

Lenovo ThinkSystem SR665 V3 Server

Product Guide

The Lenovo ThinkSystem SR665 V3 is a 2-socket 2U server that features the 5th Gen AMD EPYC 9005 "Turin" family of processors. With up to 160 cores per processor and support for the new PCIe 5.0 standard for I/O, the SR665 V3 offers the ultimate in two-socket server performance in a 2U form factor. The server is ideal for dense workloads that can take advantage of GPU processing and high-performance NVMe drives.

Suggested uses: Inference, virtualization, VDI, HPC, Hyperconverged infrastructure

Figure 1. Lenovo ThinkSystem SR665 V3

[Full 3D Tour](#)

Did you know?

The SR665 V3 server is a very configuration-rich offering, supporting 30 different drive bay configurations in the front, middle and rear of the server and 6 different slot configurations at the rear of the server. This level of flexibility ensures that you can configure the server exactly the way your workload requires.

Key features

Combining performance and flexibility, the SR665 V3 server is a great choice for enterprises of all sizes. The server offers a broad selection of drive and slot configurations and offers high performance features that industries such as finance, healthcare and telco need. Outstanding reliability, availability, and serviceability (RAS) and high-efficiency design can improve your business environment and can help save operational costs.

Scalability and performance

The following features boost performance, improve scalability and reduce costs:

- Supports one or two 5th Gen AMD EPYC 9005 processors
 - Up to 160 cores and 320 threads
 - Core speed of up to 4.0 GHz
 - TDP rating of up to 400 W
- Supports one or two 4th Gen AMD EPYC 9004 processors
 - Up to 128 cores and 256 threads
 - Core speed of up to 4.1 GHz
 - TDP rating of up to 400 W
- Support for DDR5 memory DIMMs to maximize the performance of the memory subsystem:
 - Up to 24 DDR5 memory DIMMs, 12 DIMMs per processor
 - 12 memory channels per processor (1 DIMM per channel)
 - DIMM speeds up to 6400 MHz
 - Using 256GB 3DS RDIMMs, the server supports up to 6TB of system memory
- Supports up to eight single-width GPUs or three double-wide GPUs, for substantial processing power in a 2U system.
- The server is Compute Express Link (CXL) v1.1 Ready. With CXL 1.1 for next-generation workloads, you can reduce compute latency in the data center and lower TCO. CXL is a protocol that runs across the standard PCIe physical layer and can support both standard PCIe devices as well as CXL devices on the same link.
- Supports up to 40x 2.5-inch hot-swap drive bays, by using combinations of front-accessible (up to 24 bays), mid bays (8 bays) and rear-accessible (8 bays).
- Supports 20x 3.5-inch drive bays for lower-cost high-capacity HDD storage. 2.5-inch and 3.5-inch drive bays can be mixed if desired.
- Supports up to 32x NVMe drives without oversubscription of PCIe lanes (1:1 connectivity). The use of NVMe drives maximizes drive I/O performance, in terms of throughput, bandwidth, and latency.
- Supports up to 20x SATA drives using the onboard SATA controller (no additional adapter needed), enabling lower cost, high capacity storage solution for cold storage workloads.
- Supports high-speed RAID controllers from Lenovo and Broadcom providing 12 Gb SAS connectivity to the drive backplanes. A variety of PCIe 3.0 and PCIe 4.0 RAID adapters are available.
- Supports two externally accessible 7mm hot-swap drives for operating system boot functions or data storage. Optional RAID-0 or RAID-1.
- Supports M.2 drives for convenient operating system boot functions. Available M.2 adapters support either one M.2 drive or two M.2 drives. Optional RAID-0 or RAID-1.
- Up to 12x PCIe slots (10x rear, 2x front), plus a slot dedicated to an OCP 3.0 adapter. 2.5-inch drive configurations also support an additional internal bay for a cabled RAID adapter or HBA.
- The server has a dedicated industry-standard OCP 3.0 small form factor (SFF) slot, with a PCIe 5.0 x16 interface, supporting a variety of Ethernet network adapters. Simple-swap mechanism with thumbscrews and pull-tab enables tool-less installation and removal of the adapter. Supports shared BMC network sideband connectivity to enable out-of-band systems management.

- The server offers PCI Express 5.0 (PCIe Gen 5) I/O expansion capabilities that doubles the theoretical maximum bandwidth of PCIe 4.0 (32GT/s in each direction for PCIe 5.0, compared to 16 GT/s with PCIe 4.0). A PCIe 5.0 x16 slot provides 128 GB/s bandwidth, enough to support a 400GbE network connection.

Availability and serviceability

The server provides many features to simplify serviceability and increase system uptime:

- Designed to run 24 hours a day, 7 days a week
- The server uses ECC memory and supports memory RAS features including Single Device Data Correction (SDDC, also known as Chipkill), Patrol/Demand Scrubbing, Bounded Fault, DRAM Address Command Parity with Replay, DRAM Uncorrected ECC Error Retry, On-die ECC, ECC Error Check and Scrub (ECS), and Post Package Repair.
- The server offers hot-swap drives, supporting RAID redundancy for data protection and greater system uptime.
- Available M.2 configuration with RAID support which can enable two SATA or two NVMe M.2 drives to be configured as a redundant pair.
- The server has up to two hot-swap redundant power supplies and up to six hot-swap redundant fans to provide availability for business-critical applications.
- Optional front-accessible slots and drives so that most major components and cables (except power) are located at the front of the server
- The power-source-independent light path diagnostics uses LEDs to lead the technician to failed (or failing) components, which simplifies servicing, speeds up problem resolution, and helps improve system availability.
- Solid-state drives (SSDs) offer more reliability than traditional mechanical HDDs for greater uptime.
- Proactive Platform Alerts (including PFA and SMART alerts): Processors, voltage regulators, memory, internal storage (SAS/SATA HDDs and SSDs, NVMe SSDs, M.2 storage), fans, power supplies, RAID controllers, server ambient and subcomponent temperatures. Alerts can be surfaced through the XClarity Controller to managers such as Lenovo XClarity Administrator, VMware vCenter, and Microsoft System Center. These proactive alerts let you take appropriate actions in advance of possible failure, thereby increasing server uptime and application availability.
- The built-in XClarity Controller 2 continuously monitors system parameters, triggers alerts, and performs recovery actions in case of failures to minimize downtime.
- Built-in diagnostics in UEFI, using Lenovo XClarity Provisioning Manager, speed up troubleshooting tasks to reduce service time.
- Lenovo XClarity Provisioning Manager supports diagnostics and can save service data to a USB key drive or remote CIFS share folder for troubleshooting and reduce service time.
- Auto restart in the event of a momentary loss of AC power (based on power policy setting in the XClarity Controller service processor)
- Offers a diagnostics port on the front of the server to allow you to attach an external diagnostics handset for enhanced systems management capabilities.
- Support for the XClarity Administrator Mobile app running on a supported smartphone and connected to the server through the service-enabled USB port, enables additional local systems management functions.
- Three-year or one-year customer-replaceable unit and onsite limited warranty, 9 x 5 next business day. Optional service upgrades are available.

Manageability and security

Systems management features simplify local and remote management:

- The server includes an XClarity Controller 2 (XCC2) to monitor server availability. Optional upgrade to XCC Platinum to provide remote control (keyboard video mouse) functions, support for the mounting of remote media files, FIPS 140-3 security, enhanced NIST 800-193 support, boot capture, and other management and security features.
- Lenovo XClarity Administrator offers comprehensive hardware management tools that help to increase uptime, reduce costs and improve productivity through advanced server management capabilities.
- UEFI-based Lenovo XClarity Provisioning Manager, accessible from F1 during boot, provides system inventory information, graphical UEFI Setup, platform update function, RAID Setup wizard, operating system installation function, and diagnostic functions.
- Support for Lenovo XClarity Energy Manager which captures real-time power and temperature data from the server and provides automated controls to lower energy costs.
- An integrated industry-standard Unified Extensible Firmware Interface (UEFI) enables improved setup, configuration, and updates, and simplifies error handling.
- Support for industry standard management protocols, IPMI 2.0, SNMP 3.0, Redfish REST API, serial console via IPMI
- An integrated hardware Trusted Platform Module (TPM) supporting TPM 2.0 enables advanced cryptographic functionality, such as digital signatures and remote attestation.
- Administrator and power-on passwords help protect from unauthorized access to the server.
- Supports AMD Secure Root-of-Trust, Secure Run and Secure Move features to minimize potential attacks and protect data as the OS is booted, as applications are run and as applications are migrated from server to server.
- Supports Secure Boot to ensure only a digitally signed operating system can be used.
- Industry-standard Advanced Encryption Standard (AES) NI support for faster, stronger encryption.
- Additional physical security features are a chassis intrusion switch and a lockable front bezel.

Energy efficiency

The following energy-efficiency features help save energy, reduce operational costs, and increase energy availability:

- Energy-efficient planar components help lower operational costs.
- High-efficiency power supplies with 80 PLUS Titanium certifications
- Low-voltage 1.1V DDR5 memory offers energy savings compared to 1.2V DDR4 DIMMs, an approximately 20% decrease in power consumption
- Solid-state drives (SSDs) consume as much as 80% less power than traditional spinning 2.5-inch HDDs.
- The server uses hexagonal ventilation holes, which can be grouped more densely than round holes, providing more efficient airflow through the system and thus keeping your system cooler.
- Optional Lenovo XClarity Energy Manager provides advanced data center power notification and analysis to help achieve lower heat output and reduced cooling needs.

Comparing the SR665 V3 to the SR665

The ThinkSystem SR665 V3 improves on the previous generation SR665, as summarized in the following table.

Table 1. Comparing the SR665 V3 to the SR665

Feature	SR665	SR665 V3	Benefits
Processor	• 2x 2nd or 3rd Gen AMD EPYC processors • Up to 64 cores • TDP ratings up to 280W • 64x PCIe 4.0 lanes per processor • 4x dedicated xGMI x16 interprocessor links	• 2x 4th Gen or 5th Gen AMD EPYC processors • Up to 160 cores • TDP ratings up to 400W • 64x PCIe 5.0 lanes per processor • 4x xGMI x16 interprocessor links, 1 of which can be used for an additional 16 PCIe 5.0 lanes	• Significant increase in cores per processor • Increased performance • Consolidation of more apps on same number of servers, reducing costs • New PCIe 5.0 support means higher performance networking and NVMe storage • Additional 16 PCIe lanes using an xGMI link for PCIe
Memory	• DDR4 memory operating up to 2933 MHz • 8 channels per CPU • 32 DIMMs (16 per processor), 2 DIMMs per channel • Supports RDIMMs and 3DS RDIMMs • Up to 8TB of system memory	• DDR5 memory operating up to 6400 MHz • 12 channels per CPU • 24 DIMMs (12 per processor), 1 DIMM per channel • Supports RDIMMs, 3DS RDIMMs and 9x4 RDIMMs • Up to 6TB of system memory	• New DDR5 memory offers significant performance improvements over DDR4 • More memory channels means greater memory bandwidth • Support for lower-cost 9x4 DIMMs
Internal storage	• 20x 3.5" SAS/SATA/NVMe (12 front, 4 mid, 4 rear) • 40x 2.5" SAS/SATA/NVMe (24 front, 8 mid, 8 rear) • Up to 4x 3.5" or 8x 2.5" mid-chassis drive bays • Up to 4x 3.5" or 8x 2.5" rear drive bays • 2x Internal M.2 with optional RAID • 16x onboard NVMe ports • 2x rear 7mm hot swap SAS/SATA/NVMe; optional RAID	• 20x 3.5" SAS/SATA/NVMe (12 front, 4 mid, 4 rear) • 40x 2.5" SAS/SATA/NVMe (24 front, 8 mid, 8 rear) • Up to 4x 3.5" or 8x 2.5" mid-chassis drive bays • Up to 4x 3.5" or 8x 2.5" rear drive bays • 2x Internal M.2 (optional RAID support) • 20x onboard NVMe ports • 2x rear 7mm hot swap SAS/SATA/NVMe (optional RAID support)	• Flexible storage offerings • Up to 32x NVMe drives for high-performance storage • 7mm hot swap drives as boot drives

Feature	SR665	SR665 V3	Benefits
RAID	8-port and 16-port RAID adapters with up to 8GB flash - Support for Lenovo and Broadcom adapters - Support for PCIe or Internal cabled (CFF) form factor adapters - Support for NVMe drives connected to 940 RAID adapters (Tri-Mode) - Storage HBAs available - PCIe 3.0 and PCIe 4.0 adapter choices	8-port and 16-port RAID adapters with up to 8GB flash - Support for Lenovo and Broadcom adapters - Support for PCIe or Internal cabled (CFF) form factor adapters - Support for NVMe drives connected to 940 RAID adapters (Tri-Mode) - Storage HBAs available - PCIe 3.0 and PCIe 4.0 adapter choices with support for Gen 5 adapters when available	- Consistent RAID/HBA support - Flexible config solution - PCIe Gen 5 allows for greater storage performance
Networking	- OCP 3.0 slot with PCIe Gen 4 x16 interface (rear of server) - Additional PCIe adapters supported 1GbE dedicated Management port	- OCP 3.0 slot with PCIe Gen 5 x16 interface (rear or front of server) - Additional PCIe adapters supported 1GbE dedicated Management port	- Improved performance with PCIe Gen 5 - Optional front-accessible OCP slot
PCIe	- Supports PCIe 4.0 - Up to 8x PCIe slots (all full-height slots) - Supports a RAID/HBA in CFF form factor (does not occupy a PCIe slot) 1x OCP 3.0 slot	- Supports PCIe 5.0 - Up to 12x PCIe slots, front and rear - Up to 10x PCIe slots at the rear (6x full height, 4x low-profile) or 8x PCIe slots (all full-height slots) - Up to 9x slots can be PCIe 5.0 - Supports a RAID/HBA in CFF form factor (does not occupy a PCIe slot) 1x OCP 3.0 slot, either rear or front - Support for 3x front-accessible slots (2x FH PCIe + 1x OCP) with 16 drive bays - Flexible xGMI interprocessor links allowing 1 link to be converted to two 16 PCIe 5.0 x16 connections	- More PCIe slots - PCIe Gen 5 allows for greater I/O performance - Flexible PCIe offerings - Front-accessible slots available - More PCIe connections for greater PCIe/NVMe support
GPU support	Supports up to 8x single-wide GPUs or up to 3x double-wide GPUs	Supports up to 8x single-wide GPUs or up to 3x double-wide GPUs	High performance GPU support
Management and security	- XClarity Controller - Support for full XClarity toolset including XClarity Administrator - Platform Firmware Resiliency (PFR) hardware Root of Trust (RoT) - Tamper Switch security solution (intrusion switch)	- Integrated XClarity Controller 2 - Support for full XClarity toolset including XClarity Administrator - Platform Firmware Resiliency (PFR) hardware Root of Trust (RoT) - Tamper Switch security solution (intrusion switch)	- New XCC2 offers improved management capabilities - Same system management tool with previous generation - Silicon-level security solution

Feature	SR665	SR665 V3	Benefits
Power	- Choice of 500W, 750W, 1100W, 1800W AC Hot Plug PSUs - Available in Titanium and Platinum efficiency levels 1100W -48VDC Platinum general support 240V HVDC support for PRC customers - Active-Standby mode	- Choice of 500W, 750W, 1100W, 1800W, 2400W, 2600W AC Hot Plug PSUs - Available in Titanium and Platinum efficiency levels 1100W -48VDC Platinum general support 240V HVDC support for PRC customers - Active-Standby mode	- Multiple PSU offerings to suit the configuration selected - New ErP Lot 9-compliant offerings - Support for Telco customers with -48V requirements

Components and connectors

The following figure shows the front of the server. The server supports either 2.5-inch or 3.5-inch hot-swap drives at the front, and configurations with 16x 2.5-inch drive bays optionally support 3 front-accessible PCIe slots.

