

## Lenovo ThinkSystem ST250 Server (E-2200)

### Product Guide (withdrawn product)

The Lenovo ThinkSystem ST250 is a mainstream 1-socket tower server that also be rack mounted as a rack server. It is ideal for small-to-medium businesses, remote offices, branch offices, banking and public sector. The server supports one Intel Xeon E-2200 Series processor (formerly codenamed "Coffee Lake Refresh") with up to 6 cores and up to 128 GB of 2666 MHz TruDDR4 ECC memory.

Figure 1 shows the Lenovo ThinkSystem ST250.

Figure 1. Lenovo ThinkSystem ST250

### Did you know?

The ThinkSystem ST250 is an enterprise-grade server with enterprise-level management features and support for hot-swap power supplies and drives. It offers full support of Lenovo XClarity Administrator for comprehensive systems management and includes the next generation UEFI-based Lenovo XClarity Provisioning Manager for system setup and diagnosis, and the Lenovo XClarity Controller management processor for ongoing systems management and alerting. These tools make the ST250 easy to deploy, integrate, service, and manage.

## Key features

The ThinkSystem ST250 is a office-friendly tower server that has been optimized to provide enterprise-class features to small businesses, retail, educational institutions and branch offices.

### Scalability and performance

The ST250 offers the following features to boost performance, improve scalability, and reduce costs:

- The Intel Xeon E-2200 Series processors improves productivity by offering affordable single-socket system performance with 6-core processors with up to 4.0 GHz core speeds.
- Intelligent and adaptive system performance with Intel Turbo Boost Technology 2.0 allows processor cores to run at maximum speeds during peak workloads by temporarily going beyond processor thermal design power (TDP).
- Intel Hyper-Threading Technology boosts performance for multithreaded applications by enabling simultaneous multithreading within each processor core, up to two threads per core.
- Intel Virtualization Technology integrates hardware-level virtualization hooks that allow operating system vendors to better use the hardware for virtualization workloads.
- Up to four 2666 MHz DDR4 ECC or non-ECC UDIMMs provide speed and capacity of up to 128 GB.
- The server offers PCI Express 3.0 I/O expansion capabilities that increase the theoretical maximum bandwidth by almost 100% (8 GTps per link using 128b/130b encoding) compared to the PCI Express 2.0 (5 GTps per link using 8b/10b encoding).
- With Intel Integrated I/O Technology, the PCI Express 3.0 controller is integrated into the Intel Xeon E-2200 Series processors. Such integration reduces I/O latency and increases overall system performance.
- The 12 Gbps SAS internal storage connectivity doubles the data transfer rate compared to 6 Gb SAS solutions to maximize performance of storage I/O-intensive applications.
- Flexible storage configurations support either 2.5-inch or 3.5-inch hot-swap drive bays or a combination of the two (hybrid configuration). Drive bays support SAS and SATA HDDs and SSDs.
  - Up to 16x 2.5-inch hot-swap drive bays
  - Up to 8x 3.5-inch hot-swap drive bays
  - Up to 4x 3.5-inch + 8x 2.5-inch drive bays
  - Up to 8x 3.5-inch simple-swap drive bays
- The use of solid-state drives (SSDs) instead of, or along with, traditional hard disk drives (HDDs) can significantly improve I/O performance. An SSD can support up to 100 times more I/O operations per second (IOPS) than a typical HDD.
- New high-speed RAID controllers from Broadcom provide 12 Gb SAS connectivity to the drive backplanes. A variety of RAID adapters are available, with cache up to 4 GB and support for 20 drives on a single controller.
- Offers two 5.25-inch media bays with support for optical drives or backup drives.
- Supports a single M.2 drive as an additional storage/boot device.
- The server has two integrated Gigabit Ethernet ports.
- The server offers PCI Express 3.0 I/O expansion capabilities that improve the theoretical maximum bandwidth by almost 100% (8 GT/ps per link using 128b/130b encoding) compared to the previous generation of PCI Express 2.0 (5 GT/s per link using 8b/10b encoding).
- The server offers up to four PCIe 3.0 I/O expansion slots
- Support for a NVIDIA graphics processing unit (GPU) to enhanced graphics.

## Availability and serviceability

The ST250 provides the following features to simplify serviceability and increase system uptime:

- The ST250 supports UDIMM memory with ECC protection which provides error correction not available in PC-class "servers" that use parity memory. Avoiding system crashes (and data loss) due to soft memory errors means greater system uptime.
- The server offers hot-swap (HS) SSDs and HDDs, and supports RAID redundancy for data protection and greater system uptime.
- Much like hot-swap drives, simple-swap drives are mounted on an easy-to-remove tray and work with the same RAID options. Simple-swap require a system power-down before adding or replacing, however simple-swap drives are less expensive than hot-swap drives.
- The server supports hot-swap power supplies; with two installed, they form a redundant pair to provide availability for business-critical applications.
- Tool-less cover removal provides easy access to upgrades and serviceable parts, such as memory and adapter cards.
- A choice of affordable onboard SATA RAID or advanced hardware RAID redundancy offers data protection and greater system uptime.
- The use of SSDs can provide better reliability than the use of traditional HDDs, for greater uptime.
- The built-in XClarity Controller continuously monitors system parameters, triggers alerts, and performs recovery actions in case of failures to minimize downtime.
- Allows preventive actions in advance of possible failure, thereby increasing server uptime and application availability with Proactive Platform Alerts (including PFA and SMART alerts) for memory, internal storage (SAS/SATA HDDs and SSDs, NVMe SSDs, M.2 SSDs), RAID controllers, and server ambient and sub-component temperatures.
- Built-in diagnostics in UEFI, using Lenovo XClarity Provisioning Manager, speed up troubleshooting tasks to reduce service time.
- Lenovo XClarity Provisioning Manager supports diagnostics and can save service data to a USB key drive or remote CIFS share folder for troubleshooting and reduce service time.
- Support for the XClarity Administrator Mobile app running on a supported smartphone and connected to the server through the service-enabled USB port, enables additional local systems management functions.
- Auto restart in the event of a momentary loss of AC power (based on power policy setting in the XClarity Controller service processor)
- One-year or three-year customer-replaceable unit (CRU) and onsite limited warranty with next business day response. Optional service upgrades are available.

## Manageability and security

The following powerful systems management features simplify local and remote management of the ST250:

- The server includes an XClarity Controller (XCC) to monitor server availability. Optional upgrade to XCC Advanced to provide remote control (keyboard video mouse) functions. Optional upgrade to XCC Enterprise enables the additional support for the mounting of remote media files (ISO and IMG image files), boot capture, and power capping.
- Lenovo XClarity Administrator offers comprehensive hardware management tools that help to increase uptime, reduce costs and improve productivity through advanced server management capabilities.
- New UEFI-based Lenovo XClarity Provisioning Manager, accessible from F1 during boot, provides system inventory information, graphical UEFI Setup, platform update function, RAID Setup wizard, operating system installation function, and diagnostic functions.
- Support for Lenovo XClarity Energy Manager which captures real-time power and temperature data from the server and provides automated controls to lower energy costs.
- Integrated Trusted Platform Module (TPM) 2.0 support enables advanced cryptographic functionality, such as digital signatures and remote attestation.

- Industry-standard Advanced Encryption Standard (AES) NI support for faster, stronger encryption.
- Intel Execute Disable Bit functionality can prevent certain classes of malicious buffer overflow attacks when combined with a supported operating system.
- Intel Trusted Execution Technology (Intel Xeon E processors only) provides enhanced security through hardware-based resistance to malicious software attacks, allowing an application to run in its own isolated space, protected from all other software running on a system.
- Helps prevent unauthorized software from running on the server by protecting against boot block-level malicious software with Intel Boot Guard technology.
- Protects application code and data from disclosure or modification with Intel Software Guard Extensions (SGX), enabling high-assurance security use cases, such as blockchain, identity and records privacy, secure browsing, and digital rights management (DRM).
- Physical security measures to prevent unauthorized access: Loop for a padlock to prevent the side panel from being opened and a slot at the rear of the server for a Kensington Cable Lock. Optional additional physical security features are a lockable front security door and a chassis intrusion switch (included in some models).

### **Energy efficiency**

The ST250 offers the following energy-efficiency features to save energy, reduce operational costs, increase energy availability, and contribute to the green environment:

- Energy-efficient planar components help lower operational costs.
- High-efficiency power supplies with 80 PLUS Platinum and Titanium certifications. Energy Star 3.0 certified.
- Intel Intelligent Power Capability powers individual processor elements on and off as needed to reduce power draw.
- Low-voltage 1.2 V DDR4 memory DIMMs use up to 20% less energy compared to 1.35 V DDR3 DIMMs.
- SSDs use as much as 80% less power than traditional spinning 2.5-inch HDDs.
- The server uses hexagonal ventilation holes, which can be grouped more densely than round holes, providing more efficient airflow through the system.
- Optional Lenovo XClarity Energy Manager provides advanced data center power notification, analysis, and policy-based management to help achieve lower heat output and reduced cooling needs.

## Components and connectors

The following figure shows the front of the server.

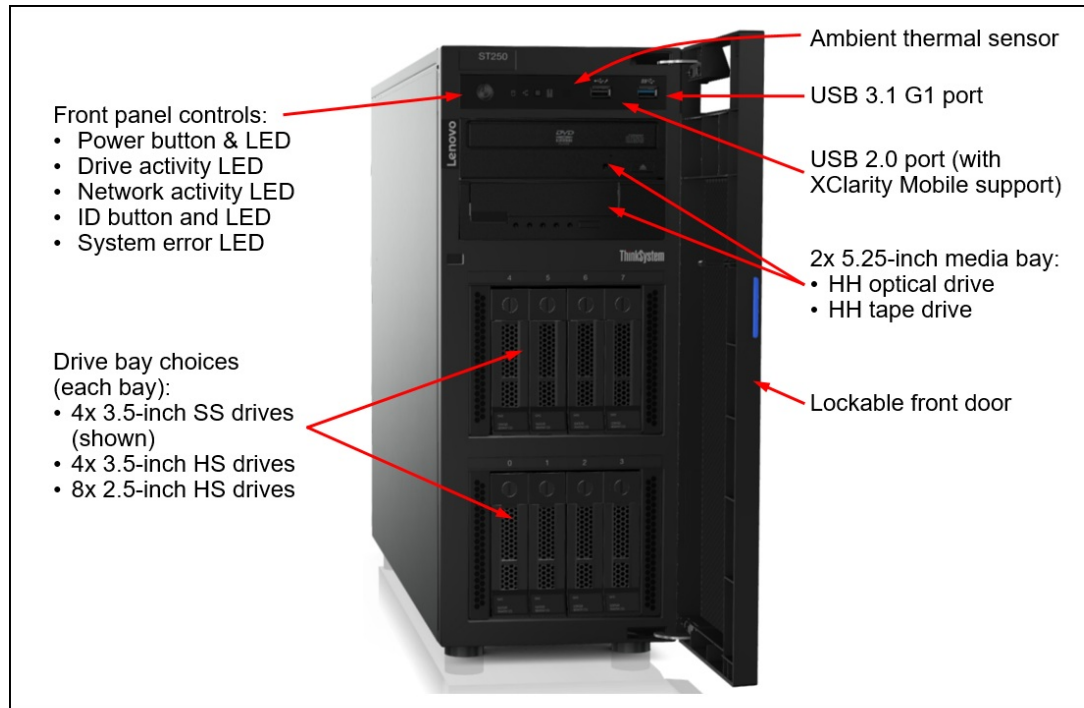

Figure 2. Front view of the ThinkSystem ST250 server

The following figure shows the rear of the server.

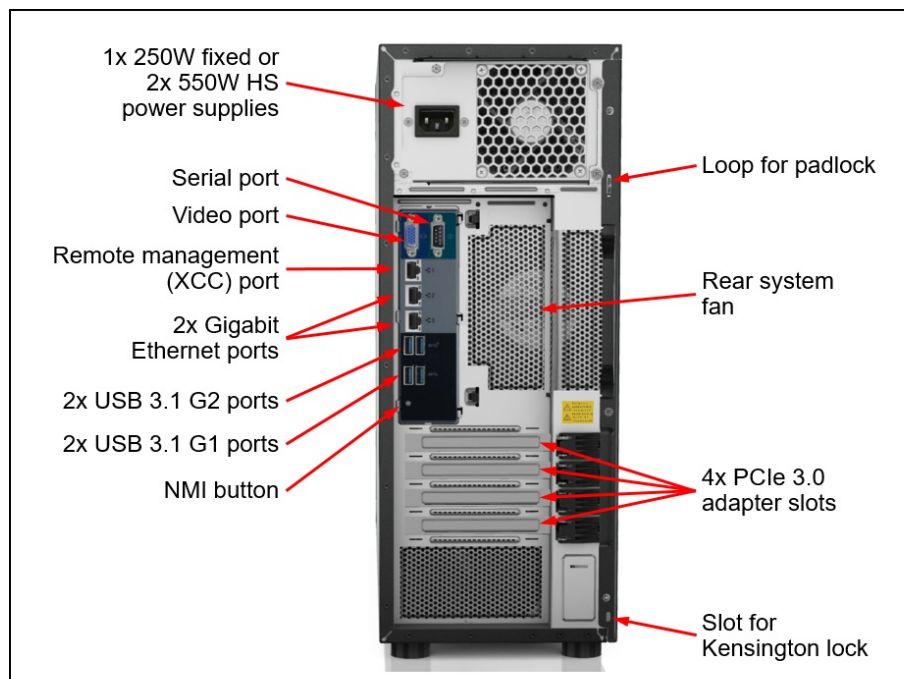

Figure 3. Rear view of the ThinkSystem ST250 server

The following figure shows the locations of key components inside the server.

