

Lenovo ThinkAgile HX7820 Appliance for SAP HANA (Xeon SP Gen 1)

Product Guide (withdrawn product)

Lenovo ThinkAgile HX Series appliances combine industry-leading hyperconvergence software from Nutanix with Lenovo enterprise platforms that feature Intel Xeon Processor Scalable family. These appliances deliver the industry's most feature-rich hyperconverged infrastructure to enterprise datacenters, bringing the benefits of web-scale technologies to enterprise applications through enterprise storage, data protection, infrastructure resilience, management and analytics, and security.

The ThinkAgile HX7820 for SAP HANA is a 4U rack-mount appliance that supports four processors, up to 6 TB of 2666 MHz TruDDR4 memory, up to 24 drives for all flash storage capacity with optional NVMe PCIe cache acceleration, and flexible network connectivity options with 1/10 GbE RJ-45, 10 GbE SFP+, and 10/25 GbE SFP28 ports.

The ThinkAgile HX7820 Appliance for SAP HANA is certified by SAP for deploying SAP HANA solutions on hyperconverged infrastructure (HCI) in production environments.

The ThinkAgile HX7820 Appliance for SAP HANA is shown in the following figure.

Figure 1. Lenovo ThinkAgile HX7820 Appliance for SAP HANA

Did you know?

The ThinkAgile HX Series appliances are built on industry-leading Lenovo ThinkSystem servers that feature enterprise-class reliability, management, and security.

The ThinkAgile HX Series appliances offer ThinkAgile Advantage Single Point of Support for quick 24/7 problem reporting and resolution.

Key features

The ThinkAgile HX Series Appliances for SAP HANA offer the following key features:

- Certified to run SAP HANA in production on hyperconverged infrastructure.
- Factory-integrated, pre-configured ready-to-go appliances built on proven and reliable Lenovo ThinkSystem servers that provide compute power for SAP HANA workloads and powered by industry's most feature-rich hyperconverged infrastructure software from Nutanix.
- Provide quick and convenient path to implement a hyperconverged solution powered by Nutanix with "one stop shop" and a single point of contact provided by Lenovo for purchasing, deploying, and supporting the solution.
- Meet workload demands with performance-optimized all-flash storage configurations.
- Deliver fully validated and integrated hardware and firmware that is certified with Nutanix software.
- Include Lenovo ThinkAgile Advantage Single Point of Support for quick 24/7 problem reporting and resolution.
- Offer Lenovo deployment services to get customers up and running quickly.

The Nutanix software running on the HX Series appliances deliver the following key features:

- A natively integrated solution for data protection and continuous availability at VM granularity that gives administrators an affordable range of options to meet the recovery point objectives (RPO) and recovery time objectives (RTO) for different applications.
- A fault resistant platform, with no single point of failure and no bottlenecks with shared-nothing architecture, where all data, metadata and services are distributed to all nodes within the cluster, that is built to detect, isolate and recover from failures anywhere in the system.
- An intuitive user-centric management experience to simplify every aspect of the IT infrastructure lifecycle and provide a single pane of glass to monitor and control Nutanix clusters, with simplified workflows and rich automation for common administrative tasks.
- Powerful security features, such as two-factor authentication and data-at-rest encryption, with a security development lifecycle that is integrated into product development to help customers meet the most stringent security requirements.

Components and connectors

The following figure shows the front view of the HX7820 Appliance for SAP HANA.

Figure 2. HX7820 for SAP HANA front view

The front of the HX7820 Appliance for SAP HANA includes the following components:

- 16x SAS/SATA and 8x AnyBay SFF hot-swap drive bays
- One VGA port
- One USB 2.0 port with XClarity Controller access
- One USB 2.0 port
- A power button
- Status LEDs
- A Pull-out LCD panel

The following figure shows the rear view of the HX7820 Appliance for SAP HANA.

Figure 3. HX7820 for SAP HANA rear view

The rear of the HX7820 Appliance for SAP HANA includes the following components:

- I/O Tray:
 - Three PCIe slots
 - One ML2 slot
 - One LOM card slot
- One 1 GbE port for XClarity Controller
- One DB-9 serial port
- Two USB 3.0 ports
- One VGA port
- Four hot-swap power supplies

System specifications

The following table lists the system specifications of the ThinkAgile HX7820 Appliances for SAP HANA.

Table 1. HX7820 for SAP HANA system specifications

Attribute	Specification
Form factor	4U Rack-mount.
Processor	Two or four Intel Xeon Gold or Platinum processors.
Chipset	Intel C624.
Memory	Up to 48 DIMMs. Support for 16 GB and 32 GB TruDDR4 2666 MHz RDIMMs, 64 GB TruDDR4 2666 MHz LRDIMMs, or 64 GB and 128 GB TruDDR4 2666 MHz 3DS RDIMMs.
Memory capacity	Up to 6 TB.
Memory protection	Error correction code (ECC), Single Device Data Correction (SDDC; for x4-based memory DIMMs), Adaptive Double Device Data Correction (ADDDC; for x4-based memory DIMMs), patrol scrubbing, and demand scrubbing.
Drive bays	16x SAS/SATA and 8x AnyBay SFF hot-swap.

Attribute	Specification
Internal storage	<ul style="list-style-type: none"> No cache drives (NVMe PCIe SSDs) and from 8 to 24 capacity drives (SAS or SATA SSDs) in increments of 2 drives; or 2 cache drives (NVMe PCIe SSDs) and from 4 to 6 capacity drives in increments of 2 drives; or 4 cache drives (NVMe PCIe SSDs) and from 8 to 20 capacity drives in increments of 2 drives.
Drive capacities	<ul style="list-style-type: none"> Cache drives (NVMe PCIe 3.0 x4 SSDs): 1.6 TB. Capacity drives: <ul style="list-style-type: none"> 12 Gbps SAS SSDs: 800 GB, 1.6 TB, 3.84 TB. 6 Gbps SATA SSDs: 480 GB, 960 GB, 1.92 TB, 3.84 TB. <p>Note: All cache drives in the appliance must be of the same model and capacity. All capacity drives in the appliance must be of the same type and capacity.</p>
Maximum storage capacity	Up to 92 TB (24x 3.84 TB SSDs).
Storage controller	2x 430-16i HBAs (12 Gbps SAS/6 Gbps SATA; non-RAID). Onboard NVMe (non-RAID).
Network interfaces	<ul style="list-style-type: none"> 2x or 4x base 1/10 GbE RJ-45 or 10 GbE SFP+ network ports. 2x or 4x additional 10/25 GbE SFP28 network ports.
Boot drive	2x M.2 non-hot-swap SSDs up to 480 GB (RAID-1).
I/O expansion slots	Seven I/O expansion slots: <ul style="list-style-type: none"> I/O Tray: <ul style="list-style-type: none"> Slot 5: PCIe 3.0 x16; low profile (for a network adapter). Slot 6: PCIe 3.0 x16; low profile (for a network adapter). Slot 7: PCIe 3.0 x8; low profile (not used). Slot 8: ML2 x16; low profile (not used). Slot 9: LOM Card slot (PCIe 3.0 x8 interface). Compute tray: Internal PCIe 3.0 x8 (for an internal storage controller). Storage tray: Internal PCIe 3.0 x8 (for an internal storage controller).
Ports	<ul style="list-style-type: none"> Front: 1x USB 2.0 port with XClarity Controller access, 1x USB 2.0 port, 1x VGA port. Rear: 2x USB 3.0 ports, 1x VGA port, 1x DB-9 serial port, 1x RJ-45 10/100/1000 Mb Ethernet port for systems management.
Cooling	Six hot-swap fans with N+1 redundancy in the compute tray.
Power supply	Four redundant hot-swap 1600 W (100 - 240 V) High Efficiency power supplies (80 PLUS Platinum certified).
Video	Matrox G200 with 16 MB memory integrated into the XClarity Controller. Maximum resolution is 1920x1200 at 60 Hz with 32 bits per pixel.
Hot-swap parts	SSDs and HDDs, power supplies, and fans.
Systems management	XClarity Controller (XCC) Enterprise (Pilot 4 chip), proactive platform alerts, light path diagnostics, XClarity Provisioning Manager, XClarity Administrator and XClarity Pro. XClarity Energy Manager (optional).
Security features	Power-on password, administrator's password, secure firmware updates, Trusted Platform Module (TPM) 1.2 or 2.0 (configurable UEFI setting).
Software	Nutanix Acropolis: Starter, Pro, and Ultimate editions. Nutanix Prism, Nutanix Calm (optional), Nutanix Flow (optional). SAP HANA (licenses are purchased separately from SAP; deployed at the customer site by Lenovo Professional Services).
Hypervisors	Nutanix Acropolis Hypervisor (factory preload).
Hardware warranty	Three-, four-, or five-year customer-replaceable unit and onsite limited hardware warranty with ThinkAgile Advantage Support and selectable service levels: 9x5 next business day (NBD) parts delivered, 9x5 NBD onsite response, 24x7 coverage with 2-hour or 4-hour onsite response, or 6-hour or 24-hour committed repair (select areas). Also available are YourDrive YourData, Premier Support, and Enterprise Software Support.