Figure 2. Front view of the ThinkSystem SR665 V3

For details on the front ports, including the optional front VGA port and front external diagnostic port, see the [Local management](#) section.

The following figure shows the components visible from the rear of the server. The figure shows one configuration, with eight full-height PCIe slots, however there are additional rear configurations which include 10 PCIe slots (6x full-height, 4x low-profile), or include 3.5-inch drive bays or 2.5-inch drive bays. The server also supports two rear-accessible 7mm hot-swap drive bays.

Figure 3. Rear view of the ThinkSystem SR665 V3 (configuration with eight full-height PCIe slots)
The following figure shows the locations of key components inside the server.

Figure 4. Internal view of the ThinkSystem SR665 V3

System architecture

The following figure shows the architectural block diagram of the SR665 V3, showing the major components and their connections.

Note that one of the xGMI links between the processors can be used instead as two PCIe 5.0 x16 connections. These PCIe connections can be used for additional NVMe drive support.

Figure 5. SR665 V3 system architectural block diagram

Standard specifications

The following table lists the standard specifications.

Table 2. Standard specifications

Components	Specification
Machine types	7D9B - 1 year warranty 7D9A - 3 year warranty
Form factor	2U rack.
Processor	One or two AMD EPYC processors, either 5th Gen 9005 ("Turin") or 4th Gen 9004 ("Genoa"). Supports processors up to 160 cores, core speeds of up to 4.1 GHz, and TDP ratings of up to 400W. Supports PCIe 5.0 for high performance I/O.
Chipset	Not applicable (platform controller hub functions are integrated into the processor)
Memory	24 DIMM slots with two processors (12 DIMM slots per processor). Each processor has 12 memory channels, with 1 DIMM per channel (DPC). Lenovo TruDDR5 RDIMMs, 3DS RDIMMs, and 9x4 RDIMMs are supported. Memory speeds up to 6400 MHz with 5th Gen AMD EPYC processors.
Memory maximum	Up to 6TB with 24x 256GB 3DS RDIMMs
Persistent memory	Not supported.
Memory protection	ECC, SDDC, Patrol/Demand Scrubbing, Bounded Fault, DRAM Address Command Parity with Replay, DRAM Uncorrected ECC Error Retry, On-die ECC, ECC Error Check and Scrub (ECS), Post Package Repair
Disk drive bays	Up to 20x 3.5-inch or 40x 2.5-inch hot-swap drive bays: • Front bays can be 3.5-inch (8 or 12 bays) or 2.5-inch (8, 16 or 24 bays) • Middle bays can be 3.5-inch (4 bays) or 2.5-inch (8 bays) • Rear bays can be 3.5-inch (2 or 4 bays) or 2.5-inch (4 or 8 bays) • Combinations of SAS/SATA, NVMe, or AnyBay (supporting SAS, SATA or NVMe) are available The server also supports these drives for OS boot or drive storage: • Two 7mm drives at the rear of the server • Internal M.2 module supporting up to two M.2 drives See Storage configurations for details.
Maximum internal storage	• 2.5-inch drives: ◦ 1228.8TB using 40x 30.72TB 2.5-inch SAS SSDs ◦ 307.2TB using 40x 7.68TB 2.5-inch SATA SSDs ◦ 3,932.16TB using 32x 122.88TB 2.5-inch NVMe SSDs ◦ 96TB using 40x 2.4TB 2.5-inch SAS HDDs • 3.5-inch drives: ◦ 480TB using 20x 24TB 3.5-inch SAS HDDs ◦ 480TB using 20x 24TB 3.5-inch SATA HDDs ◦ 307.2TB using 20x 15.36TB 3.5-inch SAS SSDs ◦ 153.6TB using 20x 7.68TB 3.5-inch SATA SSDs ◦ 153.6TB using 12x 12.8TB 3.5-inch NVMe SSDs

Components	Specification
Storage controller	- Up to 20x Onboard SATA ports (non-RAID) - Up to 20x Onboard NVMe ports (non-RAID) - NVMe Retimer Adapter (PCIe 4.0 or PCIe 5.0) 12 Gb SAS/SATA RAID adapters 8, 16 or 32 ports - Up to 8GB flash-backed cache - PCIe 4.0 or PCIe 3.0 host interface 12 Gb SAS/SATA HBA (non-RAID) 8-port and 16-port - PCIe 4.0 or PCIe 3.0 host interface
Optical drive bays	No internal optical drive
Tape drive bays	No internal backup drive
Network interfaces	Dedicated OCP 3.0 SFF slot with PCIe 5.0 x16 host interface, either at the rear of the server (rear-accessible) or the front of the server (front-accessible). Supports a variety of 2-port and 4-port adapters with 1GbE, 10GbE and 25GbE network connectivity. One port can optionally be shared with the XClarity Controller 2 (XCC2) management processor for Wake-on-LAN and NC-SI support. Additional PCIe network adapters supported in PCIe slots.
PCI Expansion slots	Up to 12x PCIe slots (10x rear, 2x front), plus a slot dedicated to an OCP 3.0 adapter. 2.5-inch drive configurations also support an additional internal bay for a cabled RAID adapter or HBA. <i>Rear:</i> Up to 10x PCIe slots, plus a slot dedicated to the OCP adapter. Slot are either PCIe 5.0 or 4.0 depending on riser selection and rear drive bay selection. The use of some slots requires two processors. Slots are configured using three riser cards. Riser 1 (slots 1-3) and Riser 2 (slots 4-6) are installed in slots in the system board, Riser 3 (slots 7-8) and Riser 4 (9-10) are cabled to ports on the system board. A variety of riser cards are available. See the I/O expansion for details. <i>Front:</i> The server also supports slots at the front of the server (configurations with up to 16 drive bays): 2x PCIe x16 full-height half-length slots, plus 1x OCP 3.0 slot <i>Internal:</i> For 2.5-inch front drive configurations, the server supports the installation of a RAID adapter or HBA in a dedicated area that does not consume any of the PCIe slots.
Ports	Front: 1x USB 3.2 G1 (5 Gb/s) port, 1x USB 2.0 port (also for XCC local management), External diagnostics port, optional VGA port. Rear: 3x USB 3.2 G1 (5 Gb/s) ports, 1x VGA video port, 1x RJ-45 1GbE systems management port for XCC remote management. Optional 2nd XCC remote management port (installs in OCP slot). Optional DB-9 COM serial port (installs in slot 3). Internal: 1x USB 3.2 G1 (5 Gb/s) connector for operating system or license key purposes.
Cooling	Up to 6x N+1 redundant hot swap 60 mm fans, configuration dependent. One fan integrated in each power supply. For customers with water infrastructure in their data center, the SR665 V3 also offers Lenovo Neptune Core open-loop water cooling for efficient heat removal.
Power supply	Up to two hot-swap redundant AC power supplies, 80 PLUS Platinum or 80 PLUS Titanium certification. 750 W, 1100 W, 1800 W, 2400 W, and 2600 W AC, supporting 220 V AC. 750 W and 1100 W options also support 110V input supply. In China only, all power supply options support 240 V DC. Also available is a 1100W power supply with a -48V DC input.
Video	Embedded video graphics with 16 MB memory with 2D hardware accelerator, integrated into the XClarity Controller. Maximum resolution is 1920x1200 32bpp at 60Hz.

Components	Specification
Hot-swap parts	Drives, power supplies, and fans.
Systems management	Operator panel with status LEDs. Optional External Diagnostics Handset with LCD display. Models with 16x 2.5-inch front drive bays can optionally support an Integrated Diagnostics Panel. XClarity Controller 2 (XCC2) embedded management based on the ASPEED AST2600 baseboard management controller (BMC). Dedicated rear Ethernet port for XCC2 remote access for management. Optional 2nd redundant XCC2 remote port supported, installs in the OCP slot. XClarity Administrator for centralized infrastructure management, XClarity Integrator plugins, and XClarity Energy Manager centralized server power management. Optional XCC Platinum to enable remote control functions and other features.
Security features	Chassis intrusion switch, Power-on password, administrator's password, Root of Trust module supporting TPM 2.0 and Platform Firmware Resiliency (PFR). Optional lockable front security bezel.
Operating systems supported	Microsoft Windows Server, Microsoft Windows 10 & 11, Red Hat Enterprise Linux, SUSE Linux Enterprise Server, VMware ESXi, Ubuntu Server. See the Operating system support section for specifics.
Limited warranty	Three-year or one-year (model dependent) customer-replaceable unit and onsite limited warranty with 9x5 next business day (NBD).
Service and support	Optional service upgrades are available through Lenovo Services: 4-hour or 2-hour response time, 6-hour fix time, 1-year or 2-year warranty extension, software support for Lenovo hardware and some third-party applications.
Dimensions	Width: 445 mm (17.5 in.), height: 87 mm (3.4 in.), depth: 766 mm (30.1 in.). See Physical and electrical specifications for details.
Weight	Maximum: 38.8 kg (85.5 lb)

Models

ThinkSystem SR665 V3 models can be configured by using the [Lenovo Data Center Solution Configurator \(DCSC\)](#).

Topics in this section:

- [CTO models](#)
- [CTO models for Windows 10 and Windows 11](#)
- [Base feature codes](#)
- [Preconfigured models](#)

CTO models

ThinkSystem SR665 V3 models can be configured by using the [Lenovo Data Center Solution Configurator \(DCSC\)](#).

Configure-to-order (CTO) models are used to create models with factory-integrated server customizations. For CTO models, two types of base CTO models are available for the SR665 V3 as listed in the columns in the following table:

- General purpose base CTO models are for general business (non-HPC) and is selectable by choosing **General Purpose** mode in DCSC.
- AI and HPC base models are intended for Artificial Intelligence (AI) and High Performance Computing (HPC) configurations and solutions are enabled using the **AI & HPC Hardware - ThinkSystem Hardware** mode in DCSC. These configurations, along with Lenovo EveryScale Solutions, can also be built using [System x and Cluster Solutions Configurator \(x-config\)](#). **Tip:** Some HPC and AI models are not listed in DCSC and can only be configured in x-config.

"For AI" models: The base CTO models listed in the table with "for AI" in the names are the only base models that support high-performance GPUs and accelerators (Controlled GPUs). These models are classified under US Government ECCN regulations and have limited market and customer availability. All other base models do not support high-performance GPUs.

Preconfigured server models may also be available for the SR665 V3, however these are region-specific; that is, each region may define their own server models, and not all server models are available in every region.

The following table lists the base CTO models of the ThinkSystem SR665 V3 server.

Table 3. Base CTO models

Machine Type/Model General purpose	Machine Type/Model for AI and HPC	Description
7D9ACTO1WW	7D9ACTOLWW	ThinkSystem SR665 V3-3yr Warranty
7D9ACTOAWW	7D9ACTOHWW	ThinkSystem SR665 V3-3yr Warranty for AI
7D9BCTO1WW	7D9BCTOLWW	ThinkSystem SR665 V3-1yr Warranty

CTO models for Windows 10 and Windows 11

The SR665 V3 can run Windows 10 and Windows 11, however only a subset of adapters and drives can be installed. For ease of configuration, the following Base CTO models have been announced to assist building a configuration that can be used with the client operating systems. For more information, see the [Windows 10 and Windows 11](#) section.

Table 4. Base CTO models for SR665 V3 with Windows 10 and Windows 11

Machine Type/Model	Description
7D9ACTO2WW	ThinkSystem SR665 V3 Workstation - 3 year Warranty
7D9BCTO2WW	ThinkSystem SR665 V3 Workstation - 1 year Warranty

Base feature codes

Models of the SR665 V3 are defined based on whether the server has 2.5-inch drive bays at the front (called the 2.5-inch chassis) or whether it has 3.5-inch drive bays at the front (called the 3.5-inch chassis). For models, the feature codes for these chassis bases are as listed in the following table.

Table 5. Chassis base feature codes

Feature code	Description
BLKJ	ThinkSystem V3 2U 12x3.5" Chassis
BLKK	ThinkSystem V3 2U 24x2.5" Chassis

Preconfigured models

The following tables list the available preconfigured models, grouped by region.

- [Models for Australia and New Zealand](#)
- [Models for Brazil](#)
- [Models for EMEA region](#)
- [Models for India](#)
- [Models for Latin American countries \(except Brazil\)](#)

Refer to the Specifications section for information about standard features of the server.

