nutanix Prism Pro with 1Yr Support | 01GU988 | 1         |
| Nutanix Prism Pro with 2Yr Support | 01GU989 | 1         |
| Nutanix Prism Pro with 3Yr Support | 01GU990 | 1         |
| Nutanix Prism Pro with 4Yr Support | 01GU991 | 1         |
| Nutanix Prism Pro with 5Yr Support | 01GU992 | 1         |

**Configuration note:** You should request a quote for the selected Prism Pro part number from Lenovo and provide additional details on the existing installation.

Nutanix Prism offers the following features:

- Single point of control
  - Accelerates enterprise-wide deployment
  - Manages capacity centrally
  - Adds nodes in minutes
  - Supports non-disruptive software upgrades with zero downtime
  - Integrates with REST APIs and PowerShell
- Monitoring and alerting
  - Tracks infrastructure utilization (storage, processor, memory)
  - Centrally monitors multiple clusters across multiple sites
  - Monitors per-VM performance and resource usage
  - · Checks system health
  - Generates alerts and notifications
  - Integrated data protection
    - Offers customizable RPO/RTO and retention policies
    - Supports configurable per-VM replication (1:1, 1:many and many:1)
    - Provides efficient VM recovery
    - Deploys affordable DR and backup to the cloud
- Diagnostics and troubleshooting
  - Provides time-based historical views of VM activity
  - Performs proactive alert analysis
  - · Correlates alerts and events to quickly diagnose issues
  - Generates actionable alerts and reduces resolution times
  - · Analyzes trending patterns for accurate capacity planning

### Lenovo XClarity Energy Manager (HX2310-E appliances)

Lenovo XClarity Energy Manager provides a stand-alone, web-based agent-less power management console that provides real time data and enables you to observe, plan and manage power and cooling for Lenovo servers. Using built-in intelligence, it identifies server power consumption trends and ideal power settings and performs cooling analysis so that you can define and optimize power-saving policies.

Lenovo XClarity Energy Manager offers the following capabilities:

- Reports vital server information, such as power, temperature and resource utilization
- · Monitors inlet temperature to locate hot spots, reducing the risk of data or device damage
- Provides finely-grained controls to limit platform power in compliance with IT policy
- Generates alerts when a user-defined threshold is reached

Lenovo XClarity Energy Manager is an optional, separately orderable software component for the Lenovo Converged HX Series appliances that is licensed on a per managed node basis; that is, each managed system requires a license.

The following table lists the geo-specific Lenovo XClarity Energy Manager software license options.

Note: Lenovo XClarity Energy Manager does not support HX2710-E appliances.

 Table 19. Lenovo XClarity Energy Manager software options

| Description  | Part number<br>(NA, AP, Japan)* | Part number<br>(EMEA, LA)** |
|--|---------------------------------|-----------------------------|
| Lenovo XClarity Energy Manager, 1 Node w/ 1 Yr S&S   | 01DA225                         | 01DA228                     |
| Lenovo XClarity Energy Manager, 5 Nodes w/ 1 Yr S&S  | 01DA226                         | 01DA229                     |
| Lenovo XClarity Energy Manager, 50 Nodes w/ 1 Yr S&S | 01DA227                         | 01DA230                     |

\* NA = North America; AP = Asia Pacific

\*\* EMEA = Europe, Middle East, Africa; LA = Latin America

## **Physical specifications**

The Lenovo Converged HX2310-E appliances have the following dimensions and weight (approximate):

- Height: 43 mm (1.7 in.)
- Width: 434 mm (17.1 in.)
- Depth: 734 mm (28.9 in.)
- Weight (maximum): 19.3 kg (42.5 lb)

The Lenovo Converged HX2710-E appliances have the following dimensions and weight (approximate):

- Enclosure
  - Height: 87 mm (3.4 in.)
  - Width: 442 mm (17.4 in.)
  - Depth: 835 mm (32.9 in.)
  - Weight (maximum): 36.9 kg (81 lb)
- Node
  - Height: 41 mm (1.6 in.)
  - Width: 216 mm (8.5 in.)
  - Depth: 659 mm (25.9 in.)
  - Weight (maximum): 6.2 kg (13.6 lb)