Attribute	Specification
Software maintenance	Three-, four-, or five-year software support and subscription (matches the duration of the selected warranty period).
Dimensions	Height: 173 mm (6.8 in.), width: 447 mm (17.6 in.), depth: 800 mm (31.5 in.)
Weight	Maximum configuration: 58.7 kg (129.4 lb)

Factory-integrated models

Product availability: The ThinkAgile HX7820 Appliances for SAP HANA that use the first generation of the Intel Xeon Processor Scalable Family are withdrawn and no longer available for ordering. For currently available ThinkAgile HX7820 Appliances for SAP HANA that use the second generation of the Intel Xeon Processor Scalable Family, refer to the Lenovo ThinkAgile HX7820 Appliance for SAP HANA (Xeon SP Gen 2) product guide:

<http://lenovopress.com/lp1249>

Factory-integrated models of the ThinkAgile HX Series appliances are configured by using the Lenovo Data Center Solution Configurator (DCSC):

<http://dcsc.lenovo.com>

During the configuration process, you are selecting one of the base Configure-to-Order (CTO) models first, and then you are adding components (processors, memory, drives, and network adapters) to the selected model according to the output from the Nutanix Sizer tool:

<http://services.nutanix.com/>

Note: You are required to engage a Lenovo representative in the project that includes the ThinkAgile HX Series appliances.

The following table lists the base CTO model of the ThinkAgile HX7820 Appliance for SAP HANA.

Table 2. Base CTO model

Description	Machine Type/Model
ThinkAgile HX7820 Appliance for SAP HANA	7Z08CTO1WW

The following table lists the base chassis for the HX7820 appliance.

Table 3. Base chassis

Description	Feature code
ThinkAgile HX782x Base	B4EE

The HX7820 Appliances for SAP HANA ship with the following items:

- *Electronic Publications Flyer*
- Fixed Rail Kit
- Four customer-selected power cables

Memory

The ThinkAgile HX7820 Appliances for SAP HANA support Lenovo TruDDR4 memory. TruDDR4 memory uses the highest-quality components sourced from Tier 1 DRAM suppliers and only memory that meets strict requirements is selected. It is compatibility tested and tuned to maximize performance and reliability.

The ThinkAgile HX7820 Appliances for SAP HANA support 24 or 48 DIMMs. Each processor has six memory channels, and there are two DIMMs per channel.

The following rules apply when selecting the memory configuration:

- The appliance supports RDIMMs, LRDIMMs, or 3DS RDIMMs.
- All DIMMs in the appliance must be of the same type (RDIMMs, LRDIMMs, or 3DS RDIMMs).
- All DIMMs in the appliance operate at the same speed up to 2666 MHz, which is determined by the maximum memory speed supported by the specific processor.
Note: Maximum memory speed can be achieved when Max performance mode is enabled in UEFI.
- The following maximum memory capacities are supported by the appliance:
 - RDIMMs: 768 GB.
 - LRDIMMs: 3 TB.
 - 3DS RDIMMs: 6 TB.

The following memory protection technologies are supported:

- ECC
- SDDC (for x4-based memory DIMMs)
- ADDDC (for x4-based memory DIMMs)
- Patrol scrubbing
- Demand scrubbing

The following table lists memory selection options available for the HX7820 Appliance for SAP HANA.

Table 4. Memory selection options

Description	Part number	Feature code	Quantity									
			192 GB	384 GB	576 GB*	768 GB	1.125 TB**	1.5 TB	2.25 TB	3 TB**	4.5 TB**	6 TB**
ThinkSystem 2666 MHz RDIMMs												
16GB TruDDR4 2666 MHz (2Rx8 1.2V) RDIMM	7X77A01303	AUNC	12	24	12	-	24	-	-	-	-	-
32GB TruDDR4 2666 MHz (2Rx4 1.2V) RDIMM	7X77A01304	AUND	-	12	12	24	24	48**	-	-	-	-
ThinkSystem 2666 MHz LRDIMMs												
64GB TruDDR4 2666 MHz (4Rx4 1.2V) LRDIMM	7X77A01305	AUNE	-	-	-	12	-	24	-	48	-	-
ThinkSystem 2666 MHz 3DS RDIMMs												
64GB TruDDR4 2666MHz (4Rx4, 1.2V) 3DS RDIMM	4ZC7A08716	AUW5	-	-	-	-	-	-	12	48	24	-
128GB TruDDR4 2666 MHz (8Rx4 1.2V) 3DS RDIMM	7X77A01307	AUNF	-	-	-	-	-	12	12	24	24	48

* Available only in the configurations with two processors.
 ** Available only in the configurations with four processors.

It is possible to expand memory capacity after the initial deployment by adding more memory DIMMs to match one of the supported memory configurations.

Internal storage

The ThinkAgile HX7820 Appliance for SAP HANA provides 16x SAS/SATA and 8x AnyBay SFF hot-swap drive bays for configurable storage capacity, and it contains two internal M.2 SATA non-hot-swap SSDs configured in a RAID-1 drive group for software preload.

The following table lists the internal storage options for the HX7820 Appliance for SAP HANA.

