

Lenovo ThinkSystem DM7000H Unified Hybrid Storage Array

Product Guide (withdrawn product)

Lenovo ThinkSystem DM7000H is a scalable, unified, hybrid storage system that is designed to provide high performance, simplicity, capacity, security, and high availability for large enterprises. Powered by the ONTAP software, ThinkSystem DM7000H delivers enterprise-class storage management capabilities with a wide choice of host connectivity options, flexible drive configurations, and enhanced data management features. The ThinkSystem DM7000H is a perfect fit for a wide range of enterprise workloads, including big data and analytics, artificial intelligence, engineering and design, hybrid clouds, and other storage I/O-intensive applications.

ThinkSystem DM7000H models are 3U rack-mount controller enclosures that include two controllers, and 256 GB RAM and 16 GB battery-backed NVRAM (128 GB RAM and 8 GB NVRAM per controller). Universal 1/10 GbE NAS/iSCSI or 4/8/16 Gb Fibre Channel (FC) ports and 1/10 GbE RJ-45 ports provide base host connectivity, with an option for additional 1/10 GbE, 40 GbE NAS/iSCSI, or 8/16/32 Gb FC connections with the adapter cards.

A single ThinkSystem DM7000H Storage Array scales up to 480 drives with the attachment of Lenovo ThinkSystem DM240S 2U24 SFF, DM120S 2U12, and DM600S 4U60 LFF Expansion Enclosures. It also offers flexible drive configurations with the choice of 2.5-inch (SFF) and 3.5-inch (LFF) form factors, 10 K rpm SAS and 7.2 K rpm NL SAS hard disk drives (HDDs), and SAS solid-state drives (SSDs).

Figure 1. Lenovo ThinkSystem DM7000H

Up to 12 DM7000H Storage Arrays can be combined into a clustered system in a NAS environment, or up to 6 DM7000H Storage Arrays can be combined into a clustered system in a SAN environment.

Did you know?

A single ThinkSystem DM7000H scales up to 7.68 PB of raw storage capacity. A cluster of the DM7000H storage systems scales up to 92 PB for NAS or up to 46 PB for SAN environments.

The ThinkSystem DM7000H offers unified file and block storage connectivity with support for 1 GbE, 10 GbE and 40 GbE NAS and iSCSI, and 8 Gb, 16 Gb, and 32 Gb Fibre Channel protocols at the same time.

Key features

The ThinkSystem DM7000H offers the following key features and benefits:

- Scalable, hybrid storage with dual active/active controller configurations for high availability and performance.
- Improved performance and data protection with RAID-DP and RAID-TEC, as well as support for traditional RAID 4.
- Flexible host connectivity to match diverse client needs with support for unified NAS and SAN storage protocols, including 1/10 and 40 GbE NAS and iSCSI, and 8/16/32 Gb Fibre Channel connectivity.
- 12 Gb SAS drive-side connectivity with multipathing with up to 24x 2.5-inch small form factor (SFF) drives in the 2U24 SFF expansion enclosures, up to 12x 3.5-inch large form factor (LFF) drives in the 2U12 LFF expansion enclosures, or up to 60x 3.5-inch LFF drives in the 4U60 LFF expansion enclosures.
- Scalability to up to 480 SFF or LFF drives with the attachment of the ThinkSystem DM240S 2U24 SFF, DM120S 2U12 LFF, or DM600S 4U60 LFF expansion enclosures to satisfy growing needs for storage capacity and performance.
- Flexibility in storing data on high-performance SAS SSDs or capacity-optimized enterprise NL SAS HDDs; mixing and matching drive types and form factors within a single system to perfectly meet performance and capacity requirements for various workloads.
- Acceleration of read-centric workloads with the high-speed, low-latency onboard NVMe SSD caching.
- A rich set of standard storage management functions available at no extra cost, including SSD read cache, hybrid storage pools, snapshots, volume copy, quality of service, thin provisioning, compression, deduplication, encryption, disk-based backup, application- and virtual machine-aware backup, quick data recovery, clustering, synchronous replication, and asynchronous replication.
- Optional licensed functions, including storage virtualization (FlexArray), WORM (write once, read many) data protection (SnapLock) and object storage tiering (FabricPool).
- Scale-out clustering of up to 12 ThinkSystem DM Series storage systems for NAS connectivity or up to six DM Series storage systems for SAN connectivity.
- Intuitive, web-based GUI for easy system setup and management.
- Lenovo XClarity support for centralized systems management of Lenovo x86 servers, switches, and storage, which provides automated agent-less discovery, inventory, monitoring, and additional platform-specific functions across multiple systems.
- Designed for 99.9999% availability with redundant hot-swap components, including controllers and I/O modules, power supplies, cooling modules (4U60 LFF enclosures only), and non-disruptive firmware upgrades.
- Certified storage for Oracle VM.
- Certified storage for Citrix XenServer: http://hcl.xenserver.org/storage/910/Lenovo_DM_Series.

The ThinkSystem DM7000H supports the complete range of data storage requirements, from highly used applications to high-capacity, low usage applications. The following drives are supported:

- 2U24 SFF performance-optimized, enterprise class HDDs: 900 GB, 1.2 TB, and 1.8 TB 10K rpm
- 2U24 SFF capacity-optimized SSDs: 960 GB, 3.84 TB, 7.68 TB, and 15.36 TB
- 2U12 LFF and 4U60 LFF high-capacity nearline HDDs: 4 TB, 8 TB, 10 TB, and 16 TB 7.2K rpm

All drives are dual-port and hot-swappable.

The ThinkSystem DM7000H supports attachment of the following ThinkSystem DM Series expansion enclosures:

- Up to 20 ThinkSystem DM240S 2U24 SFF enclosures.
- Up to 40 ThinkSystem DM120S 2U12 LFF enclosures.
- Up to 8 ThinkSystem DM600S 4U60 LFF enclosures.
- A combination of the DM240S, DM120S, and DM600S enclosures for a maximum of 480 drives.

Customers can intermix 2U24 SFF, 2U12 LFF, and 4U60 LFF expansion enclosures behind a controller enclosure. This configuration delivers the added flexibility to mix 3.5-inch and 2.5-inch drives within a single system (but not within the enclosure).

More drives and expansion enclosures are designed to be dynamically added with virtually no downtime, which helps to quickly and seamlessly respond to ever-growing capacity demands.

The ThinkSystem DM7000H offers high levels of system and data availability with the following technologies:

- Dual-active controllers (high availability pair) with automatic load balancing and failover
- Mirrored, battery-backed controller NVRAM
- Dual-port SAS HDDs and SSDs with automatic drive failure detection and rebuild
- Redundant, hot-swappable and customer replaceable hardware components, including SFP+/QSFP+ transceivers, controller and I/O modules, power supplies, cooling modules (4U60 LFF only), and drives
- Automated failover for the data path between the host and the drives with multipathing
- Non-disruptive controller and drive firmware upgrades
- Scale-out clustering

Components and connectors

The following figure shows the front of the ThinkSystem DM7000H controller enclosure.

Figure 2. ThinkSystem DM7000H controller enclosure front view

The front of the ThinkSystem DM7000H controller enclosure includes the LEDs that display the status of the system.

The following figure shows the rear of the ThinkSystem DM7000H 3U controller enclosure.

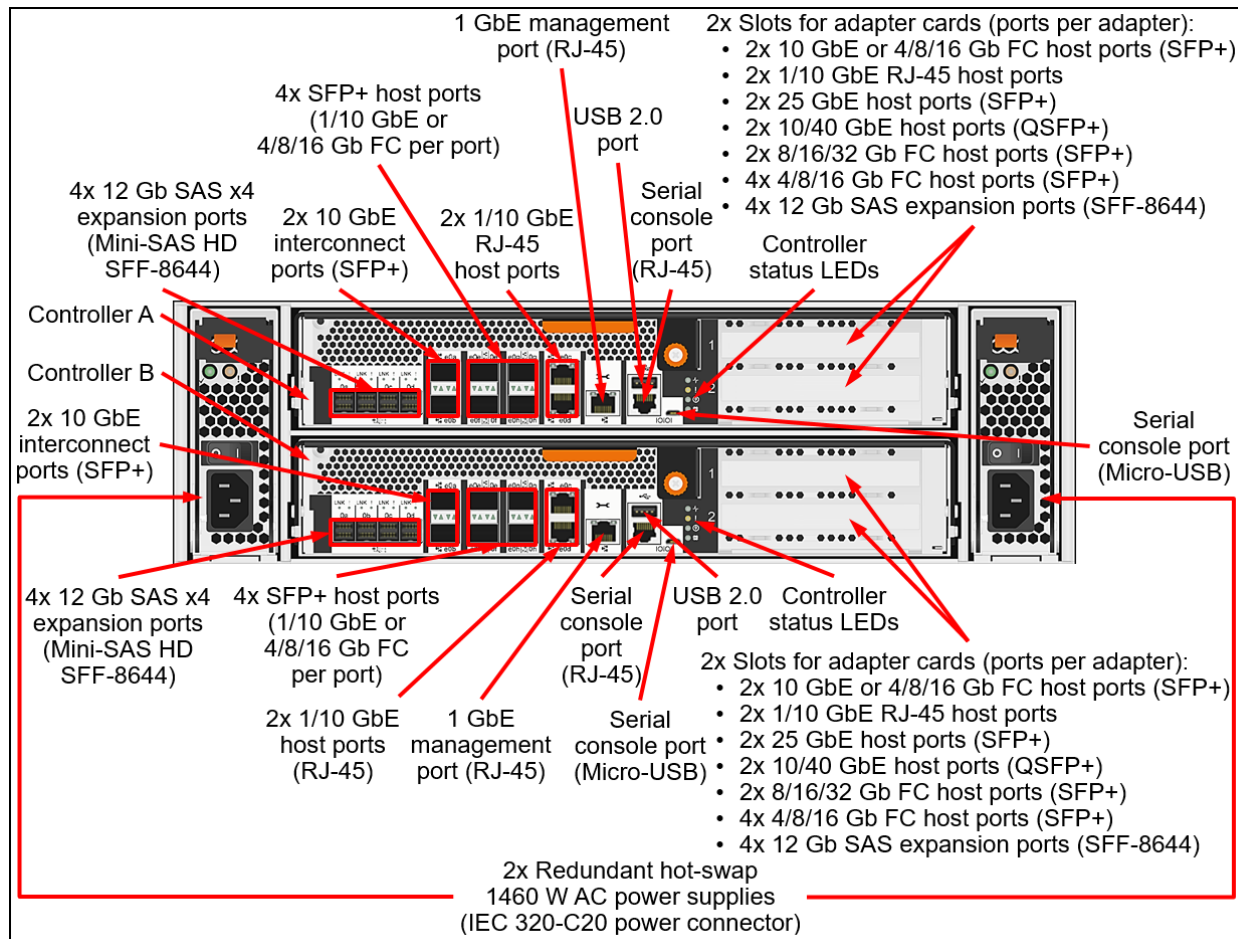

Figure 3. ThinkSystem DM7000H 3U controller enclosure rear view

The rear of the ThinkSystem DM7000H 3U controller enclosure includes the following components:

- Two redundant hot-swap controllers, each with the following ports:
 - Two 10 GbE SFP+ interconnect ports for direct-attach HA pair or switched cluster connections.
 - Four SFP+ base host ports for 1/10 Gb GbE or 4/8/16 Gb FC connectivity.
 - Two 1/10 GbE RJ-45 base host ports for NAS or iSCSI connectivity.
 - Four 12 Gb SAS x4 ports (Mini-SAS HD SFF-8644) for connections to the expansion enclosures.
 - Two slots for the following optional adapter cards (ports per adapter card):
 - Two 10 GbE (NAS or iSCSI) or 4/8/16 Gb FC SFP+ host ports.
 - Two 1/10 GbE RJ-45 host ports (NAS or iSCSI).
 - Two 10/40 GbE QSFP+ host ports (NAS or iSCSI).
 - Two 8/16/32 Gb FC SFP+ host ports (SW SFP+ transceivers included).
 - Four 4/8/16 Gb FC SFP+ host ports (SW SFP+ transceivers included).
 - Four 12 Gb SAS x4 expansion ports (Mini-SAS HD SFF-8644).
 - Two 25 GbE iWARP SFP28 host ports (MetroCluster).
 - One RJ-45 10/100/1000 Mb Ethernet port for out-of-band management.
 - Two serial console ports (RJ-45 and Micro-USB) for another means to configure the system.
 - One USB Type A port (for ONTAP software installation or booting)
- Two redundant hot-swap 1460 W (100 - 240 V) AC power supplies (IEC 320-C14 power connector) with integrated cooling fans.
- Controller status LEDs.