## **Operating environment**

The Lenovo Converged HX2310-E appliances are supported in the following environment:

- Air temperature:
  - System on: 5 °C to 40 °C (41 °F to 104 °F); altitude: 0 to 950 m (3,117 ft); decrease the maximum system temperature by 1 °C for every 175-m increase in altitude above 950 m.
  - System off: 5 °C to 45 °C (41 °F to 113 °F)
  - Shipment: -40 °C to +60 °C (-40 °F to 140 °F) at up to 10,700 m (35,105 ft)
- Maximum altitude: 3,050 m (10,000 ft) at 5 °C to 28 °C (41 °F to 82 °F)
- Humidity:
  - System on: 8% to 85%, maximum dew point 24 °C, maximum rate of change 5 °C/hr
  - System off: 8% to 85%, maximum dew point 27 °C
- Design to ASHRAE Class A3, ambient of 36 °C to 40 °C (96.8 °F to 104 °F), with relaxed support:
  - Supports cloud-like workload with no performance degradation acceptable (Turbo-Off).
     Under no circumstance can any combination of worst-case workload and configuration result
    - in system shutdown or design exposure at 40 °C.
    - The worst-case workload (like Linpack, Turbo-On) might have performance degradation.
- Electrical:
  - 100 to 127 (nominal) V AC; 50 Hz or 60 Hz; 10.0 A
  - 200 to 240 (nominal) V AC; 50 Hz or 60 Hz; 5.0 A
  - Input kilovolt-amperes (kVA) (approximately): 1.188 kVA
- BTU output (maximum): 4053 Btu/hr (1188 watts)
- Noise level:
  - 6.6 bels (operating)
  - 6.4 bels (idle)

The Lenovo Converged HX2710-E appliances are supported in the following environment:

- Air temperature:
  - System on: 10 °C to 35 °C (50 °F to 95 °F); altitude: 0 to 950 m (3,117 ft); decrease the maximum system temperature by 1 °C for every 300-m increase in altitude above 950 m.
  - System off: 5 °C to 45 °C (41 °F to 113 °F)
  - Shipment: -40 °C to +60 °C (-40 °F to 140 °F) at up to 10,700 m (35,105 ft)
- Maximum altitude: 3,050 m (10,000 ft) at 10 °C to 28 °C (50 °F to 82 °F)
- Humidity:
  - System on: 20% to 80%, maximum dew point 21 °C (70 °F), maximum rate of change 20 °C/hr
  - System off: 8% to 80%, maximum dew point 27 °C (80.6°F)
  - Shipment: 5% to 100%, maximum dew point 29 °C (84.2°F)
- Electrical:
  - 200 to 240 (nominal) V AC; 50 Hz or 60 Hz
  - Input kilovolt-amperes (kVA) (approximately): 1.544 kVA
- BTU output (maximum): 6051 Btu/hr (1773 watts)
- Noise level:
  - 6.8 bels (operating)
  - 6.2 bels (idle)

## **Regulatory compliance**

The Lenovo Converged HX2000 Series appliances conform to the following regulations:

- AS/NZS CISPR 22, Class A (Australia/New Zealand)
- BSMI CNS 13438, Class A; CNS 14336 (Taiwan)
- CCC GB 4943.1, GB 17625.1, GB 9254 Class A (China)
- CE Mark (European Union)
- CISPR 22, Class A
- EAC (Russia)
- EN 55022, Class A
- EN 55024
- EN/IEC 61000-3-2
- EN/IEC 61000-3-3
- EN/IEC/CSA/UL 60950-1
- Energy Star 2.0
- FCC Part 15, Class A (United States)
- GS/TUV (Germany)
- ICES-003/NMB-03, Class A (Canada)
- MSIP (Korea)
- NOM-019 (Mexico)
- Reduction of Hazardous Substances (ROHS)
- TUV S (Argentina)
- VCCI, Class A (Japan)

### Hardware warranty

The Lenovo Converged HX2000 Series appliances can be configured with a three-year or five-year hardware warranty and software support with standard call center support and various levels of coverage with a well-defined scope of services, including service hours, response time, term of service, and service agreement terms and conditions.