Table 5. Internal storage options

Description	Feature code	Quantity
Backplanes		
ThinkSystem 2.5" SAS/SATA 2x2 Bay Backplane Kit	AUN6	2

Description	Feature code	Quantity
ThinkSystem 2.5" SAS/SATA/NVMe 2x2 Bay Backplane Kit	AUN5	4
M.2 enablement kit		
ThinkSystem M.2 with Mirroring Enablement Kit	AUMV	1

Configuration notes:

- Two SAS/SATA backplanes, four AnyBay (SAS/SATA/NVMe) backplanes, and one M.2 with Mirroring Enablement Kit are derived by the configurator.
- The M.2 with Mirroring Enablement Kit is connected to the Intel PCH via the PCIe link, and the kit supports two M.2 SATA SSDs configured in a RAID-1 drive group for software preload.

The following table lists M.2 drives for software preload.

Table 6. Drives for software preload

Description	Feature code	Quantity
ThinkSystem M.2 128GB SATA 6Gbps Non-Hot-Swap SSD	AUUV	2
ThinkSystem M.2 5100 240GB SATA 6Gbps Non-Hot Swap SSD	B5S4	2
ThinkSystem M.2 5300 240GB SATA 6Gbps Non-Hot Swap SSD	B8HS	2
ThinkSystem M.2 5100 480GB SATA 6Gbps Non-Hot-Swap SSD	B11V	2
ThinkSystem M.2 5300 480GB SATA 6Gbps Non-Hot Swap SSD	B919	2

Configuration note: Two M.2 SATA SSDs are required for selection, and they must be of the same model and capacity.

The following table lists the controllers for internal storage of the HX7820 Appliance for SAP HANA.

Table 7. Controllers for internal storage

Description	Feature code	Quantity
ThinkSystem 430-16i SAS/SATA 12Gb HBA (non-RAID)	AUNM	2

Configuration notes:

- Two low profile SAS HBAs for internal storage provide 12 Gbps SAS JBOD (non-RAID) connectivity to the capacity SDDs; the SAS HBAs derived by the configurator, and they occupy the dedicated PCIe x8 slots on the compute and storage trays.
- The onboard NVMe interfaces provide PCIe 3.0 x4 JBOD (non-RAID) connectivity to the U.2 NVMe PCIe cache SSDs in the AnyBay drive bays.

Drives for internal storage

The following tables list the drive selection options.

Table 8. Drive selection options

Description	Part number	Feature code	Quantity (min / max)
Cache tier: NVMe PCIe 3.0 x4 SSDs			
ThinkSystem U.2 Intel P4600 1.6TB Mainstream NVMe PCIe 3.0 x4 Hot Swap SSD	7SD7A05772	B11J	0 / 4
Capacity tier: 12 Gbps SAS SSDs - PM1633a			
ThinkSystem 2.5" PM1633a 3.84TB Capacity SAS 12Gb Hot Swap SSD	7N47A00121	AUMK	4 / 24
Capacity tier: 12 Gbps SAS SSDs - PM1635a			
ThinkSystem 2.5" PM1635a 1.6TB Mainstream SAS 12Gb Hot Swap SSD	7N47A00119	AVRG	4 / 24
Capacity tier: 12 Gbps SAS SSDs - PM1643			
ThinkSystem 2.5" PM1643 3.84TB Capacity SAS 12Gb Hot Swap SSD	4XB7A13645	B4A7	4 / 24
Capacity tier: 12 Gbps SAS SSDs - PM1645			
ThinkSystem 2.5" PM1645 800GB Mainstream SAS 12Gb Hot Swap SSD	4XB7A13653	B4A0	4 / 24
ThinkSystem 2.5" PM1645 1.6TB Mainstream SAS 12Gb Hot Swap SSD	4XB7A13654	B4A1	4 / 24
Capacity tier: SATA 6Gb SSDs - S4610			
ThinkSystem 2.5" Intel S4610 480GB Mainstream SATA 6Gb Hot Swap SSD	4XB7A13634	B49M	4 / 24
ThinkSystem 2.5" Intel S4610 960GB Mainstream SATA 6Gb Hot Swap SSD	4XB7A13635	B49N	4 / 24
ThinkSystem 2.5" Intel S4610 1.92TB Mainstream SATA 6Gb Hot Swap SSD	4XB7A13636	B49P	4 / 24
Capacity tier: SATA 6Gb SSDs - PM883			
ThinkSystem 2.5" PM883 1.92TB Entry SATA 6Gb Hot Swap SSD	4XB7A10198	B34L	4 / 24
ThinkSystem 2.5" PM883 3.84TB Entry SATA 6Gb Hot Swap SSD	4XB7A10199	B34M	4 / 24

Configuration notes:

- For All Flash configurations, the HX7820 Appliance for SAP HANA supports from 4 to 24 capacity drives (SAS or SATA SSDs) depending on the quantity of the cache drives (NVMe PCIe SSDs):
 - No cache drives: From 8 to 24 capacity drives in increments of 2 drives.
 - 2 cache drives: From 4 to 6 capacity drives in increments of 2 drives.
 - 4 cache drives: From 8 to 20 capacity drives in increments of 2 drives.
- All capacity drives in the appliance must be of the same model and capacity.

It is possible to expand storage capacity after the initial deployment by adding more drives to match one of the supported storage configurations and acquiring additional storage capacity license options (see [Software](#) for details).

The following table lists withdrawn storage capacity license options that are no longer available for ordering. For currently available storage capacity license options, refer to [Software](#).

Table 9. Additional storage capacity licenses

Description	Part number	Feature code	Quantity
Nutanix APOS HW Upgrade for previously sold HX node: 1600GB SSD	01PG357	S0QQ	1 per SSD
Nutanix APOS HW Upgrade for previously sold HX node: 3840GB SSD	01PG359	S0QS	1 per SSD

Configuration note: You should request a quote for the Nutanix HW Upgrade part number from Lenovo and provide additional details on the existing installation and planned upgrade.

Network connectivity

The ThinkAgile HX7820 Appliances for SAP HANA provide two- or four-port 1/10 GbE RJ-45 or 10 GbE SFP+ network connectivity with the onboard Intel X722 NIC and a LOM card installed in the appliance. The appliances also provide four 10/25 GbE SFP28 ports with two Mellanox ConnectX-4 Lx dual-port adapters.

The following table lists the network adapters.

Table 10. Network adapters

Description	Part number	Feature code	Quantity (min / max)
1/10 GbE RJ-45 ports			
ThinkSystem 10Gb 2-port Base-T LOM (RJ-45)	7ZT7A00548	AUKL	0 / 1
ThinkSystem 10Gb 4-port Base-T LOM (RJ-45)	7ZT7A00549	AUKM	0 / 1
10 GbE SFP+ ports			
ThinkSystem 10Gb 2-port SFP+ LOM	7ZT7A00546	AUKJ	0 / 1
ThinkSystem 10Gb 4-port SFP+ LOM	7ZT7A00547	AUKK	0 / 1
10/25 GbE SFP28 ports			
Mellanox ConnectX-4 Lx 10/25GbE SFP28 2-Port PCIe Ethernet Adapter	01GR250	AUAJ	0 / 2

Configuration notes:

- One of the 1/10 GbE RJ-45 or 10 GbE SFP+ LOM cards is required for selection.
- Additional two or four 10/25 GbE network ports can be selected, if needed, and they occupy the PCIe slots 5 and 6.
- Supported transceivers or DAC cables should be purchased for the SFP+ or SFP28 ports, and UTP Category 6 cables should be purchased for the 10 GbE RJ-45 ports. The maximum number of transceivers or cables that are supported per adapter equals the quantity of the adapter ports, and all adapter ports must have the same type of the transceiver or cable selected.