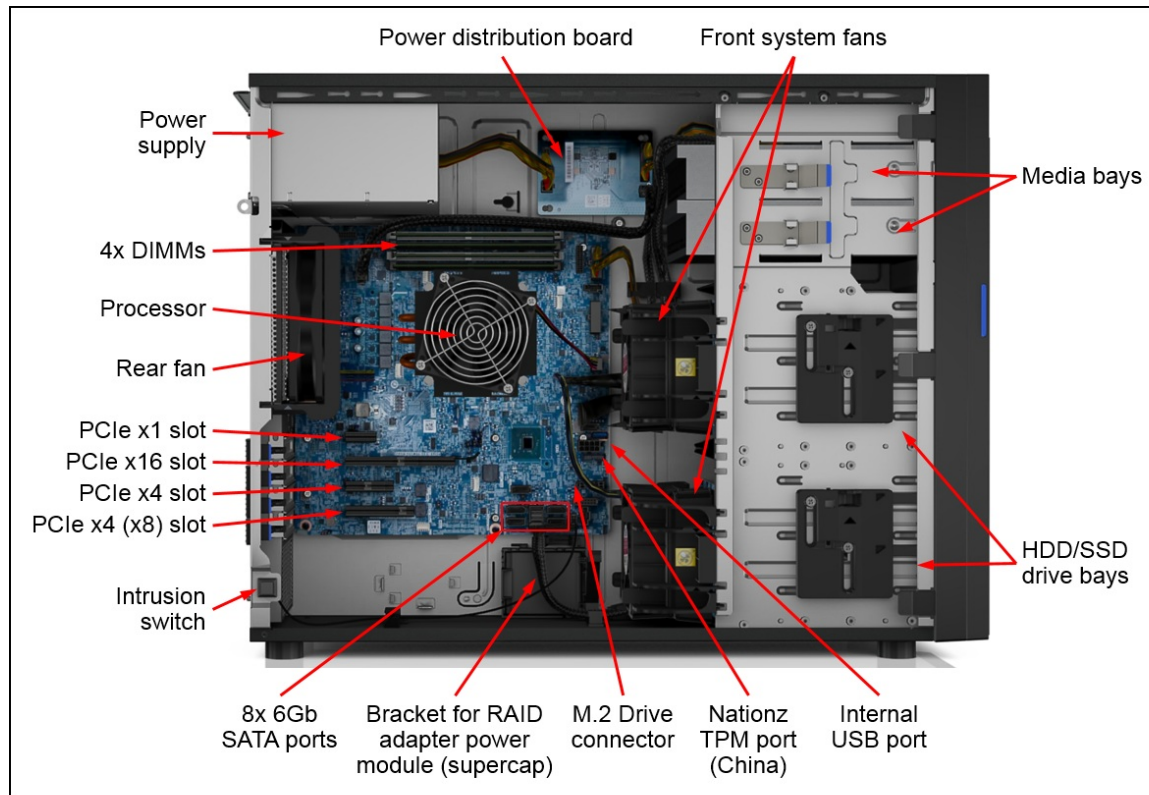

Figure 4. Internal view of the ThinkSystem ST250 server

## System architecture

The following figure shows the architectural block diagram of the ST250, showing the major components and their connections.

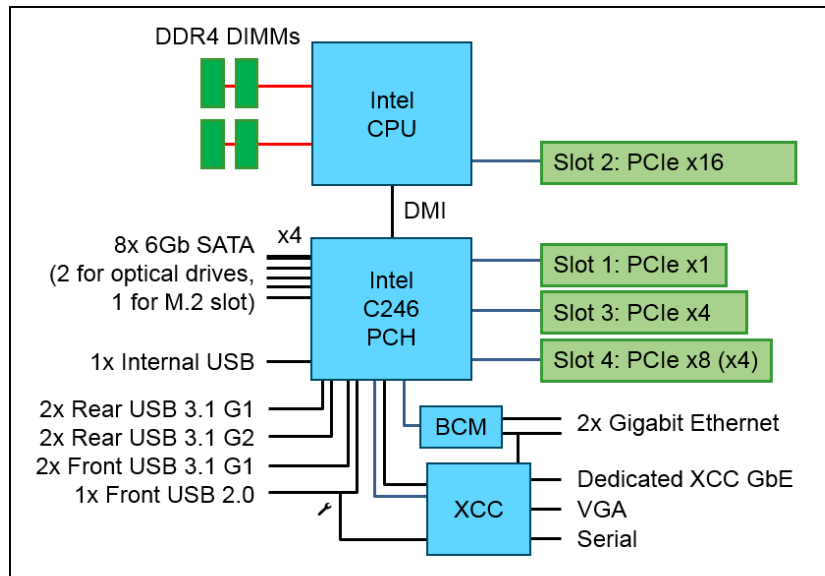

Figure 5. ST250 system architectural block diagram

A closer look at the SATA ports for use with SATA drives, optical drives and an M.2 drive, see the [Internal storage](#) section.

## Standard specifications

The following table lists the standard specifications.

Table 1. Standard specifications

Components	Specification
Machine type	7Y46 - 1 year warranty 7Y45 - 3 year warranty
Form factor	Tower (can be installed in a rack with the available Rack Mount Kit)
Processor	One Intel processor (formerly codenamed "Coffee Lake-S Refresh"). Choose from: <ul style="list-style-type: none"> <li>Intel Xeon E-2200 Series processor up to 8 cores/3.7 GHz or up to 6 cores/4.0 GHz</li> <li>Intel Core i3-9100/9300 Series processor up to 4 cores and 4 GHz</li> <li>Intel Pentium G5400/G5600 Series processor up to 4.0 GHz</li> </ul>
Chipset	Intel C246 chipset
Memory	Four DIMM sockets supporting Lenovo TruDDR4 DIMMs at 2666 MHz. Support ECC UDIMMs.
Memory maximum	<ul style="list-style-type: none"> <li>Intel Xeon E processors: Up to 128 GB with 4x 32 GB UDIMMs</li> <li>Other processors: Up to 64 GB with 4x 16 GB UDIMMs</li> </ul>
Memory protection	Error-correcting code (ECC)

Components	Specification
Disk drive bays	<p>Available configurations:</p> <ul style="list-style-type: none"> <li>• 8x or 16x 2.5-inch SAS/SATA hot-swap drive bays</li> <li>• 4x or 8x 3.5-inch SAS/SATA hot-swap drive bays</li> <li>• Both 4x 3.5-inch + 8x 2.5-inch SAS/SATA hot-swap drive bays</li> <li>• 8x 3.5-inch simple-swap drive bays</li> </ul> <p>In addition, the ST250 supports one M.2 Drive via an onboard connector. <b>Note:</b> If the onboard SATA controller is used to connect the drive bays, then only 6 drives can be installed if an M.2 drive is installed.</p>
Maximum internal storage	<ul style="list-style-type: none"> <li>• 2.5-inch drives: <ul style="list-style-type: none"> <li>◦ 122.88TB using 16x 7.68TB 2.5-inch SAS/SATA SSDs</li> <li>◦ 38.4TB using 16x 2.4TB 2.5-inch HDDs</li> </ul> </li> <li>• 3.5-inch drives: <ul style="list-style-type: none"> <li>◦ 160TB using 8x 20TB 3.5-inch HDDs</li> <li>◦ 30.72TB using 8x 3.84TB 3.5-inch SAS/SATA SSDs</li> </ul> </li> <li>• Intermix of SAS and SATA is supported</li> </ul>
Storage controller	<ul style="list-style-type: none"> <li>• Onboard 6 Gb SATA using embedded Intel RSTe software RAID, supporting RAID 0, 1, 10, 5, 50</li> <li>• 12 Gb SAS/SATA RAID for hot-swap drive configurations: <ul style="list-style-type: none"> <li>◦ RAID 530i (cacheless) supports RAID 0, 1, 10, 5, 50</li> <li>◦ RAID 730-8i with 1GB cache supports RAID 0, 1, 10, 5, 50</li> <li>◦ RAID 930-8i with 2GB flash-backed cache supports RAID 0, 1, 10, 5, 50, 6, 60</li> <li>◦ RAID 930-16i and 24i with 4GB flash-backed cache supports RAID 0, 1, 10, 5, 50, 6, 60</li> <li>◦ RAID 940-8i with 4GB flash-backed cache supports RAID 0, 1, 10, 5, 50, 6, 60</li> <li>◦ RAID 940-16i with 4GB flash-backed cache supports RAID 0, 1, 10, 5, 50, 6, 60</li> </ul> </li> <li>• 12 Gb SAS/SATA non-RAID: <ul style="list-style-type: none"> <li>◦ 430-8i or 440-8i HBAs</li> <li>◦ 430-16i or 440-16i HBAs</li> </ul> </li> </ul>
Optical drive bays	Two half-height 5.25-inch bays for optical or tape drives. Supports SATA DVD-ROM or DVD-RW (multiburner). <b>Note:</b> If the onboard SATA controller is used to connect the drive bays, then only 6 drives can be installed if an optical drive is installed.
Tape drive bays	Two half-height 5.25-inch bays for optical or tape drives. Support for one RDX drive or one LTO tape drive.
Network interfaces	Two integrated Gigabit Ethernet 1000BASE-T ports (RJ-45) based on Broadcom BCM5720 embedded controller, one can be shared with XCC for systems management. Third dedicated Gigabit Ethernet port for XCC systems management.
PCI Expansion slots	<p>Four PCIe slots as follows:</p> <ul style="list-style-type: none"> <li>• Slot 1: PCIe 3.0 x1 full-height, half-length</li> <li>• Slot 2: PCIe 3.0 x16 full-height, half-length</li> <li>• Slot 3: PCIe 3.0 x4 full-height, half-length</li> <li>• Slot 4: PCIe 3.0 x4 full-height, half-length (x8 physical slot)</li> </ul>

Components	Specification
Ports	<ul style="list-style-type: none"> <li>• Front: <ul style="list-style-type: none"> <li>◦ One USB 3.1 G1 (5 Gb/s) port</li> <li>◦ One USB 2.0 port (supports XClarity Mobile connectivity for local systems management)</li> </ul> </li> <li>• Rear: <ul style="list-style-type: none"> <li>◦ Two USB 3.1 G1 (5Gb/s) ports</li> <li>◦ Two USB 3.1 G2 (10Gb/s) ports</li> <li>◦ One VGA video</li> <li>◦ One RJ-45 systems management</li> <li>◦ Two RJ-45 GbE network ports</li> <li>◦ One serial port</li> </ul> </li> <li>• Internal: <ul style="list-style-type: none"> <li>◦ One internal USB 3.0 port for RDX drive</li> </ul> </li> </ul>
Cooling	Supports ASHRAE A2 environments. Certain configurations support ASHRAE A3. Two or three fixed system fans depending on the drive bay configuration. Additional fans attached to the processor heat sink and in the power supplies.
Power supply	Two choices, model dependent: <ul style="list-style-type: none"> <li>• One fixed power supply, 250W. 80 PLUS Platinum certified.</li> <li>• Two redundant hot-swap power supplies, each 550W. For China customers, the 550W power supplies support 240V DC input. 80 PLUS Platinum certified. Energy Star 3.0 compliant.</li> </ul>
Hot-swap parts	Hard drives and 550W power supplies
Systems management	Operator panel with status LEDs. XClarity Controller embedded management, XClarity Administrator centralized infrastructure delivery, XClarity Integrator plugins, and XClarity Energy Manager centralized server power management. Optional XClarity Controller Advanced to enable remote control functions.
Security features	Power-on password, administrator's password, Trusted Platform Module, supporting TPM 1.2 or TPM 2.0. In China only, optional Nationz TPM 2.0 module. Optional chassis intrusion switch. Padlock loop and Kensington cable slot and optional lockable front door for physical security.
Video	G200 graphics with 16 MB memory, integrated into the XClarity Controller. For use with local Administrator functions (not designed for workstation use). Maximum resolution is 1920x1200 32bpp at 60Hz.
Operating systems supported	Microsoft Windows Server, Red Hat Enterprise Linux, SUSE Linux Enterprise Server, VMware ESXi. See the <a href="#">Operating system support</a> section for specifics.
Limited warranty	Three-year or one-year (model dependent) customer-replaceable unit and onsite limited warranty with 9x5 next business day (NBD).
Service and support	Optional service upgrades are available through Lenovo Services: 4-hour or 2-hour response time, 6-hour fix time, 1-year or 2-year warranty extension, software support for Lenovo hardware and some third-party applications.
Dimensions	Width: 176 mm (6.9 in.), height: 444 mm (17.5 in.), depth: 578 mm (22.8 in.). See <a href="#">Physical and electrical specifications</a> for details.
Weight	Fully configured: 23.56 kg (51.94 lb)

The ST250 server is shipped with the following items:

- Documentation flyer
- Power cords (model and region dependent)
- Mouse & keyboard (model dependent)

## Models

ThinkSystem ST250 models can be configured by using the [Lenovo Data Center Solution Configurator \(DCSC\)](#).

Configure-to-order (CTO) models are used to create models with factory-integrated server customizations. For CTO models, two types of base CTO models are available for the ST250 as listed in the columns in the following table:

- General purpose base CTO models are for general business (non-HPC) and is selectable by choosing **General Purpose** mode in DCSC.
- AI and HPC base models are intended for Artificial Intelligence (AI) and High Performance Computing (HPC) configurations and solutions are enabled using the **AI & HPC Hardware - ThinkSystem Hardware** mode in DCSC. These configurations, along with Lenovo EveryScale Solutions, can also be built using [System x and Cluster Solutions Configurator \(x-config\)](#). **Tip:** Some HPC and AI models are not listed in DCSC and can only be configured in x-config.

Preconfigured server models may also be available for the ST250, however these are region-specific; that is, each region may define their own server models, and not all server models are available in every region.

The following table lists the base CTO models of the ThinkSystem ST250 server.

Table 2. Base CTO models

Machine Type/Model General purpose	Machine Type/Model for AI and HPC	Description
7Y45CTO1WW	7Y45CTOLWW	ThinkSystem ST250 – 3-year warranty
7Y46CTO1WW	7Y46CTOLWW	ThinkSystem ST250 – 1-year warranty

The following tables list the available models, grouped by region.

- [Models for Australia and New Zealand](#)
- [Models for South East Asian countries \(ASEAN\)](#)
- [Models for EMEA countries](#)
- [Models for Hong Kong, Taiwan, Korea \(HTK\)](#)
- [Models for India](#)
- [Models for Latin American countries \(except Brazil\)](#)
- [Models for USA and Canada](#)

Refer to the Specifications section for information about standard features of the server.

ly are using the Platinum power supply. -->

\* A maximum of 6 drives can be installed in configurations that have the onboard SATA controller and have an internal optical drive installed.

## Processors

The ST250 supports one processor from the Intel product family formerly known by the codename "Coffee Lake-S Refresh". This includes processors from the Intel Xeon E, Core i3 and Pentium families.

Topics in this section:

- [UEFI operating modes](#)

**E-2100 processors:** The ST250 also supports Xeon E-2100 processors. For details, see <https://lenovopress.com/lp0961>.

The server supports the processors that are listed in the following table.

All supported processors have the following characteristics:

- 14 nm semiconductor process technology
- 8 GT/s DMI3 bus speed
- Two DDR4 memory channels
- Support for ECC memory
- 16 PCIe 3.0 I/O lanes

**Integrated graphics and management:** Xeon processors with a G suffix include integrated graphics, however, this functionality is not used in the ST250. Instead, graphics support is provided by XClarity Controller (XCC), or by an GPU add-in card. Similarly system management of the ST250 is handled by XCC and as a result, the AMT management processor is disabled.

Table 10. Processor selections

Feature code	Intel model	TDP	Cores / threads	Base core speed	Cache	Max. memory	Max. memory speed	HT	TB / Max speed	VT	Intel SGX†

## UEFI operating modes

The ST250 offers preset operating modes that affect energy consumption and performance. These modes are a collection of predefined low-level UEFI settings that simplify the task of tuning the server to suit your business and workload requirements.

The following table lists the feature codes that allow you to specify the mode you wish to preset in the factory for CTO orders.

**UK and EU customers :** For compliance with the ERP Lot9 regulation, you should select feature BFYE. For some systems, you may not be able to make a selection, in which case, it will be automatically derived by the configurator.