The Lenovo local support centers perform problem determination and resolution for hardware-related issues and escalate to Nutanix, on behalf of the customer, for software-related problem determination. Nutanix will contact the customer and will own the software-related problem resolution until closure.

**Note:** Lenovo warranty service coverage levels are region-specific. Not all warranty service levels are available in every region.

The following table explains warranty service definitions in more detail.

| Term                             | Description  |
|----------------------------------|--|
| Onsite<br>Service                | If a problem with your product cannot be resolved via telephone, a Service Technician will be dispatched to arrive at your location.   |
| Parts<br>Delivered               | If a problem with your product cannot be resolved via telephone and a CRU part is required, Lenovo will send a replacement CRU to arrive at your location. If a problem with your product cannot be resolved via telephone and a FRU part is required, a Service Technician will be dispatched to arrive at your location. |
| Technician<br>Installed<br>Parts | If a problem with your product cannot be resolved via telephone, a Service Technician will be dispatched to arrive at your location.   |
| Hours of coverage                | <ul> <li>9x5: 9 hours per day, 5 days per week, during normal business hours, excluding local public<br/>and national holidays</li> </ul>  |
|                                  | <ul> <li>24x7: 24 hours per day, 7 days per week, 365 days per year.</li> </ul>  |

#### Table 20. Warranty service definitions

| Term | Description  |
|------|--|
|      | 2 hours, 4 hours, or Next Business Day: The time period from when the telephone based troubleshooting is completed and logged, to the delivery of the CRU or arrival of a Service Technician and part at the Customer's location for repair. |
|      | 6 hours: The time period between the service request registration in Lenovo's call management system and the restoration of the product to conformance with its specification by a Service Technician.                                       |

In general, the following Lenovo warranty service levels are available for the Converged HX Series appliances:

- Three or five years of 9x5 or 24x7 service coverage
- Parts delivered or technician installed parts from next business day to 4 or 2 hours
- Committed Service Repair Committed Service Repair (CSR) enhances the level of Warranty Service Upgrade or Post Warranty/Maintenance Service offering associated with the selected systems. Offerings vary and are available in select regions.
  - Priority handling to meet defined time frames to restore the failing machine to good working condition
  - 24x7x6 committed repair: Service performed 24 hours per day, 7 days per week, within 6 hours
- YourDrive YourData

Lenovo's YourDrive YourData service is a multi-drive retention offering that ensures your data is always under your control, regardless of the number of drives that are installed in your Lenovo server. In the unlikely event of a drive failure, you retain possession of your drive while Lenovo replaces the failed drive part. Your data stays safely on your premises, in your hands. The YourDrive YourData service can be purchased in convenient bundles with Lenovo warranty upgrades and extensions.

### Software maintenance

The Lenovo Converged HX2000 Series appliances include a three-year or five-year software support and subscription (matches the duration of the selected hardware warranty period) that entitles you to submit service requests to troubleshoot Nutanix software issues and receive code updates, including fixes, patches, and new software releases.

The Lenovo local support centers perform problem determination and resolution for hardware-related issues and escalate to Nutanix, on behalf of the customer, for software-related problem determination. Nutanix will contact the customer and will own the software-related problem resolution until closure.

Software support that is provided by Nutanix includes 24x7 phone and web coverage with the following target response times (priorities are assigned by Nutanix based on the impact on productivity):

- Priority 1 (Emergency: Productivity halted): 2 hours
- Priority 2 (Critical: Significant impact on productivity): 4 hours
- Priority 3 (Normal: Minimal impact on productivity): 8 hours (by next business day)

## **Ethernet LAN switches**

The following table lists the Ethernet LAN switches that are offered by Lenovo that can be used in Lenovo Converged HX Series solutions.