The following transceivers and cables can be purchased:

- [UTP cables for 10 GbE RJ-45 ports](#)
- [Transceivers and cables for 10 GbE SFP+ ports](#)
- [Transceivers and cables for 25 GbE SFP28 ports](#)

The following table lists cables for the 10 GbE RJ-45 ports.

Table 11. Cables for 10 GbE RJ-45 ports

Description	Part number	Feature code
UTP Category 6 cables (Green) for 10 GbE RJ-45 ports		
0.75m Cat6 Green Cable	00WE123	AVFW
1.0m Cat6 Green Cable	00WE127	AVFX

Power supplies and cables

The ThinkAgile HX7820 Appliances for SAP HANA ship with four 1600 W (230V) High Efficiency hot-swap power supplies listed in the following table.

Table 14. Power supplies

Description	Feature code	Quantity
High Efficiency 1600W Power Supply for SR950 (200-240VAC only)	AUPJ	4

The ThinkAgile HX7820 Appliances for SAP HANA ship with four customer-configured power cords. The following table lists the rack power cables and line cords that can be ordered for the HX7820 Appliances for SAP HANA.

Table 15. Power cables

Description	Part number	Feature code

Rack installation

The HX7820 Appliances for SAP HANA ship with the rail kit shown in the following table.

Table 16. Rail kit

Description	Feature code	Quantity
Rail Kit (screw-in, fixed)	A4AA	1

The following table summarizes the rail kit features and specifications.

Table 17. Rail kit features and specifications summary

Feature	Screw-in Fixed Rail
CMA	None
Rail type	Fixed
Rail length (supporting flange)	545.1 mm (21.46 in.)
Tool-less installation	No
In-rack maintenance	No*
1U PDU support	Yes
0U PDU support	Limited**
Rack type	IBM and Lenovo 4-post, IEC standard-compliant
Mounting holes	Square or round
Mounting flange thickness	2 mm (0.08 in.) – 3.3 mm (0.13 in.)
Distance between front and rear mounting flanges [^]	711.2 mm (28 in.) – 914.4 mm (36 in.)

* While certain servicing tasks require the appliance to be removed from the rack cabinet, the majority of appliance components can be serviced from the front or rear of the appliance, which does not require the removal of the appliance from the rack cabinet.

** If a 0U PDU is used, the rack cabinet must be at least 1100 mm (43.31 in.) deep.

[^] Measured when mounted on the rack, from the front surface of the front mounting flange to the rear most point of the rail.

Software

The ThinkAgile HX Series for SAP HANA appliances support the following software components:

- [Hypervisor](#)
- [Nutanix Acropolis](#)
- [Nutanix Prism](#)
- [Nutanix Calm \(optional\)](#)
- [Nutanix Flow \(optional\)](#)
- [SAP HANA](#)

Note: For the information on appliance firmware levels, hypervisor versions, and software versions that have been tested for interoperability, refer to the Lenovo ThinkAgile HX Series Best Recipes:

<http://datacentersupport.lenovo.com/us/en/solutions/ht505413>

Hypervisor

The ThinkAgile HX7820 for SAP HANA supports the Nutanix AHV hypervisor (Bundled with AOS) that is factory-preinstalled on the 2x M.2 SSDs configured in a RAID-1 drive group. The following table lists the hypervisor available for selection.

Table 18. Hypervisor

Description	Feature code	Quantity
Nutanix SW Stack on Nutanix AHV	B15S	1

Nutanix Acropolis

The ThinkAgile HX7820 Appliances for SAP HANA can be configured with one of the Nutanix software editions that are listed in the following table. The Nutanix software is factory-preloaded and the appropriate license can be downloaded from the Nutanix website to match the serial number of the appliance.

Configuration note: The HX7820 Appliances for SAP HANA can be deployed as a cluster of 3 or more nodes (AOS 5.9 or later).

Table 19. Nutanix software options

Description	Feature code	Quantity
Nutanix Starter Edition	B0VU	1
Nutanix Pro Edition	B0VV	1
Nutanix Ultimate Edition	B0VW	1

The Starter edition offers the core set of Nutanix software functionality. This edition is ideal for small-scale deployments with a limited set of workloads.

The Pro edition offers rich data services, along with resilience and management features. This edition is ideal for enterprises running multiple applications on a Nutanix cluster or with large-scale single workload deployments.

The Ultimate edition offers the full suite of Nutanix software capabilities to tackle complex infrastructure challenges. This edition is ideal for multi-site deployments.

The following table compares features of the Nutanix software editions.

Table 20. Nutanix software editions feature comparison

Feature	Nutanix software edition		
	Starter	Pro	Ultimate
Enterprise storage			
Cluster size	12 nodes max	Unlimited	Unlimited
Heterogeneous clusters	Yes	Yes	Yes
Online cluster grow/shrink	Yes	Yes	Yes
Storage containers	Yes	Yes	Yes
VM-centric snapshots and clones	Yes	Yes	Yes
Data tiering	Yes	Yes	Yes
Inline compression	Yes	Yes	Yes
Inline performance (cache) deduplication	Yes	Yes	Yes
Post-process compression	No	Yes	Yes
Post-process capacity deduplication	No	Yes	Yes
Erasur Coding (EC-X)	No	Yes	Yes
Nutanix Volumes	No	Yes	Yes
VM Flash Mode (Pin to SSD)	No	No	Yes
Nutanix Files	Optional*	Optional*	Optional*
Infrastructure resilience			
Data path redundancy	Yes	Yes	Yes
Redundancy factor	2 (Fixed)	2 or 3 (Tunable)	2 or 3 (Tunable)
Availability domains	No	Yes	Yes
Data protection			
Asynchronous replication and disaster recovery (DR)	Yes	Yes	Yes
Application-consistent snapshots	Yes	Yes	Yes
Local snapshots	Yes	Yes	Yes
Cloud Connect (Backup to public clouds)	No	Yes	Yes
Self-service restore	No	Yes	Yes
Multiple site DR (many to many)	No	Optional*	Yes
Metro availability	No	Optional*	Yes
Synchronous replication and disaster recovery	No	Optional*	Yes
Security			
Client authentication	Yes	Yes	Yes
Cluster lockdown	No	Yes	Yes
Data-at-rest encryption	No	Optional*^	Yes^
Management and analytics			
Prism Starter (Single- and multi-cluster management)	Yes	Yes	Yes
Pulse (Automated service agent)	Yes	Yes	Yes
Cluster health	Yes	Yes	Yes
One-click upgrades (Nutanix OS and Hypervisor)	Yes	Yes	Yes
Rest APIs	Yes	Yes	Yes
Virtualization			
Built-in Acropolis Hypervisor (AHV)	Yes	Yes	Yes

Feature	Nutanix software edition		
	Starter	Pro	Ultimate
VM management	Yes	Yes	Yes
Intelligent VM placement	Yes	Yes	Yes
Virtual network configuration	Yes	Yes	Yes
Host profiles	Yes	Yes	Yes
VM high availability	Yes	Yes	Yes
Self-service portal	Yes	Yes	Yes

* Requires a separate license.