The following figure shows the front of the ThinkSystem DM240S 2U SFF expansion enclosure.

Figure 4. ThinkSystem DM240S expansion enclosure front view

The front of the ThinkSystem DM240S 2U SFF expansion enclosure includes the following components:

- 24 SFF hot-swap drive bays.
- Enclosure status LEDs.
- Enclosure ID LED.

The following figure shows the front of the ThinkSystem DM120S 2U LFF expansion enclosure.

Figure 5. ThinkSystem DM120S 2U LFF expansion enclosure front view

The front of the ThinkSystem DM120S 2U LFF expansion enclosure includes the following components:

- 12 LFF hot-swap drive bays.
- Enclosure status LEDs.
- Enclosure ID LED.

The following figure shows the rear of the ThinkSystem DM240S or DM120S 2U expansion enclosure.

Figure 6. ThinkSystem DM240S or DM120S 2U expansion enclosure rear view

The rear of the ThinkSystem DM240S or DM120S 2U expansion enclosure includes the following components:

- Two redundant hot-swap I/O Modules; each I/O Module provides four 12 Gb SAS x4 expansion ports (Mini-SAS HD SFF-8644) for connections to the controller enclosures and for connecting the expansion enclosures between each other.
- Two redundant hot-swap 913 W (100 - 240 V) AC power supplies (IEC 320-C14 power connector) with integrated cooling fans.
- I/O Module status LEDs.

The following figure shows the front of the ThinkSystem DM600S 4U LFF expansion enclosure.

Figure 7. ThinkSystem DM600S 4U LFF expansion enclosure front view

The front of the ThinkSystem DM600S 4U LFF expansion enclosure includes the following components:

- Five drawers, each with 12 LFF hot-swap drive bays.
- Enclosure status LEDs.
- Enclosure ID LED.

The following figure shows the rear of the ThinkSystem DM600S 4U LFF expansion enclosure.

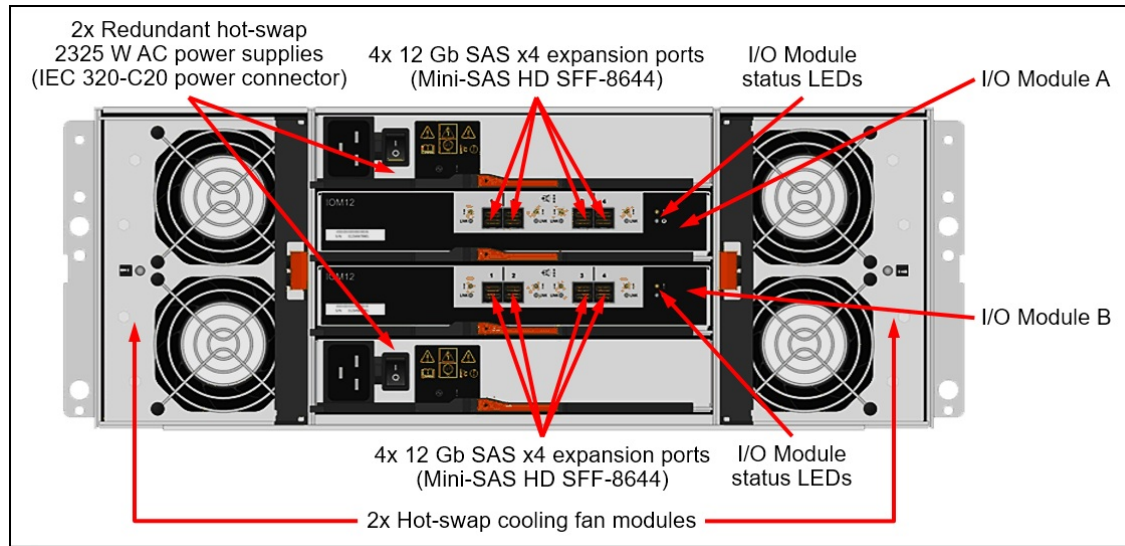

Figure 8. ThinkSystem DM600S 4U LFF expansion enclosure rear view

The rear of the ThinkSystem DM600S 4U LFF expansion enclosure includes the following components:

- Two redundant hot-swap I/O Modules; each I/O Module provides four 12 Gb SAS x4 expansion ports (Mini-SAS HD SFF-8644) for connections to the controller enclosures and for connecting the expansion enclosures between each other.
- Two redundant hot-swap 2325 W (200 - 240 V) AC power supplies (IEC 320-C20 power connector)
- Two hot-swap cooling fan modules; each module has two fans.
Note: The failed cooling module should be replaced as soon as possible.
- I/O Module status LEDs.

System specifications

The following table lists the ThinkSystem DM7000H storage system specifications.

Note: The supported hardware options, software features, and interoperability listed in this product guide are based on the ONTAP software version 9.7. For details about specific software releases that introduced support for certain hardware options and software features, refer to the Release notes of the particular software release for the ThinkSystem DM7000H that can be found at:

<http://datacentersupport.lenovo.com>

Table 1. ThinkSystem DM7000H system specifications

Attribute	Specification
Form factor	<ul style="list-style-type: none"> • DM7000H controller enclosure (machine type 7Y56): 3U rack mount • DM120S 2U12 LFF expansion enclosure (machine types 7Y59): 2U rack mount • DM240S 2U24 SFF expansion enclosure (machine types 7Y58): 2U rack mount • DM600S 4U60 LFF expansion enclosure (machine types 7Y43): 4U rack mount
Controller configuration	Dual active-active controller configuration (HA pair). Up to 6 HA pairs can be combined into a single SAN cluster, or up to 12 HA pairs can be combined into a single NAS cluster.
HA pair/cluster interconnect ports	4x 10 GbE SFP+ ports (DAC cables or SW fiber optics [LC]) (2 ports per controller).
RAID levels	RAID-4, RAID-DP, RAID-TEC.

Attribute	Specification
Controller memory	256 GB RAM per system (128 GB per controller). 16 GB battery-backed NVRAM per system (8 GB per controller) mirrored between the controllers.
Controller cache	4 TB NVMe-based Flash Cache (2 TB per controller).
Drive bays	<ul style="list-style-type: none"> Up to 480 LFF hot-swap drive bays (Up to 40x 2U12 or up to 8x 4U60 LFF expansion enclosures) Up to 480 SFF hot-swap drive bays (Up to 20x 2U24 SFF expansion enclosures) <p>Intermix of 2U24 SFF, 2U12 LFF, and 4U60 LFF expansion enclosures is supported.</p>
Drive technology	12 Gb SAS and NL SAS HDDs, 12 Gb SAS SSDs.
Drive expansion connectivity	<ul style="list-style-type: none"> 4x 12 Gb SAS x4 (Mini-SAS HD SFF-8644) base expansion ports and 4x or 8x 12 Gb SAS x4 (Mini-SAS HD SFF-8644) additional expansion ports with one or two SAS adapter cards on each of two controllers in the controller enclosure for the attachment of the expansion enclosures. 4x 12 Gb SAS x4 (Mini-SAS HD SFF-8644) expansion ports on each of two I/O modules in the expansion enclosure for the attachment to the controller enclosure and daisy chaining of the expansion enclosures.
Drives	<ul style="list-style-type: none"> 2U24 SFF drives: <ul style="list-style-type: none"> 900 GB, 1.2 TB, and 1.8 TB 10K rpm SAS HDDs 960 GB, 3.84 TB, 7.68 TB, and 15.36 TB SAS SSDs (1 DWD) 2U12 and 4U60 LFF drives: 4 TB, 8 TB, 10 TB, and 16 TB 7.2K rpm NL SAS HDDs
Storage capacity	Up to 7.68 PB (480x 16 TB LFF HDDs).
Storage protocols	<ul style="list-style-type: none"> NAS (File access): NFS and CIFS/SMB. SAN (Block access): iSCSI and FC.
Host connectivity	<p>Base ports (per controller enclosure):</p> <ul style="list-style-type: none"> 8x 1 GbE (RJ-45)/10 GbE (DAC cable or SW fiber optic cable, LC) or 4/8/16 Gb FC (SW fiber optic cable, LC) SFP+ host ports (4 ports per controller) <p>Optional additional ports on two or four adapter cards (one or two adapter cards per controller) with the following ports per adapter card:</p> <ul style="list-style-type: none"> 2x 10 GbE or 4/8/16 Gb FC SFP+ (DAC cable [10 GbE] or SW fiber optic cable, LC) 2x 1/10 GbE RJ-45 ports (UTP Category 6/6a) 2x 10/40 GbE QSFP+ (DAC cable or SW fiber optic cable, MPO) 2x 8/16/32 Gb FC SFP+ host ports (SW fiber optic cable, LC) 4x 4/8/16 Gb FC SFP+ host ports (SW fiber optic cable, LC)
MetroCluster	<p>Optional adapter that is used for IP MetroCluster configurations:</p> <ul style="list-style-type: none"> 2x 25 GbE iWARP SFP28 (DAC cable or SW fiber optic cable, LC)
Host operating systems	Microsoft Windows Server 2012 R2, 2016, and 2019; Red Hat Enterprise Linux (RHEL) 6, 7, and 8; SUSE Linux Enterprise Server (SLES) 11, 12, and 15; VMware vSphere 6.0, 6.5, 6.7, and 7.0.
Performance*	Up to 350 000 random read IOPS (8 KB blocks).

Attribute	Specification
Configuration maximums**	<ul style="list-style-type: none"> ● Maximum raw storage capacity: 7.68 PB ● Maximum flash pool cache size: 72 TB ● Maximum aggregate size: 400 TB ● Maximum number of FlexVol volumes per controller: 1000 ● Maximum FlexVol volume size: 100 TB ● Maximum number of LUNs per controller: 12 288 ● Maximum number of LUNs per FlexVol volume: 512 ● Maximum LUN size: 16 TB ● Maximum number of drives in a RAID group (data + parity drives): <ul style="list-style-type: none"> ○ RAID 4: 14 (13 + 1 SAS SSDs) or 7 (6 + 1 NL SAS HDDs) ○ RAID-DP: 28 (26 + 2 SAS SSDs) or 20 (18 + 2 NL SAS HDDs) ○ RAID-TEC: 29 (26 + 3 SAS SSDs or NL SAS HDDs) ● Maximum number of initiators per controller: 4096 ● Maximum number of snapshots per FlexVol volume: 1023
Cooling	Redundant cooling with two cooling modules (DM600S 4U60 LFF) or with the fans that are built into power supplies (DM7000H, DM240S 2U24 SFF, and DM120S 2U12 LFF).
Power supply	Two redundant hot-swap 1460 W (100 - 240 V) (DM7000H 3U controller enclosure), 913 W (100 - 240 V) (DM240S 2U24 and DM120S 2U12 enclosures) or 2325 W (200 - 240 V) (DM600S 4U60 enclosures) Platinum AC power supplies.
Hot-swap parts	Controllers, I/O modules, drives, power supplies, cooling modules (DM600S 4U60 LFF only), and SFP+/QSFP+ transceivers and DAC cables.
Management ports	<ul style="list-style-type: none"> ● 1x 1 GbE port (UTP, RJ-45) per controller for out-of-band management. ● 2x Serial console ports (RJ-45 and Micro-USB) for system configuration.
Management interfaces	ThinkSystem Storage Manager web-based GUI; SSH CLI; Serial console CLI; SNMP, email, and syslog alerts; optional Lenovo XClarity.
Security features	Secure Socket Layer (SSL), Secure Shell (SSH), user level security, role-based access control (RBAC), LDAP authentication.
Warranty and support	Three-, four-, or five-year customer-replaceable unit and onsite limited warranty with selectable service levels: 9x5 service coverage next business day (NBD) onsite response (Foundation) or 24x7 service coverage with 4-hour onsite response (Essential). Premier Support is also available. Software support is included in the Foundation or Essential Service for the duration of the warranty period.
Dimensions	<p>Controller enclosure:</p> <ul style="list-style-type: none"> ● Height: 130 mm (5.1 in.) ● Width: 447 mm (17.6 in.) ● Depth: 608 mm (23.9 in.) <p>2U24 SFF expansion enclosure:</p> <ul style="list-style-type: none"> ● Height: 85 mm (3.4 in.) ● Width: 449 mm (17.7 in.) ● Depth: 484 mm (19.1 in.) <p>2U12 LFF expansion enclosure:</p> <ul style="list-style-type: none"> ● Height: 85 mm (3.4 in.) ● Width: 447 mm (17.6 in.) ● Depth: 483 mm (19.0 in.) <p>4U60 LFF expansion enclosure:</p> <ul style="list-style-type: none"> ● Height: 174 mm (6.9 in.) ● Width: 449 mm (17.7 in.) ● Depth: 922 mm (36.3 in.)