Common to all models:

- Power supplies are Platinum unless otherwise stated
- All models include a Toolless Slide Rail Kit

Models for Australia and New Zealand

Common to all Australia and New Zealand models:

- All models include a Toolless Slide Rail Kit and Cable Management Arm

Table 7. Models for Australia and New Zealand

Processors

The SR665 V3 supports processors in the fourth-generation AMD EPYC family of processors. The server supports one or two processors.

Topics in this section:

- [Processor options](#)
- [Processor features](#)
- [xGMI cabled connection](#)
- [One-processor configurations](#)
- [Thermal requirements by processor](#)
- [Lenovo Processor Neptune Core Module - Open-loop liquid cooling](#)
- [UEFI operating modes](#)
- [Platform Secure Boot](#)

Processor options

The SR665 V3 supports the following processor families:

- 5th Gen AMD EPYC processors (formerly codenamed "Turin"):
 - Processors with Zen 5 architecture, with high per-core performance
 - Processors with Zen 5c architecture, with high core density and best power efficiency
- 4th Gen AMD EPYC processors:
 - 4th Gen AMD EPYC processors (formerly codenamed "Genoa")
 - 4th Gen AMD EPYC processors with AMD 3D V-Cache (formerly codenamed "Genoa-X"), with larger L3 caches, suitable for engineering workloads like EDA and CFD
 - 4th Gen AMD EPYC processors with Zen 4c architecture (formerly codenamed "Bergamo"), with higher core counts, suitable for workloads like cloud-native applications

All supported processors have the following characteristics:

- 12 DDR5 memory channels
- 128 PCIe 5.0 I/O lanes, 64 lanes available for PCIe and NVMe devices

Configuration notes:

- Processor options include a heatsink but do not include a system fan
- Processors with a P suffix are single-socket capable processors and are only available in configure-to-order builds or in preconfigured models. These processors are not available as option part numbers.
- All 5th Gen processors support a 6400 MHz memory bus speed provided specific memory DIMMs are installed in the server and the latest system firmware is applied. See the table in the [Memory options](#) section to see which DIMMs support 6400 MHz. For all other DIMMs, the memory bus operates at 6000 MHz.

The following table lists the 5th Gen AMD EPYC processors supported by the SR665 V3.

Mainstream column: Processors marked as **Mainstream** can be configured in DCSC (select Full Mode) or in x-config. For processors marked as **Extended**, please contact your Lenovo sales representative.

Processor features

The following table lists the features of the supported 5th Gen AMD EPYC processors.

6400 MHz memory support: The processors support memory up to 6400 MHz provided that specific memory DIMMs are installed in the server and the latest system firmware is applied. See the table in the [Memory options](#) section to see which DIMMs support 6400 MHz.

Table 14. Processor specifications - 5th Gen AMD EPYC processors

† The maximum single-core frequency that the processor is capable of operating

** Processors with a P suffix are single-socket capable processors; Processors with an F suffix are frequency-optimized processor

xGMI cabled connection

As shown in the [System architecture](#) section, the server has four xGMI links between the two processors. By default, three xGMI links are used for inter-processor communications, and the fourth xGMI connection is used to provide two PCIe x16 connections for additional PCIe and NVMe devices. However, to maximize CPU-to-CPU performance, the two xGMI connectors can be joined using a cable.

Ordering information for this xGMI cable is listed in the following table.

Table 16. xGMI cable

Part number	Feature code	Description
4X97A87125	BR65	ThinkSystem SR665 V3 CPU interconnection Cable Kit*

* In DCSC, this cable may be labeled "Cable126"

Configuration notes:

- The following configurations do not support the use of this xGMI cable:
 - Configurations with 16 or more onboard connections to NVMe drives
 - Configurations with front PCIe slots + front OCP slot + front onboard NVMe
 - Configurations with 12 PCIe slots (10x rear, 2x front)

One-processor configurations

The SR665 V3 can be used with only one processor installed. Most core functions of the server (including the

XClarity Controller) are connected to processor 1 as shown in the [System architecture](#) section.

With only one processor, the server has the following capabilities:

- 12 memory DIMMs
- Slot 1-3 are available; Slot 4-8 are not available
- 16 onboard SATA connections
- 8 onboard NVMe connections

Drive support and controller support is as listed in the [Storage configurations](#) section - see the rows for 1 processor installed in the tables.

Thermal requirements by processor

For thermal requirements for processors, see the Thermal Rules section in the Information Center for the SR665 V3:

https://pubs.lenovo.com/sr665-v3/thermal_rules

Additional ambient temperature restrictions may apply. See the [Operating environment](#) section for details.

Lenovo Processor Neptune Core Module - Open-loop liquid cooling

The SR665 V3 also supports advanced direct-water cooling (DWC) capability with the Lenovo Processor Neptune Core Module. This module implements a liquid cooling solution where heat from the processors is removed from the rack and the data center using an open loop and coolant distribution units.

With the Processor Neptune Core Module, all heat generated by the processors is removed from the server using water. This means that the server fans and data center air conditioning units only need to remove the heat generated by the other components. This results in lower air conditioning costs and it enables the use of slower fans which results in lower overall power consumption.

The following figure shows the Lenovo Processor Neptune Core Module.

Figure 6. Lenovo Processor Neptune Core Module

The Processor Neptune Core Module also includes a leak detection module which can detect a leakage of

more than 0.5ml (about 10 drops) along the length of the tube and then issue an event to the XClarity Controller. XCC will then post an error to the System Event Log and enable further actions. Once the liquid evaporates, a further event is issue to XCC.

The Processor Neptune Core Module is only available in CTO orders, not as a field upgrade. Ordering information is listed in the following table.

Table 17. Lenovo Processor Neptune Core Module

Part number	Feature code	Description
CTO only	BZGM*	ThinkSystem SR665 V3/SR645 V3 Processor Neptune Core Module

* In DCSC, this feature code is listed in the Processor tab

Configuration notes:

- The Processor Neptune Core Module requires water infrastructure be available in the rack cabinet and data center, as described in the [Water infrastructure](#) section.
- All processor SKUs are supported
- Two CPUs are required; Configurations with one processor are not supported
- All front drive bay configurations are supported
- Slot 6 is not available for adapters - the water loop is routed through the space otherwise occupied by slot 6
- Rear drive bays are supported
- 7mm drive bays are supported only in slot 3
- M.2 adapters are supported based on the configurations in the [Storage configurations](#) section
- Standard fans can be configured in most configurations
- The use of a cable management arm (CMA) is not supported

For more information, see the Thermal Rules page:
https://pubs.lenovo.com/sr665-v3/thermal_rules

The following figure shows the Lenovo Neptune Processor DWC Module installed in the SR665 V3 (risers removed to show internal components).

Figure 7. Lenovo Neptune Processor DWC Module installed in the SR665 V3

UEFI operating modes

The SR665 V3 offers preset operating modes that affect energy consumption and performance. These modes are a collection of predefined low-level UEFI settings that simplify the task of tuning the server to suit your business and workload requirements.

The following table lists the feature codes that allow you to specify the mode you wish to preset in the factory for CTO orders.

UK and EU customers: For compliance with the ERP Lot9 regulation, you should select feature BFYA. For some systems, you may not be able to make a selection, in which case, it will be automatically derived by the configurator.

Table 18. UEFI operating mode presets in DCSC

Feature code	Description
BFYA	Operating mode selection for: "Maximum Efficiency Mode"
BFYB	Operating mode selection for: "Maximum Performance Mode"

The preset modes for the SR665 V3 are as follows:

- **Maximum Efficiency Mode** (feature BFYA): Maximizes performance/watt efficiency while maintaining reasonable performance

- **Maximum Performance Mode** (feature BFYB): Achieves maximum performance but with higher power consumption and lower energy efficiency.

For details about these preset modes, and all other performance and power efficiency UEFI settings offered in the SR665 V3, see the paper "Tuning UEFI Settings for Performance and Energy Efficiency on AMD Processor-Based ThinkSystem Servers", available from <https://lenovopress.lenovo.com/lp1267>.

Platform Secure Boot

Platform Secure Boot (PSB) is a feature of AMD EPYC processors that helps defend against threats to firmware. It is designed to provide protection in response to growing firmware-level remote attacks being seen across the industry. AMD Secure Boot extends the AMD silicon root of trust to help protect the system by establishing an unbroken chain of trust from the AMD silicon root of trust to the BIOS. The UEFI secure boot helps continue the chain of trust from the system BIOS to the OS Bootloader. This feature helps defend against remote attackers seeking to embed malware into firmware.

With PSB enabled, the processor is cryptographically bound to the server firmware code signing key once the processors are installed in the server and the server is powered on. From that point on, that processor can only be used with motherboards that use the same code signing key.

Disabling PSB will stop the protection against remote and local attackers seeking to embed malware into a platform's firmware, BIOS and even UEFI functions. Disabling PSB also allows you to install the processor in another server that you purchased from Lenovo, however, we do not recommend you do this by yourself. Please contact the Lenovo service team for further assistance.

By default, the server has Platform Secure Boot enabled on the installed processors, however for factory orders, you can choose to have the server with PSB disabled. To do this, select feature code C18D as listed in the following table. PSB can be later enabled in System Setup if desired.

Cannot be disabled once enabled: Once you enable PSB in a server, it cannot be disabled on those processors.

Table 19. Platform Secure Boot

Feature code	Description	Purpose
C0DF	Platform Secure Boot Enable	PSB is enabled in the factory and cannot later be disabled. Default choice in DCSC.
C18D	Platform Secure Boot Disable	PSB is not enabled in the factory. It can be later enabled in UEFI System Setup if desired.

If you add a second processor as a field upgrade and your server has PSB enabled, then as soon as you install the processor and power the server on, the processor is then cryptographically bound to the server, and can only be used in that server going forward.

Note: Platform Secure Boot (PSB) is different from the Secure Boot security feature described in the [Platform Firmware Resiliency](#) section.

Memory options

The SR665 V3 uses Lenovo TruDDR5 memory operating at up to 6400 MHz with 5th Gen AMD EPYC processors, and up to 4800 MHz with 4th Gen AMD EPYC processors. The server supports up to 24 DIMMs with 2 processors. The processors have 12 memory channels and support 1 DIMM per channel. The server supports up to 6TB of memory using 24x 256GB 3DS RDIMMs and two processors.

Lenovo TruDDR5 memory uses the highest quality components that are sourced from Tier 1 DRAM suppliers and only memory that meets the strict requirements of Lenovo is selected. It is compatibility tested and tuned to maximize performance and reliability. From a service and support standpoint, Lenovo TruDDR5 memory automatically assumes the system warranty, and Lenovo provides service and support worldwide.

The following table lists the memory options supported in the SR665 V3 with 5th Gen AMD EPYC processors.

Table 20. Memory options for 5th Gen AMD EPYC processors

Part number	Feature code	Description	Maximum speed	DRAM technology
x4 RDIMMs				
4X77A93526	C1PL	ThinkSystem 32GB TruDDR5 6400MHz (1Rx4) RDIMM-A	6400 MHz	16Gb
4X77A93528	C0CK	ThinkSystem 64GB TruDDR5 6400MHz (2Rx4) RDIMM-A	6400 MHz	16Gb
4X77A93533	C0CP	ThinkSystem 96GB TruDDR5 6400MHz (2Rx4) RDIMM-A	6400 MHz	24Gb
4X77A93529	C0CL	ThinkSystem 128GB TruDDR5 6400MHz (2Rx4) RDIMM-A	6400 MHz	32Gb
4X77B09790	CBNB	ThinkSystem SR645 V3/SR665 V3 32GB TruDDR5 6400MHz (1Rx4) RDIMM-A v2	6400 MHz	16Gb
4X77B09788	CBND	ThinkSystem SR645 V3/SR665 V3 64GB TruDDR5 6400MHz (2Rx4) RDIMM-A v2	6400 MHz	16Gb
4X77B07424	CA1Q	ThinkSystem 96GB TruDDR5 6400MHz (2Rx4) RDIMM-A v2	6400 MHz	24Gb
4X77B07421	CA1M	ThinkSystem 128GB TruDDR5 6400MHz (2Rx4) RDIMM-A v2	6400 MHz	32Gb
x8 RDIMMs

4X77A93527	C0CJ	ThinkSystem 32GB TruDDR5 6400MHz (2Rx8) RDIMM-A	6000 MHz	16Gb
4X77B10304	CC0A	ThinkSystem SR645 V3/SR665 V3 16GB TruDDR5 6400MHz (1Rx8) RDIMM-A v2	6400 MHz	16Gb
4X77B09789	CBNC	ThinkSystem SR645 V3/SR665 V3 32GB TruDDR5 6400MHz (2Rx8) RDIMM-A v2	6400 MHz	16Gb
10x4 3DS RDIMMs				
4X77B07422	CA1N	ThinkSystem 256GB TruDDR5 6400MHz (4Rx4) 3DS RDIMM-A	6400 MHz	32Gb

The following table lists the memory options supported in the SR665 V3 with 4th Gen AMD EPYC processors.

Table 21. Memory options for 4th Gen AMD EPYC processors

Part number	Feature code	Description	Maximum speed	DRAM technology
10x4 RDIMMs				
4X77A81438	BQ39	ThinkSystem 32GB TruDDR5 4800MHz (1Rx4) 10x4 RDIMM-A	4800 MHz	16Gb
4X77A81441	BQ3D	ThinkSystem 64GB TruDDR5 4800MHz (2Rx4) 10x4 RDIMM-A	4800 MHz	16Gb

Part number	Feature code	Description	Maximum speed	DRAM technology
4X77A81448	BUVV	ThinkSystem 96GB TruDDR5 4800MHz (2Rx4) 10x4 RDIMM-A	4800 MHz	24Gb
4X77A96982	C467	ThinkSystem 128GB TruDDR5 5600MHz (2Rx4) RDIMM-A	4800 MHz	32Gb
x8 RDIMMs				
4X77A81437	BQ3C	ThinkSystem 16GB TruDDR5 4800MHz (1Rx8) RDIMM-A	4800 MHz	16Gb
4X77A81440	BQ37	ThinkSystem 32GB TruDDR5 4800MHz (2Rx8) RDIMM-A	4800 MHz	16Gb
4X77A81447	BUVU	ThinkSystem 48GB TruDDR5 4800MHz (2Rx8) RDIMM-A	4800 MHz	24Gb

For more information on DDR5 memory, see the Lenovo Press paper, *Introduction to DDR5 Memory*, available from <https://lenovopress.com/lp1618>.