^ Software-based encryption that uses standard drives.

It is possible to upgrade a software edition after the initial deployment by purchasing one of the software upgrade options listed in the following table.

Table 21. Nutanix software upgrade options

Description	Part number	Feature code	Quantity (per node)
Nutanix Starter to Pro Upgrade	01GU985	AW7H	1
Nutanix Starter to Ultimate Upgrade	01GU986	AW7J	1
Nutanix Pro to Ultimate Upgrade	01GU987	AW7K	1

Configuration note: Customers should request a quote for the selected Nutanix SW Upgrade part number from Lenovo and provide additional details on the existing installation and planned upgrade.

In addition to the software licenses for the specific Nutanix software edition, the ThinkAgile HX Series appliances require the Nutanix capacity licenses that are based on the total number of the processor cores and total flash storage (SSD) capacity in the appliance.

During the initial purchase, the Nutanix capacity licenses are derived by the configurator that automatically adds the required quantity of the capacity license options that are listed in the following table based on the selected processors and SSDs.

Table 22. Nutanix capacity license options

Description	Feature code	Quantity
Node Cores	B6C1	1 per processor core
Node Tebibytes	B6C2	1 per TiB of SSD capacity

It is possible to add two more processors to the models with two processors after the initial deployment by acquiring processor options and additional core capacity license options listed in the following table, as needed.

Table 23. Optional core capacity expansion license options

Description	Part number	Feature code	Quantity (per processor core)
Nutanix APOS HW Upgrade for previously sold HX node: Additional Core	7S0P0001WW	S1NL	1

It is possible to expand storage capacity after the initial deployment by adding more drives to match one of the supported storage configurations and acquiring additional SSD capacity license options listed in the following table, as needed.

Table 24. Optional storage capacity expansion license options

Description	Part number	Feature code	Quantity (per TiB of SSD capacity)
Nutanix APOS HW Upgrade for previously sold HX node: Additional TiB	7S0P0002WW	S1NM	1

Configuration notes:

- The total flash storage capacity in Tebibytes (TiB) can be calculated by multiplying the total flash storage capacity in Terabytes (TB) by 0.909495.
- When expanding capacity after the initial deployment, customers should request a quote for the selected HW Upgrade part numbers from Lenovo and provide additional details on the existing installation.

The following optional software licenses are available for the Nutanix software editions:

- Nutanix Files
- Nutanix Software Encryption
- Nutanix Advanced Replication

The optional software licenses can be added during the initial purchase by selecting one of the software options listed in the following table.

Table 25. Optional software selection options

Description	Feature code	Quantity
Nutanix Files	B4MX	1 per TiB of NAS capacity
Nutanix ENC - Data at Rest Encryption	B4V5	1 per node
Nutanix REP - Advanced Replication	B4V6	1 per node

Also, the optional software licenses for Nutanix Files can be added after the initial deployment by purchasing one of the software license options listed in the following table.

Table 26. Optional software license options for Nutanix Files

Description	Part number	Feature code	Quantity (per TiB of NAS capacity)
Nutanix Files License with 1Yr Maintenance and Support (per TiB)	7S0P000JWW	S1P3	1
Nutanix Files License with 2Yr Maintenance and Support (per TiB)	7S0P000KWW	S1P5	1
Nutanix Files License with 3Yr Maintenance and Support (per TiB)	7S0P000LWW	S1MQ	1
Nutanix Files License with 4Yr Maintenance and Support (per TiB)	7S0P000MWW	S1MX	1
Nutanix Files License with 5Yr Maintenance and Support (per TiB)	7S0P000NWW	S1N4	1

Configuration notes:

- The Nutanix Files license is available as an add-on for the Nutanix Starter, Pro, and Ultimate software editions.
- When adding Nutanix Files after the initial deployment, customers should request a quote for the selected Nutanix Files license part numbers from Lenovo and provide additional details on the existing installation.
- The total NAS storage capacity in Tebibytes (TiB) can be calculated by multiplying the total NAS storage capacity in Terabytes (TB) by 0.909495.
- The Nutanix ENC and Nutanix REP licenses are available as add-ons for the Nutanix Pro software edition.
- The Nutanix REP license includes the multiple site DR, metro availability, and synchronous replication and disaster recovery features.

Nutanix Prism

Nutanix Prism gives administrators an easy way to manage virtual environments running on Acropolis, and it simplifies and streamlines common workflows for hypervisor and virtual machine lifecycle management.

Nutanix Prism is a part of the Nutanix software preloaded on the appliances, and it includes the following components:

- Prism Starter (included in Starter, Pro, and Ultimate Nutanix software editions): Provides ability to configure, manage, and monitor a Nutanix cluster and centralized management of multiple local and remote Nutanix clusters.
- Prism Pro (Selectable software license; optional): Enables efficiency evaluation, capacity planning, expansion recommendations, custom dashboards, and advanced search capabilities.

The Prism Pro software license can be added during the initial purchase by selecting one of the software options listed in the following table.

Table 27. Prism Pro selection options

Description	Feature code	Quantity (per node)
Prism Pro	B0W4	1
XClarity Pro and Prism Pro	B0W5	1

Also, Prism Starter can be upgraded to Prism Pro after the initial deployment by purchasing one of the software license options listed in the following table.

Table 28. Prism Pro software license options

Description	Part number	Feature code	Quantity (per node)
Nutanix Prism Pro with 1Yr Support	7S0P000UWW	AW87	1
Nutanix Prism Pro with 2Yr Support	7S0P000VWW	AW88	1
Nutanix Prism Pro with 3Yr Support	7S0P000WWW	AW89	1
Nutanix Prism Pro with 4Yr Support	7S0P000XWW	AW8A	1
Nutanix Prism Pro with 5Yr Support	7S0P000YWW	AW8B	1

Configuration note: When upgrading Prism Starter to Prism Pro after the initial deployment, customers should request a quote for the selected Prism Pro part numbers from Lenovo and provide additional details on the existing installation.

Nutanix Prism offers the following features:

- Single point of control
 - Accelerates enterprise-wide deployment
 - Manages capacity centrally
 - Adds nodes in minutes
 - Supports non-disruptive software upgrades with zero downtime
 - Integrates with REST APIs and PowerShell
 - Manages firmware updates with the ThinkAgile HX Lifecycle Manager (UEFI, XCC, drives, network adapters, and SAS HBAs)
- Monitoring and alerting
 - Tracks infrastructure utilization (storage, processor, memory)
 - Centrally monitors multiple clusters across multiple sites
 - Monitors per-VM performance and resource usage
 - Checks system health
 - Generates alerts and notifications
- Integrated data protection
 - Offers customizable RPO/RTO and retention policies
 - Supports configurable per-VM replication (1:1, 1:many and many:1)
 - Provides efficient VM recovery
 - Deploys affordable DR and backup to the cloud
- Diagnostics and troubleshooting
 - Provides time-based historical views of VM activity
 - Performs proactive alert analysis
 - Correlates alerts and events to quickly diagnose issues
 - Generates actionable alerts and reduces resolution times
 - Analyzes trending patterns for accurate capacity planning

Nutanix Calm

Nutanix Calm enables advanced application-level orchestration by providing a powerful, common management framework that can be leveraged by IT teams to rapidly create and deliver applications. The Calm software offers the following key features:

- Fully automates the provisioning, scaling, and deletion of traditional multi-tiered applications and distributed services.
- Simplifies the set-up and management of custom enterprise applications by incorporating all elements of each application, including relevant VMs, configurations, and related binaries, into an easy-to-use-blueprint.
- Publishes blueprints through the Nutanix Marketplace, giving end users the ability to request IT services that can then be instantly provisioned.
- Maintains control with role-based governance that limits user operations based on permissions and logs all activities for end-to-end traceability.