Attribute	Specification
Weight	<ul style="list-style-type: none"> Controller enclosure (fully configured): 34.5 kg (76.1 lb) 2U24 SFF expansion enclosure (fully configured): 24.4 kg (53.8 lb) 2U12 LFF expansion enclosure (fully configured): 28.7 kg (63.3 lb) 4U60 LFF expansion enclosure (fully configured): 111.5 kg (245.8 lb)

* Estimated performance based on internal measurements.

** For a detailed list of configuration limits and restrictions for a specific version of the software, refer to the Lenovo Data Center Support website:

<http://datacentersupport.lenovo.com>

Controller enclosures

Factory-integrated models of the ThinkSystem DM7000H Unified Hybrid Storage Array are configured by using the Lenovo Data Center Solution Configurator (DCSC):

<http://dcsc.lenovo.com>

The following table lists the CTO base models for the ThinkSystem DM7000H.

Withdrawn from marketing: The ThinkSystem DM7000H is now withdrawn from marketing. The suggested replacement is the DM7100H as described in the DM7100H product guide, <https://lenovopress.com/lp1270-thinksystem-dm7100h-unified-hybrid-storage-array>

Table 2. ThinkSystem DM7000H CTO base models

Description	Machine Type/Model	Feature code
Lenovo ThinkSystem DM Series 3U Chassis (2x PSUs, No controller modules)	7Y56CTO1WW	B38K

Configuration note: Two DM7000 controllers (feature code B39H) are selected by default in the configurator, and the selection cannot be changed.

The models of the ThinkSystem DM7000H ship with the following items:

- One chassis with the following components:
 - Two controllers
 - Two power supplies
- Rack Mount Kit
- 2 m USB Cable (USB Type A to Micro-USB)
- *Electronic Publications Flyer*
- Two customer-configured power cables

Controllers

The ThinkSystem DM7000H controller enclosures ship with two DM7000 controllers. A *controller* provides interfaces for host connectivity, management, and internal drives, and it runs ONTAP storage management software. Each DM7000 controller enclosure provides 256 GB RAM, 16 GB battery-backed NVRAM, and 4 TB NVMe SSD flash cache (128 GB RAM, 8 GB NVRAM, and 2 TB NVMe SSD flash cache per controller).

The DM7000H controller enclosures ship with four interconnect 10 GbE SFP+ ports (two ports per controller) to cable a directly-connected dual-controller HA pair or for switched cluster interconnect with multiple dual-controller HA pairs. Up to six HA pairs can be combined into a single SAN cluster or up to 12 HA pairs can be combined into a single NAS cluster.

The DM7000H controller enclosures ship with eight universal SFP+ ports (four ports per controller) for 1/10 GbE NAS / iSCSI or 4/8/16 Gb FC host connectivity and four 1/10 GbE RJ-45 ports (two per controller) for 1/10 GbE NAS / iSCSI host connectivity. Each controller also has two expansion slots for optional adapter cards.

Each DM7000H controller enclosure also provides eight integrated 12 Gb SAS x4 expansion ports (Mini-SAS HD SFF-8644 connectors) (four ports per controller) for the attachment of the ThinkSystem DM Series expansion enclosures.

The following interfaces can be added to the ThinkSystem DM7000H controller enclosures with optional adapter cards (ports per adapter card):

- Host interfaces
 - 2x 10 GbE or 4/8/16 Gb FC SFP+ ports for NAS, iSCSI, or FC connectivity (for FC connectivity, 16 Gb FC SW SFP+ transceivers [LC connectors] included; for 10 GbE connectivity, optical transceivers or DAC cables should be purchased for the adapter card)
 - 2x 1/10 GbE RJ-45 ports for NAS or iSCSI connectivity (require RJ-45 UTP Category 6 cables that should be purchased for the adapter card)
 - 2x 10/40 GbE QSFP+ ports for NAS or iSCSI connectivity (require optical transceivers or DAC cables that should be purchased for the adapter card)
 - 2x 8/16/32 Gb FC SFP+ ports for FC connectivity (SW SFP+ transceivers [LC connectors] included)
 - 4x 4/8/16 Gb FC SFP+ ports for FC connectivity (SW SFP+ transceivers [LC connectors] included)
- Expansion interfaces: 4x 12 Gb SAS x4 ports (Mini-SAS HD SFF-8644) ports for expansion connectivity
- MetroCluster interfaces:
 - 2x 25 GbE iWARP SFP28 ports for IP MetroCluster connectivity (require optical transceivers or DAC cables that should be purchased for the adapter card)

Configuration notes:

- A pair of the universal SFP+ base ports (e0e/0e and e0f/0f or e0g/0g and e0h/0h) in the system must have the same connectivity type (either Ethernet or Fibre Channel, but not both types) and the same type of physical connections; different pairs might have different types of connectivity.
- Both controllers must have matching configurations of the base ports (type and physical connections) and adapter cards (type, quantity, slot location, and physical connections).
- The adapter cards should be installed in pairs: Two or four adapter cards are supported per controller enclosure (two adapter cards per controller), including a combination of the adapter card pairs.
- One 40 GbE port on the dual-port 40 GbE adapter card can be configured as 4x 10 GbE ports (the other 40 GbE port cannot be used in this configuration).

The following table lists the supported host port configurations for the ThinkSystem DM7000H.

Table 3. ThinkSystem DM7000H host port configurations

Port type and total number of ports per controller enclosure (per controller)					
10 GbE or 16 Gb FC SFP+	10 GbE RJ-45	25 GbE SFP28	40 GbE QSFP+	16 Gb FC SFP+	32 Gb FC SFP+
Base host ports

Lenovo ThinkSystem DM Series 16Gb 4 port Fibre Channel Card	4XC7A14397	B38V	4
Adapter cards: Additional expansion interfaces			
Lenovo ThinkSystem DM Series 12Gb 4 port SAS Card	4XC7A14398	B38W	4

Description	Part number	Feature code	Maximum quantity per controller enclosure
SFP+ options for base ports			
1Gb RJ-45 iSCSI SFP+ Module 1 pack	4XF7A14917	B4K7	8
8Gb Fibre Channel SFP+ Module 1 pack	4XF7A14918	B4K8	8
16Gb Fibre Channel SFP+ Module 1 pack	4XF7A14920	B4KA	8
SFP+ options for 10 Gb iSCSI / 16 Gb FC adapter card			
QLogic 10Gb SFP+ SR Optical Transceiver	49Y4218	0064	8
SFP+ options for base ports, 10 Gb iSCSI / 16 Gb FC adapter card, and interconnect ports			
10Gb SW Optical iSCSI SFP+ Module 1 pack	4XF7A14919	B4K9	20
SFP28 options for 25 GbE adapter card			
25Gb Ethernet Optical SFP28 Shortwave Module 1 pack	4XF7A39597	B732	8
QSFP+ options for 40 GbE adapter card			
Lenovo 40GBASE-eSR4 QSFP+ Transceiver	00FE325	A5U9	8
OM3 optical cables for 40 GbE QSFP+ eSR4 transceivers			
Lenovo 10m QSFP+ MPO-MPO OM3 MMF Cable	00VX003	AT2U	8
Lenovo 30m QSFP+ MPO-MPO OM3 MMF Cable	00VX005	AT2V	8
OM4 optical cables for 40 GbE QSFP+ eSR4 transceivers			
Lenovo 5m MPO-MPO OM4 MMF Cable	7Z57A03567	AV25	8
Lenovo 7m MPO-MPO OM4 MMF Cable	7Z57A03568	AV26	8
Lenovo 10m MPO-MPO OM4 MMF Cable	7Z57A03569	AV27	8
Lenovo 15m MPO-MPO OM4 MMF Cable	7Z57A03570	AV28	8
Lenovo 20m MPO-MPO OM4 MMF Cable	7Z57A03571	AV29	8
Lenovo 30m MPO-MPO OM4 MMF Cable	7Z57A03572	AV2A	8
Optical breakout cables for 40 GbE QSFP+ eSR4 transceivers			
Lenovo 1m MPO-4xLC OM3 MMF Breakout Cable	00FM412	A5UA	4
Lenovo 3m MPO-4xLC OM3 MMF Breakout Cable	00FM413	A5UB	4
Lenovo 5m MPO-4xLC OM3 MMF Breakout Cable	00FM414	A5UC	4
DAC cable options for 40 GbE QSFP+ host connectivity			
Lenovo 1m Passive QSFP+ DAC Cable	49Y7890	A1DP	8
Lenovo 3m Passive QSFP+ DAC Cable	49Y7891	A1DQ	8
Lenovo 5m Passive QSFP+ DAC Cable	00D5810	A2X8	8
Lenovo 7m Passive QSFP+ DAC Cable	00D5813	A2X9	8
DAC cable options for 40 GbE QSFP+ to 4x 10 GbE SFP+ host connectivity			
Lenovo 1m Passive QSFP+ to SFP+ Breakout DAC Cable	49Y7886	A1DL	4
Lenovo 3m Passive QSFP+ to SFP+ Breakout DAC Cable	49Y7887	A1DM	4
Lenovo 5m Passive QSFP+ to SFP+ Breakout DAC Cable	49Y7888	A1DN	4
OM4 cable options for 8/16/32 Gb FC, 10 GbE SW SFP+, and 25 GbE SFP28 optical transceivers			
Lenovo 0.5m LC-LC OM4 MMF Cable	4Z57A10845	B2P9	28
Lenovo 1m LC-LC OM4 MMF Cable	4Z57A10846	B2PA	28
Lenovo 3m LC-LC OM4 MMF Cable	4Z57A10847	B2PB	28
Lenovo 5m LC-LC OM4 MMF Cable	4Z57A10848	B2PC	28

Description	Part number	Feature code	Maximum quantity per controller enclosure
Lenovo 10m LC-LC OM4 MMF Cable	4Z57A10849	B2PD	28

Lenovo 25m LC-LC OM3 MMF Cable	00MN517	ASRB	28
Lenovo 30m LC-LC OM3 MMF Cable	00MN520	ASRC	28
DAC cable options for 10 GbE SFP+ connectivity (SFP+ base, adapter card, and interconnect ports)			
0.5m Passive DAC SFP+ Cable	00D6288	A3RG	20
1m Passive DAC SFP+ Cable	90Y9427	A1PH	20
1.5m Passive DAC SFP+ Cable	00AY764	A51N	20
2m Passive DAC SFP+ Cable	00AY765	A51P	20
3m Passive DAC SFP+ Cable	90Y9430	A1PJ	20
5m Passive DAC SFP+ Cable	90Y9433	A1PK	20
7m Passive DAC SFP+ Cable	00D6151	A3RH	20
DAC cable options for 25 GbE SFP28 connectivity (SFP28 adapter card ports)			
Lenovo 1m Passive 25G SFP28 DAC Cable	7Z57A03557	AV1W	8
Lenovo 3m Passive 25G SFP28 DAC Cable	7Z57A03558	AV1X	8
Lenovo 5m Passive 25G SFP28 DAC Cable	7Z57A03559	AV1Y	8
UTP Category 6 cables options for 1/10 GbE RJ-45 host connectivity and 1 GbE RJ-45 management ports			
0.75m Green Cat6 Cable	00WE123	AVFW	4
1.0m Green Cat6 Cable	00WE127	AVFX	4
1.25m Green Cat6 Cable	00WE131	AVFY	4
1.5m Green Cat6 Cable	00WE135	AVFZ	4
3m Green Cat6 Cable	00WE139	AVG0	4
10m Green Cat6 Cable	90Y3718	A1MT	4
25m Green Cat6 Cable	90Y3727	A1MW	4

* Factory-installed only.