Table 11. UEFI operating mode presets in DCSC

Feature code	Description
BFYB	Operating mode selection for: "Maximum Performance Mode"
BFYC	Operating mode selection for: "Minimal Power Mode"
BFYD	Operating mode selection for: "Efficiency Favoring Power Savings Mode"
BFYE	Operating mode selection for: "Efficiency - Favoring Performance Mode"

The preset modes for the ST250 are as follows:

- **Maximum Performance Mode** (feature BFYB): Achieves maximum performance but with higher power consumption and lower energy efficiency.
- **Minimal Power Mode** (feature BFYC): Minimize the absolute power consumption of the system.
- **Efficiency Favoring Power Savings Mode** (feature BFYD): Maximize the performance/watt efficiency with a bias towards power savings. This is the favored mode for SPECpower benchmark testing, for example.
- **Efficiency Favoring Performance Mode** (feature BFYE): Maximize the performance/watt efficiency with a bias towards performance. This is the favored mode for Energy Star certification, for example.

## Memory options

The ST250 server supports Lenovo TruDDR4 UDIMM memory with ECC protection. TruDDR4 memory uses the highest-quality components sourced from Tier 1 DRAM suppliers and only memory that meets strict requirements is selected. It is compatibility-tested and tuned to maximize performance and reliability.

TruDDR4 memory has a unique signature programmed into the DIMM, which enables ThinkSystem servers to verify whether the memory installed is qualified and supported. From a service and support standpoint, TruDDR4 memory automatically assumes the system's warranty, and service and support provided worldwide.

The ST250 supports up to 4 DIMMs. The processors have 2 memory channels and support 2 DIMMs per channel.

All DIMMs operate at a speed of 2666 MHz. However, if the processor selected has a lower memory bus speed (eg 2400 MHz - see the [Processor](#) table), then all DIMMs will operate at that lower speed.

The following table lists the memory options that are available for the ST250 server.

Table 12. Memory options

Part number	Feature code	Description	Maximum supported
ECC UDIMMs			
4ZC7A08696	B35J	ThinkSystem 8GB TruDDR4 2666MHz (1Rx8, 1.2V) ECC UDIMM	4
4ZC7A08699	B35K	ThinkSystem 16GB TruDDR4 2666MHz (2Rx8, 1.2V) ECC UDIMM	4
4ZC7A15142	B96E	ThinkSystem 32GB TruDDR4 2666MHz (2Rx8, 1.2V) ECC UDIMM	4

The following rules and recommendations apply when selecting the memory configuration:

- The server only supports UDIMMs
- The use of the 32GB DIMM is only supported with Xeon processors. It is not supported with Core or Pentium processors.
- All DIMMs must be identical. Mixing DIMMs is not supported.
- For best performance when installing two DIMMs, install one in each memory channel

## Internal storage

The ST250 supports 2.5-inch hot-swap, 3.5-inch hot-swap, and 3.5-inch simple-swap drives in a variety of drive bay configurations.

In this section:

- [Backplanes and drive bays](#)
- [Adapters and cabling](#)
- [Field upgrades](#)
- [M.2 drives](#)
- [SED encryption key management with ISKLM](#)

### Drive bays and backplanes

The server supports up to 16 drive bays:

- Up to 16x 2.5-inch hot-swap drives
- Up to 8x 3.5-inch drives hot-swap drives
- Up to 8x 3.5-inch simple-swap drives
- A combination of 8x 2.5" hot-swap and 4x 3.5" hot-swap drives.

Hot-swap configurations SAS and SATA drives depending on the controller used (the onboard SATA controller supports SATA drives only). Simple-swap drive configurations support SATA drives only. NVMe PCIe drives are not supported with any configuration.

The different drive bay configurations supported are shown in the following figure. The server also supports one M.2 drive, installed in a slot on the system board as shown in the [internal view](#) of the server.

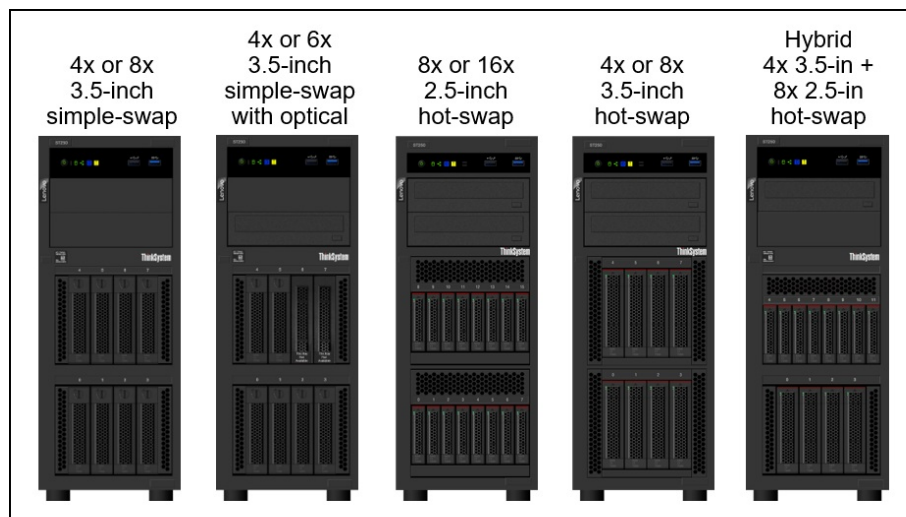

Figure 6. Internal drive bay configurations

The following table lists the available hot-swap backplanes and simple-swap backplates. The feature codes are used for configure-to-order and the option part numbers are for field installations & upgrades. See the [Field upgrades](#) section for details.

Table 13. Backplanes

Option part number	Feature code	Description
4M17A80523 or 4M17A12790	B41E	ThinkSystem ST250 2.5" SATA/SAS 8-Bay Backplane Kit
4M17A80608 or 4M17A80603	BN9N	ThinkSystem ST250 2.5" SATA/SAS 8-Bay Backplane Kit for X40 RAID
4M17A80522 or 4M17A12788	B41D	ThinkSystem ST250 3.5" SATA/SAS 4-Bay Backplane Kit
4M17A80604 or 4M17A80606		ThinkSystem ST250 3.5" SATA/SAS 4-Bay Backplane Kit with x40
4M17A80598	BN14	ThinkSystem ST250 3.5" SATA 4-Bay Simple Swap Bracket Plate Kit v2
4M17A12789	B4LP	ThinkSystem ST250 3.5" SATA 4-Bay Simple Swap Bracket Plate Kit

Configuration notes regarding drive bays with the use of the onboard SATA controller:

- If the onboard SATA controller is used, then up to 8 drives can be connected (hot-swap or simple-swap) provided no optical drive or M.2 drive is installed.
- If the onboard SATA controller is used and an optical drive or an M.2 drive is installed, then at most 6 drives can be installed. The last two drives (drive bays 6 and 7, where the first drive bay is bay 0) will not be connected and should remain empty (and in the case of simple-swap drives, the SATA connections to the bays 6 & 7 should be disconnected)
- If the onboard SATA controller is used in RAID mode and an M.2 drive is installed, the M.2 cannot be used as a boot device to boot Windows.
- If the onboard SATA controller is used in RAID mode and eight drives are installed, the last two drives (drive bays 6 and 7, where the first drive bay is bay 0) cannot be used as a boot device to boot Windows.

## Adapters and cabling

This section describes the adapter and cabling requirements for each drive bay configuration.

The ST250 has an onboard SATA controller for drive, optical drive and M.2 connectivity. For the drives, connections are via 5 connectors on the system board: four single-lane SATA connectors and one mini-SAS HD connector with 4 lanes.

When using the onboard SATA controller, SATA ports 6 and 7 are shared between drive bays 6 & 7, the two optical drive bays, and the M.2 connector. The connections are as follows, shown in the figure below:

- SATA ports 0, 1, 2 and 3 are connected to the first 4 drive bays (bays 0-3). These are routed to a single mini-SAS HD connector on the system board.
- SATA ports 4 and 5 are connected to bays 4 and 5
- SATA port 6 is either connected to drive bay 6 or optical drive bay 0 (lower bay).
- SATA port 7 is either connected to drive bay 7 or optical drive bay 1 (upper bay) or to the onboard M.2 connector. When an M.2 drive is inserted into the M.2 connector, it automatically connects to the SATA port and any connected drives (drive bay 7 or ODD1) are automatically disconnected.

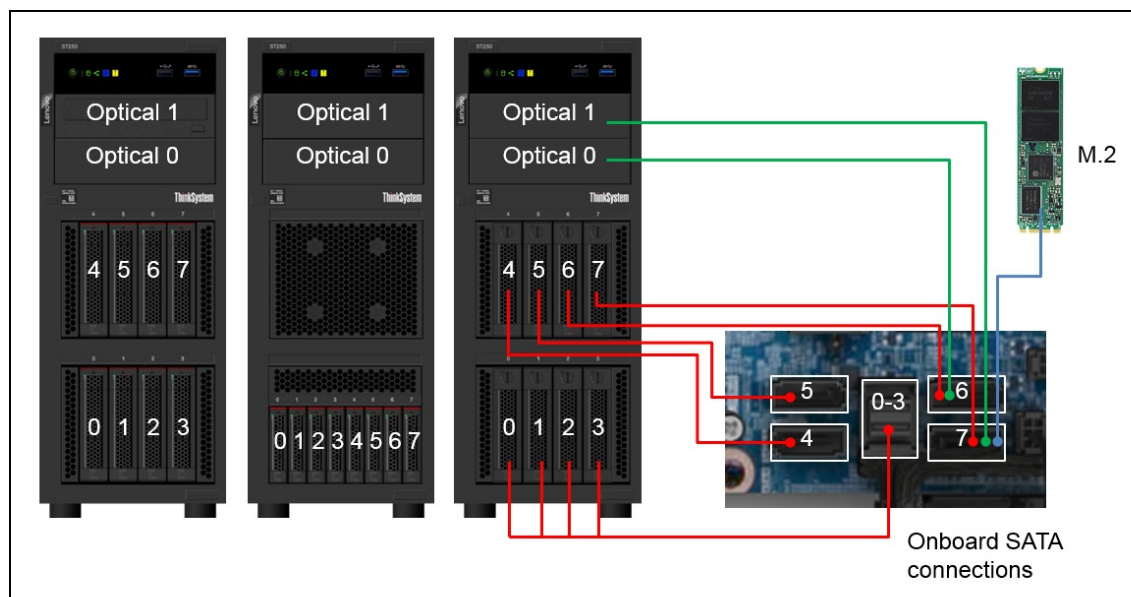

Figure 7. Onboard SATA connections

In summary, the following combinations are supported with the onboard SATA controller:

- 8x SATA drives
- 6x SATA drives + M.2
- 6x SATA drives + M.2 + 1x optical drive
- 6x SATA drives + 2x optical drives

The ST250 also supports the use of a RAID adapter or SAS host bus adapter to support the use of SAS drives plus offering higher performance features and RAID functionality.

Configurations guidance is as follows:

- For 8-bay configurations, use one of the supported 8-port RAID adapters or HBA
- For 12-bay or 16-bay configurations, use the RAID 930-16i adapter and RAID 940-16i adapter
- It is supported to add any one of the following combinations to a RAID adapter/HBA configuration:
  - 1x SATA optical drive
  - 1x SATA optical drive + M.2 drive
  - 2x SATA optical drive

It is not supported to add 2x SATA optical drives + M.2 drive to a RAID adapter or HBA configuration.

## Field upgrades

The following table shows the upgrades you can perform to the ST250 after initial purchase. Upgrades you can perform are as follows:

- Replacing the onboard software RAID controller with a hardware RAID adapter or SAS HBA
- Replacing an existing adapter without cache with a RAID adapter with flash-backed cache
- Adding the second (upper) drive cage of 4x 3.5-inch or 8x 2.5-inch drive bays

**Tip:** In the tables, **RAID/HBA X30** refers to any of the following adapters:

- ThinkSystem 430-8i or 430-16i SAS/SATA 12Gb HBAs
- ThinkSystem RAID 530-8i PCIe 12Gb Adapter
- ThinkSystem RAID 730-8i 1GB Cache or RAID 730-8i 2GB Flash PCIe 12Gb Adapters
- ThinkSystem RAID 930-8i 2GB or RAID 930-16i 4GB Flash PCIe 12Gb Adapters

**RAID/HBA X40** refers to any of the following adapters:

- ThinkSystem 440-8i or 440-16i SAS/SATA PCIe Gen4 12Gb HBAs
- ThinkSystem RAID 940-8i 4GB or RAID 940-16i 4GB Flash PCIe Gen4 12Gb Adapters

Table 14. Upgrading the internal drive bays in the field

Starting configuration	Required configuration	Controller to add (X30 means 530, 730, 930 or 430) (X40 means 940 or 440)	Cable Kit	Backplane & Cage Kit
Upgrading Onboard SATA to RAID Adapter/HBA (1 Drive Cage)				
4x3.5" HS SW RAID	4x3.5" HS HW RAID	Add 8-port RAID/HBA X30	4Z57A14087	Not needed
		Add 8-port RAID/HBA X40	4Z57A80611	Not needed
8x3.5" HS SW RAID	8x3.5" HS HW RAID	Add 8-port RAID/HBA X30	4Z57A14087	Not needed
		Add 8-port RAID/HBA X40	4Z57A80611	Not needed
8x2.5" HS SW RAID	8x2.5" HS HW RAID	Add 8-port RAID/HBA X30	4Z57A14087	Not needed
		Add 8-port RAID/HBA X40	4Z57A80611	Not needed
Upgrading Onboard SATA to RAID Adapter/HBA + Adding Upper Drive Cage				
4x3.5" HS SW RAID	8x3.5" HS HW RAID	Add 8-port RAID/HBA X30	4Z57A14087	4M17A80522 or 4M17A12788
		Add 8-port RAID/HBA X40	4Z57A80611	4M17A80604 or 4M17A80606
4x3.5" HS SW RAID	4x3.5" HS + 8x2.5" HW RAID	Add 16-port or 2x 8-port RAID/HBA X30	4Z57A14087	4M17A80523 or 4M17A12790
		Add 16-port or 2x 8-port RAID/HBA X40	4Z57A80611	4M17A80608 or 4M17A80603
8x2.5" HS SW RAID	16x2.5" HS HW RAID	Add 16-port or 2x 8-port RAID/HBA X30	4Z57A14087	4M17A80523 or 4M17A12790
		Add 16-port or 2x 8-port RAID/HBA X40	4Z57A80611	4M17A80608 or 4M17A80603
Replacing a RAID adapter/HBA with a RAID 930i adapter (requiring a bracket for the flash power module)				

Starting configuration	Required configuration	Controller to add (X30 means 530, 730, 930 or 430) (X40 means 940 or 440)	Cable Kit	Backplane & Cage Kit
Any HBA or RAID adapter without flash-backed cache	RAID with flash-backed cache	Replace existing adapter with RAID 930	4Z57A14087	Not needed
		Replace existing adapter with RAID 940	4Z57A80611	Not needed
Adding Upper Drive Cage (No change to existing controller if possible)				
4x3.5" SS SW RAID	8x3.5" SS SW RAID*	No change (onboard SATA)	None	4M17A80598 or 4M17A12789
4x3.5" HS SW RAID	8x3.5" HS SW RAID*	No change (onboard SATA)	None	4M17A80522 or 4M17A12788
4x3.5" HS HW RAID	8x3.5" HS HW RAID	No change (existing RAID/HBA X30)	None	4M17A80522 or 4M17A12788
		No change (existing RAID/HBA X40)	None	4M17A80604 or 4M17A80606
4x3.5" HS HW RAID	4x3.5" HS + 8x2.5" HW RAID	Add second 8-port or replace existing 8-port with 16-port RAID/HBA X30	None	4M17A80523 or 4M17A12790
		Add second 8-port or replace existing 8-port with 16-port RAID/HBA X40	None	4M17A80608 or 4M17A80603
8x 2.5" HS HW RAID	16x 2.5" HS HW RAID	Add second 8-port or replace existing 8-port with 16-port RAID/HBA X30	None	4M17A80523 or 4M17A12790
		Add second 8-port or replace existing 8-port with 16-port RAID/HBA X40	None	4M17A80608 or 4M17A80603

\* If you have an optical drive or M.2 drive installed, you are limited to 6 drives

The following table lists the contents of the cable and backplane kits needed for the upgrades.