The Calm software is licensed on a per-VM basis in 25 VM packs. The Calm software licenses can be added during the initial purchase by selecting the software option listed in the following table.

Table 29. Calm software selection options

Description	Feature code	Quantity (per 25 VMs)
Calm 25 License Pack	B4E4	1

Also, Calm licenses can be added after the initial deployment by purchasing one of the software license options listed in the following table.

Table 30. Calm software license options

Description	Part number	Feature code	Quantity (per 25 VMs)
Nutanix Calm Standard, Per 25 VMs w/1Yr Support	7S0P000ZWW	B3D7	1
Nutanix Calm Standard, Per 25 VMs w/2Yr Support	7S0P0010WW	B3D8	1
Nutanix Calm Standard, Per 25 VMs w/3Yr Support	7S0P0011WW	B3D9	1
Nutanix Calm Standard, Per 25 VMs w/4Yr Support	7S0P0012WW	B3DA	1
Nutanix Calm Standard, Per 25 VMs w/5Yr Support	7S0P0013WW	B3DB	1

Configuration note: When adding the Calm software licenses after the initial deployment, customers should request a quote for the selected Calm part numbers from Lenovo and provide additional details on the existing installation.

Nutanix Flow

Nutanix Flow delivers advanced networking and security services, providing visibility into the virtual network, application-centric protection from network threats, and automation of common networking operations. The Flow software offers the following key features:

- Real-time visualization of communications between VMs helps implement appropriate network policies in a Nutanix environment.
- Micro-segmentation provides granular control and governance of all traffic into and out of a virtual machine with network policies attached to individual VMs and applications, rather than specific network segments.
- API-based notifications enable third party network devices to automate network configuration changes, such as VLAN provisioning or policy updates, in response to VM lifecycle events, such as adding a new VM.
- Service insertion and chaining enables virtualized network functions from third-party software (such as virtual firewalls and load balancers) to be deployed with VM traffic in a Nutanix environment.

The Flow software is licensed on a per-node basis. The Flow software license can be added during the initial purchase by selecting the software option listed in the following table,

Table 31. Flow software selection options

Description	Feature code	Quantity (per node)
Flow Single Node License	B4E5	1

Also, Flow licenses can be added after the initial deployment by purchasing one of the software license options listed in the following table.

Table 32. Flow software license options

Description	Part number	Feature code	Quantity (per node)
Nutanix Flow, Per Node w/1Yr Support	7S0P0014WW	B3DC	1
Nutanix Flow, Per Node w/2Yr Support	7S0P0015WW	B3DD	1
Nutanix Flow, Per Node w/3Yr Support	7S0P0016WW	B3DE	1
Nutanix Flow, Per Node w/4Yr Support	7S0P0017WW	B3DF	1
Nutanix Flow, Per Node w/5Yr Support	7S0P0018WW	B3DG	1

Configuration note: When adding the Flow software licenses after the initial deployment, customers should request a quote for the selected Flow part numbers from Lenovo and provide additional details on the existing installation.

SAP HANA

SAP HANA software licenses are purchased separately from SAP. Also, SUSE Linux Enterprise Server or Red Hat Enterprise Linux Server licenses are needed for deploying virtual machines for the SAP HANA virtualized environment. SAP HANA software stack is deployed at the customer site by Lenovo Professional Services that are required for the ThinkAgile HX7820 Appliance for SAP HANA.

Systems management

The ThinkAgile HX Series appliances for SAP HANA support the following systems management tools:

- Lenovo XClarity Controller
- Light path diagnostics
- Lenovo XClarity Administrator and XClarity Pro
- Lenovo XClarity Energy Manager

Lenovo XClarity Controller

The ThinkAgile HX appliances contain Lenovo XClarity Controller (XCC) Enterprise, which provides advanced service-processor control, monitoring, and alerting functions.

XClarity Controller Enterprise offers the following capabilities for the HX Series appliances:

- Gathering and viewing system information and inventory
- Monitoring system status and health
- Alerting and notifications
- Event logging
- Syslog alerting
- Configuring security
- Updating system firmware
- Real-time power usage monitoring
- Displaying graphics for real-time and historical power usage data and temperature
- Capping power usage
- Remotely controlling power (Power on, Power off, Restart)

The XClarity Controller provides remote server management through the following interfaces:

- Intelligent Platform Management Interface (IPMI) Version 2.0
- Simple Network Management Protocol (SNMP) Version 3
- Common Information Model (CIM)
- Data Center Manageability Interface (DCMI) Version 1.5
- Redfish REpresentational State Transfer (REST) API
- Web browser with HTML5 support
- Command-line interface
- Virtual Operator Panel with XClarity Mobile App via the front USB port with XClarity Controller access

Virtual Operator Panel provides quick access to system status, firmware, network, health, and alerts information. With proper authentication, it also allows to configure systems management and network settings and to control system power (Power on, Power off, Restart). The Virtual Operator Panel can be accessed from the XClarity Mobile App running on the Android or iOS mobile device that is connected to the front USB port with XClarity Controller access (See [Components and connectors](#)).

Light path diagnostics

The HX7820 appliances include basic light path diagnostics, which provides the system LEDs on the front of the appliance (see [Components and connectors](#)) and the LEDs near the monitored components (for example, the DIMM error LEDs on the system board). Also, the appliances offer an LCD display panel, which provides quick access to system status, firmware, network, and health information.

Lenovo XClarity Administrator and XClarity Pro

Lenovo XClarity Administrator is a centralized systems management solution that helps administrators deliver infrastructure faster. This solution integrates easily with Lenovo x86 servers, appliances, certified nodes, Top-of-Rack Ethernet switches, and storage systems, providing automated agent-less discovery, inventory, monitoring, and alerts across multiple systems. In addition, some managed endpoints support firmware updates and configuration management.

Lenovo XClarity Administrator is an optional software component for the ThinkAgile HX Series appliances which can be used to manage firmware upgrades outside of the Nutanix Prism software.

Notes:

- Lenovo XClarity Administrator can be downloaded and used at no charge to discover and monitor HX Series appliances and manage firmware upgrades for them.
- Optional Lenovo XClarity Pro subscription license that can be selected in the configurator provides software support for XClarity Administrator for the duration of the selected warranty period. If Lenovo XClarity software support is required, the XClarity Pro option must be selected.