Expansion enclosures

The ThinkSystem DM7000H supports attachment of the following ThinkSystem DM Series expansion enclosures:

- Up to 20 ThinkSystem DM240S 2U24 SFF enclosures.
- Up to 40 ThinkSystem DM120S 2U12 LFF enclosures.
- Up to 8 ThinkSystem DM600S 4U60 LFF enclosures.
- A combination of the DM240S, DM120S, and DM600S enclosures for a maximum of 480 drives.

Intermix of DM240S 2U24 SFF, DM120S 2U12 LFF, and DM600S 4U60 LFF expansion enclosures behind a controller enclosure is supported. The expansion enclosures can be added to the system non-disruptively.

The following table lists the CTO base models for the ThinkSystem DM Series expansion enclosures.

Table 5. CTO base models for the ThinkSystem DM Series expansion enclosures

Description	Machine Type/Model	Feature code
Lenovo ThinkSystem Storage 2U24 Chassis (with 2x PSUs)	7Y58CTO1WW	B38L
Lenovo ThinkSystem Storage 2U12 Chassis (with 2x PSUs)	7Y59CTO1WW	B38M
Lenovo ThinkSystem Storage 4U60 Chassis (with 2x PSUs)	7Y43CTO1WW	B38N

Configuration note: Two I/O expansion modules (feature code B39J) are selected by default in the configurator, and the selection cannot be changed.

The models of the ThinkSystem DM240S, DM120S, and DM600S ship with the following items:

- One chassis with the following components:
 - Two I/O modules
 - Two power supplies
 - Two cooling modules (4U60 LFF only)
- Rack Mount Kit
- *Electronic Publications Flyer*
- Two customer-configured power cables

Each ThinkSystem DM Series expansion enclosure ships with two SAS I/O expansion modules. Each *I/O expansion module* provides four external 12 Gb SAS x4 ports (Mini-SAS HD SFF-8644 connectors labelled Port 1-4) that are used for connections to the ThinkSystem DM7000H and for daisy chaining the expansion enclosures between each other.

The ThinkSystem DM7000H supports up to six expansion enclosure stacks with the following quantities of the enclosures in each stack for a total of up to 480 drives:

- Up to 10 DM120S 2U12 LFF enclosures with HDDs
- Up to 10 DM240S 2U24 SFF enclosures with HDDs
- Up to 4 DM240S 2U24 SFF enclosures with SSDs
- Up to 4 DM600S 4U60 LFF enclosures with HDDs

For one or two stacks, the integrated SAS expansion ports on the DM7000 controller can be used. For three or four stacks, an additional 4-port SAS adapter card is required for the DM7000 controller. For five or six stacks, two additional 4-port SAS adapter cards are required for the DM7000 controller.

The example expansion connectivity topologies for two and four enclosure stacks with dual-path HA (high availability) are shown in the following figures.

Figure 9. DM7000H expansion enclosure connectivity topology: Two stacks

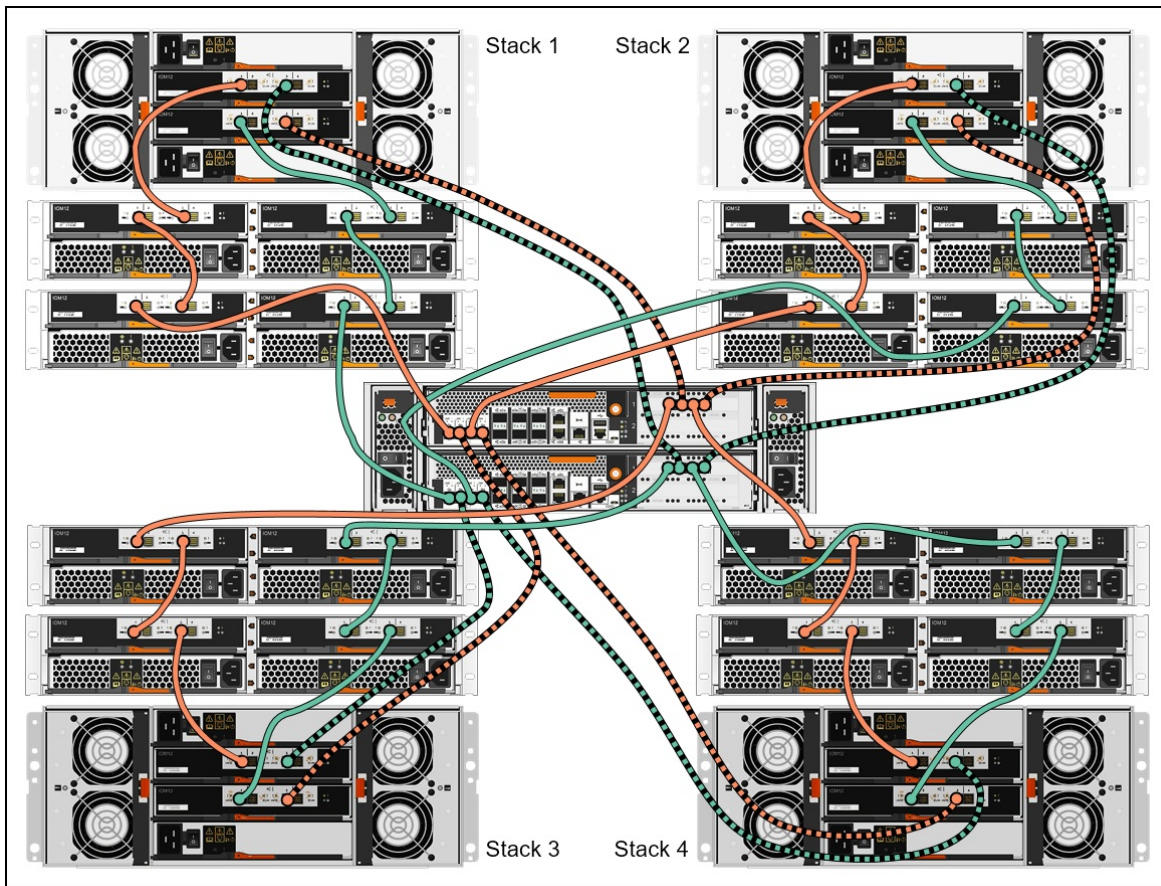

Figure 10. DM7000H expansion enclosure connectivity topology: Four stacks

Expansion cabling rules:

- Ports A and C (integrated and on the SAS adapter cards) on the Controller 1 are primary paths to stacks; each port is connected to the Port 1 on the I/O Module A in the first expansion enclosure in a stack.
- Port 3 on the I/O Module A in the first expansion enclosure is connected to Port 1 on the I/O Module A in the adjacent expansion enclosure, and so on (until the last expansion enclosure in a stack is cabled).
- Ports B and D (integrated and on the SAS adapter cards) on the Controller 1 are secondary paths to stacks; each port is connected to the Port 3 on the I/O Module B in the last expansion enclosure in a stack.
- Ports A and C (integrated and on the SAS adapter cards) on the Controller 2 are primary paths to stacks; each port is connected to the Port 1 on the I/O Module B in the first expansion enclosure in a stack.
- Port 3 on the I/O Module B in the first expansion enclosure is connected to Port 1 on the I/O Module B in the adjacent expansion enclosure, and so on (until the last expansion enclosure in a stack is cabled).
- Ports B and D (integrated and on the SAS adapter cards) on the Controller 2 are secondary paths to stacks; each port is connected to the Port 3 on the I/O Module A in the last expansion enclosure in a stack.

The following table lists ordering information for the supported expansion enclosure connectivity options.

Table 6. Expansion enclosure connectivity options

Description	Part number	Feature code	Maximum quantity per one expansion enclosure
External MiniSAS HD 8644/MiniSAS HD 8644 0.5M Cable	00YL847	AU16	4
External MiniSAS HD 8644/MiniSAS HD 8644 1M Cable	00YL848	AU17	4
External MiniSAS HD 8644/MiniSAS HD 8644 2M Cable	00YL849	AU18	4
External MiniSAS HD 8644/MiniSAS HD 8644 3M Cable	00YL850	AU19	4

Configuration notes:

- The following quantities of SAS cables are needed per stack of the expansion enclosures:
 - Two SAS cables per expansion enclosure in the stack for connecting the first expansion enclosure in the stack to the controller enclosure and for connections to the adjacent expansion enclosures.
 - Two additional SAS cables for connecting the last expansion enclosure in the stack to the controller enclosure.
- The length of the SAS cables that connect a 2U12 or 2U24 enclosure to an adjacent 4U60 enclosure should be at least 1 meter.

Drives

The ThinkSystem DM240S 2U24 SFF expansion enclosures support up to 24 SFF hot-swap drives, the DM120S 2U12 LFF expansion enclosures support up to 12 LFF hot-swap drives, and the DM600S 4U60 LFF expansion enclosures support up to 60 LFF hot-swap drives.

Shipping requirement: 2U12 and 2U24 enclosures can be shipped with all drive bays populated, however the 4U60 enclosures must be shipped with drives removed.

The following table lists supported drive options for the DM240S 2U24 SFF expansion enclosures.

Table 7. DM240S 2U24 SFF drive options

Description	Part number	Feature code	Maximum quantity per 2U24 enclosure
2.5-inch 12 Gbps SAS hot-swap HDDs			
ThinkSystem 5.4TB (6x 900GB 10K SAS HDDs) 2U24 Drive Pack for DM7000H	None*	B892	4
ThinkSystem 7.2TB (6x 1.2TB 10K SAS HDDs) 2U24 Drive Pack for DM7000H	None*	B893	4
ThinkSystem 10.8TB (6x 1.8TB 10K SAS HDDs) 2U24 Drive Pack for DM7000H	None*	B894	4
2.5-inch 12 Gbps SAS hot-swap SSDs (1 Drive Write per Day)			
ThinkSystem 5.76TB (6x 960GB SAS SSDs) 2U24 Drive Pack for DM7000H	4XB7A16978	B66V	4
ThinkSystem 23.04TB (6x 3.84TB SAS SSDs) 2U24 Drive Pack for DM7000H	4XB7A16981	B66Y	4
ThinkSystem 46.08TB (6x 7.68TB SAS SSDs) 2U24 Drive Pack for DM7000H	4XB7A16984	B671	4
ThinkSystem 92.16TB (6x 15.36TB SAS SSDs) 2U24 Drive Pack for DM7000H	4XB7A16987	B674	4

* Factory-installed only, no field upgrade.

The following table lists supported drive options for the DM120S 2U12 LFF expansion enclosures.