Table 15. Cable and backplane kits

## M.2 drive

The ST250 server supports one M.2 form-factor SATA drive. The M.2 drive is installed in a slot directly on the system board as shown in the following figure.

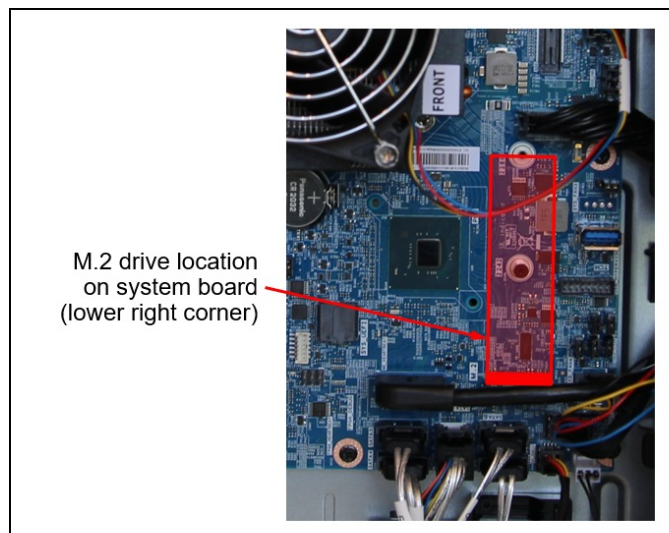

Figure 8. Location of the M.2 Drive on the ST250 system board

Supported drives are listed in the [Internal drive options](#) section.

Configuration notes:

- With an M.2 drive installed, if the onboard SATA controller is used to connect 2.5" or 3.5" drives, then only six drives can be installed. The other two drive bays must remain empty or disconnected.
- Only one optical drive can be installed if an M.2 drive is used. The use of two optical drives + M.2 is not supported.
- With an M.2 drive installed, if the onboard SATA controller is used to connect 2.5" or 3.5" drives and the controller is in RAID mode, then the M.2 cannot be used as a boot device to boot Windows.
- Configurations with an M.2 drive + optical drive + backup drive (either RDX or tape) is only supported as a field upgrade. Such configurations are not supported configure-to-order (CTO).

For details about M.2 components, see the *ThinkSystem M.2 Drives and M.2 Adapters* product guide:  
<https://lenovopress.com/lp0769-thinksystem-m2-drives-adapters>

**Tip:** The ThinkSystem M.2 Enablement Kit and ThinkSystem M.2 with Mirroring Enablement Kit that are supported in other ThinkSystem servers are not supported with the ST250.

## Controllers for internal storage

The ST250 uses two onboard 6Gb SATA ports to connect the four or eight drives. Hot-swap and simple-swap SATA drives are supported. These onboard SATA ports support RSTe mode for RAID functionality or AHCI mode for JBOD support.

**Virtualization support:** The onboard SATA ports can be used with virtualization hypervisors, including VMware ESXi, Linux KVM, Xen, and Microsoft Hyper-V, however support is limited to AHCI (non-RAID) mode. RSTe mode is not supported with virtualization hypervisors.

**Windows support:** Windows only supports a RSTe-based RAID array of no more than 6 drives.

In addition to the onboard SATA controller, the ST250 with hot-swap drives supports the use of an internal RAID adapter or HBA. The following table lists the supported adapters.

Table 16. Controllers for internal storage - hot-swap drive support

Part number	Feature code	Description	Number of ports	Maximum supported	Slots supported
SAS/SATA HBA					
7Y37A01088	AUNL	ThinkSystem 430-8i SAS/SATA 12Gb HBA	8	3	2,3,4
7Y37A01089	AUNM	ThinkSystem 430-16i SAS/SATA 12Gb HBA	16	1	2,3,4
4Y37A78601	BM51	ThinkSystem 440-8i SAS/SATA PCIe Gen4 12Gb HBA	8	3	2,3,4
4Y37A78602	BM50	ThinkSystem 440-16i SAS/SATA PCIe Gen4 12Gb HBA	16	1	2,3,4
RAID adapters					
7Y37A01082	AUNG	ThinkSystem RAID 530-8i PCIe 12Gb Adapter	8	2	2,3,4
4Y37A78834	BMFT	ThinkSystem RAID 540-8i PCIe Gen4 12Gb Adapter	8	2	2,3,4
7Y37A01083*	AUNH*	ThinkSystem RAID 730-8i 1GB Cache PCIe 12Gb Adapter	8	2	2,3,4
4Y37A09722	B4RQ	ThinkSystem RAID 730-8i 2GB Flash PCIe 12Gb Adapter	8	1	2,3,4
7Y37A01084	AUNJ	ThinkSystem RAID 930-8i 2GB Flash PCIe 12Gb Adapter	8	1	2,3,4
7Y37A01085	AUNK	ThinkSystem RAID 930-16i 4GB Flash PCIe 12Gb Adapter	16	1	2,3,4
4Y37A09728	B8NY	ThinkSystem RAID 940-8i 4GB Flash PCIe Gen4 12Gb Adapter	8	1	2,3,4
4Y37A78600	BM35	ThinkSystem RAID 940-16i 4GB Flash PCIe Gen4 12Gb Adapter	16	1	2,3,4

\* The RAID 730-8i adapter is not available in USA and Canada

For a comparison of the functions of the supported storage adapters, see the ThinkSystem RAID Adapter and HBA Reference:

<https://lenovopress.com/lp1288-thinksystem-raid-adapter-and-hba-reference#st250-support=ST250>

## Internal drive options

The following tables list the drive options for internal storage of the server.

2.5-inch hot-swap drives:

- [2.5-inch hot-swap 12 Gb SAS HDDs](#)
- [2.5-inch hot-swap 6 Gb SATA HDDs](#)
- [2.5-inch hot-swap 6 Gb SATA SSDs](#)

3.5-inch hot-swap drives:

- [3.5-inch hot-swap 12 Gb SAS HDDs](#)
- [3.5-inch hot-swap 6 Gb SATA HDDs](#)
- [3.5-inch hot-swap 6 Gb SATA SSDs](#)

Simple-swap drives:

- [3.5-inch simple-swap 6 Gb SATA HDDs](#)
- [3.5-inch simple-swap 6 Gb SATA SSDs](#)

M.2 drives:

- [M.2 SATA drives](#)

**M.2 drive support:** The use of M.2 drives requires an additional adapter as described in the [M.2 drives](#) subsection.

**SED support:** The tables include a column to indicate which drives support SED encryption. The encryption functionality can be disabled if needed. Note: Not all SED-enabled drives have "SED" in the description.

Table 17. 2.5-inch hot-swap 12 Gb SAS HDDs

Part number	Feature code	Description	SED support	Max Qty
<b>2.5-inch hot-swap HDDs - 12 Gb SAS 15K</b>

## USB flash drive

For general portable storage needs, the server also supports the USB flash drive option that is listed in the following table.

Table 26. USB memory key

Part number	Feature	Description
4X77A08621	B8NV	ThinkSystem 32GB USB Flash Drive

## Internal backup units

The ST250 supports the internal backup unit options that are listed in the following table.

Table 27. Internal backup units

Part number	Feature code	Description	Maximum supported
<b>Drives</b>			
4T27A80487	B4BM	ThinkSystem Internal Half High LTO Gen8 SAS Tape Drive v2	1
4T27A10727	B4BM	ThinkSystem Internal Half High LTO Gen8 SAS Tape Drive	1
4T27A80486	AVF5	ThinkSystem Internal Half High LTO Gen7 SAS Tape Drive v2	1
7T27A01503	AVF5	ThinkSystem Internal Half High LTO Gen7 SAS Tape Drive	1
4T27A80485	AVF6	ThinkSystem Internal RDX USB 3.0 Dock	1
7T27A01501	AVF6	ThinkSystem Internal RDX USB 3.0 Dock	1
<b>LTO Media</b>			
7TP7A01606	AVF7	ThinkSystem LTO Gen7 6TB Tape	Not applicable
4TP7A09619	B4BN	ThinkSystem LTO Gen8 12TB Tape	Not applicable
<b>RDX Media</b>			
7TP7A01601	AVF8	ThinkSystem RDX 500GB Cartridge	Not applicable
7TP7A01602	AVF1	ThinkSystem RDX 1TB Cartridge	Not applicable
7TP7A01603	AVF0	ThinkSystem RDX 2TB Cartridge	Not applicable
7TP7A04318	AXD1	ThinkSystem RDX 4TB Cartridge	Not applicable

Configuration notes:

- The RDX drive is attached via the internal USB 3.0 port on the system board. The USB cable ships with the drive.
- The use of an LTO tape drive requires a SAS HBA, either the 430-8i or 430-16i SAS/SATA 12Gb HBA. Details about the adapters in the [SAS adapters for external storage](#) section. The SAS cable ships with the tape drive.
- Configurations with an M.2 drive + optical drive + backup drive (either RDX or tape) is only supported as a field upgrade. Such configurations are not supported configure-to-order (CTO). For field upgrades, the drives are installed as follows:
  - Optical drive goes in Bay 1 (upper bay) connected to SATA port 6
  - Tape/RDX drive goes in Bay 0 (lower bay) connected to a SAS HBA or internal USB port

**LTO tape drive in a rack conversion kit :** The ST250 is supported installed on its side in a rack mount kit, however the use of an LTO tape drive in this configuration is supported but not recommended.

For field upgrades to add an internal tape drive, you will need to also order the cable kit listed in the following table. This kit is not needed for factory (CTO) orders.

Table 28. Tape drive cable kit

Part number	Description
4Z57A80509	ThinkSystem ST250 ODD/Tape Cable Kit v2 <ul style="list-style-type: none"> <li>• 1x ODD data cable</li> <li>• 1x ODD/tape power cable</li> </ul>
4Z57A14085	ThinkSystem ST250 ODD/Tape Cable Kit <ul style="list-style-type: none"> <li>• 1x ODD data cable</li> <li>• 1x ODD/tape power cable</li> </ul>

For more information about RDX drive and LTO tape drives, see the Backup Units page on the Lenovo Press site: <https://lenovopress.com/servers/options/backup>

## Optical drives

The ST250 supports the internal optical drive options listed in the following table. The internal optical are installed in the 5.25-inch media drive bays.

Table 29. Optical drives

Part number	Feature code	Description	Maximum supported
Internal optical drives			
4XA7A80482	BN5H	ThinkSystem Half High SATA DVD-ROM Optical Disk Drive v2	2
7XA7A01204	AVEZ	ThinkSystem Half High SATA DVD-ROM Optical Disk Drive	2
4XA7A80481	BN5J	ThinkSystem Half High SATA DVD-RW Optical Disk Drive v2	2
7XA7A01202	AVEY	ThinkSystem Half High SATA DVD-RW Optical Disk Drive	2

Configuration rules:

- Only one optical drive can be installed if an M.2 drive is used. The use of two optical drives + M.2 is not supported.
- For configurations using the onboard SATA controller, if 1 or 2 optical drives are installed, only 6 HDDs or SSDs can be installed.
- Configurations with an M.2 drive + optical drive + backup drive (either RDX or tape) is only supported as a field upgrade. Such configurations are not supported configure-to-order (CTO). For field upgrades, the drives are installed as follows:
  - Optical drive goes in Bay 1 (upper bay) connected to SATA port 6
  - Tape/RDX drive goes in Bay 0 (lower bay) connected to a SAS HBA or internal USB port

For field upgrades to add one of the internal optical drives, you will need to also order the cable kit listed in the following table. For two internal optical drives, order two cable kits. This kit is not needed for factory (CTO) orders.

Table 30. Optical drive cable kit

Part number	Description
4Z57A80509	ThinkSystem ST250 ODD/Tape Cable Kit v2 <ul style="list-style-type: none"><li>• 1x ODD data cable</li><li>• 1x ODD/tape power cable</li></ul>
4Z57A14085	ThinkSystem ST250 ODD/Tape Cable Kit <ul style="list-style-type: none"><li>• 1x ODD data cable</li><li>• 1x ODD/tape power cable</li></ul>

The Half High SATA DVD-ROM drive supports the following media and speeds for reading:

- CD-ROM 48X
- CD-DA (DAE) 48X
- CD-R 48X
- CD-RW 40X
- DVD-ROM (single layer) 16X
- DVD-ROM (dual layer) 12X
- DVD-R (4.7 GB) 16X
- DVD-R DL 8X
- DVD+R 16X
- DVD+R DL 8X
- DVD-RW (4.7 GB) 8X
- DVD+RW 8X

The Half High SATA DVD-RW drive supports the same media and speeds for reading as HH DVD-ROM. In addition, this drive supports the following media and speeds for writing:

- CD-R 24X
- CD-RW 4X
- High Speed CD-RW 10X
- Ultra Speed CD-RW 16X
- DVD-R 8X
- DVD-R DL 8X
- DVD+R 8X
- DVD+R DL 8X
- DVD-RW 6X
- DVD+RW 8X

The server supports the external USB optical drive listed in the following table.

Table 31. External optical drive

Part number	Feature code	Description
7XA7A05926	AVV8	ThinkSystem External USB DVD RW Optical Disk Drive

The drive is based on the Lenovo Slim DVD Burner DB65 drive and supports the following formats: DVD-RAM, DVD-RW, DVD+RW, DVD+R, DVD-R, DVD-ROM, DVD-R DL, CD-RW, CD-R, CD-ROM.

## I/O expansion options

The ST250 server has four PCIe 3.0 slots, as follows:

- Slot 1: PCIe 3.0 x1 full-height, half-length (x1 physical slot, closed ended)
- Slot 2: PCIe 3.0 x16 full-height, half-length (x16 physical slot, closed ended)
- Slot 3: PCIe 3.0 x4 full-height, half-length (x4 physical slot, open ended)
- Slot 4: PCIe 3.0 x4 full-height, half-length (x8 physical slot, closed ended)

Slot 3 in the ST250 is an open-end design, which means that it can accept adapters with a longer edge connector than the physical length of the slot connector. For example, if a x8 adapter is installed in the x4 slot 3 of the server, half of the edge connector will not be connected to the slot. The adapter will still function, however performance will be impacted.

The following figure shows the locations of the PCIe slots.