The following rules apply when selecting the memory configuration:

- Memory rated at 4800 MHz is only supported with 4th Gen processors. Memory rated at 6400 MHz memory is only supported with 5th Gen processors (and operates at 6000 MHz or 6400 MHz as indicated in the table).
- The SR665 V3 supports quantities 1, 2, 4, 6, 8, 10, 12 DIMMs per processor; other quantities not supported
- The server supports four types of DIMMs: 9x4 RDIMMs, 10x4 RDIMMs, x8 RDIMMs and 3DS RDIMMs
 - UDIMMs and LRDIMMs are not supported
- Mixing of DIMM types is not supported (for example, 9x4 DIMMs with 10x4 RDIMMs)
- Mixing of DRAM technology (16Gb, 24Gb, 32Gb) is not supported. See the column in the above table.
- Mixing of 128GB 3DS RDIMMs and 256GB 3DS RDIMMs is not supported
- Mixing of 128GB 3DS RDIMMs (features BYEE and BQ3A) is not supported
- Mixing of 256GB 3DS RDIMMs (features BZPN and BQ3B) is not supported
- Mixing x4 and x8 DIMMs is not supported
- Mixing of DIMM rank counts is supported. Follow the required installation order installing the DIMMs with the higher rank counts first.
- Mixing of DIMM capacities is supported, however only two different capacities are supported across all channels of the processor (eg 16GB and 32GB). Follow the required installation order installing the larger DIMMs first.
- Memory operates at the speed of the memory bus of the processor (see the [Processor features](#) section for specifics), or the maximum speed that the memory DIMMs support (see the above tables), whichever is lower
- The use of the 128GB 3D RDIMM feature BYEE has the following requirements for thermal reasons:
 - If CPU TDP > 240W, the combination of GPUs and 24x 2.5-inch drive bays is not supported
 - Additional ambient temperature requirements - see https://pubs.lenovo.com/sr665-v3/thermal_rules for information
- When adding the ThinkSystem 256GB TruDDR5 6400MHz (4Rx4) 3DS RDIMM-A (4X77B07422) as a field upgrade, follow the instructions in [Support tip TT3220](#)

Note: Memory mirroring and memory rank sparing are not supported.

For best performance, consider the following:

- Ensure the memory installed is at least the same speed as the memory bus of the selected processor.
- Populate all 12 memory channels with identical DIMMs (same Lenovo part number)

The following memory protection technologies are supported:

- ECC detection/correction
- Bounded Fault detection/correction
- SDDC (for x4-based memory DIMMs; look for "x4" in the DIMM description. Not supported with 9x4 RDIMMs)
- Patrol/Demand Scrubbing
- DRAM Address Command Parity with Replay
- DRAM Uncorrected ECC Error Retry
- On-die ECC
- ECC Error Check and Scrub (ECS)
- Post Package Repair

Internal storage

The SR665 V3 has three drive bay zones and supports up to 20x 3.5-inch or 40x 2.5-inch hot-swap drive bays or a combination of drive bays, depending on the selected chassis and backplane configuration. The server also supports configurations without any drive bays if desired.

The three drive bay zones are as follows:

- Front:
 - Up to 12x 3.5-inch hot-swap bays, or
 - Up to 24x 2.5-inch hot-swap bays
- Middle:
 - 4x 3.5-inch hot-swap bays, or
 - 8x 2.5-inch hot-swap bays
- Rear:
 - Up to 4x 3.5-inch hot-swap bays, or
 - Up to 8x 2.5-inch hot-swap bays
 - Also supports 2x 7mm hot-swap drives bays

All drives are hot-swap and are accessible from the front, from the rear, or from drive bays that are located in the middle of the server (accessible when you remove the top cover of the server).

The server also supports one or two M.2 drives, installed in an M.2 adapter internal to the server.

In this section:

- [NVMe drive support](#)
- [Tri-Mode support - RAID 940 adapters](#)
- [Front drive bays](#)
- [Mid drive bays](#)
- [Rear drive bays](#)
- [Storage configurations](#)
- [Field upgrades](#)
- [RAID flash power module \(supercap\) support](#)
- [7mm drives](#)
- [M.2 drives](#)
- [SED encryption key management with SKLM](#)

NVMe drive support

The SR665 V3 supports NVMe drives to maximize storage performance.

- Up to 32 NVMe drives in a 2.5-inch drive configuration, without oversubscription (that is, each x4 drive has a dedicated x4 (4 lanes) connection to the processor, either direct to the processor or via a retimer adapter)
 - Up to 24 installed in front bays
 - Up to 32 installed in front and mid bays
- Up to 8 NVMe drives in a 3.5-inch drive configuration, without oversubscription:
 - 4x 3.5-inch drives in the front drive bays, or
 - 8x 2.5-inch drives in the mid-chassis drive bays

Riser 3 support with onboard NVMe: The use of the onboard NVMe ports is not supported with Riser 3, except the following storage configurations, as described in the [Storage configurations](#) section:

- Config 13-1 (2x CPUs, 6xSAS/SATA+2xAnyBay G4 backplane)
- Config 13-2 (2x CPUs, 6xSAS/SATA+2xAnyBay G4 backplane)
- Config 12D-1 (2x CPUs, 1x8x2.5" NVMe G4 backplane)

The specifics of these configurations are covered in the [Storage configurations](#) section. The tables in those sections indicate the number of NVMe drives in each configuration.

In addition, the SR665 V3 supports two 7mm NVMe drives for use as boot drives.

Tri-Mode support - RAID 940 adapters

The RAID 940 adapters support NVMe through a feature named Tri-Mode support (or Trimode support). This feature enables the use of NVMe U.3 drives at the same time as SAS and SATA drives. Tri-Mode requires an AnyBay backplane. Cabling of the controller to the backplanes is the same as with SAS/SATA drives, and the NVMe drives are connected via a PCIe x1 link to the controller.

NVMe drives connected using Tri-Mode support provide better performance than SAS or SATA drives: A SATA SSD has a data rate of 6Gbps, a SAS SSD has a data rate of 12Gbps, whereas an NVMe U.3 Gen 4 SSD with a PCIe x1 link will have a data rate of 16Gbps. NVMe drives typically also have lower latency and higher IOPS compared to SAS and SATA drives. Tri-Mode is supported with U.3 NVMe drives and requires an AnyBay backplane.

Tri-Mode requires U.3 drives: Only NVMe drives with a U.3 interface are supported. U.2 drives are not supported. See the [Internal drive options](#) section for the U.3 drives supported by the server.

Front drive bays

The front drive bay zone supports the following configurations:

- 8x or 12x 3.5-inch drive bays (all hot-swap)
- 8x, 16x or 24x 2.5-inch drive bays (all hot-swap)
- No backplanes and no drives (supports [field upgrades](#))

The specific combinations that are supported in the SR665 V3 are shown in the following figures. The feature codes listed are the backplane feature codes when ordering CTO and correspond to the feature codes listed in the table below the figure. Note that NVMe and AnyBay backplanes are available either PCIe Gen4 (G4) or PCIe Gen5 (G5).

Figure 8. SR665 V3 front drive bay configurations - 3.5-inch drive bays

Figure 9. SR665 V3 front drive bay configurations - 2.5-inch drive bays, all the same drive type

Figure 10. SR665 V3 front drive bay configurations - 2.5-inch drive bays, combinations

Figure 11. SR665 V3 front drive bay configurations - 2.5-inch drive bays with front PCIe slots

The backplanes used to provide these drive bays are listed in the following table.

Field upgrades: All front backplanes are available as part numbers for field upgrades along with require cable option kits, as described in the [Field upgrades](#) section below.

Table 22. Backplanes for front drive bays

Feature	Description	Bays	PCIe Gen	SAS Gen	Max qty
Front 3.5-inch drive backplanes					
B8LP	ThinkSystem 2U 8x3.5" SAS/SATA Backplane	8	-	12Gb	1
B8LT	ThinkSystem 2U 12x3.5" SAS/SATA Backplane	12	-	12Gb	1

Feature	Description	Bays	PCIe Gen	SAS Gen	Max qty
BPL8	ThinkSystem 2U 8x3.5" SAS/SATA+4 AnyBay Backplane	12	Gen4	24Gb	1
BPL9	ThinkSystem 2U 8x3.5" SAS/SATA+4 NVMe Backplane	12	Gen4	24Gb	1
BQ2S	ThinkSystem 2U 12x3.5" SAS/SATA with Rear 4-Bay Expander Backplane	12*	-	12Gb	1
Front 2.5-inch drive backplanes					
B8LU	ThinkSystem 2U 8x2.5" SAS/SATA Backplane	8	-	12Gb	3
BH8D	ThinkSystem 2U/4U 8x2.5" NVMe Backplane	8	Gen4	24Gb	3
BS7Y	ThinkSystem V3 2U 8x2.5" NVMe Gen5 Backplane	8	Gen5	24Gb	3
BH8B	ThinkSystem 2U/4U 8x2.5" AnyBay Backplane	8	Gen4	24Gb	3
BLL2	ThinkSystem V3 2U 8x2.5" AnyBay Gen5 Backplane	8	Gen5	24Gb	3
BPL7	ThinkSystem 2U 6x2.5" SAS/SATA+2 AnyBay Backplane	8	Gen4	24Gb	1
BQ2T	ThinkSystem 2U 24x2.5" SAS/SATA with Rear 4-Bay Expander Backplane	24*	-	12Gb	1
Integrated Diagnostics Panel (for 2.5-inch configurations with 8 or 16 bays only)					
BMJA	ThinkSystem 2U 16x2.5" Front Operator Panel v2	-	-	-	1

* Backplane has an onboard SAS expander that provides connectivity to SAS/SATA drive bays in a separate rear backplane (order the rear backplane separately). See also note below for BQ2T.

The use of front drive bays has the following configuration rules:

- The SR665 V3 also supports configurations without any drive bays, allowing for drive bay upgrades as described in the [field upgrades](#) section.
- If 3.5-inch front drive bays are used, an internal (CFF) RAID adapter or HBA is not supported as the adapter and bays occupy the same physical space
- Any 8x 2.5-inch and 16x 2.5-inch drive configuration (SAS/SATA, AnyBay, or NVMe) can optionally be configured for use with the Integrated Diagnostics Panel as described in the [Local management](#) section. 3.5-inch drive configurations do not support the Integrated Diagnostics Panel. With the Integrated Diagnostics Display, 8-bay configurations can be upgrade to 16 bays, however 16-bay configurations cannot be upgrade to 24 bays.
- If you are building a server configuration that includes the ThinkSystem 2U 24x2.5" SAS/SATA with Rear 4-Bay Expander Backplane (feature BQ2T) and the order also includes a rack cabinet, then you can configure at most 6 drives to be installed in the factory. The remaining drives must be ordered separately using the option part numbers for the drives. This requirement does not apply if the order does not include a rack cabinet. The requirement is due to the shock/vibration limits of the 24x 2.5-inch backplane.
- The use of ThinkSystem 2U 12x3.5" SAS/SATA with Rear 4-Bay Expander Backplane (BQ2S, 4XH7A86133) is not supported with Windows Server or Windows 10/11 when used with the following:
 - Any of these mid or rear backplanes:
 - ThinkSystem 2U 4x3.5" SAS/SATA Middle Backplane (BCQK)
 - ThinkSystem 2U 2x3.5" SAS/SATA Rear Backplane (BAG7)
 - ThinkSystem 1U/2U 4x3.5" SAS/SATA Backplane (B8L3)
 - ThinkSystem V3 1U/2U 4x2.5" AnyBay Backplane (BQ2U)
 - Any of these SAS HBAs:
 - ThinkSystem 440-8i SAS/SATA PCIe Gen4 12Gb HBA (BM51)
 - ThinkSystem 440-16i SAS/SATA PCIe Gen4 12Gb HBA (BM50)
 - ThinkSystem 440-16i SAS/SATA PCIe Gen4 12Gb Internal HBA (B8P1)

Mid drive bays

The SR665 V3 supports hot-swap drives installed in the middle of the server chassis. The drive bays are

accessible by removing the top lid of the server and levering the mid drive chassis up at the front.

The following configurations are supported:

- 4x 3.5-inch hot-swap SAS/SATA drive bays
- 8x 2.5-inch hot-swap SAS/SATA drive bays
- 8x 2.5-inch hot-swap NVMe drive bays

The drive bays in the open position are shown in the following figure.

M.2 support: When mid drive bays are configured, the M.2 adapter is installed on the mid drive bay mechanical as shown in the images.

Figure 12. Mid-chassis drive bays

The backplanes used to provide these drive bays are listed in the following table.

Table 23. Backplanes for mid drive bays

Feature code	Description	PCIe Gen	Maximum supported
Mid - 3.5-inch drive backplane			
BCQK	ThinkSystem 2U 4x3.5" SAS/SATA Middle Backplane	-	1
Mid - 2.5-inch drive backplane			
BCQL	ThinkSystem 2U 4x2.5" SAS/SATA Middle Backplane	-	2‡
BDY7	ThinkSystem 2U 4x2.5" Middle NVMe Backplane	Gen4	2‡

‡ 2.5-inch drive backplanes for the mid-chassis area must be installed in pairs. NVMe and SAS/SATA cannot

be mixed.

Field upgrades: Backplanes are available as part numbers for field upgrades along with require cable option kits, as described in the [Field upgrades](#) section below.

The use of drive bays in the mid-chassis area has the following configuration rules:

- All processors are supported. Higher TDP processors will require the performance heatsinks.
- Full-length adapter cards are not supported
- GPUs (including low profile GPUs such as the NVIDIA A2) are not supported
- The use of mid drive bays requires Riser 1 be installed, since power for the mid bay backplanes comes from Riser 1

Rear drive bays

The SR665 V3 supports hot-swap drives installed at the rear of the server chassis. Supported configurations are as follows:

- 3.5-inch hot-swap drives
 - 2x SAS/SATA drive bays
 - 4x SAS/SATA drive bays
- 2.5-inch hot-swap drives
 - 4x SAS/SATA drive bays
 - 4x AnyBay drive bays
 - 8x SAS/SATA drive bays

The configurations are shown in the following figure.