Table 8. DM120S 2U12 LFF drive options

Description	Part number	Feature code	Maximum quantity per 2U12 enclosure
3.5-inch 12 Gbps NL SAS hot-swap HDDs			
ThinkSystem 24TB (6x 4TB NL SAS HDDs) 2U12 Drive Pack for DM7000H	4XB7A17013	B67M	2
ThinkSystem 48TB (6x 8TB NL SAS HDDs) 2U12 Drive Pack for DM7000H	4XB7A17016	B67Q	2
ThinkSystem 60TB (6x 10TB NL SAS HDDs) 2U12 Drive Pack for DM7000H	4XB7A17019	B67T	2
ThinkSystem 96TB (6x 16TB NL SAS HDDs) 4U60 Drive Pack for DM7000H	4XB7A65093	BCV3	2

The following table lists supported drive options for the DM600S 4U60 LFF expansion enclosures.

Table 9. DM600S 4U60 LFF drive options

Description	Part number	Feature code	Maximum quantity per 4U60 enclosure
3.5-inch 12 Gbps NL SAS hot-swap HDDs			

Description	Part number	Feature code	Maximum quantity per 4U60 enclosure
ThinkSystem 120TB (30x 4TB NL SAS HDDs) 4U60 Drive Pack for DM7000H	None*	B6BL	2
ThinkSystem 240TB (30x 8TB NL SAS HDDs) 4U60 Drive Pack for DM7000H	None*	B6BM	2
ThinkSystem 300TB (30x 10TB NL SAS HDDs) 4U60 Drive Pack for DM7000H	None*	B6BN	2
ThinkSystem 480TB (30x 16TB NL SAS HDDs) 4U60 Drive Pack for DM7000H	4XB7A65402	BCVE	2

* Factory-installed only, no field upgrade.

Configuration notes:

- The DM240S 2U24 SFF expansion enclosures support from 12 to 24 drives in increments of 6 drives. For factory-installed drive packs, all drives in the enclosure must be of the same type and capacity.
- The DM120S 2U12 LFF expansion enclosures support from 6 to 12 drives in increments of 6 drives (**Note:** The first enclosure must be fully populated with 12 drives). For factory-installed drive packs, all drives in the enclosure must be of the same type and capacity.
- The DM600S 4U60 LFF expansion enclosures support from 30 to 60 drives in increments of 30 drives. For factory-installed drive packs, all drives in the enclosure must be of the same type and capacity.

Software

In this section:

- [Feature bundles](#)
- [ONTAP software versions](#)
- [Extended ONTAP features](#)
- [Ansible playbooks for DM Series](#)

ONTAP software unifies data management across flash, disk, and cloud to simplify the Lenovo DM storage environment. It builds the foundation for a Data Fabric, making it easy to move the data where it is needed across flash, disk, and cloud resources.

Feature bundles

Controller software for the DM7000H is available in the following bundles of features:

- Unified Base (China only) (Feature B5RH)
- Unified Premium (Feature B5RJ)

The following table summarizes the features in each bundle for the DM7000H.

Table 10. Comparison of software features for the DM7000H

Feature	Unified Base (PRC only)	Unified Premium
Controller software feature code	B5RH	B5RJ
RAID-4, RAID-DP, and RAID-TEC data protection	Included	Included
SAN (Block access): iSCSI, FC, NVMe/FC	Included	Included
NAS (File access): NFS, CIFS/SMB	Included	Included
Thin provisioning	Included	Included
Compression	Included	Included
Deduplication	Included	Included

Feature	Unified Base (PRC only)	Unified Premium
Snapshots	Included	Included
Encryption*	No	Included*
Balanced placement	Included	Included
Dynamic capacity expansion	Included	Included
Adaptive Quality of Service	Included	Included
SnapRestore	Included	Included
FlexClone	Included	Included
FlexVol	Included	Included
FlexCache	Included	Included
SnapMirror asynchronous replication	No	Included
SyncMirror data protection	Included	Included
Trusted Platform Module (TPM) support	No	Included
MetroCluster IP	Included	Included
NVMe over FC Protocol	No	No
NVMe over TCP Protocol	Included	Included
SnapMirror synchronous replication	No	Included
FlexGroup	Included	Included
SnapVault disk-based storage backup	No	Included
SnapCenter	No	Included
ONTAP S3	Included	Included
ONTAP S3 SnapMirror	No	Optional
FabricPool object storage tiering	Optional	Optional
SnapLock data protection	No	Optional
Security and Compliance Bundle (Anti-ransomware, MTKM, SnapLock)	No	Optional
Hybrid Cloud Bundle (FabricPool, SnapMirror Cloud)	Optional**	Optional

* Requires the encryption version of ONTAP. See the [ONTAP software](#) section.

** When used with bundles other than Unified Premium, Hybrid Cloud Bundle only adds FabricPool. The use of SnapMirror Cloud requires Unified Premium.

The features are summarized as follows:

- **RAID-4, RAID-DP, and RAID-TEC data protection** : Provides the flexibility to choose the level of data protection required and helps improve performance and availability with built-in spare capacity and by distributing data across all physical drives in the aggregate, sustaining to up to one (RAID-4), two (RAID-DP), or three (RAID-TEC) concurrent drive failures.
- **Thin provisioning**: Optimizes efficiency by allocating storage space based on the minimum space required by each application at any given time, so that applications consume only the space they are actually using, not the total space that has been allocated to them, which allows customers to purchase storage they need today and add more as application requirements grow.
- **Compression**: Provides transparent inline and post-process data compression to reduce the amount of storage that customers need to purchase and manage.
- **Deduplication**: Performs general-purpose deduplication for removal of redundant data to reduce the amount of storage that customers need to purchase and manage.
- **Snapshots**: Enables creation of read-only copies of data for backup, parallel processing, testing, and development, and have the copies available almost immediately.

- **Encryption:** Provides software-based encryption for data at rest for enhanced data security with the traditional drives and embedded key management (requires the encryption-capable version of the ONTAP software).
- **Balanced placement:** Provides automated workload distribution across the cluster to help increase utilization and performance.
- **Dynamic capacity expansion:** Allows the capacity of a volume or aggregate to be expanded by adding new physical drives.
- **Adaptive Quality of Service:** Simplifies operations and maintains consistent workload performance by defining QoS policies and automatically adjusting storage resources to respond to workload changes.
- **SnapRestore:** Enables quick recovery of data by reverting a local volume or file to its previous state from a particular snapshot copy stored on the file system.
- **FlexClone:** References snapshot metadata to create writable point-in-time copies of a volume.
- **FlexVol:** Provides abstraction layer between the logical volume and its physical location in the storage array.
- **FlexCache:** Speeds up access to data and offloads traffic from heavily accessed volumes for read-intensive workloads by placing frequently used data in cache locally or remotely (closer to the point of client access) and serving the data to the clients directly from cache without accessing the data source.
- **SnapMirror asynchronous replication:** Provides storage system-based data replication between the storage systems containing source (local) and destination (remote) volumes by using asynchronous (at specified regular intervals) data transfers over IP communication links.
- **SyncMirror data protection:** Adds extra level of data protection and availability by mirroring a pair of RAID aggregates.
- **Trusted Platform Module (TPM):** For encryption enabled systems. The encryption keys for the onboard key manager (OKM) are no longer stored in the boot device, but instead are stored in the physical TPM for systems so equipped, offering greater security and protection. Moving to the TPM is a nondisruptive process.
- **MetroCluster IP:** Provides storage system-based clustering with online, real-time data mirroring between the local and remote sites by using synchronous data transfers over IP communication links to deliver continuous availability with zero RPO and near-zero RTO. All storage systems in a MetroCluster IP configuration must be of the same model. New to ONTAP 9.11: MetroCluster with Storage Virtual Machine Disaster Recovery (SVM-DR) can now use a third site for the SVM-DR
- **NVMe over TCP Protocol:** Enables NVMe over TCP
- **Data Protection Optimized (DPO):** Increases the amount of concurrent SnapMirror sessions per node, as well as improving SnapMirror performance to the cluster.
- **SnapMirror synchronous replication:** Provides storage system-based data replication between the storage systems containing source (local) and destination (remote) volumes by using synchronous (as soon as the data is written to the source volume)
- **FlexGroup:** Enables a single volume to span across multiple clustered storage arrays to maximize storage capacity and automate load distribution. New to ONTAP 9.11: FlexGroups can now be created as SnapLock volumes.
- **SnapVault disk-based storage backup:** Enables data stored on multiple systems to be backed up to a central, secondary system quickly and efficiently as read-only snapshot copies.
- **SnapCenter:** Provides application- and virtual machine-aware backup and restoration of data by using the Snapshots technology and leverages the SnapMirror capabilities of storage systems to provide onsite or offsite backup set mirroring for disaster recovery.
- **ONTAP S3:** Expands the DM Series unified story and allows customers to manage, block, file, and object data from one interface. Customers can now natively store data in S3 buckets onboard the DM Series.

- **ONTAP S3 SnapMirror** : Enables you to protect buckets in ONTAP S3 object stores using familiar SnapMirror mirroring and backup functionality. Requires ONTAP 9.11 or later on both source and destination clusters. Requires the Unified Premium Bundle.
- **SnapMirror Cloud**: A backup and recovery technology designed for ONTAP users who want to transition their data protection workflows to the cloud. SnapMirror Cloud is an extension to the family of SnapMirror replication technologies. While SnapMirror is frequently used for ONTAP-to-ONTAP backups, SnapMirror Cloud uses the same replication engine to transfer Snapshot copies for ONTAP to S3-compliant object storage backups.
- **Multitenant Key Management (MTKM)**: Provides the ability for individual tenants or storage virtual machines (SVMs) to maintain their own keys through KMIP for NVE. With multitenant external key management, you can centralize your organization's key management functions by department or tenant while inherently confirming that keys are not stored near the assets. This approach decreases the possibility of compromise.
- **Anti-ransomware**: Uses workload analysis in NAS (NFS and SMB) environments to proactively detect and warn about abnormal activity that might indicate a ransomware attack. When an attack is suspected, anti-ransomware also creates new Snapshot backups, in addition to existing protection from scheduled Snapshot copies. New to ONTAP 9.11: Optional multi-admin verification to approve administration functions that could result in data loss.

Add-on feature bundles:

- **Security and Compliance Bundle**: Licensed per 2-node HA Pair, the Security and Compliance Bundle provides built-in protection from ransomware and while also providing the ability to meet regulatory compliance and organizational data retention requirements.
 - Includes: Anti-ransomware feature with Multitenant Key Management (MTKM) and SnapLock
- **Hybrid Cloud Bundle**: Licensed per TB (3 Year & 5 Year Offerings) the Hybrid Cloud Bundle provides the ability to use S3 SnapMirror from ONTAP to the Public Cloud (AWS S3) and/or SnapMirror Cloud with participating ISV Backup providers.
 - Includes SnapMirror Cloud and FabricPool

Optional Extended features also available via Feature on Demand (FoD) (see the [Extended ONTAP features](#) section)

- **FabricPool**: FabricPool is a hybrid storage solution that uses an all flash (all SSD) aggregate as the performance tier and an object store as the external capacity tier. Data in a FabricPool is stored in a tier based on whether it is frequently accessed or not. Using a FabricPool helps you reduce storage cost without compromising performance, efficiency, or protection.
- **SnapLock data protection**: Creates Write-Once-Read-Many (WORM) non-rewritable, non-erasable data on hard disk drives to prevent files from being altered or deleted until a predetermined or default retention date.

ONTAP software versions

The following table lists the software selection options for the DM7000H. The table also indicates which markets each version is available in.