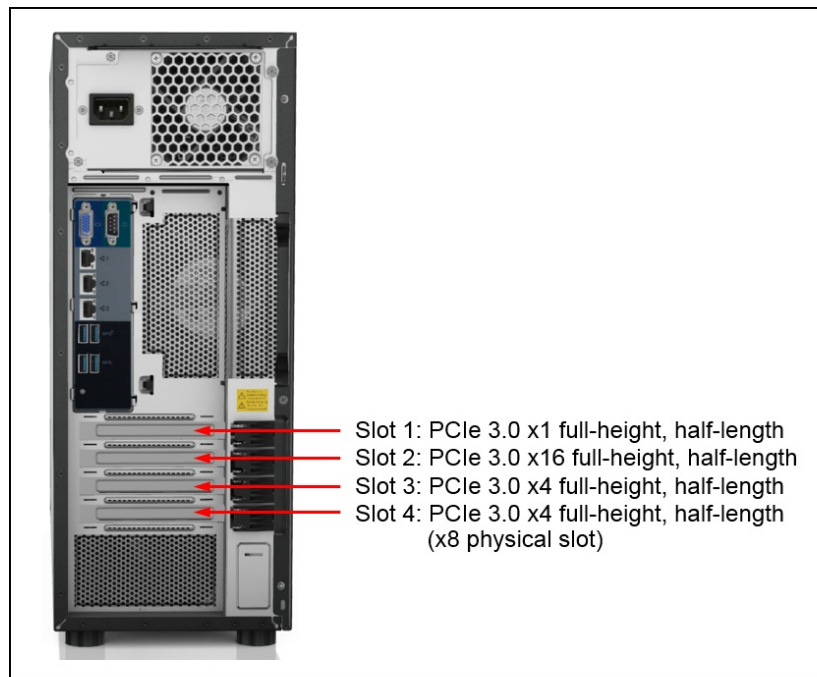

Figure 9. ThinkSystem ST250 PCIe slots

## Network adapters

The ST250 has two onboard Gigabit Ethernet ports, connected to a Broadcom BCM5720 embedded controller.

The following table lists other supported network adapters. The maximum supported column indicates which slots each adapter is supported in. For slot locations see the [I/O expansion options](#) section.

Table 32. Network adapters

Part number	Feature code	Description	Slots supported	Maximum supported
Gigabit Ethernet				
7ZT7A00484	AUZV	ThinkSystem Broadcom 5719 1GbE RJ45 4-Port PCIe Ethernet Adapter	2,3,4	2
7ZT7A00482	AUZX	ThinkSystem Broadcom 5720 1GbE RJ45 2-Port PCIe Ethernet Adapter	1,2,3,4	2
7ZT7A00533	AUZZ	ThinkSystem I350-F1 PCIe 1Gb 1-Port SFP Ethernet Adapter	2,3,4	2
7ZT7A00534	AUZY	ThinkSystem I350-T2 PCIe 1Gb 2-Port RJ45 Ethernet Adapter	2,3,4	2
7ZT7A00535	AUZW	ThinkSystem I350-T4 PCIe 1Gb 4-Port RJ45 Ethernet Adapter	2,3,4	2
10 Gb Ethernet SFP+				
00AG580	AT7T	Emulex VFA5.2 2x10 GbE SFP+ Adapter and FCoE/iSCSI SW	2,3,4	2*
00AG570	AT7S	Emulex VFA5.2 2x10 GbE SFP+ PCIe Adapter	2,3,4	2*
7XC7A05525	B0YL	Intel X710-DA4 4x10Gb SFP+ Adapter	2,3,4	2*
7ZT7A00537	AUKX	ThinkSystem Intel X710-DA2 PCIe 10Gb 2-Port SFP+ Ethernet Adapter	2,3,4	2*
10 Gb Ethernet 10GBASE-T				
00MM850	ATRY	Intel X550-T1 Single Port 10GBase-T Adapter	2,3,4	2
00MM860	ATPX	Intel X550-T2 Dual Port 10GBase-T Adapter	2,3,4	2
7XC7A05927	B0X1	Intel X710-T4 4x10Gb Base-T Adapter	2,3,4	2
25 Gb Ethernet				
7ZT7A00505	AUKS	ThinkSystem Broadcom 57412 25GbE SFP28 1-Port PCIe Ethernet Adapter	2,3,4	2*
7XC7A05523	B0WY	ThinkSystem Intel XXV710-DA2 10/25GbE SFP28 2-Port PCIe Ethernet Adapter	2,3,4	2*

\* Requires transceivers or DAC cables that must be ordered separately.

For more information, including the transceivers and cables that each adapter supports, see the list of Lenovo Press Product Guides in the Ethernet adapters category:

<https://lenovopress.com/servers/options/ethernet>

## SAS adapters for external storage

The following table lists the SAS HBAs and RAID adapters suitable for connectivity to external storage.

Table 33. Supported SAS HBAs and RAID adapters

Part number	Feature code	Description	Slots supported	Maximum supported
12 Gb SAS HBA				
7Y37A01090	AUNR	ThinkSystem 430-8e SAS/SATA 12Gb HBA	2,3,4	2
12 Gb RAID Adapter				
7Y37A01087	AUNQ	ThinkSystem RAID 930-8e 4GB Flash PCIe 12Gb Adapter	2,3,4	1*

\* Limited by the number of supercap mounts in the server

**Mixing storage adapter families:** The following HBA/RAID adapter combinations are supported:

- X30 external adapters with other X30 adapters (internal or external)
- X40 external adapters with other X40 adapters (internal or external)
- X40 external adapters with X350 internal adapters

The following HBA/RAID adapter combinations are *not* supported:

- X30 adapters (internal or external) with X40 adapters (internal or external)
- X30 adapters (internal or external) with X350 internal adapters

The following table summarizes the features of supported adapters.

Table 34. Comparison of features

Feature	430-8e	RAID 930-8e
Adapter type	HBA	External RAID
Part number	7Y37A01090	7Y37A01087
Controller chip	LSI SAS3408	LSI SAS3516
Broadcom equivalent	HBA 9400-8e	MegaRAID 9480-8e
Host interface	PCIe 3.0x8	PCIe 3.0x8
Port interface	12 Gb SAS	12 Gb SAS
Number of ports	8	8
Port connectors	2x Mini-SAS HD SFF8644	2x Mini-SAS HD SFF8644
Drive interface	SAS/SATA	SAS,SATA
Drive type	HDD/SSD/SED*	HDD,SED,SSD
Hot-swap drives	Yes	Yes
Maximum devices	512 (planned: 1024)	64 (planned: 216)
RAID levels	None	0/1/10/5/50/6/60
JBOD mode	Yes	Yes
Cache	None	4GB (Standard)
CacheVault cache protection	None	Yes (Flash)
Performance Accelerator (FastPath)	No	Yes
SSD Caching (CacheCade Pro 2.0)	No	No
SED support*	Yes*	Yes

\* SED (self-encrypting drive) support of the SAS HBA is by using software on the server (SED commands are passed through the HBA to the drives).

## Fibre Channel host bus adapters

The following table lists the Fibre Channel HBAs supported by the server.

Table 35. Fibre Channel adapters

Part number	Feature code	Description	Slots supported	Maximum supported
16 Gb Fibre Channel				
01CV840	ATZV	Emulex 16Gb Gen6 FC Dual-port HBA	2,3,4	2
01CV830	ATZU	Emulex 16Gb Gen6 FC Single-port HBA	2,3,4	2

For more information, see the list of Lenovo Press Product Guides in the Host bus adapters category:

<https://lenovopress.com/servers/options/hba>

## Flash Storage adapters

The server currently does not support Flash Storage adapters.

## GPU adapters

The ST250 does not support any GPUs that are currently available.

The ST250 server supports the graphics processing units (GPUs) listed in the following table.

Table 36. GPU adapters

Part number	Feature code	Description	Slots supported	Maximum supported
4X67A14935	B7JW	ThinkSystem NVIDIA Quadro P2200 5GB PCIe Active GPU	2	1
7C57A02877	AUW6	ThinkSystem NVIDIA Quadro P2000	2	1
4X67A11584	B31D	ThinkSystem NVIDIA Quadro P620 2GB PCIe Active GPU	2	1

The following rule applies:

- The use of a GPU requires 550W hot-swap power supplies

For information about GPUs, see the ThinkSystem GPU Summary:

<https://lenovopress.com/lp0768-thinksystem-gpu-summary>

## Fans and cooling

The ST250 has the following fans. All fans are fixed (non-hot-swap).

- One or two system fans at the front of the server, mounted on the drive cages. If the server has one drive cage, only one front fan is included
- One system fan at the rear of the server
- Fan mounted on the heatsink of the processor
- One fan in each power supply

See the Inside view in the [Components and connectors](#) section for locations.

## Power supplies

The server supports either a single fixed power supply or one or two hot-swap power supplies. When two hot-swap power supplies are installed, they form a redundant pair. The following table lists the supported power supplies.

Table 37. Power supply options

Part number	Feature code	Description	Maximum supported	110V AC	220V AC	240V DC China only
None*	B41Q	ThinkSystem ST250 250W Fixed PSU	1	Yes	Yes	No
7N67A00882	B41P	550W (230V/115V) Platinum Hot-Swap Power Supply	2	Yes	Yes	Yes

\* Configure-to-order only

The power supplies are auto-sensing and support both 110V AC (100-127V 50/60 Hz) and 220V AC (200-240V 50/60 Hz) power. In China only, the 550W power supply also support 240V DC. Both 250W and 550W power supplies are 80 PLUS Platinum certified. The 550W hot-swap power supply is Energy Star 3.0 compliant.

Power supply options do not include a line cord.

For server configurations, the inclusion of a power supply is model dependent. Configure-to-order models can be configured without a power cord if desired.

The following table lists the maximum configuration for the 250W power supply.

Table 38. Maximum configuration for the 250W power supply

Subsystem	250W fixed power supply
Processor	Up to 80W TDP (except Xeon E-2278G which is not supported)
Memory	No restriction
Drives	Up to 4x 3.5-inch drives or 8x 2.5-inch drives (HDD or SSD)
Media bays	1x optical drive or 1x LTO tape drive or 1x RDX drive
M.2	No restriction
Adapters (except GPU)	1 or 2 adapters up to PCIe x8
GPU	Not supported

For further power configuration of the server, use the Lenovo Capacity Planner, available at:  
<https://datacentersupport.lenovo.com/us/en/products/solutions-and-software/software/lenovo-capacity-planner/solutions/ht504651>

## Power cords

Line cords can be ordered as listed in the following table.

Table 39. Power cords

Region	Part number	Feature	Description
Argentina	39Y7930	6222	2.8m, 10A/250V, C13 to IRAM 2073 (Argentina) Line Cord

## Integrated virtualization

The server supports booting from an operating system or hypervisor installed on an M.2 solid-state drive. See the [M.2 drives section](#) for details and the list of available options.

You can download supported VMware vSphere hypervisor images from the following web page and load it on the M.2 drive using the instructions provided:

[https://vmware.lenovo.com/content/custom\\_iso/](https://vmware.lenovo.com/content/custom_iso/)

## Systems management

The ST250 contains an integrated service processor, XClarity Controller (XCC), which provides advanced service-processor control, monitoring, and alerting functions. The XCC is based on the Pilot4 XE401 baseboard management controller (BMC) using a dual-core ARM Cortex A9 service processor.

## Local management

The ST250 offers a front operator panel showing key LED status indicators, as shown in the following figure.

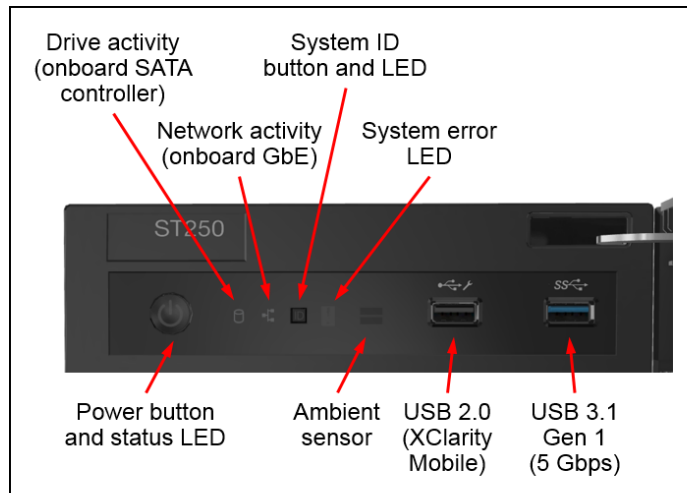

Figure 10. Front operator panel

## System status with XClarity Mobile

The XClarity Mobile app includes a tethering function where you can connect your Android or iOS device to the server via USB to see the status of the server.

The steps to connect the mobile device are as follows:

1. Enable USB Management on the server, by holding down the ID button for 3 seconds (or pressing the dedicated USB management button if one is present)
2. Connect the mobile device via a USB cable to the server's USB port with the management symbol

3. In iOS or Android settings, enable Personal Hotspot or USB Tethering
4. Launch the Lenovo XClarity Mobile app

Once connected you can see the following information:

- Server status including error logs (read only, no login required)
- Server management functions (XClarity login credentials required)

## Remote management

The server offers a dedicated RJ45 port at the rear of the server for remote management via the XClarity Controller management processor. The port supports 10/100/1000 Mbps speeds.

Remote server management is provided through industry-standard interfaces:

- Intelligent Platform Management Interface (IPMI) Version 2.0
- Simple Network Management Protocol (SNMP) Version 3 (no SET commands; no SNMP v1)
- Common Information Model (CIM-XML)
- Representational State Transfer (REST) support
- Redfish support (DMTF compliant)
- Web browser - HTML 5-based browser interface (Java and ActiveX not required) using a responsive design (content optimized for device being used - laptop, tablet, phone) with NLS support

IPMI via the Ethernet port (IPMI over LAN) is supported, however it is disabled by default. For CTO orders you can specify whether you want the feature enabled or disabled in the factory, using the feature codes listed in the following table.

Table 40. IPMI-over-LAN settings

Part number	Feature code	Description
CTO only	B7XZ	Disable IPMI-over-LAN (default)
CTO only	B7Y0	Enable IPMI-over-LAN

There are two XClarity Controller upgrades available for the server, Advanced and Enterprise.

Lenovo XClarity Controller Advanced adds the following remote control functions:

- Remotely viewing video with graphics resolutions up to 1600x1200 at 75 Hz with up to 23 bits per pixel, regardless of the system state
- Remotely accessing the server using the keyboard and mouse from a remote client
- Capturing blue-screen errors
- International keyboard mapping support
- LDAP-based authentication

Lenovo XClarity Controller Enterprise enables the following additional features:

- Boot Capture
- Remote mounting of CD-ROM (ISO) and diskette (IMG) files as virtual drives
- Virtual console collaboration - Ability for up to 6 remote users to be log into the remote session simultaneously
- Power capping
- License for XClarity Energy Manager

Preconfigured models come with either XClarity Controller Standard, Advanced or Enterprise, depending on the model. See the [Models](#) section for details. The following table shows the field upgrades available for preconfigured models.