Figure 13. Rear 2.5-inch and 3.5-inch drive bay configurations

The backplanes used to provide these drive bays are listed in the following table.

7mm drives: The SR665 V3 supports two 7mm drives. See the [7mm drives](#) section for details.

Table 24. Backplanes for rear drive bays

Feature code	Description	PCIe Gen	Maximum supported
Rear - 3.5-inch drive backplanes			
BAG7	ThinkSystem 2U 2x3.5" SAS/SATA Rear Backplane	-	1
B8L3	ThinkSystem 1U/2U 4x3.5" SAS/SATA Backplane	-	1
Rear - 2.5-inch drive backplanes			

Feature code	Description	PCIe Gen	Maximum supported
B8LV	ThinkSystem 2U 4x2.5" SAS/SATA Backplane	-	1
BQ2U	ThinkSystem V3 1U/2U 4x2.5" AnyBay Backplane	Gen4	1
B97X	ThinkSystem 2U 8x2.5" SAS/SATA Rear Backplane	-	1

Field upgrades: Backplanes are available as part numbers for field upgrades along with require cable option kits, as described in the [Field upgrades](#) section below.

The use of rear drive bays has the following configuration rules:

- The use of rear bays restricts the number of slots and the choice of risers that are supported. See the [I/O expansion](#) section for details.
- The use of rear drive bays may require that Riser 1 or Riser 2 be installed, since power for the rear backplane comes from that riser.

Storage configurations

This section describes the various combinations of front and rear drives that the server supports, as well as M.2 support.

Tip: These tables are based on Config Matrix V2.7A in TRD 9.9

In this section:

- [Overview of configurations - 3.5-inch front drive bays](#)
- [Overview of configurations - 2.5-inch front drives supporting rear slots \(no front slots\)](#)
- [Overview of configurations - 2.5-inch front drives supporting front slots \(no rear slots\)](#)
- [Overview of configurations - 2.5-inch front drives supporting 12 slots \(front & rear\)](#)
- [Details - 3.5-inch front drive bays](#)
- [Details - 2.5-inch front drives supporting rear slots \(no front slots\)](#)
- [Details - 2.5-inch front drives supporting front slots \(no rear slots\)](#)
- [Details - 2.5-inch front drives supporting 12 slots \(front & rear\)](#)

The following tables summarize the storage configurations for the SR665 V3. For details, including processor requirements, M.2 and 7mm support, and controller selections, see each of the Details tables.

Overview - 3.5-inch front drives

The following table summarizes the configurations that use 3.5-inch front drive bays.

Details - 3.5-inch front bays

The following table details the configurations that use 3.5-inch front drive bays.

Click to go to the [overview of the 3.5-inch front drive configurations](#).

Return to [Storage configurations](#).

In the table below, the M.2 and 7mm columns have the following meanings:

- **M.2 Non-RAID (SATA)** means the M.2 SATA/x4 NVMe adapter (4Y37A79663) with SATA drives. No RAID support.
- **M.2 Non-RAID (NVMe)** means the M.2 SATA/x4 NVMe adapter (4Y37A79663) with NVMe drives. No RAID support.
- **M.2 RAID** means an M.2 adapter with integrated RAID, either 4Y37A09750 (Marvell) or 4Y37A90063 (Broadcom). RAID-0 and RAID-1 are supported with the integrated RAID controller.
- **7mm Non-RAID (SATA)** means the 7mm SATA/NVMe kit (BU0N) with SATA drives. No RAID support.
- **7mm Non-RAID (NVMe)** means the 7mm SATA/NVMe kit (BU0N) with NVMe drives. No RAID support.
- **7mm RAID** means the 7mm kit with integrated RAID, either B8P3 (Marvell) or BYFG (Broadcom). RAID-0 and RAID-1 are supported with the integrated RAID controller.

* These storage configurations, when configured with a 440-8i or 440-16i HBA, are not supported with Windows Server or Windows 10/11

Details - 2.5-inch front bays supporting rear slots (no front slots)

The following table details the configurations that use 2.5-inch front bays supporting rear slots (no front slots).

Click to go to the [overview of the 2.5-inch front drive configurations](#).

Return to [Storage configurations](#).

In the table below, the M.2 and 7mm columns have the following meanings:

- **M.2 Non-RAID (SATA)** means the M.2 SATA/x4 NVMe adapter (4Y37A79663) with SATA drives. No RAID support.
- **M.2 Non-RAID (NVMe)** means the M.2 SATA/x4 NVMe adapter (4Y37A79663) with NVMe drives. No RAID support.
- **M.2 RAID** means an M.2 adapter with integrated RAID, either 4Y37A09750 (Marvell) or 4Y37A90063 (Broadcom). RAID-0 and RAID-1 are supported with the integrated RAID controller.
- **7mm Non-RAID (SATA)** means the 7mm SATA/NVMe kit (BU0N) with SATA drives. No RAID support.
- **7mm Non-RAID (NVMe)** means the 7mm SATA/NVMe kit (BU0N) with NVMe drives. No RAID support.
- **7mm RAID** means the 7mm kit with integrated RAID, either B8P3 (Marvell) or BYFG (Broadcom). RAID-0 and RAID-1 are supported with the integrated RAID controller.

Details - 2.5-inch front bays supporting front slots (no rear slots)

The following table details the configurations that use 2.5-inch front bays supporting front slots (no rear slots).

Click to go to the [overview of the 2.5-inch front drive configurations](#).

Return to [Storage configurations](#).

In the table below, the M.2 and 7mm columns have the following meanings:

- **M.2 Non-RAID (SATA)** means the M.2 SATA/x4 NVMe adapter (4Y37A79663) with SATA drives. No RAID support.
- **M.2 Non-RAID (NVMe)** means the M.2 SATA/x4 NVMe adapter (4Y37A79663) with NVMe drives. No RAID support.
- **M.2 RAID** means an M.2 adapter with integrated RAID, either 4Y37A09750 (Marvell) or 4Y37A90063 (Broadcom). RAID-0 and RAID-1 are supported with the integrated RAID controller.
- **7mm Non-RAID (SATA)** means the 7mm SATA/NVMe kit (BU0N) with SATA drives. No RAID support.
- **7mm Non-RAID (NVMe)** means the 7mm SATA/NVMe kit (BU0N) with NVMe drives. No RAID support.

- **7mm RAID** means the 7mm kit with integrated RAID, either B8P3 (Marvell) or BYFG (Broadcom). RAID-0 and RAID-1 are supported with the integrated RAID controller.

Details - 2.5-inch front drives supporting 12 slots (front & rear)

The following table details the configurations that use 2.5-inch front drives supporting 12 slots (front & rear).

Click to go to the [overview of the 2.5-inch front drive configurations](#).

Return to [Storage configurations](#).

In the table below, the M.2 and 7mm columns have the following meanings:

- **M.2 Non-RAID (SATA)** means the M.2 SATA/x4 NVMe adapter (4Y37A79663) with SATA drives. No RAID support.
- **M.2 Non-RAID (NVMe)** means the M.2 SATA/x4 NVMe adapter (4Y37A79663) with NVMe drives. No RAID support.
- **M.2 RAID** means an M.2 adapter with integrated RAID, either 4Y37A09750 (Marvell) or 4Y37A90063 (Broadcom). RAID-0 and RAID-1 are supported with the integrated RAID controller.
- **7mm Non-RAID (SATA)** means the 7mm SATA/NVMe kit (BU0N) with SATA drives. No RAID support.
- **7mm Non-RAID (NVMe)** means the 7mm SATA/NVMe kit (BU0N) with NVMe drives. No RAID support.
- **7mm RAID** means the 7mm kit with integrated RAID, either B8P3 (Marvell) or BYFG (Broadcom). RAID-0 and RAID-1 are supported with the integrated RAID controller.

Field upgrades

The SR665 V3 is orderable without drive bays, allowing you to add a backplane, cabling and controllers as field upgrades. The server also supports upgrading some configurations by adding additional front drive bays (for example, upgrading from 8 to 16x 2.5-inch drive bays).

To add drive bays you will need to order both drive backplanes and cable kits. Backplane kits do not include cables.

The upgrades are listed as follows:

- [3.5-inch chassis drive bay upgrades](#)
- [2.5-inch chassis drive bay upgrades](#)
- [Upgrades to Retimer adapters](#)
- [Upgrades to an Internal \(CFF\) HBA/RAID adapter](#)
- [2.5-inch drive bay fillers](#)

For more information about the backplane kits and cable kits, see the Lenovo server options site:
https://serveroption.lenovo.com/cable_kit_options/

3.5-inch chassis drive bay upgrades

The table below lists the backplane kits and cable kits needed to build one of the supported 3.5-inch chassis configurations.

Tip: The configurations each have a letter that matches the configurations listed in the [Storage configurations](#) section.

Table 33. Drive bay field upgrade for the 3.5-inch chassis (Blue = SAS/SATA, Purple = AnyBay, Red = NVMe)

When adding drive bays, you will also need to add the appropriate storage controller(s). Consult the tables in the [Storage configurations](#) section to determine what controller sections are supported and what additional controllers you will need. Controllers are described in the [Controllers for internal storage](#) section.

2.5-inch chassis drive bay upgrades

The table below lists the backplane kits and cable kits needed to build one of the supported 2.5-inch chassis configurations.

Tip: The configurations each have a letter that matches the configurations listed in the [Storage configurations](#) section.

Note: Front drive cable kits are based on the location of the backplane in the server. The three backplane locations are BP1, BP2 and BP3 as shown in the following figure.

Figure 14. Backplane numbering

When adding drive bays, you will also need to add the appropriate storage controller(s). Consult the tables in the [Storage configurations](#) section to determine what controller sections are supported and what additional controllers you will need. Controllers are described in the [Controllers for internal storage](#) section.

Upgrades to Retimer adapters

If you are upgrading to a configuration that includes a Retimer adapter (see the Detailed tables in the [Storage configurations](#) section), then you will need to also order one of the following cable kits.

Table 35. Cable kits when upgrading to a Retimer configuration

Part number	Description	Quantity required
4X97A85860	ThinkSystem SR665 V3 32x2.5" PCIe Gen4 NVME Retimer Cable Option Kit	1
4X97A85859	ThinkSystem SR665 V3 24x2.5" PCIe Gen4 NVME Retimer Cable Option Kit	1

Upgrades to an Internal (CFF) HBA/RAID adapter

If you want to add an internal (CFF) storage adapter (HBA, RAID adapter or SAS expander) to a configuration, you will need to order the cable kit as listed in the following table. Suitable upgrades are either replacing an existing adapter in a rear PCIe slot, or adding the CFF adapter to a server without any storage adapter installed.

The cable kit to order is listed in the following table.

Table 36. Cable kit when upgrading to an Internal HBA/RAID adapter

Part number	Description	Quantity required
4X97A85177	ThinkSystem SR665 V3 Internal HBA/RAID Adapter Cable Option Kit	1

2.5-inch drive bay fillers

Backplane option kits include the necessary drive bay fillers, however if needed, additional blanks can be ordered as listed in the following table.

Table 37. Drive bay fillers for 2.5-inch bays

Part number	Description
4XH7A99569	ThinkSystem 2.5" 1x1 HDD Filler by 8 units (contains 8x single drive-bay fillers)

RAID flash power module (supercap) support

If you plan to add one of the RAID adapters that includes a RAID flash power module (supercap) as a field upgrade, then you may also need to order a Supercap installation kit for the supercap, depending on the location where the supercap will be installed. For CTO orders, the components needed are automatically derived when you select the RAID adapter.

The adapters that this applies to are as follows:

- Any supported RAID 9350 adapter
- Any supported RAID 940 adapter

The location of the supercaps depends on the mid-chassis drive cage used in the server, as shown in the following table.

Table 38. Supercap support

Mid drive cage	Supercaps supported	Location of supercaps	Supercap holder
No mid drive cage	4	Mounted on the air baffle	Not needed
2.5-inch drives	2	Mounted on the left side of the mid drive cage	Integrated into the left side of the 2.5-inch mid drive cage
3.5-inch drives	1	Mounted under the system fan cage	Included with ThinkSystem SR665 V3 Middle 4x3.5" SAS/SATA Backplane Option Kit (4XH7A85892) or order separately (see below)

For 3.5-inch drive bay configurations, if the server already has 3.5-inch mid-chassis drive bays, then the supercap holder is already present under the system fan cages. If you plan to add 3.5-inch mid-chassis drive bays by adding ThinkSystem SR665 V3 Middle 4x3.5" SAS/SATA Backplane Option Kit (4XH7A85892), then the supercap holder is part of the option kit.

7mm drives

The SR665 V3 supports two 7mm drives, either both SATA or both NVMe, at the rear of the server. These drives go in place of either PCIe slot 3 (Riser 1) or PCIe slot 6 (Riser 2) as shown in the following figure.

Figure 15. Rear 7mm drive bay configurations

For CTO orders, the configuration includes the drive bays and the cage the drive bays are mounted on to. The cage required depends on where the 7mm drives are located (Riser 1 or Riser 2) and whether there are PCIe slots above the 7mm drive bays. The following table lists the ordering information.

Tip for 4x 3.5-inch rear drives: If you wish to configure 4x 3.5-inch rear drives plus 7mm drives in a CTO configuration, the 7mm drives will install in slot 6. You should specify riser card BLKP for Riser 1 and then leave Riser 2 without a riser selected.