Table 11. Software selection

Feature code	Description	Availability
ONTAP 9.7		
BAYJ	Lenovo ThinkSystem DM Series ONTAP 9.7 SW Base NonEncryption	China only
BAYL	Lenovo ThinkSystem DM Series ONTAP 9.7 Software Encryption	All markets
BAYK	Lenovo ThinkSystem DM Series ONTAP 9.7 Software NonEncryption	All markets
ONTAP 9.8		
BF5S	Lenovo ThinkSystem DM Series ONTAP 9.8 Software Base NonEncryption	China only
BF5Q	Lenovo ThinkSystem DM Series ONTAP 9.8 Software Encryption	All markets except China
BF5R	Lenovo ThinkSystem DM Series ONTAP 9.8 Software NonEncryption	All markets
ONTAP 9.9		
BKF7	Lenovo ThinkSystem DM Series ONTAP 9.9 Software Base NonEncryption	China only
BKFB	Lenovo ThinkSystem DM Series ONTAP 9.9 Software Encryption	All markets
BKFA	Lenovo ThinkSystem DM Series ONTAP 9.9 Software NonEncryption	All markets
ONTAP 9.10		
BNLY	Lenovo ThinkSystem DM Series ONTAP 9.10 Software Base NonEncryption	China only
BNM2	Lenovo ThinkSystem DM Series ONTAP 9.10 Software Encryption	All markets except China
BNM1	Lenovo ThinkSystem DM Series ONTAP 9.10 Software NonEncryption	All markets
ONTAP 9.11		
BRK0	Lenovo ThinkSystem DM Series ONTAP 9.11 Software Base NonEncryption	China only
BRJW	Lenovo ThinkSystem DM Series ONTAP 9.11 Software Encryption	All markets except China
BRJX	Lenovo ThinkSystem DM Series ONTAP 9.11 Software NonEncryption	All markets

Software maintenance is included in the DM7000H warranty and support (see [Warranty and support](#) for details).

Extended ONTAP features

FabricPool and SnapLock WORM data protection are optional extended features. To obtain these feature licenses, order the part numbers as listed in the following table. Upgrades are supported in specific bundles as listed in the [Comparison of software features table](#).

Note: Extended features are only available as field upgrades and are not orderable as part of a CTO configuration.

Table 12. Optional software features

Part number	Feature code	Description	Quantity
4P47A16547	None*	DM Series SnapLock License	1 per system (contains two licenses)
4P47A37057	None*	DM Series FabricPool – 1TB Increment – 3 years	1 per TB of storage capacity
4P47A37288	None*	DM Series FabricPool – 1TB Increment – 5 years	1 per TB of storage capacity
4P47A82668	BPQ6	Security and Compliance Bundle	1 per system (contains two licenses)
4P47A83121	BQ8X	Hybrid Cloud Bundle 3 year per TB License	1 per TB of storage capacity
4P47A83123	BQ8W	Hybrid Cloud Bundle 5 year per TB License	1 per TB of storage capacity

* Field upgrade only; no factory installation.

Configuration notes:

- The SnapLock feature is licensed on a per-controller basis; that is, two licenses are needed per system, and these two licenses are contained in a single orderable part number. These licenses also include 5-year software support entitlement.
- The FabricPool feature is a cluster-wide, capacity-based license that is available for 3-year or 5-year subscription terms.

Ansible playbooks for DM Series

Ansible Playbooks give customers the ability to quickly deploy and use DM Series storage systems using a standard open source deployment tool. Each playbook executes a set of tasks to achieve a configuration/provisioning goal.

Lenovo has created playbooks that can be used with DM Series storage systems to help with:

- Provisioning
- Configuring

To access the Ansible Playbooks for Lenovo ThinkSystem DM Series storage systems, go to the following page:

<https://github.com/lenovo/ansible-dm-series-ontap>

Management

The ThinkSystem DM7000H supports the following management interfaces:

- Lenovo ThinkSystem Storage Manager, a web-based interface via HTTPS for single-system management or centralized management of the cluster of systems, that runs on the storage system itself and requires only a supported browser (Microsoft Internet Explorer, Google Chrome, or Mozilla Firefox), so there is no need for a separate console or plug-in.
- Command line interface (CLI) via SSH or through serial console.
- Syslog, SNMP, and e-mail notifications.
- Optional Lenovo XClarity for discovery, inventory, monitoring, and alerts.

Power supplies and cables

The ThinkSystem DM7000H 3U controller enclosure ships with two redundant hot-swap 1460 W (100 - 240 V) Platinum AC power supplies, each with an IEC 320-C14 connector.

The ThinkSystem DM240S 2U24 SFF and DM120S 2U12 LFF expansion enclosures ship with two redundant hot-swap 913 W (100 - 240 V) Platinum AC power supplies, each with an IEC 320-C14 connector.

The ThinkSystem DM600S 4U60 LFF expansion enclosures ship with two redundant hot-swap 2325 W (200 - 240 V) Platinum AC power supplies, each with an IEC 320-C20 connector.

Each ThinkSystem DM Series enclosure requires the selection of two power cables.

The following table lists the rack power cable and line cord options that can be ordered for the DM7000H 3U, DM240S 2U24 SFF, and DM120S 2U12 LFF enclosures (two power cords per enclosure).

Table 13. Power cables for DM7000H 3U, DM240S 2U24 SFF, and DM120S 2U12 LFF enclosures

Rack installation

The individually shipped ThinkSystem DM7000H, DM240S, and DM600S enclosures come with the ThinkSystem Storage Rack Mount Kit 2U24/4U60, and the individually shipped ThinkSystem DM120S enclosures come with the ThinkSystem Storage Rack Mount Kit 2U12.

The rack mount kits are listed in the following table.

Table 15. 4-post rack mount kits

Description	Feature code	Quantity
Lenovo ThinkSystem Storage Rack Mount Kit 2U12	B38X	1
Lenovo ThinkSystem Storage Rack Mount Kit 2U24/4U60	B38Y	1

When the ThinkSystem DM Series enclosures are factory-integrated and shipped installed in a rack cabinet, the rack mount kits that support Ship-in-Rack (SIR) capabilities are derived by the configurator. The SIR-capable rack mount kits are listed in the following table.

Table 16. 4-post SIR rack mount kits

Description	Feature code	Quantity
Lenovo ThinkSystem Storage Rack Mount Kit 2U12	B38X	1
Lenovo ThinkSystem Storage SIR Rack Mount Kit (for 2U24 enclosures)	B6TH	1
DM 3U Adjustable Rail Kit (SIR)	B79Z	1
DM/DE 4U Adjustable Rail Kit (SIR)	B742	1

The following table summarizes the rack mount kit features and specifications.

Table 17. Rack mount kit features and specifications summary

Attribute	Screw-in fixed rail with adjustable depth				
	2U12	2U24/4U60	2U24 SIR	3U SIR	4U SIR

In-rack maintenance	Yes*	Yes*	Yes*	Yes*	Yes*
Ship-in-rack (SIR) support	Yes	No	Yes	Yes	Yes
1U PDU support	Yes	Yes	Yes	Yes	Yes
0U PDU support	Limited**	Limited**	Limited**	Limited**	Limited**
Rack type	IBM or Lenovo 4-post, IEC standard-compliant				
Mounting holes	Square or round	Square or round	Square or round	Square or round	Square or round
Mounting flange thickness	2 mm (0.08 in.) – 3.3 mm (0.13 in.)	2 mm (0.08 in.) – 3.3 mm (0.13 in.)	2 mm (0.08 in.) – 3.3 mm (0.13 in.)	2 mm (0.08 in.) – 3.3 mm (0.13 in.)	2 mm (0.08 in.) – 3.3 mm (0.13 in.)
Distance between front and rear mounting flanges [^]	605 mm (23.8 in.) – 812.8 mm (32 in.)	605 mm (23.8 in.) – 812.8 mm (32 in.)	605 mm (23.8 in.) – 812.8 mm (32 in.)	605 mm (23.8 in.) – 812.8 mm (32 in.)	605 mm (23.8 in.) – 812.8 mm (32 in.)

‡ The rack cabinet must be at least 1100 mm (43.31 in.) deep for 4U60 enclosures.

* The majority of the enclosure components can be serviced from the front or rear of the enclosure, which does not require the removal of the enclosure from the rack cabinet.

** If a 0U PDU is used, the rack cabinet must be at least 1000 mm (39.37 in.) deep for 2U12, 2U24, and 3U enclosures, or at least 1200 mm (47.24 in.) deep for 4U60 enclosures.

[^] Measured when mounted on the rack, from the front surface of the front mounting flange to the rear most point of the rail.

Physical specifications

The ThinkSystem DM7000H controller enclosure has the following dimensions and weight (approximate):

- Height: 130 mm (5.1 in.)
- Width: 447 mm (17.6 in.)
- Depth: 608 mm (23.9 in.)
- Weight (fully configured): 34.5 kg (76.1 lb)

The ThinkSystem DM240S 2U24 SFF enclosures have the following dimensions and weight (approximate):

- Height: 85 mm (3.4 in.)
- Width: 449 mm (17.7 in.)
- Depth: 484 mm (19.1 in.)
- Weight (fully configured): 24.4 kg (53.8 lb)

The ThinkSystem DM120S 2U12 LFF enclosures have the following dimensions and weight (approximate):

- Height: 85 mm (3.4 in.)
- Width: 447 mm (17.6 in.)
- Depth: 483 mm (19.0 in.)
- Weight (fully configured): 28.7 kg (63.3 lb)

The ThinkSystem DM600S 4U60 LFF enclosures have the following dimensions and weight (approximate):

- Height: 174 mm (6.9 in.)
- Width: 449 mm (17.7 in.)
- Depth: 922 mm (36.3 in.)
- Weight (fully configured): 111.5 kg (245.8 lb)

Operating environment

The ThinkSystem DM7000H, DM240S 2U24 SFF, DM120S 2U12 LFF, and DM600S 4U60 LFF enclosures are supported in the following environment:

- Air temperature:
 - Operating:
 - DM7000H and DM240S 2U24 SFF: 5 °C - 45 °C (41 °F - 113 °F)
 - DM120S 2U12 LFF and DM600S 4U60 LFF: 10 °C - 40 °C (50 °F - 104 °F)
 - Non-operating: -40 °C - +70 °C (-40 °F - 158 °F)
 - Maximum altitude: 3050 m (10,000 ft)
- Relative humidity:
 - Operating: 8% - 90% (non-condensing)
 - Non-operating: 10% - 95% (non-condensing)
- Electrical power:
 - DM7000H
 - 100 to 127 (nominal) V AC; 50 Hz or 60 Hz; 6.69 A
 - 200 to 240 (nominal) V AC; 50 Hz or 60 Hz; 3.35 A
 - Maximum system power load: 636 W
 - DM240S 2U24 SFF
 - 100 to 127 (nominal) V AC; 50 Hz or 60 Hz; 4.11 A
 - 200 to 240 (nominal) V AC; 50 Hz or 60 Hz; 2.05 A
 - Maximum system power load: 390 W
 - DM120S 2U12 LFF
 - 100 to 127 (nominal) V AC; 50 Hz or 60 Hz; 3.56 A
 - 200 to 240 (nominal) V AC; 50 Hz or 60 Hz; 1.78 A
 - Maximum system power load: 338 W
 - DM600S 4U60 LFF
 - 200 to 240 (nominal) V AC; 50 Hz or 60 Hz; 8.11 A
 - Maximum system power load: 1541 W
- Heat dissipation:
 - DM7000H: 2170 BTU/hour
 - DM240S 2U24 SFF: 1331 BTU/hour
 - DM120S 2U12 LFF: 1153 BTU/hour
 - DM600S 4U60 LFF: 5258 BTU/hour
- Acoustical noise emission:
 - DM7000H: 7.8 bels
 - DM240S 2U24 SFF: 6.9 bels
 - DM120S 2U12 LFF: 6.3 bels
 - DM600S 4U60 SFF: 7.2 bels

Warranty and support

The DM7000H has a 1-year warranty and the expansion enclosures have a 1-year or 3-year warranty based on the machine type of the system, as listed in the following table.

Table 18. Duration of standard warranty

System	Machine type 1 year warranty
DM7000H Controller Enclosure	7Y56
DM120S 2U12 LFF Expansion Enclosure	7Y59
DM240S 2U24 SFF Expansion Enclosure	7Y58
DM600S 4U60 LFF Expansion Enclosure	7Y43

The standard warranty terms are customer-replaceable unit (CRU) and onsite (for field-replaceable units FRUs only) with standard call center support during normal business hours and 9x5 Next Business Day Parts Delivered.