The XClarity Pro license can be added during the initial purchase by selecting one of the software options listed in the following table.

Table 33. XClarity Pro selection options

Description	Feature code	Quantity (per node)
XClarity Pro	B0W3	1

Also, XClarity Pro licenses can be added after the initial deployment by purchasing one of the software license options listed in the following table.

Table 34. Lenovo XClarity Pro license options

Description	Part number		Quantity (per node)
	NA, AP, Japan*	EMEA, LA**	
Lenovo XClarity Pro, per Managed Endpoint w/1 Yr SW S&S	00MT201	00MT207	1
Lenovo XClarity Pro, per Managed Endpoint w/3 Yr SW S&S	00MT202	00MT208	1
Lenovo XClarity Pro, per Managed Endpoint w/5 Yr SW S&S	00MT203	00MT209	1

* NA = North America; AP = Asia Pacific.

** EMEA = Europe, Middle East, Africa; LA = Latin America.

Lenovo XClarity Administrator is available from Lenovo at no charge, and it offers the following features:

- Auto-discovery and monitoring of HX Series appliances
- Firmware updates and compliance enforcement
- External alerts and notifications via SNMP traps, syslog remote logging, and e-mail
- Secure connections to managed endpoints
- NIST 800-131A or FIPS 140-2 compliant cryptographic standards between the management solution and managed endpoints
- Integration into existing higher-level management systems such as cloud automation and orchestration tools through REST APIs, providing extensive external visibility and control over hardware resources
- An intuitive, easy-to-use GUI
- Scripting support with Windows PowerShell, providing command-line visibility and control over hardware resources

For more information, refer to the Lenovo XClarity Administrator Product Guide:

<http://lenovopress.com/tips1200>

Lenovo XClarity Energy Manager

Lenovo XClarity Energy Manager provides a stand-alone, web-based agent-less power management console that provides real time data and enables you to observe, plan and manage power and cooling for Lenovo servers and appliances. Using built-in intelligence, it identifies server power consumption trends and ideal power settings and performs cooling analysis so that you can define and optimize power-saving policies.

Lenovo XClarity Energy Manager offers the following capabilities:

- Monitors room, row, rack, and device levels in the data center
- Reports vital system information, such as power, temperature and resource utilization
- Monitors inlet temperature to locate hot spots, reducing the risk of data or device damage
- Provides finely-grained controls to limit platform power in compliance with IT policy
- Generates alerts when a user-defined threshold is reached

Lenovo XClarity Energy Manager license is included in the XClarity Controller Enterprise upgrade.

For more information, refer to the Lenovo XClarity Energy Manager web page:

<http://datacentersupport.lenovo.com/us/en/solutions/invo-ixem>

Physical specifications

The ThinkAgile HX7820 Appliances for SAP HANA have the following dimensions and weight (approximate):

- Height: 173 mm (6.8 in.)
- Width: 447 mm (17.6 in.)
- Depth: 800 mm (31.5 in.)
- Weight (maximum): 58.7 kg (129.4 lb)

Operating environment

The ThinkAgile HX Series appliances comply with ASHRAE class A2 specifications. The appliance performance might be impacted when the operating temperature is outside the ASHRAE A2 specifications. Some HX7820 appliances comply with ASHRAE class A3 and class A4 specifications, provided the following configuration requirement is met: Processors with TDP more than or equal to 150 W not installed.

The HX Series appliances are supported in the following environment:

- Air temperature:
 - Operating:
 - ASHRAE Class A4: 5 °C - 45 °C (41 °F - 113 °F); for altitudes above 900 m (2,953 ft), decrease the maximum ambient temperature by 1 °C for every 125-m (410-ft) increase in altitude
 - ASHRAE Class A3: 5 °C - 40 °C (41 °F - 104 °F); for altitudes above 900 m (2,953 ft), decrease the maximum ambient temperature by 1 °C for every 175-m (574-ft) increase in altitude
 - ASHRAE Class A2: 10 °C - 35 °C (50 °F - 95 °F); for altitudes above 900 m (2,953 ft), decrease the maximum ambient temperature by 1 °C for every 300-m (984-ft) increase in altitude
 - Non-operating: 5 °C - 45 °C (41 °F - 113 °F)
 - Storage: -40 °C - +60 °C (-40 °F - 140 °F)
- Maximum altitude: 3,050 m (10,000 ft)
- Humidity:
 - Operating:
 - ASHRAE Class A4: 8% - 90% (non-condensing); maximum dew point: 24 °C (75 °F)
 - ASHRAE Class A3: 8% - 85% (non-condensing); maximum dew point: 24 °C (75 °F)
 - ASHRAE Class A2: 8% - 80% (non-condensing); maximum dew point: 21 °C (70 °F)
 - Storage: 8% - 90% (non-condensing)
- Electrical: 200 - 240 (nominal) V AC; 50 Hz / 60 Hz
- Acoustics (maximum configuration, operating): 6.1 bels

- Vibration:
 - Operating: 0.21 G rms at 5 Hz to 500 Hz for 15 minutes across 3 axes
 - Non-operating: 1.04 G rms at 2 Hz to 200 Hz for 15 minutes across 6 surfaces
- Shock:
 - Operating: 15 G for 3 milliseconds in each direction (positive and negative X, Y, and Z axes)
 - Non-operating:
 - 12 kg - 22 kg: 50 G for 152 in./sec velocity change across 6 surfaces
 - 23 kg - 31 kg: 35 G for 152 in./sec velocity change across 6 surfaces

The following table lists the maximum system power load, rated inlet current, and system heat output based on the power supply and source voltage.

Table 35. Rated system power, inlet current, and system heat output

Power supply	Source voltage	Maximum power load per system (four power supplies)	Rated current per inlet	System heat output
1600 W Platinum	200 - 240 V AC	4334 W	9 A	14788 BTU/hour

Regulatory compliance

The ThinkAgile HX Series appliances conform to the following regulations:

- United States FCC Part 15, Class A
- Canada ICES-003/NMB-03, Class A
- UL/CSA 60950-1
- Mexico NOM-019
- Argentina IEC60950-1
- Japan VCCI, Class A
- Australia/New Zealand AS/NZS CISPR 22, Class A
- China CCC GB4943.1, GB9254 Class A, GB17625.1
- Taiwan BSMI CNS13438, Class A; CNS14336-1
- Korea KN22, Class A; KN24
- Russia/GOST ME01; IEC-60950-1; GOST R 51318.22, 51318.24, 51317.3.2, and 51317.3.3
- IEC 60950-1 (CB Certificate and CB Test Report)
- Europe CE Mark (EN55022 Class A, EN60950-1, EN55024, EN61000-3-2, EN61000-3-3)
- CISPR 22, Class A
- Germany TUV-GS (EN60950-1/IEC60950-1, EK1-ITB2000)
- Reduction of Hazardous Substances (ROHS)
- Energy Star 3.0

Warranty and support

The ThinkAgile HX Series appliances can be configured with a three-, four, or five-year hardware warranty with 24x7 ThinkAgile Advantage Single Point of Support (Lenovo appliance hardware and Nutanix software) and various levels of coverage with a well-defined scope of services, including service hours, response time, term of service, and service agreement terms and conditions.