Table 41. XClarity Controller field upgrades

Part number	Feature code	Description
4L47A09132	AVUT	ThinkSystem XClarity Controller Standard to Advanced Upgrade (for servers that have XCC Standard)
4L47A09133	AVUU	ThinkSystem XClarity Controller Advanced to Enterprise Upgrade (for servers that have XCC Advanced)

For configure-to-order (CTO) models, you can elect to have one of the following XCC functionality by selecting the appropriate XCC feature codes as listed in the following table:

- XCC Standard - select neither feature listed in the table
- XCC Advanced - select feature AVUT
- XCC Enterprise - select feature AUPW

Table 42. XClarity Controller Upgrades for configure-to-order

Feature code	Description
AVUT	ThinkSystem XClarity Controller Standard to Advanced Upgrade
AUPW	ThinkSystem XClarity Controller Standard to Enterprise Upgrade

## Lenovo XClarity Provisioning Manager

Lenovo XClarity Provisioning Manager (LXPM) is a UEFI-based application embedded in ThinkSystem servers and accessible via the F1 key during system boot.

LXPM provides the following functions:

- Graphical UEFI Setup
- System inventory information and VPD update
- System firmware updates (UEFI and XCC)
- RAID setup wizard
- OS installation wizard (including unattended OS installation)
- Diagnostics functions

## Lenovo XClarity Administrator

Lenovo XClarity Administrator is a centralized resource management solution designed to reduce complexity, speed response, and enhance the availability of Lenovo systems and solutions. It provides agent-free hardware management for ThinkSystem servers. The administration dashboard is based on HTML 5 and allows fast location of resources so tasks can be run quickly.

Because Lenovo XClarity Administrator does not require any agent software to be installed on the managed endpoints, there are no CPU cycles spent on agent execution, and no memory is used, which means that up to 1GB of RAM and 1 - 2% CPU usage is saved, compared to a typical managed system where an agent is required.

Lenovo XClarity Administrator is an optional software component for the ST250. The software can be downloaded and used at no charge to discover and monitor the ST250 and to manage firmware upgrades.

If software support is required for Lenovo XClarity Administrator, or premium features such as configuration management and operating system deployment are required, Lenovo XClarity Pro software subscription should be ordered. Lenovo XClarity Pro is licensed on a per managed system basis, that is, each managed Lenovo system requires a license.

The following table lists the Lenovo XClarity software license options.

Table 43. Lenovo XClarity Pro ordering information

Part number	Feature code	Description
00MT201	1339	Lenovo XClarity Pro, per Managed Endpoint w/1 Yr SW S&S
00MT202	1340	Lenovo XClarity Pro, per Managed Endpoint w/3 Yr SW S&S
00MT203	1341	Lenovo XClarity Pro, per Managed Endpoint w/5 Yr SW S&S
7S0X000HWW	SAYV	Lenovo XClarity Pro, per Managed Endpoint w/6 Yr SW S&S
7S0X000JWW	SAYW	Lenovo XClarity Pro, per Managed Endpoint w/7 Yr SW S&S

Lenovo XClarity Administrator offers the following standard features that are available at no charge:

- Auto-discovery and monitoring of Lenovo systems
- Firmware updates and compliance enforcement
- External alerts and notifications via SNMP traps, syslog remote logging, and e-mail
- Secure connections to managed endpoints
- NIST 800-131A or FIPS 140-3 compliant cryptographic standards between the management solution and managed endpoints
- Integration into existing higher-level management systems such as cloud automation and orchestration tools through REST APIs, providing extensive external visibility and control over hardware resources
- An intuitive, easy-to-use GUI
- Scripting with Windows PowerShell, providing command-line visibility and control over hardware resources

Lenovo XClarity Administrator offers the following premium features that require an optional Pro license:

- Pattern-based configuration management that allows to define configurations once and apply repeatedly without errors when deploying new servers or redeploying existing servers without disrupting the fabric
- Bare-metal deployment of operating systems and hypervisors to streamline infrastructure provisioning

For more information, refer to the Lenovo XClarity Administrator Product Guide:

<http://lenovopress.com/tips1200>

## Lenovo XClarity Integrators

Lenovo also offers software plug-in modules, Lenovo XClarity Integrators, to manage physical infrastructure from leading external virtualization management software tools including those from Microsoft and VMware.

These integrators are offered at no charge, however if software support is required, a Lenovo XClarity Pro software subscription license should be ordered.

Lenovo XClarity Integrators offer the following additional features:

- Ability to discover, manage, and monitor Lenovo server hardware from VMware vCenter or Microsoft System Center
- Deployment of firmware updates and configuration patterns to Lenovo x86 [rack servers](#) and Flex System from the virtualization management tool
- Non-disruptive server maintenance in clustered environments that reduces workload downtime by dynamically migrating workloads from affected hosts during rolling server updates or reboots
- Greater service level uptime and assurance in clustered environments during unplanned hardware events by dynamically triggering workload migration from impacted hosts when impending hardware failures are predicted

For more information about all the available Lenovo XClarity Integrators, see the Lenovo XClarity Administrator Product Guide: <https://lenovopress.com/tips1200-lenovo-xclarity-administrator>

## Lenovo XClarity Essentials

Lenovo offers the following XClarity Essentials software tools that can help you set up, use, and maintain the server at no additional cost:

- **Lenovo Essentials OneCLI**  
OneCLI is a collection of server management tools that uses a command line interface program to manage firmware, hardware, and operating systems. It provides functions to collect full system health information (including health status), configure system settings, and update system firmware and drivers.
- **Lenovo Essentials UpdateXpress**  
The UpdateXpress tool is a standalone GUI application for firmware and device driver updates that enables you to maintain your server firmware and device drivers up-to-date and help you avoid unnecessary server outages. The tool acquires and deploys individual updates and UpdateXpress System Packs (UXSPs) which are integration-tested bundles.
- **Lenovo Essentials Bootable Media Creator**  
The Bootable Media Creator (BOMC) tool is used to create bootable media for offline firmware update.

For more information and downloads, visit the Lenovo XClarity Essentials web page:

<http://support.lenovo.com/us/en/documents/LNVO-center>

## Lenovo XClarity Energy Manager

Lenovo XClarity Energy Manager (LXEM) is a power and temperature management solution for data centers. It is an agent-free, web-based console that enables you to monitor and manage power consumption and temperature in your data center through the management console. It enables server density and data center capacity to be increased through the use of power capping.

LXEM is a licensed product. A single-node LXEM license is included with the XClarity Controller Enterprise upgrade as described in the [Remote Management](#) section. If your server does not have the XCC Enterprise upgrade, Energy Manager licenses can be ordered as shown in the following table.

Table 44. Lenovo XClarity Energy Manager

Part number	Description
4L40E51621	Lenovo XClarity Energy Manager Node License (1 license needed per server)

For more information about XClarity Energy Manager, see the following resources:

- **Lenovo Support page:**  
<https://datacentersupport.lenovo.com/us/en/solutions/lnvo-lxem>
- **User Guide for XClarity Energy Manager:**  
<https://pubs.lenovo.com/lxem/>

## Security

The ST250 offers the following security features:

- Electronic security measures:
  - Administrator and power-on passwords
  - Trusted Platform Module (TPM) supporting both TPM 1.2 and TPM 2.0
  - For China customers, the Nationz TPM plug-in module
  - Self-encrypting drives with support for IBM Security Key Lifecycle Manager
- Mechanical security measures
  - Loop for a padlock to prevent the side panel from being opened
  - Slot at the rear of the server for a Kensington Cable Lock
  - Optional lockable front door
  - Optional chassis intrusion switch

The server is NIST SP 800-147B compliant.

The Nationz TPM module is installed in a dedicated socket on the system board. See the [Components and connectors](#) section for locations of physical components.

The following table lists the security options for the server.

Table 45. Security features

Part number	Feature code	Description
4M17A12791	B41K	ThinkSystem ST250 4U Security Door
4M17A12792	B4MA	ThinkSystem ST258 4U Security Door (China customers only)
4Z57A14086	B4LS	ThinkSystem ST250 Intrusion Cable Kit
CTO only*	B22N	ThinkSystem Nationz Trusted Platform Module v2.0 (China customers only)

\* Available via configure-to-order or in preconfigured models only

For self-encrypting drives (SEDs) with support for enterprise key managers, see the [SED encryption key management](#) section.

## Intel Transparent Supply Chain

Add a layer of protection in your data center and have peace of mind that the server hardware you bring into it is safe authentic and with documented, testable, and provable origin.

Lenovo has one of the world's best supply chains, as ranked by Gartner Group, backed by extensive and mature supply chain security programs that exceed industry norms and US Government standards. Now we are the first Tier 1 manufacturer to offer Intel® Transparent Supply Chain in partnership with Intel, offering you an unprecedented degree of supply chain transparency and assurance.

To enable Intel Transparent Supply Chain for the Intel-based servers in your order, add the following feature code in the [DCSC configurator](#), under the Security tab.

Table 46. Intel Transparent Supply Chain ordering information

Feature code	Description
BB0P	Intel Transparent Supply Chain

For more information on this offering, see the paper *Introduction to Intel Transparent Supply Chain on Lenovo ThinkSystem Servers*, available from <https://lenovopress.com/lp1434-introduction-to-intel-transparent-supply-chain-on-thinksystem-servers>.

## Keyboards and Mice

The following table lists the supported full-sized USB keyboards and mice available for Lenovo ThinkSystem servers.

The keyboards have the following features:

- Full-sized 104-key keyboard with 3 special Windows keys
- 3 LEDs for caps lock, scroll lock and num lock
- Wired USB connection with 1.8m cable
- Adjustable feet at the rear of the keyboard

**Tip:** For keyboards that fit in the rack-mounted console kit, see the [KVM console options](#) section, or the [ThinkSystem 18.5-inch LCD Console](#) product guide

Table 47. Lenovo Preferred Pro USB Full-sized keyboards - ThinkSystem

## Rack installation

The ST250 can be installed in the rack with the Rack Mount Kit, which converts the server to a rack-mountable server.

**Note:** The server is a 4U rack mount server, however the rack mount kit adds 1U to the vertical space occupied by the server. The total rack space occupied is 5U.

Part number information is listed in the following table. The kit can only be ordered as an option part number, not in a CTO order.

Table 48. Rack installation options

Part number	Description
4M17A12785	ThinkSystem ST50/ST250 Rack Mount Kit

The rack mount kit includes the following items:

- 1U tray to hold the server horizontally
- Left and right slide rails
- Cable management arm
- Brackets and other hardware
- Installation instructions

## Operating system support

The server supports the following operating systems:

- Microsoft Windows Server 2016
- Microsoft Windows Server 2019
- Microsoft Windows Server 2022
- Red Hat Enterprise Linux 7.7
- Red Hat Enterprise Linux 7.8
- Red Hat Enterprise Linux 7.9
- Red Hat Enterprise Linux 8.1
- Red Hat Enterprise Linux 8.2
- Red Hat Enterprise Linux 8.3
- Red Hat Enterprise Linux 8.4
- Red Hat Enterprise Linux 8.5
- Red Hat Enterprise Linux 8.6
- Red Hat Enterprise Linux 8.7

- Red Hat Enterprise Linux 8.8
- Red Hat Enterprise Linux 8.9
- Red Hat Enterprise Linux 9.0
- Red Hat Enterprise Linux 9.1
- Red Hat Enterprise Linux 9.2
- Red Hat Enterprise Linux 9.3
- SUSE Linux Enterprise Server 12 SP5
- SUSE Linux Enterprise Server 12 Xen SP5
- SUSE Linux Enterprise Server 15 SP1
- SUSE Linux Enterprise Server 15 SP2
- SUSE Linux Enterprise Server 15 SP3
- SUSE Linux Enterprise Server 15 SP4
- SUSE Linux Enterprise Server 15 SP5
- SUSE Linux Enterprise Server 15 Xen SP1
- SUSE Linux Enterprise Server 15 Xen SP2
- SUSE Linux Enterprise Server 15 Xen SP3
- SUSE Linux Enterprise Server 15 Xen SP4
- SUSE Linux Enterprise Server 15 Xen SP5
- Ubuntu 22.04 LTS 64-bit
- VMware ESXi 6.5 U3
- VMware ESXi 6.7 U3
- VMware ESXi 7.0
- VMware ESXi 7.0 U1
- VMware ESXi 7.0 U2
- VMware ESXi 7.0 U3
- VMware ESXi 8.0
- VMware ESXi 8.0 U1
- VMware ESXi 8.0 U2

For a complete list of supported, certified and tested operating systems, plus additional details and links to relevant web sites, see the Operating System Interoperability Guide:

<https://lenovopress.com/osig#servers=st250-7y45-7y46-e-2200>

**Virtualization support:** The onboard SATA ports of the server can be used with virtualization hypervisors, including VMware ESXi, Linux KVM, Xen, and Microsoft Hyper-V, however support is limited to AHCI (non-RAID) mode. RSTe mode is not supported with virtualization hypervisors.

For configure-to-order configurations, the server can be preloaded with VMware ESXi. Ordering information is listed in the following table.

Table 49. VMware ESXi preload

Part number	Feature code	Description
CTO only	B6U0	VMware ESXi 6.5 U3 (factory installed)
CTO only	B88T	VMware ESXi 6.7 U3 (factory installed)
CTO only	BBZG	VMware ESXi 7.0 (Factory Installed)
CTO only	BE5E	VMware ESXi 7.0 U1 (Factory Installed)
CTO only	BHSR	VMware ESXi 7.0 U2 (Factory Installed)
CTO only	BMEY	VMware ESXi 7.0 U3 (Factory Installed)
CTO only	BMT5	VMware ESXi 8.0 (Factory Installed)
CTO only	BQ8S	VMware ESXi 8.0 U1 (Factory Installed)

## Physical and electrical specifications

The ST250 has the following overall physical dimensions, including tower feet, excluding components that extend outside the standard chassis, such as power supply handles:

- Width: 176 mm (6.9 inches) (4U)
- Height: 444 mm (17.5 inches)
- Depth: 578 mm (22.8 inches)

The following table lists the detailed dimensions. See the figure below for the definition of each dimension.