### Table 21. Ethernet LAN switches

| Description  | Part<br>number | Feature<br>code |  |
|--|----------------|-----------------|--|
| 1 Gb Ethernet switches (IPMI management and 1 GbE host connectivity)                           |                |                 |  |
| Lenovo RackSwitch G7028 (Rear to Front)  | 7159BAX        | AT09            |  |
| Lenovo RackSwitch G7052 (Rear to Front)  | 7159CAX        | AT0A            |  |
| Lenovo RackSwitch G8052 (Rear to Front)  | 7159G52        | ASY2            |  |
| 10 Gb Ethernet switches (10 GbE host connectivity)   |                |                 |  |
| Lenovo ThinkSystem NE1032 RackSwitch (Rear to Front)   | 7159A1X        | AU3A            |  |
| Lenovo ThinkSystem NE1032T RackSwitch (Rear to Front)  | 7159B1X        | AU38            |  |
| Lenovo ThinkSystem NE1072T RackSwitch (Rear to Front)  | 7159C1X        | AU36            |  |
| Lenovo RackSwitch G8124E (Rear to Front)   | 7159BR6        | AT0B            |  |
| Lenovo RackSwitch G8272 (Rear to Front)  | 7159CRW        | ASRD            |  |
| Lenovo RackSwitch G8296 (Rear to Front)  | 7159GR6        | ASVM            |  |
| 40 Gb Ethernet switches (40 GbE aggregation layer; 10 GbE breakout host connectivity)          |                |                 |  |
| Lenovo RackSwitch G8332 (Rear to Front)  | 7159BRX        | ASY4            |  |
| 100 Gb Ethernet switches (40 GbE/100 GbE aggregation layer; 10 GbE breakout host connectivity) |                |                 |  |
| Lenovo ThinkSystem NE10032 RackSwitch (Rear to Front)  | 7159D1X        | AV17            |  |

For more information, see the list of Product Guides in the Top-of-rack Switches category: http://lenovopress.com/servers/options/switches

## **Rack cabinets**

The following table lists the rack cabinets that are offered by Lenovo that can be used in Lenovo Converged HX Series solutions.

### Table 22. Rack cabinets

| Description   | Part<br>number | Feature<br>code |
|---|----------------|-----------------|
| 25U S2 Standard Rack (1000 mm deep; 2 sidewall compartments)              | 93072RX        | 1042            |
| 25U Static S2 Standard Rack (1000 mm deep; 2 sidewall compartments)       | 93072PX        | 6690            |
| 42U S2 Standard Rack (1000 mm deep; 6 sidewall compartments)              | 93074RX        | 1043            |
| 42U 1100mm Enterprise V2 Dynamic Rack (6 sidewall compartments)           | 93634PX        | A1RC            |
| 42U 1100mm Enterprise V2 Dynamic Expansion Rack (6 sidewall compartments) | 93634EX        | A1RD            |
| 42U 1200mm Deep Dynamic Rack (6 sidewall compartments)                    | 93604PX        | 7649            |
| 42U 1200mm Deep Static Rack (6 sidewall compartments)                     | 93614PX        | 7651            |
| 42U Enterprise Rack (1105 mm deep; 4 sidewall compartments)               | 93084PX        | 5621            |
| 42U Enterprise Expansion Rack (1105 mm deep; 4 sidewall compartments)     | 93084EX        | 5622            |

For more information, see the list of Product Guides in the Rack Cabinets category: http://lenovopress.com/servers/options/racks

## **Power distribution units**

The following table lists the power distribution units (PDUs) that are offered by Lenovo that can be used in Lenovo Converged HX Series solutions.