Table 39. CTO feature codes for 7mm drive bays

Feature code	Description	SATA drives	NVMe drives	RAID	Maximum supported	Windows 10/11 support
Backplane - 7mm drives						
BU0N	ThinkSystem 7mm SATA/NVMe 2-Bay Rear Enablement Kit v2	Yes	Yes (x1 lane)	No	1	No
B8P3	ThinkSystem 2U 7mm Drive Kit w/ NVMe RAID	No	Yes (x1 lane)	Integrated (Marvell)	1	No
BYFG	ThinkSystem 7mm SATA/NVMe 2-Bay Rear Hot-Swap RAID Enablement Kit	Yes	Yes (x1 lane)	Integrated (Broadcom)	1	Supported

The use of the 7mm rear drive bays has the following configuration rules:

- The 7mm rear drive kit is supported in either slot 3 or slot 6 but not both at the same time.
- M.2 and 7mm are mutually exclusive: they are not supported together in the same configuration
- For ThinkSystem 7mm SATA/NVMe 2-Bay Rear Enablement Kit v2 (feature BU0N):
 - RAID is not supported
- For ThinkSystem 2U 7mm Drive Kit w/ NVMe RAID (feature B8P3)
 - The adapter only supports NVMe drives
 - RAID functionality is integrated into the 7mm adapter using a Marvell 88NR2241 NVMe RAID Controller
- For ThinkSystem 7mm SATA/NVMe 2-Bay Rear Hot-Swap RAID Enablement Kit (feature BYFG)
 - The adapter supports either SATA or NVMe drives
 - RAID functionality is integrated into the 7mm adapter using a Broadcom RAID Controller

7mm drive field upgrades

For field upgrades, using the following ordering information. The kits include two cages for use depending on your PCIe slot configuration. The cages are for either Riser 1 or Riser 2. The part numbers also include the cables necessary to connect the 7mm backplane to either the system board or RAID adapter.

Table 41. Field upgrade part numbers for 7mm drives

Part number	Description	Purpose
7mm Enablement Kits		
4XH7A93167	ThinkSystem SR665 V3/SR655 V3 7mm RAID B540p-2HS SATA/NVMe Enablement Kit • 2-bay hot-swap drive enclosure • 2FH+7mm SSD Riser Cage (with 2 FH PCIe slots) • 7mm SSD Riser Cage (without PCIe slots) • 2x 7mm drive bay fillers • Signal and power cables for onboard connections	7mm drive bays for SATA or NVMe drive support. RAID support is integrated into the adapter using an onboard Broadcom RAID controller.

M.2 drives

The SR665 V3 supports one or two M.2 form-factor SATA or NVMe drives for use as an operating system boot solution or as additional storage.

The M.2 drives install into an M.2 module which is mounted horizontally in the server:

- In servers without mid-chassis drives, the M.2 module is mounted on the air baffle
- With a mid-chassis drive cage (2.5-inch or 3.5-inch), the M.2 module is mounted on the drive cage, as shown in the [Mid drive bays](#) section.

The supported M.2 modules are listed in the following table. For field upgrades see the [M.2 field upgrades](#) section below.

Table 42. M.2 modules

Part number	Feature code	Description	SATA drives	NVMe drives	RAID	Maximum supported	Windows 10/11 support
4Y37A79663	BM8X	ThinkSystem M.2 SATA/x4 NVMe 2-Bay Adapter	Yes	Yes (x4 lanes)	No	1	Supported

Part number	Feature code	Description	SATA drives	NVMe drives	RAID	Maximum supported	Windows 10/11 support
4Y37A09750	B8P9	ThinkSystem M.2 NVMe 2-Bay RAID Adapter	No	Yes (x1 lane)	Integrated (Marvell)	1	No
4Y37A90063	BYFF	ThinkSystem M.2 RAID B540i-2i SATA/NVMe Adapter	Yes	Yes (x1 lane)	Integrated (Broadcom)	1	Supported

Configuration notes:

- M.2 is not supported with all storage configurations - see [Storage configurations](#) for details.
- M.2 and 7mm are mutually exclusive: they are not supported together in the same configuration
- For field upgrades, an additional cable is needed as described in the [M.2 field upgrades](#) section below
- For ThinkSystem M.2 SATA/x4 NVMe 2-Bay Adapter (4Y37A79663, feature BM8X):
 - RAID is not supported
- For ThinkSystem M.2 NVMe 2-Bay RAID Adapter (4Y37A09750):
 - RAID is implemented using an onboard Marvell 88NR2241 NVMe RAID controller
- For ThinkSystem M.2 RAID B540i-2i SATA/NVMe Adapter (4Y37A90063):
 - RAID is implemented using an onboard Broadcom RAID controller

Supported drives are listed in the [Internal drive options](#) section.

The ThinkSystem M.2 SATA/x4 NVMe 2-Bay Adapter has the following features:

- Supports one or two M.2 drives, either SATA or NVMe
- When two drives installed, they must be either both SATA or both NVMe
- Support 42mm, 60mm, 80mm and 110mm drive form factors (2242, 2260, 2280 and 22110)
- No RAID support
- Either 6Gbps SATA or PCIe 4.0 x4 interface to the drives depending on the drives installed
- Supports monitoring and reporting of events and temperature through I2C
- Firmware update via Lenovo firmware update tools
- When connected to a separate PCIe RAID adapter, supports SED drive encryption via the RAID adapter, otherwise no SED support

The ThinkSystem M.2 NVMe 2-Bay RAID Adapter (4Y37A09750) has the following features:

- Supports one or two NVMe M.2 drives
- Support 42mm, 60mm, 80mm and 110mm drive form factors (2242, 2260, 2280 and 22110)
- RAID support via an onboard Marvell 88NR2241 NVMe RAID Controller
- With 1 drive, supports single-drive RAID-0
- With 2 drives, supports 2-drive RAID-0, 2-drive RAID-1, or two single-drive RAID-0 arrays
- PCIe 3.0 x2 host interface; PCIe 3.0 x1 connection to each drive
- Management and configuration support via UEFI and OS-based tools
- Supports monitoring and reporting of events and temperature through I2C
- Firmware update via Lenovo firmware update tools
- No support for SED drive encryption

The ThinkSystem M.2 RAID B540i-2i SATA/NVMe Adapter (4Y37A90063) has the following features:

- Supports one or two M.2 drives, either SATA or NVMe
- Support 42mm, 60mm, 80mm and 110mm drive form factors (2242, 2260, 2280 and 22110)
- RAID support via an onboard Broadcom SAS3808N RAID Controller
- With 1 drive, supports JBOD
- With 2 drives, supports 2-drive RAID-0, 2-drive RAID-1, or JBOD
- PCIe 4.0 x2 host interface; PCIe 4.0 x1 connection to each drive
- Management and configuration support via UEFI and OS-based tools
- Supports monitoring and reporting of events and temperature
- Firmware update via Lenovo firmware update tools
- Supports SED drive encryption

M.2 field upgrades

For field upgrades, the SR665 V3 also requires additional cables necessary to connect the M.2 to either the system board or RAID adapter. Ordering information is listed in the following table.

Table 44. Cable kit for M.2 drive support

Part number	Description
M.2 Cable Kit - cables for use with RAID adapters or with onboard connectivity	
4X97A87126	ThinkSystem SR665 V3 M.2 Enablement Cable Option Kit
RAID adapters for M.2 RAID support (ThinkSystem M.2 SATA/x4 NVMe 2-Bay Adapter only)	
4Y37A78834	ThinkSystem RAID 540-8i PCIe Gen4 12Gb Adapter (NVMe M.2 support using Tri-Mode)

SED encryption key management with SKLM

The server supports self-encrypting drives (SEDs) as listed in the [Internal drive options](#) section. To effectively manage a large deployment of these drives in Lenovo servers, IBM Security Key Lifecycle Manager (SKLM) offers a centralized key management solution.

The IBM Security Key Lifecycle Manager software is available from Lenovo using the ordering information listed in the following table.

Table 45. IBM Security Key Lifecycle Manager licenses

Part number	Feature	Description
SKLM Basic Edition		
7S0A007FWW	S874	IBM Security Key Lifecycle Manager Basic Edition Install License + SW Subscription & Support 12 Months

7S0A0099WW	SDK5	IBM Security Key Lifecycle Manager For Usable Decimal Petabyte Storage Resource Value Unit License + SW Subscription & 5 Years Of Support

Controllers for internal storage

The SR665 V3 offers a variety of controller options for internal drives:

- For 2.5-inch and 3.5-inch drives:
 - Onboard SATA ports (feature AVUX)
 - Onboard NVMe ports (feature BC4V)
 - NVMe switch and retimer adapters (PCIe slot-based)
 - RAID adapters and HBAs for SAS/SATA drives (PCIe slot-based)
 - RAID adapters, SAS Expander, and HBAs for SAS/SATA drives (cabled in a dedicated space)
- For 7mm drive bays in the rear of the server (see the [7mm drives](#) section)
 - SATA controller integrated into the 7mm drive bay enclosure
 - NVMe controller integrated into the 7mm drive bay enclosure
- For M.2 drives internal to the server (see [M.2 drives](#) section)
 - SATA controller integrated on the M.2 SATA 2-Bay RAID Enablement Kit
 - NVMe controller integrated on the M.2 NVMe 2-Bay RAID Enablement Kit

As well as supporting RAID adapters and HBAs that install in a PCIe slot, the SR665 V3 with 2.5-inch front drive bays supports a custom form factor (CFF) adapter that is mounted in the server and cabled to one of the onboard NVMe ports. These Internal Adapters are not supported with 3.5-inch front drives due to a lack of physical space.

The following table lists the adapters used for the internal storage of the server.

Table 46. Internal Storage adapter support

Part number	Feature code	Description	RAID levels	Power module (supercap)	PCIe lanes	Max qty	Slots supported	Windows 10/11 support
Onboard controllers								
CTO only	AVUX	On Board SATA AHCI Mode	None	No	-	1	N/A	Supported
CTO only	BC4V	Non RAID NVMe	None	No	-	1	N/A	Supported

4TA7A84579	BLKY	ThinkSystem PCIe Gen5 NVMe Retimer Adapter (4x drives)	None	No	Gen5 x16	3	1,2,3,4,5	Supported

‡ These custom form factor (CFF) adapters are only supported with 2.5-inch front drive bays. Not supported in configurations with 3.5-inch front drive bays.

** This adapter is currently not available for CTO orders; it is only available as an option part number for field upgrades

Configuration notes:

- **Gen5 Retimer adapter:** CD8P drives are supported with ThinkSystem PCIe Gen5 NVMe Retimer Adapter (4TA7A84579). See [Support Tip TT3437](#) for details regarding the minimum firmware levels that are required.
- **Supercap support limits the number of RAID adapters installable:** The table lists whether the adapter includes a power module (supercap) to power the flash memory. The server supports between 1 and 4 supercaps depending on the server configuration as described in the [RAID flash power](#)

[module \(supercap\) support](#) section. The number of supercaps supported also determines the maximum number of RAID adapters with flash that can be installed in the server.

- **Field upgrades:** If you are adding a RAID adapter with supercap to the server as a field upgrade, you may need a supercap holder as described in the [RAID flash power module \(supercap\) support](#) section.
- **7mm drive support:** The storage adapters listed in the table below do *not* provide connectivity to the 7mm drive bays. The 7mm drives have their own independent RAID controller. See the [7mm drives](#) section for details.

The onboard SATA controller has the following features:

- Controller integrated into the AMD processor
- JBOD only; no RAID support
- Supports up to 20 SATA drives in the SR665 V3 (16 with one processor)
- Supports HDDs and SSDs; can be mixed

The onboard NVMe support has the following features:

- Controller integrated into the AMD processor
- Supports up to 20x NVMe drives direct connected to onboard ports; additional drives through retimer/switch adapters
- Each drive has PCIe 5.0 x4 host interface
- Supports JBOD - Intel and non-Intel NVMe SSDs
- No support for RAID

For specifications about the RAID adapters and HBAs supported by the SR665 V3, see the ThinkSystem RAID Adapter and HBA Reference, available from:

<https://lenovopress.lenovo.com/lp1288-thinksystem-raid-adapter-and-hba-reference#sr665-v3-support=SR665%2520V3>

For more information about each of the adapters, see the product guides in the RAID adapters or HBA sections of the Lenovo Press web site:

<https://lenovopress.com/servers/options/raid>

<https://lenovopress.com/servers/options/hba>

Tri-Mode support - RAID 940 adapters

The RAID 940 adapters support NVMe through a feature named Tri-Mode support (or Trimode support). This feature enables the use of NVMe U.3 drives at the same time as SAS and SATA drives. Tri-Mode requires an AnyBay backplane. Cabling of the controller to the backplanes is the same as with SAS/SATA drives, and the NVMe drives are connected via a PCIe x1 link to the controller.

NVMe drives connected using Tri-Mode support provide better performance than SAS or SATA drives: A SATA SSD has a data rate of 6Gbps, a SAS SSD has a data rate of 12Gbps, whereas an NVMe U.3 Gen 4 SSD with a PCIe x1 link will have a data rate of 16Gbps. NVMe drives typically also have lower latency and higher IOPS compared to SAS and SATA drives. Tri-Mode is supported with U.3 NVMe drives and requires an AnyBay backplane.

Tri-Mode requires U.3 drives: Only NVMe drives with a U.3 interface are supported. U.2 drives are not supported. See the [Internal drive options](#) section for the U.3 drives supported by the server.

Internal drive options

The following tables list the drive options for internal storage of the server.

2.5-inch hot-swap drives:

- [2.5-inch hot-swap 12 Gb SAS HDDs](#)
- [2.5-inch hot-swap 24 Gb SAS SSDs](#)
- [2.5-inch hot-swap 6 Gb SATA SSDs](#)
- [2.5-inch hot-swap PCIe 5.0 NVMe SSDs](#)
- [2.5-inch hot-swap PCIe 4.0 NVMe SSDs](#)

2.5-inch 7mm hot-swap drives:

- [7mm 2.5-inch hot-swap 6 Gb SATA SSDs](#)
- [7mm 2.5-inch hot-swap PCIe 4.0 NVMe SSDs](#)

3.5-inch hot-swap drives:

- [3.5-inch hot-swap 12 Gb SAS HDDs](#)
- [3.5-inch hot-swap 6 Gb SATA HDDs](#)
- [3.5-inch hot-swap 24 Gb SAS SSDs](#)
- [3.5-inch hot-swap 6 Gb SATA SSDs](#)
- [3.5-inch hot-swap PCIe 4.0 NVMe SSDs](#)

M.2 drives:

- [M.2 SATA drives](#)
- [M.2 PCIe 4.0 NVMe drives](#)

M.2 drive support: The use of M.2 drives requires an additional adapter as described in the [M.2 drives](#) subsection.