Table 50. Detailed dimensions

Dimension	Description
176 mm (4U)	$X_a$ = Width, using widest features (not including feet)
155 mm	$X_b$ = Width, distance to outer edges of chassis feet (feet do not extend beyond the chassis)
444 mm	$Y_a$ = Height, from bottom of feet to top of chassis body
430 mm	$Y_b$ = Height, from bottom of chassis body to top of chassis body
544 mm	$Z_a$ = Depth, from front door to most rearward I/O port surface
578 mm	$Z_b$ = Depth, from front door to deepest feature of the chassis body feature
595 mm	$Z_c$ = Depth, from front door to deepest feature such as power supply handle
23 mm	$Z_e$ = Depth, front door to front plate of chassis body

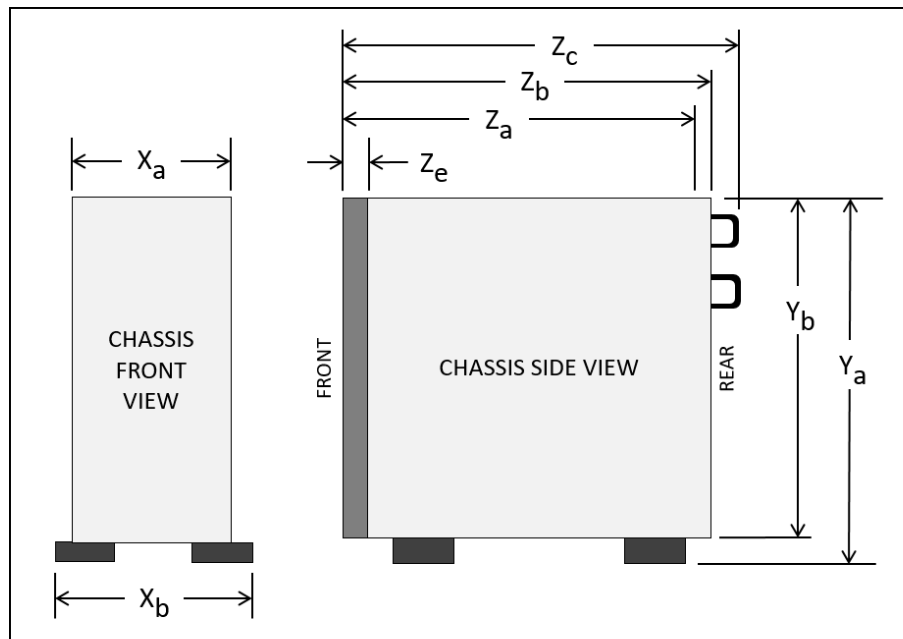

Figure 11. Server dimension

The shipping (cardboard packaging) dimensions of the ST250 are as follows:

- Width: 579 mm (22.8 inches)
- Height: 298 mm (11.7 inches)
- Depth: 763 mm (30.0 inches)

The server has the following weight:

- Weight, fully configured: 23.56 kg (51.94 lb)

Electrical requirements are as follows:

- Models with a 250 W AC fixed power supply:
  - 100-127 (nominal) V ac; 50 Hz or 60 Hz
  - 200 - 240 (nominal) V ac; 50 Hz or 60 Hz

- Models with 550 W AC hot-swap power supplies:
  - 100-127 (nominal) V ac; 50 Hz or 60 Hz; 6.2 A
  - 200 - 240 (nominal) V ac; 50 Hz or 60 Hz; 3.0 A
  - Input kilovolt-amperes (kVA) (approximately):
    - Minimum configuration: 0.16 kVA
    - Maximum configuration: 0.722 kVA
- Models with 550 W 240V DC power supplies (China customers running 240V DC input)
  - 200 - 240 (nominal) V dc; 2.5 A
  - Input kilovolt-amperes (kVA) (approximately):
    - Minimum configuration: 0.16 kVA
    - Maximum configuration: 0.70 kVA

## Operating environment

The server can operate in ASHRAE A2 environments (10-35°C).

The server can be configured to operate in ASHRAE A3 environments (5-40°C), provided the following restrictions are met:

- Processor with a maximum TDP of 80W
- Maximum of 8x 2.5" drives
- PCIe adapters up to 10W power consumption

The server is supported operating in the following environments:

- ASHRAE A2:
  - Temperature: 10°C to 35°C
  - Humidity: 8% to 80%
  - Altitude 0-3000 m (10,000 ft), derated 1°C per 300 m above 950 m
- ASHRAE A3:
  - Temperature: 5°C to 40°C
  - Humidity: 8% to 85%
  - Altitude 0-3000 m (10,000 ft), derated 1°C per 175 m above 950 m

Non-operating environment support:

- Without packaging:
  - Temperature: -10 °C to 60 °C
  - Humidity: 8 to 90%
- Storage with packaging:
  - Temperature: -40 °C to 70 °C
  - Humidity: 8 to 90%

Thermal (heat) output:

- Minimum configuration: 238.6 BTU/hr, 69.8 W
- Maximum configuration: 1010.33 BTU/hr, 296.10 W

Acoustical noise emissions: See the following table.

Table 51. Acoustical noise emissions

	Minimum	Typical	Maximum
<b>Sound power level</b>			
Idle	3.7 bels	3.8 bels	4.3 bels
Operating	3.7 bels	4.0 bels	4.4 bels
<b>Sound pressure level (tabletop)</b>			
Idle	26.5 dBA	26.8 dBA	39.4 dBA
Operating	26.7 dBA	27.0 dBA	40.1 dBA
<b>Sound pressure level (floor)</b>			
Idle	19.3 dBA	19.5 dBA	29.5 dBA
Operating	19.4 dBA	21.0 dBA	32.3 dBA

Notes:

- These sound levels were measured in controlled acoustical environments according to procedures specified by ISO 7779 and are reported in accordance with ISO 9296.
- The declared acoustic noise levels are based on specified configurations, which may change slightly depending on configuration/conditions.

## Warranty upgrades and post-warranty support

The ST250 has a 1-year or 3-year warranty, based on the machine type of the system:

- 7Y46 - 1 year warranty
- 7Y45 - 3 year warranty

Our global network of regional support centers offers consistent, local-language support enabling you to vary response times and level of service to match the criticality of your support needs:

- **Standard Next Business Day** – Best choice for non-essential systems requiring simple maintenance.
- **Premier Next Business Day** – Best choice for essential systems requiring technical expertise from senior-level Lenovo engineers.
- **Premier 24x7 4-Hour Response** – Best choice for systems where maximum uptime is critical.
- **Premier Enhanced Storage Support 24x7 4-Hour Response** – Best choice for storage systems where maximum uptime is critical.

For more information, consult the brochure [Lenovo Operational Support Services for Data Centers Services](#).

## Services

Lenovo Data Center Services empower you at every stage of your IT lifecycle. From expert advisory and strategic planning to seamless deployment and ongoing support, we ensure your infrastructure is built for success. Our comprehensive services accelerate time to value, minimize downtime, and free your IT staff to focus on driving innovation and business growth.

**Note:** Some service options may not be available in all markets or regions. For more information, go to <https://lenovolocator.com/>. For information about Lenovo service upgrade offerings that are available in your region, contact your local Lenovo sales representative or business partner.

In this section:

- [Lenovo Advisory Services](#)
- [Lenovo Plan & Design Services](#)
- [Lenovo Deployment, Migration, and Configuration Services](#)
- [Lenovo Support Services](#)
- [Lenovo Managed Services](#)
- [Lenovo Sustainability Services](#)

## Lenovo Advisory Services

Lenovo Advisory Services simplify the planning process, enabling customers to build future-proofed strategies in as little as six weeks. Consultants provide guidance on projects including VM migration, storage, backup and recovery, and cost management to accelerate time to value, improve cost efficiency, and build a flexibly scalable foundation.

- **Assessment Services**

An Assessment helps solve your IT challenges through an onsite, multi-day session with a Lenovo technology expert. We perform a tools-based assessment which provides a comprehensive and thorough review of a company's environment and technology systems. In addition to the technology based functional requirements, the consultant also discusses and records the non-functional business requirements, challenges, and constraints. Assessments help organizations like yours, no matter how large or small, get a better return on your IT investment and overcome challenges in the ever-changing technology landscape.

- **Design Services**

Professional Services consultants perform infrastructure design and implementation planning to support your strategy. The high-level architectures provided by the assessment service are turned into low level designs and wiring diagrams, which are reviewed and approved prior to implementation. The implementation plan will demonstrate an outcome-based proposal to provide business capabilities through infrastructure with a risk-mitigated project plan.

## Lenovo Plan & Design Services

Unlock faster time to market with our tailored, strategic design workshops to align solution approaches with your business goals and technical requirements. Leverage our deep solution expertise and end-to-end delivery partnership to meet your goals efficiently and effectively.

## Lenovo Deployment, Migration, and Configuration Services

Optimize your IT operations by shifting labor-intensive functions to Lenovo's skilled technicians for seamless on-site or remote deployment, configuration, and migration. Enjoy peace of mind, faster time to value, and comprehensive knowledge sharing with your IT staff, backed by our best-practice methodology.

- **Deployment Services for Storage and ThinkAgile**

A comprehensive range of remote and onsite options tailored specifically for your business needs to ensure your storage and ThinkAgile hardware are fully operational from the start.

- **Hardware Installation Services**

A full-range, comprehensive setup for your hardware, including unpacking, inspecting, and positioning components to ensure your equipment is operational and error-free for the most seamless and efficient installation experience, so you can quickly benefit from your investments.

- **DM/DG File Migration Services**

Take the burden of file migration from your IT's shoulders. Our experts will align your requirements and business objectives to the migration plans while coordinating with your team to plan and safely execute the data migration to your storage platforms.

- **DM/DG/DE Health Check Services**

Our experts perform proactive checks of your Firmware and system health to ensure your machines are operating at peak and optimal efficiency to maximize up-time, avoid system failures, ensure the security of IT solutions and simplify maintenance.

- **Factory Integrated Services**

A suite of value-added offerings provided during the manufacturing phase of a server or storage system that reduces time to value. These services aim at improving your hardware deployment experience and enhance the quality of a standard configuration before it arrives at your facility.

## Lenovo Support Services

In addition to response time options for hardware parts, repairs, and labor, Lenovo offers a wide array of additional support services to ensure your business is positioned for success and longevity. Our goal is to reduce your capital outlays, mitigate your IT risks, and accelerate your time to productivity.

- **Premier Support for Data Centers**

Your direct line to the solution that promises the best, most comprehensive level of support to help you fully unlock the potential of your data center.

- **Premier Enhanced Storage Support (PESS)**

Gain all the benefits of Premier Support for Data Centers, adding dedicated storage specialists and resources to elevate your storage support experience to the next level.

- **Committed Service Repair (CSR)**

Our commitment to ensuring the fastest, most seamless resolution times for mission-critical systems that require immediate attention to ensure minimal downtime and risk for your business. This service is only available for machines under the Premier 4-Hour Response SLA.

- **Multivendor Support Services (MVS)**

Your single point of accountability for resolution support across vast range of leading Server, Storage, and Networking OEMs, allowing you to manage all your supported infrastructure devices seamlessly from a single source.

- **Keep Your Drive (KYD)**

Protect sensitive data and maintain compliance with corporate retention and disposal policies to ensure your data is always under your control, regardless of the number of drives that are installed in your Lenovo server.

- **Technical Account Manager (TAM)**

Your single point of contact to expedite service requests, provide status updates, and furnish reports to track incidents over time, ensuring smooth operations and optimized performance as your business grows.

- **Enterprise Software Support (ESS)**

Gain comprehensive, single-source, and global support for a wide range of server operating systems and Microsoft server applications.

For more information, consult the brochure [Lenovo Operational Support Services for Data Centers](#).

## Lenovo Managed Services

Achieve peak efficiency, high security, and minimal disruption with Lenovo's always-on Managed Services. Our real-time monitoring, 24x7 incident response, and problem resolution ensure your infrastructure operates seamlessly. With quarterly health checks for ongoing optimization and innovation, Lenovo's remote active monitoring boosts end-user experience and productivity by keeping your data center's hardware performing at its best.

Lenovo Managed Services provides continuous 24x7 remote monitoring (plus 24x7 call center availability) and proactive management of your data center using state-of-the-art tools, systems, and practices by a team of highly skilled and experienced Lenovo services professionals.

Quarterly reviews check error logs, verify firmware & OS device driver levels, and software as needed. We'll also maintain records of latest patches, critical updates, and firmware levels, to ensure you systems are providing business value through optimized performance.

## Lenovo Sustainability Services

- **Asset Recovery Services**

Lenovo Asset Recovery Services (ARS) provides a secure, seamless solution for managing end-of-life IT assets, ensuring data is safely sanitized while contributing to a more circular IT lifecycle. By maximizing the reuse or responsible recycling of devices, ARS helps businesses meet sustainability goals while recovering potential value from their retired equipment. For more information, see the [Asset Recovery Services offering page](#).

- **CO2 Offset Services**

Lenovo's CO2 Offset Services offer a simple and transparent way for businesses to take tangible action on their IT footprint. By integrating CO2 offsets directly into device purchases, customers can easily support verified climate projects and track their contributions, making meaningful progress toward their sustainability goals without added complexity.

- **Lenovo Certified Refurbished**

Lenovo Certified Refurbished offers a cost-effective way to support IT circularity without compromising on quality and performance. Each device undergoes rigorous testing and certification, ensuring reliable performance and extending its lifecycle. With Lenovo's trusted certification, you gain peace of mind while making a more sustainable IT choice.

## **Lenovo TruScale**

Lenovo TruScale XaaS is your set of flexible IT services that makes everything easier. Streamline IT procurement, simplify infrastructure and device management, and pay only for what you use – so your business is free to grow and go anywhere.

Lenovo TruScale is the unified solution that gives you simplified access to:

- The industry's broadest portfolio – from pocket to cloud – all delivered as a service
- A single-contract framework for full visibility and accountability
- The global scale to rapidly and securely build teams from anywhere
- Flexible fixed and metered pay-as-you-go models with minimal upfront cost
- The growth-driving combination of hardware, software, infrastructure, and solutions – all from one single provider with one point of accountability.

For information about Lenovo TruScale offerings that are available in your region, contact your local Lenovo sales representative or business partner.

## Regulatory compliance

The ST250 server conforms to the following standards:

- Energy Star 3.0
- USA FCC Title 47 CFR Part 15 Subpart B
- Canada ICES-003, issue 6, Class A
- UL62368-1
- CSA C22.2, No. 62368-1-14
- NOM-019
- Argentina IEC60950-1
- Australia/New Zealand AS/NZS CISPR 32, Class A
- Japan VCCI 32-1
- IEC 60950-1 (CB Certificate and CB Test Report), IEC 62368-1 (CB Certificate and CB Test Report)
- China CCC (GB4943.1), GB9254 Class A, GB17625.1, CECP, CELP
- Taiwan BSMI CNS13438, Class A; CNS14336-1
- Korea KN32, Class A; KN35
- Russia, Belorussia and Kazakhstan, TR CU 020/2011 and TR CU 004/2011
- CE Mark (EN55032 Class A, EN60950-1, EN55024, EN61000-3-2, and EN61000-3-3, EN 62368-1)
- CISPR 32, Class A
- TUV-GS ( EN62368-1, EK1-ITB2000)
- India BIS certification

## External drive enclosures

The server supports attachment to external drive enclosures using a RAID controller with external ports or a SAS host bus adapter. Adapters supported by the server are listed in the [SAS adapters for external storage](#) section.

**Note:** Information provided in this section is for ordering reference purposes only. For the operating system and adapter support details, refer to the interoperability matrix for a particular storage enclosure that can be found on the Lenovo Data Center Support web site:

<http://datacentersupport.lenovo.com>

Table 52. External drive enclosures

Model	Description
4587HC1	Lenovo Storage D1212 Disk Expansion Enclosure (2U enclosure with 12x LFF drive bays)
4587HC2	Lenovo Storage D1224 Disk Expansion Enclosure (2U enclosure with 24x SFF drive bays)
6413HC1	Lenovo Storage D3284 High Density Expansion Enclosure (5U enclosure with 84x LFF drive bays)
7DAHCTO1WW	Lenovo ThinkSystem D4390 Direct Attached Storage (4U enclosure with 90x LFF drive bays)

For details about supported drives, adapters, and cables, see the following Lenovo Press Product Guides:

- Lenovo Storage D1212 and D1224  
<http://lenovopress.lenovo.com/lp0512>
- Lenovo Storage D3284  
<http://lenovopress.lenovo.com/lp0513>
- Lenovo ThinkSystem D4390  
<https://lenovopress.lenovo.com/lp1681>

## External storage systems

Lenovo offers the ThinkSystem DE Series, ThinkSystem DG Series and ThinkSystem DM Series external storage systems for high-performance storage. See the DE Series, DG Series and DM Series product guides for specific controller models, expansion enclosures and configuration options:

- ThinkSystem DE Series Storage  
<https://lenovopress.com/storage/thinksystem/de-series#rt=product-guide>
- ThinkSystem DM Series Storage  
<https://lenovopress.com/storage/thinksystem/dm-series#rt=product-guide>
- ThinkSystem DG Series Storage  
<https://lenovopress.com/storage/thinksystem/dg-series#rt=product-guide>

## External backup units

The following table lists the available external SAS tape backup options.