Lenovo's additional support services provide a sophisticated, unified support structure for your data center, with an experience consistently ranked number one in customer satisfaction worldwide. Available offerings include:

- **Premier Support**

Premier Support provides a Lenovo-owned customer experience and delivers direct access to technicians skilled in hardware, software, and advanced troubleshooting, in addition to the following:

- Direct technician-to-technician access through a dedicated phone line
- 24x7x365 remote support
- Single point of contact service
- End to end case management
- Third-party collaborative software support
- Online case tools and live chat support
- On-demand remote system analysis

- **Warranty Upgrade (Preconfigured Support)**

Services are available to meet the on-site response time targets that match the criticality of your systems.

- 3, 4, or 5 years of service coverage
- 1-year or 2-year post-warranty extensions
- **Foundation Service:** 9x5 service coverage with next business day onsite response. YourDrive YourData is an optional extra (see below).
- **Essential Service:** 24x7 service coverage with 4-hour onsite response or 24-hour committed repair (available only in select markets). Bundled with YourDrive YourData.
- **Advanced Service:** 24x7 service coverage with 2-hour onsite response or 6-hour committed repair (available only in select markets). Bundled with YourDrive YourData.

- **Managed Services**

Lenovo Managed Services provides continuous 24x7 remote monitoring (plus 24x7 call center availability) and proactive management of your data center using state-of-the-art tools, systems, and practices by a team of highly skilled and experienced Lenovo services professionals.

Quarterly reviews check error logs, verify firmware & OS device driver levels, and software as needed. We'll also maintain records of latest patches, critical updates, and firmware levels, to ensure you systems are providing business value through optimized performance.

- **Technical Account Management (TAM)**

A Lenovo Technical Account Manager helps you optimize the operation of your data center based on a deep understanding of your business. You gain direct access to your Lenovo TAM, who serves as your single point of contact to expedite service requests, provide status updates, and furnish reports to track incidents over time. In addition, your TAM will help proactively make service recommendations and manage your service relationship with Lenovo to make certain your needs are met.

- **Enterprise Server Software Support**

Enterprise Software Support is an additional support service providing customers with software support on Microsoft, Red Hat, SUSE, and VMware applications and systems. Around the clock availability for critical problems plus unlimited calls and incidents helps customers address challenges fast, without incremental costs. Support staff can answer troubleshooting and diagnostic questions, address product comparability and interoperability issues, isolate causes of problems, report defects to software vendors, and more.

- **YourDrive YourData**

Lenovo's YourDrive YourData is a multi-drive retention offering that ensures your data is always under your control, regardless of the number of drives that are installed in your Lenovo server. In the unlikely event of a drive failure, you retain possession of your drive while Lenovo replaces the failed drive part. Your data stays safely on your premises, in your hands. The YourDrive YourData service can be purchased in convenient bundles and is optional with Foundation Service. It is bundled with Essential Service and Advanced Service.

- **Health Check**

Having a trusted partner who can perform regular and detailed health checks is central to maintaining efficiency and ensuring that your systems and business are always running at their best. Health Check supports Lenovo-branded server, storage, and networking devices, as well as select Lenovo-supported products from other vendors that are sold by Lenovo or a Lenovo-Authorized Reseller.

Examples of region-specific warranty terms are second or longer business day parts delivery or parts-only base warranty.

If warranty terms and conditions include onsite labor for repair or replacement of parts, Lenovo will dispatch a service technician to the customer site to perform the replacement. Onsite labor under base warranty is limited to labor for replacement of parts that have been determined to be field-replaceable units (FRUs). Parts that are determined to be customer-replaceable units (CRUs) do not include onsite labor under base warranty.

If warranty terms include parts-only base warranty, Lenovo is responsible for delivering only replacement parts that are under base warranty (including FRUs) that will be sent to a requested location for self-service. Parts-only service does not include a service technician being dispatched onsite. Parts must be changed at customer's own cost and labor and defective parts must be returned following the instructions supplied with the spare parts.

Lenovo Service offerings are region-specific. Not all preconfigured support and upgrade options are available in every region. For information about Lenovo service upgrade offerings that are available in your region, refer to the following resources:

- Service part numbers in Lenovo Data Center Solution Configurator (DCSC):

Services

Lenovo Services is a dedicated partner to customer success. Lenovo's goal for customers is to reduce capital outlays, mitigate IT risks, and accelerate time to productivity.

Here is a more in-depth look at what Lenovo can do for their customers:

- **Asset Recovery Services**

Asset Recovery Services (ARS) helps customers recover the maximum value from their end-of-life equipment in a cost-effective and secure way. On top of simplifying the transition from old to new equipment, ARS mitigates environmental and data security risks associated with data center equipment disposal. Lenovo ARS is a cash-back solution for equipment based on its remaining market value, yielding maximum value from aging assets and lowering total cost of ownership for customers.

- **Assessment Services**

An assessment helps solve customer IT challenges through an onsite, multi-day session with a Lenovo technology expert. Lenovo performs a tools-based assessment which provides a comprehensive and thorough review of a company's environment and technology systems. In addition to the technology-based functional requirements, the consultant also discusses and records the non-functional business requirements, challenges, and constraints. Assessments help organizations, no matter how large or small, get a better return on their IT investment and overcome challenges in the ever-changing technology landscape.

- **Design Services**

Professional Services consultants perform infrastructure design and implementation planning to support customer's strategy. The high-level architectures provided by the assessment service are turned into low level designs and wiring diagrams, which are reviewed and approved prior to implementation. The implementation plan will demonstrate an outcome-based proposal to provide business capabilities through infrastructure with a risk-mitigated project plan.

- **Basic Hardware Installation**

Lenovo experts can seamlessly manage the physical installation of customer's server, storage, or networking hardware. Working at a time convenient for the customer (business hours or off shift), the technician will unpack and inspect the systems on customer site, install options, mount in a rack cabinet, connect to power and network, check and update firmware to the latest levels, verify operation, and dispose of the packaging, allowing customers to focus on other priorities.

- **Deployment Services**

When investing in new IT infrastructures, customers need to ensure that their business will see quick time to value with little to no disruption. Lenovo deployments are designed by development and engineering teams who know Lenovo products and solutions better than anyone else, and Lenovo technicians own the process from delivery to completion. Lenovo will conduct remote preparation and planning, configure and integrate systems, validate systems, verify and update appliance firmware, train on administrative tasks, and provide post-deployment documentation. Customer's IT teams leverage Lenovo skills to enable IT staff to transform with higher level roles and tasks.

- **Integration, Migration, and Expansion Services**

Integration, Migration, and Expansion Services allow to move existing physical and virtual workloads easily, or to determine technical requirements to support increased workloads while maximizing performance. These services include tuning, validation, and documenting ongoing run processes, and they leverage migration assessment planning documents to perform necessary migrations.

Some service options may not be available in every region. For more information about Lenovo service offerings that are available in a specific region, contact a local Lenovo sales representative or business partner.

Regulatory compliance

The ThinkSystem DM Series enclosures conform to the following regulations:

- United States: FCC Part 15, Class A; UL 60950-1
- Canada: ICES-003, Class A; CAN/CSA-C22.2 60950-1
- Mexico NOM
- European Union: CE Mark (EN55032 Class A, EN55024, IEC/EN60950-1); ROHS Directive 2011/65/EU
- Russia, Kazakhstan, Belarus: EAC
- China: CCC GB 4943.1, GB 17625.1, GB 9254 Class A; CELP; CECP
- Japan: VCCI, Class A
- Taiwan: BSMI CNS 13438, Class A; CNS 14336-1
- Korea KN32/35, Class A
- Australia/New Zealand: AS/NZS CISPR 22 Class A

Interoperability

Lenovo provides end-to-end storage compatibility testing to deliver interoperability throughout the network. The ThinkSystem DM7000H Unified Hybrid Storage Array supports attachment to Lenovo servers by using NAS (NFS and CIFS/SMB), iSCSI, and Fibre Channel storage connectivity protocols.

The following sections list adapters and Ethernet LAN and FC SAN switches that are currently offered by Lenovo that can be used with the ThinkSystem DM7000H Hybrid Storage Array in IT solutions:

- [Adapters](#)
- [Cluster interconnect](#)
- [Ethernet LAN switches](#)
- [Fibre Channel SAN switches](#)

Note: Tables that are provided in these sections are for ordering reference purposes only.

For end-to-end storage configuration support, refer to the Lenovo Storage Interoperation Center (LSIC): <https://datacentersupport.lenovo.com/us/en/lxic>

Use the LSIC to select the known components of your configuration and then get a list all other supported combinations, with details about supported hardware, firmware, operating systems, and drivers, plus any additional configuration notes. View results on screen or export them to Excel.

Adapters

This section lists the adapters for the following types of storage connectivity:

- NAS and iSCSI connectivity
- Fibre Channel connectivity

NAS and iSCSI connectivity

The ThinkSystem DM7000H supports NAS and iSCSI attachments via standard 1 Gb, 10 Gb, and 40 Gb Ethernet connections (direct attach or switch-based). Any compatible Ethernet switch, including Lenovo ThinkSystem and RackSwitch Ethernet switches and embedded Flex System Ethernet I/O modules, can be used to provide NAS and iSCSI connectivity for the ThinkSystem DM7000H storage.

With software iSCSI initiators, any supported 1 Gb, 10 Gb, or 40 Gb Ethernet adapter for Lenovo servers is compatible with the ThinkSystem DM7000H NAS and iSCSI storage.

Fibre Channel connectivity

The ThinkSystem DM7000H supports FC switch-based attachments. Lenovo B Series and DB Series FC SAN switches and directors can be used to provide FC connectivity.

Currently available FC adapters for Lenovo servers that are compatible with the ThinkSystem DM7000H FC storage are listed in the following table. Other FC HBAs also might be supported (see the Interoperability Matrix for details).

Table 19. Fibre Channel adapters

Description	Part number
ThinkSystem HBAs: 32 Gb FC (8/16/32 Gb FC connectivity)	
ThinkSystem Emulex LPe35000 32Gb 1-port PCIe Fibre Channel Adapter	4XC7A08250
ThinkSystem Emulex LPe35002 32Gb 2-port PCIe Fibre Channel Adapter	4XC7A08251
ThinkSystem Emulex LPe32000-M6-LP PCIe 32Gb 1-Port SFP+ Fibre Channel Adapter	7ZT7A00517
ThinkSystem Emulex LPe32002-M6-LP PCIe 32Gb 2-Port SFP+ Fibre Channel Adapter	7ZT7A00519
ThinkSystem QLogic QLE2740 PCIe 32Gb 1-Port SFP+ Fibre Channel Adapter	7ZT7A00516
ThinkSystem QLogic QLE2742 PCIe 32Gb 2-Port SFP+ Fibre Channel Adapter	7ZT7A00518
System x HBAs: 16 Gb FC	
Emulex 16Gb Gen6 FC Single-port HBA (LPe31000)	01CV830
Emulex 16Gb Gen6 FC Dual-port HBA (LPe31002)	01CV840
Emulex 16Gb FC Single-port HBA (LPe16000)	81Y1655
Emulex 16Gb FC Dual-port HBA (LPe16002)	81Y1662
QLogic 16Gb Enhanced Gen5 FC Single-port HBA (QLE2690)	01CV750
QLogic 16Gb Enhanced Gen5 FC Dual-port HBA (QLE2692)	01CV760
QLogic 16Gb FC Single-port HBA (QLE2660)	00Y3337
QLogic 16Gb FC Dual-port HBA (QLE2662)	00Y3341
Flex System HBAs: 16 Gb FC	
ThinkSystem Emulex LPm16002B-L Mezz 16Gb 2-Port Fibre Channel Adapter	7ZT7A00521
ThinkSystem Emulex LPm16004B-L Mezz 16Gb 4-Port Fibre Channel Adapter	7ZT7A00522
ThinkSystem QLogic QML2692 Mezz 16Gb 2-Port Fibre Channel Adapter	7ZT7A00520
Flex System FC5052 2-port 16Gb FC Adapter	95Y2386
Flex System FC5054 4-port 16Gb FC Adapter	95Y2391

Description	Part number
Flex System FC5172 2-port 16Gb FC Adapter	69Y1942

Cluster interconnect

The following table lists the Ethernet storage switch that can be used with the ThinkSystem DM7000H Unified Hybrid Storage Array for cluster interconnect and MetroCluster IP configurations.