SED support: The tables include a column to indicate which drives support SED encryption. The encryption functionality can be disabled if needed. Note: Not all SED-enabled drives have "SED" in the description.

Table 47. 2.5-inch hot-swap 12 Gb SAS HDDs

USB flash drive

For general portable storage needs, the server also supports the USB flash drive option that is listed in the following table.

Table 63. USB memory key

Part number	Feature	Description
4X77A77065	BNWN	ThinkSystem USB 32GB USB 3.0 Flash Drive

Internal backup units

The server does not support any internal backup units, such as tape drives or RDX drives. External backup units are available as described in the [External backup units](#) section.

Optical drives

The server supports the external USB optical drive listed in the following table.

Table 64. External optical drive

Part number	Feature code	Description
7XA7A05926	AVV8	ThinkSystem External USB DVD RW Optical Disk Drive

The drive is based on the Lenovo Slim DVD Burner DB65 drive and supports the following formats: DVD-RAM, DVD-RW, DVD+RW, DVD+R, DVD-R, DVD-ROM, DVD-R DL, CD-RW, CD-R, CD-ROM.

I/O expansion

The SR665 V3 supports a total of up to 12x PCIe slots, 10x at the rear and 2x at the front, plus 1x OCP 3.0 SFF slot for networking. The OCP slot can be either at the front or at the rear (but not both). Slot availability is based on riser selection and drive bays configured. The use of some slots requires that both processors be installed as listed below.

Topics in this section:

- [Slot layout and connections](#)
- [Slot combinations](#)
- [Slot ordering information](#)
- [Serial port](#)
- [OCP slot filler](#)

Slot layout and connections

The slots are provided by riser cards:

- Riser 1: Slots 1, 2 and 3, all full-height slots (connect to CPU 1)
- Riser 2: Slots 4, 5, and 6, all full-height slots (connect to CPU 2)
- Riser 3: Slot 7 and 8
 - When configured as full-height slots: Slot 7 connects to CPU 2, slot 8 to CPU 1
 - When configured as low-profile slots: Both slots connect to CPU 1
- Riser 4: Slots 9 and 10 (connect to CPU 2)

The slots in each riser are either PCIe x16 or PCIe x8 depending on the riser card selected as listed in the table below. All x8 slots are open-ended and physically support x16 adapters. Depending on the risers selected, slots are either PCIe 5.0 or PCIe 4.0.

Riser 3 support with onboard NVMe: The use of Riser 3 is not supported with onboard NVMe, except the following storage configurations, as described in the [Storage configurations](#) section:

- Config 13-1 (2x CPUs, 6xSAS/SATA+2xAnyBay G4 backplane)
- Config 13-2 (2x CPUs, 6xSAS/SATA+2xAnyBay G4 backplane)
- Config 12D-1 (2x CPUs, 1x8x2.5" NVMe G4 backplane)

The SR665 V3 also supports front-accessible PCIe slots: two PCIe 4.0 or PCIe 5.0 x16 slots plus a dedicated OCP 3.0 SFF slot for networking. Front-accessible slots are as follows:

- Slot 11: full-height half-length FHHL slot (connects to CPU 2)
- Slot 12: full-height half-length FHHL slot (connects to CPU 2)

OCP slot: When front slots are configured, the rear OCP slot is disconnected and cannot be used.

As discussed in the [Internal storage](#) section, the server supports drive bays in the rear of the server. Depending on the drive bays selected, the number of slots available for adapters is reduced. The figure below shows the supported combinations of slots and drive bays.

Internal HBA/RAID adapter: For configurations with 2.5-inch front drive bays, an internal RAID adapter or HBA can be installed in a dedicated space and cabled to a PCIe x8 connector, thereby freeing up a slot for other purposes.

The following figure shows the locations of the rear-accessible slots for each configuration selection. The OCP slot is located in the lower-left corner.

Figure 16. SR665 V3 rear slot configurations

The following figure shows the locations of the front-accessible slots.

Figure 17. SR665 V3 front slots

Slot combinations

The SR665 V3 supports the riser combinations as listed in the following table. The table lists the PCIe slot risers in the rear of the server, the PCIe slots in the front of the server, and the front & rear OCP slots.

The table also lists the total number of PCIe slots (excluding the OCP slot) assuming a 3-slot riser is selected for Riser 1 and Riser 2.

Table 65. Slot combinations

Total PCIe slots	Riser 1	Riser 2	Riser 3	Riser 4	Front slots	Rear OCP	Front OCP
Rear slots + Rear OCP							
3	Yes	No	No	No	No	Yes	No
6	Yes	Yes	No	No	No	Yes	No
8	Yes	Yes	Yes	No	No	Yes	No

8	Yes	Yes	No	No	Yes	Yes	No
10	Yes	Yes	Yes	No	Yes	Yes	No
12	Yes	Yes	Yes	Yes	Yes	Yes	No
Rear + Front slots + Front OCP							
5	Yes	No	No	No	Yes	No	Yes
8	Yes	Yes	No	No	Yes	No	Yes
Front slots + Rear OCP							
2	No	No	No	No	Yes	Yes	No

Slot ordering information

The following table lists the riser cards available for CTO builds and for field upgrades.

No slots: It is also possible to build a configuration without any slots, in which case slot fillers will be derived in the configurator. Slots can be added later as field upgrades using option part numbers as listed in the table.

Table 66. Riser cards

Part number	Feature code	Description	Slot configuration* (Green = Gen5, Blue = Gen4)				Purpose
Rear Riser 1 (FH slots)			Slot 1	Slot 2	Slot 3		
4XH7A82898	BPQU	ThinkSystem V3 2U x16/x8/x8 PCIe Gen5 Riser 1 or 2	Gen5 x16	Gen5 x8	Gen5 x8		3 slots PCIe 5.0

4XH7A85885	BPKG	ThinkSystem V3 2U x16/x16 PCIe Gen4 Riser3 Kit with Cage	Gen4 x16	Gen4 x16			2x PCIe 4.0 x16 slots; DW GPU in slot 7

Part number	Feature code	Description	Slot configuration* (Green = Gen5, Blue = Gen4)				Purpose
4XH7A85886	BPKH	ThinkSystem V3 2U x8/x8 PCIe Gen5 Riser3 Kit with Cage	Gen5 x8	Gen5 x8			2x PCIe 5.0 x8 slots
4XH7A85884	BPKF	ThinkSystem V3 2U x8/x8 PCIe Gen4 Riser3 Kit with Cage	Gen4 x8	Gen4 x8			2x PCIe 4.0 x8 slots
Rear Riser 3 & 4 (4x LP slots)			Slot 7	Slot 8	Slot 9	Slot 10	
4XH7A85888	BQ2W†	ThinkSystem V3 2U PCIe Gen5 Riser 3/4-part 1 for Rear 10 slots	Gen5 x8	Gen5 x8			2x PCIe 5.0 x8 slots
	BTMS‡	ThinkSystem V3 2U PCIe Gen5 Riser 3/4-part 2 for Rear 10 slots			Gen5 x8	Gen4 x8	2x PCIe x8 slots (Gen 5, Gen4)
Front Riser			Slot 11	Slot 12			
CTO only	BQ2X	ThinkSystem V3 2U Front x16/x16 PCIe G4 Riser	Gen4 x16	Gen4 x16			2x PCIe 4.0 x16 front-accessible slots
CTO only	C1PN‡	ThinkSystem V3 2U 2X16 Front PCIe Gen5 Riser	Gen5 x16	Gen5 x16			2x PCIe 5.0 x16 front-accessible slots

* All PCIe x8 slots are open ended and will physically support x16 adapters

† In the configurator, when feature BQ2W is selected, BTMS is automatically derived and provides slots 9 & 10. 4XH7A85888 contains both risers.

‡ Front Gen5 riser (feature C1PN) is currently only supported with 5th Gen ("Turin") processors. Support for 4th Gen processors planned for 1Q/2025

To configure the rear OCP slot, no additional feature codes are needed. To configure the front OCP slot, you will need the components listed in the following table. These components are used to route the rear OCP signals to the front of the server.

Tip: See the Slot combinations section to see which slot combinations are supported with the front and rear OCP slots

Table 67. Feature codes for the front OCP slot

Feature code	Description
BQ2E	ThinkSystem V3 1U/2U Front OCP Interposer Card
BQ2F*	ThinkSystem V3 1U/2U Rear OCP Interposer Card

* BQ2F is automatically derived when BQ2E is selected

Configuration rules:

- Riser 3 is not supported with the M.2 adapter
- Front PCIe slots are not supported with the M.2 adapter
- For best performance, install PCIe 5.0 adapters in PCIe 5.0 (Gen5) slots
- The server only supports one OCP slot, either in the rear of the server or the front of the server, not both
- If you want to configure 4x low profile slots for slots 7-10, select feature BQ2W which provides riser 3 (slots 7, 8). Feature BTMS will then be automatically derived to provide riser 4 (slots 9 & 10), along with the necessary cables. Option part number 4XH7A85888 contains both of these risers and the cables.
- If you want to add both a 7mm drive enclosure plus 2x PCIe slots above it, you will need to order the 7mm drive option (either 4XH7A85898 or 4XH7A85899) plus the x16/x16/E riser kit (4XH7A82900 for PCIe Gen 5 or 4XH7A82892 for Gen 4). The riser kit part number provides the 2-slot riser card.
- All PCIe x8 slots are open ended and will physically support x16 adapters

Serial port

The SR665 V3 optionally supports a RS-232 serial port by adding a COM port bracket to either slot 3 or slot 6. Ordering information is shown in the following table.

Front PCIe slots: The serial port is not supported in the front PCIe slots

Table 68. Serial port

Part number	Feature code	Description
4X97A82921	BMNJ	ThinkSystem V2/V3 1U COM Port Upgrade Kit

The bracket is shown in the following figure. The option part number includes both Low Profile and Full Height brackets.

Figure 18. ThinkSystem V2/V3 1U COM Port Upgrade Kit

OCP slot filler

If customers or partners remove an OCP adapter from the server, we recommend that a slot cover (slot filler) be installed in its place to ensure proper airflow in the server. Ordering information is listed in the following table.

Tip: For CTO orders and preconfigured models, slot fillers are automatically installed in slots where an OCP adapter is not installed.

Table 69. OCP slot filler

Part number	Description
4XF7B06188	ThinkSystem OCP3 FILLER

Network adapters

The server has a dedicated OCP 3.0 SFF slot with PCIe 5.0 x16 host interface. See [Figure 3](#) for the location of the OCP slot.

The following table lists the supported OCP adapters. One port can optionally be shared with the XCC management processor for Wake-on-LAN and NC-SI support. Only 1 OCP card can be installed in the server, either rear-accessible or front-accessible.

Table 70. Supported OCP adapters

Part number	Feature code	Description	Maximum supported	Windows 10/11 support

* The AMD X3522 10/25GbE adapter is not supported in any low-profile slots, and not supported in slot 2 or slot 3 of a x16/x8/x8 riser (BLKL or BPQU)

** With 1x CPU, the server only supports 1x BlueField-3 B3220 DPU. Field upgrades require power cable 4X97B02426.

‡ Requires a PCIe Gen4 riser; Not supported in a PCIe Gen5 riser

† With EPYC 9005 "Turin" processors, only supported with a PCIe Gen4 riser; Not supported in a PCIe Gen5 riser

When adding ThinkSystem NVIDIA BlueField-3 B3220 VPI QSFP112 2P 200G PCIe Gen5 x16 Adapter (4XC7A87752) as a field upgrade, the power cable listed in the following table will also need to be ordered.

Table 72. Power cable for BlueField-3 B3220 DPU

Part number	Feature code	Description
4X97B02426	BMJL	ThinkSystem V3 2U BlueField-3 B3220 Power Cable Kit

For more information, including the transceivers and cables that each adapter supports, see the list of Lenovo Press Product Guides in the Networking adapters category:

<https://lenovopress.com/servers/options/ethernet>

Configuration requirements:

- Adapters with a x16 host interface require a x16 slot to maximize performance
- PCIe Gen5 adapters will require a Gen5 riser to maximize performance
- The following adapters are only supported with a PCIe Gen4 riser when installed with an EPYC 9005 "Turin" processor; Not supported in a PCIe Gen5 riser:
 - ThinkSystem Broadcom 57414 10/25GbE SFP28 2-port PCIe Ethernet Adapter, 4XC7A08238
 - ThinkSystem Broadcom 57416 10GBASE-T 2-Port PCIe Ethernet Adapter, 7ZT7A00496

Fibre Channel host bus adapters

The following table lists the Fibre Channel HBAs supported by the SR665 V3.

No Windows 10/11 support: None of the adapters listed in the table are supported with Windows 10 or Windows 11.

Table 73. Fibre Channel HBAs

Part number	Feature code	Description	PCIe lanes	Max qty	Slots supported
64 Gb Fibre Channel HBAs					
4XC7A77485	BLC1	ThinkSystem Emulex LPe36002 64Gb 2-port PCIe Fibre Channel Adapter	Gen4 x8	10	1-12
32 Gb Fibre Channel HBAs					
4XC7A76498	BJ3G	ThinkSystem Emulex LPe35000 32Gb 1-port PCIe Fibre Channel Adapter v2	Gen4 x8	10	1-12
4XC7A76525	BJ3H	ThinkSystem Emulex LPe35002 32Gb 2-port PCIe Fibre Channel Adapter v2	Gen4 x8	10	1-12
4XC7A08279	BA1G	ThinkSystem QLogic QLE2770 32Gb 1-Port PCIe Fibre Channel Adapter	Gen4 x8	10	1-12
4XC7A08276	BA1F	ThinkSystem QLogic QLE2772 32Gb 2-Port PCIe Fibre Channel Adapter	Gen4 x8	10	1-12†
16 Gb Fibre Channel HBAs					
01CV840	ATZV	Emulex 16Gb Gen6 FC Dual-port HBA	Gen3 x8	10	1-12
01CV830	ATZU	Emulex 16Gb Gen6 FC Single-port HBA	Gen3 x8	10	1-12
01CV760	ATZC	QLogic 16Gb Enhanced Gen5 FC Dual-port HBA	Gen3 x8	10	1-12
01CV750	ATZB	QLogic 16Gb Enhanced Gen5 FC Single-port HBA	Gen3 x8	10	1-12

† With EPYC 9005 "Turin" processors, only supported with a PCIe Gen4 riser; Not supported in a PCIe Gen5 riser

For more information, see the list of Lenovo Press Product Guides in the Host bus adapters category:

<https://lenovopress.com/servers/options/hba>

SAS adapters for external storage

The following table lists SAS HBAs and RAID adapters supported by SR665 V3 server for use with external storage.