**Tip:** Verify the end-to-end support of an IBM tape backup solution through the IBM System Storage Interoperation Center (SSIC): <http://www.ibm.com/systems/support/storage/ssic>

Table 53. External SAS backup options

Part number	Description
External SAS tape backup drives	
6160S6E	IBM TS2260 Tape Drive Model H6S
6160S7E	IBM TS2270 Tape Drive Model H7S
6160S8E	IBM TS2280 Tape Drive Model H8S
6160S9E	IBM TS2290 Tape Drive Model H9S
External SAS tape backup autoloaders	
6171S6R	IBM TS2900 Tape Autoloader w/LTO6 HH SAS
6171S7R	IBM TS2900 Tape Autoloader w/LTO7 HH SAS
6171S8R	IBM TS2900 Tape Autoloader w/LTO8 HH SAS
6171S9R	IBM TS2900 Tape Autoloader w/LTO9 HH SAS
External tape backup libraries	
6741A1F	IBM TS4300 3U Tape Library Base Unit
6741B1F	IBM TS4300 3U Tape Library Base Unit - Max 48U
6741A3F	TS4300 Tape Library Expansion Unit
6741B3F	IBM TS4300 3U Tape Library Expansion Unit - Max 48U
SAS backup drives for TS4300 Tape Library	
01KP934	LTO 6 HH SAS Drive
01KP937	LTO 7 HH SAS Drive
01KP953	LTO 8 HH SAS Drive
02JH836	LTO 9 HH SAS Drive

For more information, see the list of Product Guides in the Backup units category:  
<https://lenovopress.com/servers/options/backup>

## Top-of-rack Ethernet switches

The following table lists the Ethernet LAN switches that are offered by Lenovo.

Table 54. Ethernet LAN switches

Part number	Description
<b>1 Gb Ethernet Rack switches</b>	
7Y810011WW	Lenovo ThinkSystem NE0152T RackSwitch (Rear to Front)
7Z320011WW	Lenovo ThinkSystem NE0152TO RackSwitch (Rear to Front, ONIE)
7159BAX	Lenovo RackSwitch G7028 (Rear to Front)
7159CAX	Lenovo RackSwitch G7052 (Rear to Front)
7159G52	Lenovo RackSwitch G8052 (Rear to Front)
7165H1X	Juniper EX2300-C PoE Switch
7165H2X	Juniper EX2300-24p PoE Switch
<b>1 Gb Ethernet Campus switches</b>	
7Z340011WW	Lenovo CE0128TB Switch (3-Year Warranty)
7Z360011WW	Lenovo CE0128TB Switch (Limited Lifetime Warranty)
7Z340012WW	Lenovo CE0128PB Switch (3-Year Warranty)
7Z360012WW	Lenovo CE0128PB Switch (Limited Lifetime Warranty)
7Z350021WW	Lenovo CE0152TB Switch (3-Year Warranty)
7Z370021WW	Lenovo CE0152TB Switch (Limited Lifetime Warranty)
7Z350022WW	Lenovo CE0152PB Switch (3-Year Warranty)
7Z370022WW	Lenovo CE0152PB Switch (Limited Lifetime Warranty)
<b>10 Gb Ethernet switches</b>	
7159A1X	Lenovo ThinkSystem NE1032 RackSwitch (Rear to Front)
7159B1X	Lenovo ThinkSystem NE1032T RackSwitch (Rear to Front)
7Z330011WW	Lenovo ThinkSystem NE1064TO RackSwitch (Rear to Front, ONIE)
7159C1X	Lenovo ThinkSystem NE1072T RackSwitch (Rear to Front)
7159CRW	Lenovo RackSwitch G8272 (Rear to Front)
7159GR6	Lenovo RackSwitch G8296 (Rear to Front)
7159BR6	Lenovo RackSwitch G8124E (Rear to Front)
<b>25 Gb Ethernet switches</b>	
7159E1X	Lenovo ThinkSystem NE2572 RackSwitch (Rear to Front)
7Z210021WW	Lenovo ThinkSystem NE2572O RackSwitch (Rear to Front, ONIE)
7Z330021WW	Lenovo ThinkSystem NE2580O RackSwitch (Rear to Front, ONIE)
<b>100 Gb Ethernet switches</b>	
7159D1X	Lenovo ThinkSystem NE10032 RackSwitch (Rear to Front)
7Z210011WW	Lenovo ThinkSystem NE10032O RackSwitch (Rear to Front, ONIE)

For more information, see the list of Product Guides in the following switch categories:

- 1 Gb Ethernet switches: <http://lenovopress.com/networking/tor/1gb?rt=product-guide>
- 10 Gb Ethernet switches: <http://lenovopress.com/networking/tor/10gb?rt=product-guide>
- 25 Gb Ethernet switches: <http://lenovopress.com/networking/tor/25gb?rt=product-guide>
- 40 Gb Ethernet switches: <http://lenovopress.com/networking/tor/40gb?rt=product-guide>
- 100 Gb Ethernet switches: <https://lenovopress.com/networking/tor/100Gb?rt=product-guide>

## **Fibre Channel SAN switches**

Lenovo offers the ThinkSystem DB Series of Fibre Channel SAN switches for high-performance storage expansion. See the DB Series product guides for models and configuration options:

- ThinkSystem DB Series SAN Switches:  
<https://lenovopress.com/storage/switches/rack#rt=product-guide>

## **Uninterruptible power supply units**

The following table lists the uninterruptible power supply (UPS) units that are offered by Lenovo.

Table 55. Uninterruptible power supply units

Part number	Description
Tower UPS units - 100-125VAC	
7DD6A000WW	T1kVA Tower UPS-G2 (100-125VAC)
55951AX	T1kVA Tower UPS (100-125VAC)
7DD6A002WW	T1.5kVA Tower UPS-G2 (100-125VAC)
55952AX	T1.5kVA Tower UPS (100-125VAC)
Tower UPS units - 200-240VAC	
7DD6A001WW	T1kVA Tower UPS-G2 (200-240VAC)
55951KX	T1kVA Tower UPS (200-240VAC)
7DD6A003WW	T1.5kVA Tower UPS-G2 (200-240VAC)
55952KX	T1.5kVA Tower UPS (200-240VAC)
Rack-mounted or tower UPS units - 100-125VAC	
7DD5A001WW	RT1.5kVA 2U Rack or Tower UPS-G2 (100-125VAC)
55941AX	RT1.5kVA 2U Rack or Tower UPS (100-125VAC)
55942AX	RT2.2kVA 2U Rack or Tower UPS (100-125VAC)
7DD5A003WW	RT3kVA 2U Rack or Tower UPS-G2 (100-125VAC)
55943AX	RT3kVA 2U Rack or Tower UPS (100-125VAC)
Rack-mounted or tower UPS units - 200-240VAC	
7DD5A002WW	RT1.5kVA 2U Rack or Tower UPS-G2 (200-240VAC)
55941KX	RT1.5kVA 2U Rack or Tower UPS (200-240VAC)
55942KX	RT2.2kVA 2U Rack or Tower UPS (200-240VAC)
7DD5A005WW	RT3kVA 2U Rack or Tower UPS-G2 (200-240VAC)
55943KX	RT3kVA 2U Rack or Tower UPS (200-240VAC)
7DD5A007WW	RT5kVA 3U Rack or Tower UPS-G2 (200-240VAC)
55945KX	RT5kVA 3U Rack or Tower UPS (200-240VAC)
7DD5A008WW	RT6kVA 3U Rack or Tower UPS-G2 (200-240VAC)
55946KX	RT6kVA 3U Rack or Tower UPS (200-240VAC)
55948KX	RT8kVA 6U Rack or Tower UPS (200-240VAC)
7DD5A00AWW	RT11kVA 6U Rack or Tower UPS-G2 (200-240VAC)
55949KX	RT11kVA 6U Rack or Tower UPS (200-240VAC)
55943KT†	ThinkSystem RT3kVA 2U Standard UPS (200-230VAC) (2x C13 10A, 2x GB 10A, 1x C19 16A outlets)
55943LT†	ThinkSystem RT3kVA 2U Long Backup UPS (200-230VAC) (2x C13 10A, 2x GB 10A, 1x C19 16A outlets)
55946KT†	ThinkSystem RT6kVA 5U UPS (200-230VAC) (2x C13 10A outlets, 1x Terminal Block output)
5594XKT†	ThinkSystem RT10kVA 5U UPS (200-230VAC) (2x C13 10A outlets, 1x Terminal Block output)
Rack-mounted or tower UPS units - 380-415VAC	
55948PX	RT8kVA 6U 3:1 Phase Rack or Tower UPS (380-415VAC)
55949PX	RT11kVA 6U 3:1 Phase Rack or Tower UPS (380-415VAC)

† Only available in China and the Asia Pacific market.

For more information, see the list of Product Guides in the UPS category:

<https://lenovopress.com/servers/options/ups>

## Power distribution units

The following table lists the power distribution units (PDUs) that are offered by Lenovo.

Table 56. Power distribution units

Part number	Feature code	Description	ANZ	ASEAN	Brazil	EET	MEA	RUCIS	WE	HTK	INDIA	JAPAN	LA	NA	PRC

## Rack cabinets

The ST250 server can be installed horizontally in a rack cabinet using the Rack Mount Kit, as described in the [Rack installation](#) section.

The following table lists the supported rack cabinets.

Table 57. Rack cabinets

Model	Description
7D2NCTO1WW	12U 1200mm Deep Micro Datacenter Rack
7D2PCTO1WW	18U 1200mm Deep Micro Datacenter Rack
93072RX	25U Standard Rack (1000mm)
93072PX	25U Static S2 Standard Rack (1000mm)
7D6DA007WW	ThinkSystem 42U Onyx Primary Heavy Duty Rack Cabinet (1200mm)
7D6DA008WW	ThinkSystem 42U Pearl Primary Heavy Duty Rack Cabinet (1200mm)
7D6EA009WW	ThinkSystem 48U Onyx Primary Heavy Duty Rack Cabinet (1200mm)
7D6EA00AWW	ThinkSystem 48U Pearl Primary Heavy Duty Rack Cabinet (1200mm)
1410O42	Lenovo EveryScale 42U Onyx Heavy Duty Rack Cabinet
1410P42	Lenovo EveryScale 42U Pearl Heavy Duty Rack Cabinet
1410O48	Lenovo EveryScale 48U Onyx Heavy Duty Rack Cabinet
1410P48	Lenovo EveryScale 48U Pearl Heavy Duty Rack Cabinet
93604PX	42U 1200mm Deep Dynamic Rack
93614PX	42U 1200mm Deep Static Rack
93634PX	42U 1100mm Dynamic Rack
93634EX	42U 1100mm Dynamic Expansion Rack
93074RX	42U Standard Rack (1000mm)

For specifications about these racks, see the Lenovo Rack Cabinet Reference, available from: <https://lenovopress.com/lp1287-lenovo-rack-cabinet-reference>

For more information, see the list of Product Guides in the Rack cabinets category: <https://lenovopress.com/servers/options/racks>

## KVM console options

The following table lists the supported KVM consoles.

Table 58. KVM console

Part number	Description
Consoles	
4XF7A84188	ThinkSystem 18.5" LCD console (with US English keyboard)
4XF7A73009	ThinkSystem 18.5" LCD console (with US English keyboard)
17238BX	1U 18.5" Standard Console (without keyboard - see the next table)

The following table lists the keyboards supported with the 1U 18.5" Standard Console (now withdrawn).

**Note:** These keyboards are not supported with the ThinkSystem 18.5" LCD Console.

Table 59. Keyboards for 1U 18.5" Standard Console

Part number	Description
7ZB7A05469	ThinkSystem Keyboard w/ Int.Pointing Device USB - Arabic 253 RoHS v2
7ZB7A05468	ThinkSystem Keyboard w/ Int. Pointing Device USB - Belg/UK 120 RoHS v2

7ZB7A05230	ThinkSystem Keyboard w/ Int. Pointing Device USB - US Euro 103P RoHS v2

The following table lists the available KVM switches and the options that are supported with them.

Table 60. KVM switches and options

Part number	Description
KVM Console switches	
1754D1T	ThinkSystem Digital 2x1x16 KVM Switch (DVI video output port)
1754A1T	ThinkSystem Analog 1x8 KVM Switch (DVI video output port)
1754D2X	Global 4x2x32 Console Manager (GCM32)
1754D1X	Global 2x2x16 Console Manager (GCM16)
1754A2X	Local 2x16 Console Manager (LCM16)
1754A1X	Local 1x8 Console Manager (LCM8)
Cables for ThinkSystem Digital and Analog KVM Console switches	
4X97A11108	ThinkSystem VGA to DVI Conversion Cable
4X97A11109	ThinkSystem Single-USB Conversion Cable for Digital KVM
4X97A11107	ThinkSystem Dual-USB Conversion Cable for Digital KVM
4X97A11106	ThinkSystem USB Conversion Cable for Analog KVM
Cables for GCM and LCM Console switches	
43V6147	Single Cable USB Conversion Option (UCO)
39M2895	USB Conversion Option Pack
46M5383	Virtual Media Conversion Option Gen2 (VCO2)
46M5382	Serial Conversion Option (SCO)

## Lenovo Financial Services

Why wait to obtain the technology you need now? No payments for 90 days and predictable, low monthly payments make it easy to budget for your Lenovo solution.

- **Flexible**

Our in-depth knowledge of the products, services and various market segments allows us to offer greater flexibility in structures, documentation and end of lease options.

- **100% Solution Financing**

Financing your entire solution including hardware, software, and services, ensures more predictability in your project planning with fixed, manageable payments and low monthly payments.

- **Device as a Service (DaaS)**

Leverage latest technology to advance your business. Customized solutions aligned to your needs. Flexibility to add equipment to support growth. Protect your technology with Lenovo's Premier Support service.

- **24/7 Asset management**

Manage your financed solutions with electronic access to your lease documents, payment histories, invoices and asset information.

- **Fair Market Value (FMV) and \$1 Purchase Option Leases**

Maximize your purchasing power with our lowest cost option. An FMV lease offers lower monthly payments than loans or lease-to-own financing. Think of an FMV lease as a rental. You have the flexibility at the end of the lease term to return the equipment, continue leasing it, or purchase it for the fair market value. In a \$1 Out Purchase Option lease, you own the equipment. It is a good option when you are confident you will use the equipment for an extended period beyond the finance term. Both lease types have merits depending on your needs. We can help you determine which option will best meet your technological and budgetary goals.

Ask your Lenovo Financial Services representative about this promotion and how to submit a credit application. For the majority of credit applicants, we have enough information to deliver an instant decision and send a notification within minutes.