The Lenovo local support centers perform problem determination and resolution for hardware-related issues and escalate to Nutanix, on behalf of the customer, for software-related problem determination. Nutanix will contact the customer and will own the software-related problem resolution until closure.

The base warranty provides 9x5 Next Business Day response with parts delivered. Lenovo's additional support services provide a sophisticated, unified support structure for a customer's data center, with an experience consistently ranked number one in customer satisfaction worldwide.

The following Lenovo support services are available for selection:

- **Premier Support** provides a Lenovo-owned customer experience and delivers direct access to technicians skilled in hardware, software, and advanced troubleshooting, in addition to the following capabilities:
 - Direct technician-to-technician access through a dedicated phone line.
 - 24x7x365 remote support.
 - Single point of contact service.
 - End to end case management.
 - 3rd Party collaborative software support.
 - Online case tools and live chat support.
 - On-demand remote system analysis.
- **Warranty service level upgrades (Preconfigured Support)** are available to meet the on-site response time targets that match the criticality of customer's systems:
 - 3, 4, or 5 years of service coverage.
 - **Foundation Service:** 9x5 service coverage with next business day onsite response, with optional YourDrive YourData.
 - **Essential Service:** 24x7 service coverage with 4-hour onsite response or 24-hour committed repair (available only in select regions), bundled with YourDrive YourData.
 - **Advanced Service:** 24x7 service coverage with 2-hour onsite response or 6-hour committed repair (available only in select regions), bundled with YourDrive YourData.

- **Managed Services**

Lenovo Managed Services provide continuous 24x7 remote monitoring (plus 24x7 call center availability) and proactive management of a customer's data center using state of the art tools, systems, and practices by a team of highly skilled and experienced Lenovo services professionals.

Quarterly reviews check error logs, verify firmware and operating system device driver levels, and software as needed. Lenovo will also maintain records of latest patches, critical updates, and firmware levels, to ensure customer's systems are providing business value through optimized performance.

- **Technical Account Management (TAM)**

A Lenovo Technical Account Manager helps customers optimize operations of their data centers based on a deep understanding of customer's business. Customers gain direct access to a Lenovo TAM, who serves as their single point of contact to expedite service requests, provide status updates, and furnish reports to track incidents over time. Also, a TAM helps proactively make service recommendations and manage service relationship with Lenovo to make certain that customer's needs are met.

- **Enterprise Software Support**

Lenovo Enterprise Software Support is an additional support service that provides customers with software support on Microsoft, Red Hat, SUSE, and VMWare applications and systems. Around the clock availability for critical problems plus unlimited calls and incidents helps customers address challenges fast, without incremental costs. Support staff can answer troubleshooting and diagnostic questions, address product compatibility and interoperability issues, isolate causes of problems, report defects to software vendors, and more.

- **YourDrive YourData**

Lenovo's YourDrive YourData service is a multi-drive retention offering that ensures that customer's data is always under their control, regardless of the number of drives that are installed in their Lenovo server. In the unlikely event of a drive failure, customers retain possession of their drive while Lenovo replaces the failed drive part. Customer's data stays safely on customer premises, in their hands. The YourDrive YourData service can be purchased in convenient bundles with Foundation, Essential, or Advanced services.

- **Health Check**

Having a trusted partner who can perform regular and detailed health checks is central to maintaining efficiency and ensuring that customer systems and business are always running at their best. Health Check supports Lenovo-branded server, storage, and networking devices, as well as select Lenovo-supported products from other vendors that are sold by Lenovo or a Lenovo-Authorized Reseller.

Some regions might have different warranty terms and conditions than the standard warranty. This is due to local business practices or laws in the specific region. Local service teams can assist in explaining region-specific terms when needed. Examples of region-specific warranty terms are second or longer business day parts delivery or parts-only base warranty.

If warranty terms and conditions include onsite labor for repair or replacement of parts, Lenovo will dispatch a service technician to the customer site to perform the replacement. Onsite labor under base warranty is limited to labor for replacement of parts that have been determined to be field-replaceable units (FRUs). Parts that are determined to be customer-replaceable units (CRUs) do not include onsite labor under base warranty.

If warranty terms include parts-only base warranty, Lenovo is responsible for delivering only replacement parts that are under base warranty (including FRUs) that will be sent to a requested location for self-service. Parts-only service does not include a service technician being dispatched onsite. Parts must be changed at customer's own cost and labor and defective parts must be returned following the instructions supplied with the spare parts.

Lenovo support services are region-specific. Not all support services are available in every region. For information about Lenovo support services that are available in a specific region, refer to the following resources:

- Service part numbers in Data Center Solution Configurator (DCSC):

- Lenovo Data Center Services Agreement
<http://support.lenovo.com/us/en/solutions/ht116628>

Nutanix software support

The ThinkAgile HX Series appliances include a three-, four-, or five-year Nutanix software support and subscription (matches the duration of the selected hardware warranty period) that entitles customers to submit service requests to troubleshoot Nutanix software issues and receive code updates, including fixes, patches, and new software releases.

The Lenovo local support centers perform problem determination and resolution for hardware-related issues and escalate to Nutanix, on behalf of the customer, for software-related problem determination. Nutanix will contact the customer and will own the software-related problem resolution until closure.

Software support that is provided by Nutanix includes 24x7 phone and web coverage with the following target response times (priorities are assigned by Nutanix based on the impact on productivity):

- Priority 1 (Emergency: Productivity halted): Within 30 minutes.
- Priority 2 (Critical: Significant impact on productivity): Within 2 hours.
- Priority 3 (Normal: Minimal impact on productivity): Within 4 hours.
- Priority 4 (Low: General requests for information): Within next two business days.

<http://datacentersupport.lenovo.com/us/en/solutions/ht505404>

SAP HANA support

Lenovo solution support team works closely with SAP and is dedicated to troubleshooting the SAP HANA software and hardware issues and can coordinate any cross company support functions (SAP, SUSE, Red Hat, Nutanix) that may be necessary to resolve the problem as soon as possible.

Deployment services

The following Lenovo Professional Services are available for the ThinkAgile HX Series appliances to get customers up and running quickly:

- Nutanix deployment services - Base (per node)
 - Conducting remote preparation and planning
 - Verifying firmware versions and performing firmware updates, if needed
 - Installing and configuring hypervisor and Nutanix controller VM
 - Creating Nutanix cluster
 - Configuring storage
 - Configuring administrative features
- Nutanix deployment services - Advanced (per cluster)
 - Configuring Nutanix containers and Acropolis (AHV) cluster
 - Transferring knowledge
- Nutanix deployment services - Advanced with XClarity (per cluster)
 - Nutanix deployment services - Advanced
 - Installing Lenovo XClarity
 - Installing system updates

The following optional Lenovo basic installation services are available for the ThinkAgile HX Series appliances:

- Unpacking and inspecting the systems
- Mounting the systems in a rack cabinet
- Connecting the systems to electrical power and network
- Checking and updating firmware to the latest levels
- Verifying operations
- Disposal of the packaging materials (within the customer site)

The SAP HANA onsite deployment that is provided by Lenovo Professional Services is required for the ThinkAgile HX Series Appliances for SAP HANA.