Table 20. Ethernet storage switch

Description	Part number
BES-53248 Ethernet Storage Switch: 16x SFP ports and 2x QSFP ports active, 2 PS (CTO only)	7D2SCTO1WW

For more information, see the BES-53248 Ethernet Storage Switch for Lenovo Product Guide:
<http://lenovopress.com/lp1226>

Ethernet LAN switches

The following table lists currently available rack-mount Ethernet switches that are currently offered by Lenovo that can be used with the ThinkSystem DM7000H Unified Hybrid Storage Array in IT solutions.

Table 21. Ethernet rack-mount switches

Description	Part number
1 Gb Ethernet (1 GbE connectivity; NAS and iSCSI)	
Lenovo ThinkSystem NE0152T RackSwitch (Rear to Front)	7Y810011WW
Lenovo ThinkSystem NE0152TO RackSwitch (Rear to Front, ONIE)	7Z320011WW
Lenovo RackSwitch G7028 (Rear to Front)	7159BAX
Lenovo RackSwitch G7052 (Rear to Front)	7159CAX
Lenovo CE0128TB Switch (3-Year Warranty)	7Z340011WW
Lenovo CE0128TB Switch (Limited Lifetime Warranty)	7Z360011WW
Lenovo CE0128PB Switch (3-Year Warranty)	7Z340012WW
Lenovo CE0128PB Switch (Limited Lifetime Warranty)	7Z360012WW
Lenovo CE0152TB Switch (3-Year Warranty)	7Z350021WW
Lenovo CE0152TB Switch (Limited Lifetime Warranty)	7Z370021WW
Lenovo CE0152PB Switch (3-Year Warranty)	7Z350022WW
Lenovo CE0152PB Switch (Limited Lifetime Warranty)	7Z370022WW
10 Gb Ethernet (10 GbE connectivity; NAS and iSCSI)	
Lenovo ThinkSystem NE1032 RackSwitch (Rear to Front)	7159A1X
Lenovo ThinkSystem NE1032T RackSwitch (Rear to Front)	7159B1X
Lenovo ThinkSystem NE1064TO RackSwitch (Rear to Front, ONIE)	7Z330011WW
Lenovo ThinkSystem NE1072T RackSwitch (Rear to Front)	7159C1X
Lenovo RackSwitch G8272 (Rear to Front)	7159CRW
25 Gb Ethernet (10/25 GbE connectivity out of an SFP28 port; NAS and iSCSI)	
Lenovo ThinkSystem NE2572 RackSwitch (Rear to Front)	7159E1X
Lenovo ThinkSystem NE2572O RackSwitch (Rear to Front, ONIE)	7Z210021WW
Lenovo ThinkSystem NE2580O RackSwitch (Rear to Front, ONIE)	7Z330021WW
100 Gb Ethernet (1x 40 GbE or 4x 10/25 GbE breakout connectivity out of a QSFP28 port; NAS and iSCSI)	

Description	Part number
Lenovo ThinkSystem NE10032 RackSwitch (Rear to Front)	7159D1X
Lenovo ThinkSystem NE10032O RackSwitch (Rear to Front, ONIE)	7Z210O11WW

For more information, see the list of Product Guides in the Top-of-rack Switches category:
<http://lenovopress.com/servers/options/switches#rt=product-guide>

The following table lists currently available embedded Ethernet switches and pass-thru modules for Flex System that can be used with the ThinkSystem DM7000H Unified Hybrid Storage Array in IT solutions.

Table 22. Embedded Ethernet switches for Flex System

Description	Part number
10 Gb Ethernet (10 GbE connectivity; NAS and iSCSI)	
Lenovo Flex System Fabric EN4093R 10Gb Scalable Switch	00FM514
Lenovo Flex System SI4091 10Gb System Interconnect Module	00FE327
Lenovo Flex System Fabric SI4093 System Interconnect Module	00FM518
25 Gb Ethernet (10/25 GbE connectivity out of an SFP28 port; NAS and iSCSI)	
Lenovo ThinkSystem NE2552E Flex Switch	4SG7A08868
Pass-thru modules (10 GbE connectivity [require a compatible external switch]; NAS and iSCSI)	
Lenovo Flex System EN4091 10Gb Ethernet Pass-thru	88Y6043

For more information, see the list of Product Guides in the Blade Network Modules category:
<http://lenovopress.com/servers/blades/networkmodule#rt=product-guide>

Fibre Channel SAN switches

Lenovo offers the ThinkSystem DB Series of Fibre Channel SAN switches for high-performance storage expansion. See the DB Series product guides for models and configuration options:

- ThinkSystem DB Series SAN Switches:
<https://lenovopress.com/storage/switches/rack#rt=product-guide>

Rack cabinets

The following table lists the supported rack cabinets.

Table 23. Rack cabinets

Part number	Description
93072RX	25U Standard Rack (1000mm)
93072PX	25U Static S2 Standard Rack (1000mm)
7D6DA007WW	ThinkSystem 42U Onyx Primary Heavy Duty Rack Cabinet (1200mm)
7D6DA008WW	ThinkSystem 42U Pearl Primary Heavy Duty Rack Cabinet (1200mm)
1410-O42	Lenovo EveryScale 42U Onyx Heavy Duty Rack Cabinet
1410-P42	Lenovo EveryScale 42U Pearl Heavy Duty Rack Cabinet
93604PX	42U 1200mm Deep Dynamic Rack
93614PX	42U 1200mm Deep Static Rack
93634PX	42U 1100mm Dynamic Rack
93634EX	42U 1100mm Dynamic Expansion Rack
93074RX	42U Standard Rack (1000mm)
7D6EA009WW	ThinkSystem 48U Onyx Primary Heavy Duty Rack Cabinet (1200mm)
7D6EA00AWW	ThinkSystem 48U Pearl Primary Heavy Duty Rack Cabinet (1200mm)
1410-O48	Lenovo EveryScale 48U Onyx Heavy Duty Rack Cabinet
1410-P48	Lenovo EveryScale 48U Pearl Heavy Duty Rack Cabinet

For specifications about these racks, see the Lenovo Rack Cabinet Reference, available from: <https://lenovopress.com/lp1287-lenovo-rack-cabinet-reference>

For more information, see the list of Product Guides in the Rack cabinets category: <https://lenovopress.com/servers/options/racks>

Power distribution units

The following table lists the power distribution units (PDUs) that are offered by Lenovo.

Table 24. Power distribution units

Uninterruptible power supply units

The following table lists the uninterruptible power supply (UPS) units that are offered by Lenovo.

Table 25. Uninterruptible power supply units

Part number	Description
55941AX	RT1.5kVA 2U Rack or Tower UPS (100-125VAC)
55941KX	RT1.5kVA 2U Rack or Tower UPS (200-240VAC)
55942AX	RT2.2kVA 2U Rack or Tower UPS (100-125VAC)
55942KX	RT2.2kVA 2U Rack or Tower UPS (200-240VAC)
55943AX	RT3kVA 2U Rack or Tower UPS (100-125VAC)
55943KX	RT3kVA 2U Rack or Tower UPS (200-240VAC)
55945KX	RT5kVA 3U Rack or Tower UPS (200-240VAC)
55946KX	RT6kVA 3U Rack or Tower UPS (200-240VAC)
55948KX	RT8kVA 6U Rack or Tower UPS (200-240VAC)
55949KX	RT11kVA 6U Rack or Tower UPS (200-240VAC)
55948PX	RT8kVA 6U 3:1 Phase Rack or Tower UPS (380-415VAC)
55949PX	RT11kVA 6U 3:1 Phase Rack or Tower UPS (380-415VAC)
55943KT†	ThinkSystem RT3kVA 2U Standard UPS (200-230VAC) (2x C13 10A, 2x GB 10A, 1x C19 16A outlets)
55943LT†	ThinkSystem RT3kVA 2U Long Backup UPS (200-230VAC) (2x C13 10A, 2x GB 10A, 1x C19 16A outlets)
55946KT†	ThinkSystem RT6kVA 5U UPS (200-230VAC) (2x C13 10A outlets, 1x Terminal Block output)
5594XKT†	ThinkSystem RT10kVA 5U UPS (200-230VAC) (2x C13 10A outlets, 1x Terminal Block output)

† Only available in China and the Asia Pacific market.

Lenovo Financial Services

Lenovo Financial Services reinforces Lenovo's commitment to deliver pioneering products and services that are recognized for their quality, excellence, and trustworthiness. Lenovo Financial Services offers financing solutions and services that complement your technology solution anywhere in the world.

We are dedicated to delivering a positive finance experience for customers like you who want to maximize your purchase power by obtaining the technology you need today, protect against technology obsolescence, and preserve your capital for other uses.

We work with businesses, non-profit organizations, governments and educational institutions to finance their entire technology solution. We focus on making it easy to do business with us. Our highly experienced team of finance professionals operates in a work culture that emphasizes the importance of providing outstanding customer service. Our systems, processes and flexible policies support our goal of providing customers with a positive experience.

We finance your entire solution. Unlike others, we allow you to bundle everything you need from hardware and software to service contracts, installation costs, training fees, and sales tax. If you decide weeks or months later to add to your solution, we can consolidate everything into a single invoice.

Our Premier Client services provide large accounts with special handling services to ensure these complex transactions are serviced properly. As a premier client, you have a dedicated finance specialist who manages your account through its life, from first invoice through asset return or purchase. This specialist develops an in-depth understanding of your invoice and payment requirements. For you, this dedication provides a high-quality, easy, and positive financing experience.

For your region-specific offers, please ask your Lenovo sales representative or your technology provider about the use of Lenovo Financial Services. For more information, see the following Lenovo website:

<https://www.lenovo.com/us/en/landingpage/lenovo-financial-services/>

LENOVO PROVIDES THIS PUBLICATION "AS IS" WITHOUT WARRANTY OF ANY KIND, EITHER EXPRESS OR IMPLIED, INCLUDING, BUT NOT LIMITED TO, THE IMPLIED WARRANTIES OF NON-INFRINGEMENT, MERCHANTABILITY OR FITNESS FOR A PARTICULAR PURPOSE. Some jurisdictions do not allow disclaimer of express or implied warranties in certain transactions, therefore, this statement may not apply to you.

This information could include technical inaccuracies or typographical errors. Changes are periodically made to the information herein; these changes will be incorporated in new editions of the publication. Lenovo may make improvements and/or changes in the product(s) and/or the program(s) described in this publication at any time without notice.

The products described in this document are not intended for use in implantation or other life support applications where malfunction may result in injury or death to persons. The information contained in this document does not affect or change Lenovo product specifications or warranties. Nothing in this document shall operate as an express or implied license or indemnity under the intellectual property rights of Lenovo or third parties. All information contained in this document was obtained in specific environments and is presented as an illustration. The result obtained in other operating environments may vary. Lenovo may use or distribute any of the information you supply in any way it believes appropriate without incurring any obligation to you.

Any references in this publication to non-Lenovo Web sites are provided for convenience only and do not in any manner serve as an endorsement of those Web sites. The materials at those Web sites are not part of the materials for this Lenovo product, and use of those Web sites is at your own risk. Any performance data contained herein was determined in a controlled environment. Therefore, the result obtained in other operating environments may vary significantly. Some measurements may have been made on development-level systems and there is no guarantee that these measurements will be the same on generally available systems. Furthermore, some measurements may have been estimated through extrapolation. Actual results may vary. Users of this document should verify the applicable data for their specific environment.