### Table 23. Power distribution units

| Description   | Part<br>number | Feature<br>code |
|---|----------------|-----------------|
| 0U Basic PDUs   |                |                 |
| 0U 36 C13/6 C19 24A/200-240V 1 Phase PDU with NEMA L6-30P line cord               | 00YJ776        | ATZY            |
| 0U 36 C13/6 C19 32A/200-240V 1 Phase PDU with IEC60309 332P6 line cord            | 00YJ777        | ATZZ            |
| 0U 21 C13/12 C19 32A/200-240V/346-415V 3 Phase PDU with IEC60309 532P6 cord       | 00YJ778        | AU00            |

## Uninterruptible power supply units

The following table lists the uninterruptible power supply (UPS) units that are offered by Lenovo that can be used in Lenovo Converged HX Series solutions.

Table 24. Uninterruptible power supply units

| Description   | Part<br>number | Feature<br>code |
|---|----------------|-----------------|
| RT1.5kVA 2U Rack or Tower UPS (100-125VAC) (8x NEMA 5-15R 12A outlets)              | 55941AX        | A53S            |
| RT1.5kVA 2U Rack or Tower UPS (200-240VAC) (8x IEC 320 C13 10A outlets)             | 55941KX        | A53T            |
| RT2.2kVA 2U Rack or Tower UPS (100-125VAC) (8x NEMA 5-20R 16A outlets)              | 55942AX        | A53U            |
| RT2.2kVA 2U Rack or Tower UPS (200-240VAC) (8x IEC 320 C13 10A, 1x C19 16A outlets) | 55942KX        | A53V            |
| RT3kVA 2U Rack or Tower UPS (100-125VAC) (6x NEMA 5-20R 16A, 1x L5-30R 24A outlets) | 55943AX        | A53W            |
| RT3kVA 2U Rack or Tower UPS (200-240VAC) (8x IEC 320 C13 10A, 1x C19 16A outlets)   | 55943KX        | A53X            |
| RT5kVA 3U Rack or Tower UPS (200-240VAC) (8x IEC 320 C13 10A, 2x C19 16A outlets)   | 55945KX        | A540            |
| RT6kVA 3U Rack or Tower UPS (200-240VAC) (8x IEC 320 C13 10A, 2x C19 16A outlets)   | 55946KX        | A541            |
| RT8kVA 6U Rack or Tower UPS (200-240VAC) (4x IEC 320-C19 16A outlets)               | 55948KX        | A543            |
| RT11kVA 6U Rack or Tower UPS (200-240VAC) (4x IEC 320-C19 16A outlets)              | 55949KX        | A544            |
| RT8kVA 6U 3:1 Phase Rack or Tower UPS (380-415VAC) (4x IEC 320-C19 16A outlets)     | 55948PX        | A546            |
| RT11kVA 6U 3:1 Phase Rack or Tower UPS (380-415VAC) (4x IEC 320-C19 16A outlets)    | 55949PX        | A547            |

## **Lenovo Financial Services**

Lenovo Financial Services reinforces Lenovo's commitment to deliver pioneering products and services that are recognized for their quality, excellence, and trustworthiness. Lenovo Financial Services offers financing solutions and services that complement your technology solution anywhere in the world.

We are dedicated to delivering a positive finance experience for customers like you who want to maximize your purchase power by obtaining the technology you need today, protect against technology obsolescence, and preserve your capital for other uses.

We work with businesses, non-profit organizations, governments and educational institutions to finance their entire technology solution. We focus on making it easy to do business with us. Our highly experienced team of finance professionals operates in a work culture that emphasizes the importance of providing outstanding customer service. Our systems, processes and flexible policies support our goal of providing customers with a positive experience.

We finance your entire solution. Unlike others, we allow you to bundle everything you need from hardware and software to service contracts, installation costs, training fees, and sales tax. If you decide weeks or months later to add to your solution, we can consolidate everything into a single invoice.

Our Premier Client services provide large accounts with special handling services to ensure these complex transactions are serviced properly. As a premier client, you have a dedicated finance specialist who manages your account through its life, from first invoice through asset return or purchase. This specialist develops an in-depth understanding of your invoice and payment requirements. For you, this dedication provides a high-quality, easy, and positive financing experience.

For your region specific offers please ask your Lenovo sales representative or your technology provider about the use of Lenovo Financial Services. For more information, see the following Lenovo website: http://www.lenovofs.com