No Windows 10/11 support: None of the adapters listed in the table are supported with Windows 10 or Windows 11.

Table 74. Adapters for external storage

Part number	Feature code	Description	PCIe lanes	Max qty	Slots supported
SAS HBAs					
4Y37A78837	BNWK	ThinkSystem 440-8e SAS/SATA PCIe Gen4 12Gb HBA	Gen4 x8	8	1 - 8,11,12**
4Y37A09724	B8P7	ThinkSystem 440-16e SAS/SATA PCIe Gen4 12Gb HBA	Gen4 x8	8	1 - 8,11,12**
4Y37A85156	BWKP	ThinkSystem 450W-16e SAS/SATA PCIe Gen4 24Gb HBA	Gen4 x16	5	1,2,4,5,7
External RAID adapters					
4Y37A78836	BNWJ	ThinkSystem RAID 940-8e 4GB Flash PCIe Gen4 12Gb Adapter	Gen4 x8	4	1 - 8,11,12**

* See below regarding supercap requirements

** When Riser 3 is full-height slots, slots 1-8 are supported; when Riser 3 is configured as low-profile slots, 8 & 10 are supported, but 7 & 9 are not.

For a comparison of the functions of the supported storage adapters, see the ThinkSystem RAID Adapter and HBA Reference:

<https://lenovopress.lenovo.com/lp1288#sr665-v3-support=SR665%2520V3&internal-or-external-ports=External>

The RAID 940-8e adapter uses a flash power module (supercap), which can be installed in one of up to 4 locations in the server depending on the server configuration. See the [RAID flash power module \(supercap\) support](#) section for details. The number of 940-8e RAID adapters supported is based on how many supercaps can be installed in the server. If an internal RAID adapter with flash power modules is installed, the maximum number of 940-8e adapters supported is reduced by 1.

For more information, see the list of Lenovo Press Product Guides in the Host bus adapters and RAID adapters categories:

<https://lenovopress.com/servers/options/hba>
<https://lenovopress.com/servers/options/raid>

GPU adapters

This section describes the supported GPUs.

- [GPU part numbers](#)
- [GPU configuration rules](#)
- [Riser selections for double-wide GPUs](#)
- [GPU Enablement Kit](#)
- [GPU cable kits](#)

GPU part numbers

The SR665 V3 supports the following graphics processing units (GPUs).

Table 75. Supported GPUs

Part number	Feature code	Description	Controlled GPU	TDP	Aux power	PCIe lanes	Max qty	Slots supported	Windows 10/11 support
Double-wide GPUs									
4X67A90669	BYFH	ThinkSystem NVIDIA L40S 48GB PCIe Gen4 Passive GPU	Controlled	350W	Yes	Gen4 x16	3	2, 5, 7*†	Supported
4X67B09095‡	CBU5‡	ThinkSystem NVIDIA RTX PRO 6000 Blackwell Max-Q Workstation Edition 96GB PCIe Gen5 Active GPU	Controlled	300W	Yes	Gen4 x16	3	2, 5, 7*†	Supported
4X67A89324	C2DP	ThinkSystem NVIDIA RTX 6000 Ada 48GB PCIe Active GPU	Controlled	300W	Yes	Gen4 x16	3	2, 5, 7*†	Supported
4X67A81102	BP04	ThinkSystem AMD Instinct MI210 PCIe Gen4 Passive Accelerator	Controlled	300W	Yes	Gen4 x16	3	2, 5, 7*	No
4X67A76727	BQZU	ThinkSystem NVIDIA A16 64GB Gen4 PCIe Passive GPU	No	250W	Yes	Gen4 x16	3	2, 5, 7*	Supported
4X67A96491	C4RX	ThinkSystem NVIDIA RTX 4500 Ada 24GB PCIe Active GPU	No	200W	Yes	Gen4 x16	3	2, 5, 7*	Supported
4X67A76581	BQZR	ThinkSystem NVIDIA A30 24GB PCIe Gen4 Passive GPU w/o CEC	Controlled	165W	Yes	Gen4 x16	3	2, 5, 7*	Supported
Single-wide GPUs									
4X67A84824	BS2C	ThinkSystem NVIDIA L4 24GB PCIe Gen4 Passive GPU	Controlled	72W	No	Gen4 x16	7	1 - 7†	Supported

* When a double-wide GPU is installed in slot 2, 5 or 7, the adjacent slot 1, 4 and 8 respectively is not available

† Requires the use of a PCIe Gen5 slot; see [below](#) for details

‡ The ThinkSystem NVIDIA RTX PRO 6000 Blackwell Max-Q Workstation Edition 96GB PCIe Gen5 Active

GPU is planned for January 2026

For information about these GPUs, see the ThinkSystem GPU Summary, available at:
<https://lenovopress.com/lp0768-thinksystem-thinkagile-gpu-summary>

For CTO orders, the SR665 V3 also supports the selection of a placeholder for a GPU. This selection results in a "GPU ready" configuration which ensures that the server ships with the components needed for GPU installation (GPU power cables, air ducts, power supplies, fans, etc) without actually including the GPUs themselves. The following table lists the ordering information for CTO orders.

Table 76. GPU-Ready configurations - ordering information

Part number	Feature code	Description
CTO only	BW40	ThinkSystem NVIDIA A4500 GPU-Ready Installation
CTO only	BVLL	ThinkSystem NVIDIA H100 GPU-Ready Installation
CTO only	BW3Z	ThinkSystem NVIDIA L40 GPU-Ready Installation
CTO only	BZUS	ThinkSystem NVIDIA L40S GPU-Ready Installation
CTO only	BP4X	ThinkSystem DW GPU-Ready Installation (for all other supported DW GPUs)

GPU configuration rules

The following configuration requirements must be met when installing GPUs:

- The table includes a Controlled GPU column. If a GPU is listed as Controlled, that means the GPU is not offered in certain markets, as determined by the US Government. If a GPU is listed as No, that means the GPU is not controlled and is available in all markets.
- GPUs can be configured in CTO orders as follows:
 - A Controlled GPU can only be configured using one of the Base CTO models designated with "for AI", such as 7D9ACTOAWW, as listed in the [Models](#) section.
 - A GPU that is not controlled can only be configured using one of the Base CTO models that is *not* named "for AI", such as 7D9ACTO1WW, as listed in the [Models](#) section.
- All GPUs installed must be identical
- When a double-wide GPU is installed in slot 2, 5 or 7, the adjacent slot 1, 4 and 8 respectively is not available
- Flash storage adapters are not supported.
- Middle drive bays and Rear drive bays are not supported
- For a configuration with 3x GPUs $\geq 300W$ (such as H100, L40S), if the processor TDP is $\geq 320W$ then open-loop water cooling is required. For air cooling, either reduce the configuration to 2x GPUs, or select a processor with a TDP $< 320W$.
- The following GPUs require a PCIe Gen5 slot:
 - NVIDIA L4: Requires a PCIe Gen5 slot (all processors)
 - NVIDIA L40: Requires a PCIe Gen5 slot for 5th Gen processors (a PCIe Gen4 slot is supported for 4th Gen processors)
 - NVIDIA L40S: Requires a PCIe Gen5 slot for 5th Gen processors (a PCIe Gen4 slot is supported for 4th Gen processors)
 - NVIDIA RTX A4500 Ada: Requires a PCIe Gen5 slot for 5th Gen processors (a PCIe Gen4 slot is supported for 4th Gen processors)
 - NVIDIA RTX 6000 Ada: Requires a PCIe Gen5 slot for 5th Gen processors (a PCIe Gen4 slot is supported for 4th Gen processors)
- If 5x NVIDIA L4 GPUs are to be configured, use the following riser cards (uses all x16 slots)
 - Riser 1: ThinkSystem V3 2U x16/x16/E PCIe Gen5 Riser1 or 2, BPQV
 - Riser 2: ThinkSystem V3 2U x16/x16/E PCIe Gen5 Riser1 or 2, BPQV

- Riser 3: ThinkSystem V3 2U x16/x16 PCIe Gen5 Riser3 Kit, BLL9
- If 7x NVIDIA L4 GPUs are to be configured (mix of x16 and x8 slots), use the following riser cards:
 - Riser 1: ThinkSystem V3 2U x16/x8/x8 PCIe Gen5 Riser 1 or 2, BPQU
 - Riser 2: ThinkSystem V3 2U x16/x8/x8 PCIe Gen5 Riser 1 or 2, BPQU
 - Riser 3: ThinkSystem V3 2U x16/x16 PCIe Gen5 Riser3 Kit, BLL9
- For details regarding supported combinations of front drive bays, processors, fans, and ambient temperature, see the Thermal Rules page of the User Guide:
https://pubs.lenovo.com/sr665-v3/thermal_rules#gpu-configurations
- Some NVIDIA A Series GPUs are available as two feature codes, one with a CEC chip and one without a CEC chip (ones without the CEC chip have "w/o CEC" in the name). The CEC is a secondary Hardware Root of Trust (RoT) module that provides an additional layer of security, which can be used by customers who have high regulatory requirements or high security standards. NVIDIA uses a multi-layered security model and hence the protection offered by the primary Root of Trust embedded in the GPU is expected to be sufficient for most customers. The CEC defeatured products still offer Secure Boot, Secure Firmware Update, Firmware Rollback Protection, and In-Band Firmware Update Disable. Specifically, without the CEC chip, the GPU does not support Key Revocation or Firmware Attestation. CEC and non-CEC GPUs of the same type of GPU can be mixed in field upgrades.

Riser selections for double-wide GPUs

When a double-wide GPU is installed in slot 2, 5 or 7, the adjacent slot 1, 4 and 8 respectively is not available. The riser cards listed in the following table are used with double-wide GPUs.

Table 77. Risers needed for double-wide GPUs

Riser	Part number	Feature code	Description
Riser 1 (GPU in slot 2) - PCIe Gen5	4XH7A82902	BPQW	ThinkSystem V3 2U E/x16/x16 PCIe Gen5 Riser1 or 2
Riser 1 (GPU in slot 2) - PCIe Gen4	4XH7A82894	BLKN	ThinkSystem V3 2U G4 E/x16/x16 PCIe Riser1 or 2
Riser 2 (GPU in slot 5) - PCIe Gen5	4XH7A82902	BPQW	ThinkSystem V3 2U E/x16/x16 PCIe Gen5 Riser1 or 2
Riser 2 (GPU in slot 5) - PCIe Gen4	4XH7A82894	BLKN	ThinkSystem V3 2U G4 E/x16/x16 PCIe Riser1 or 2
Riser 3 (GPU in slot 7) - PCIe Gen5	4XH7A85887	BLL9	ThinkSystem V3 2U x16/x16 PCIe Gen5 Riser3 Kit
Riser 3 (GPU in slot 7) - PCIe Gen4	4XH7A85885	BPKG	ThinkSystem V3 2U x16/x16 PCIe Gen4 Riser3 Kit with Cage

GPU Enablement Kit

When installing any full-length GPU as a field upgrade, you will also need to order the GPU Enablement Kit as listed in the following table. This kit is not required for the NVIDIA A2 GPU.

Table 78. ThinkSystem SR665 V3 GPU Full Length Thermal Option Kit

Part number	Description	Maximum supported
4X67A85856	ThinkSystem SR665 V3 GPU Full Length Thermal Option Kit • 2x 2U processor performance heatsinks - replace existing 2U heatsinks (SBB7A54175) • 1x ThinkSystem 2U GPU air duct - replaces main air baffle (SBB7A54054) • 3x GPU extend air ducts - needed in a zone if an A10 or other single-wide GPU > 75W is installed in the upper slot (SBB7A43702) • 3x Air duct fillers - needed in each riser zone if no GPU is installed in that zone (SBB7A54052) • 3x 8-pin GPU power cables for double-wide GPUs (SBB7A49792) • 3x 16-pin GPU power cables for double-wide GPUs (SBB7A66338) • 3x GPU power cables for GPUs such as A4500 (SBB7A44786) • 3x GPU power Y-cables when 2x single-wide GPUs installed on one riser (SBB7A23757)	1

The following figure shows the GPU air duct with GPU air duct fillers and GPU extend air ducts installed. Note that the drawings might not 100% reflect the shipping components.

Figure 19. SR665 V3 GPU air duct

GPU cable kits

The following cable kits are offered to provide auxiliary power cables for GPUs that require one. See the

[Supported GPUs table](#) to see which GPUs require an auxiliary power cable.

Configuration notes:

- This cable kits are only required for field upgrades; factory (CTO) orders will automatically include any required cables.
- For double-wide GPUs, The DW (double-wide) cable kit is only required if you are adding *additional* double-wide GPUs to a server that already has a DW GPU installed from a CTO order. If you are doing a field upgrade to install the *first* DW GPU to a server, order the ThinkSystem SR665 V3 GPU Full Length Thermal Option Kit, 4X67A85856 instead, since the Enablement Kit includes the necessary power cables.
- The SW (single-wide) cable kit is required if you are doing any field upgrades to add a single-wide GPU that requires an auxiliary power cable (GPU power > 75 W), however, all currently supported GPUs do *not* require auxiliary power cables.

Table 79. GPU cable kits

Part number	Description
4X97A86165	ThinkSystem SR665 V3/SR655 V3 DW GPU Cable Option Kit • 3x GPU power cable for H100, L40, L40S GPUs (SBB7A66338) • 3x GPU power cables RTX A4500 (SBB7A44786) • 3x GPU power cables for all other double-wide GPUs (SBB7A49792)
4X97A86166	ThinkSystem SR665 V3/SR655 V3 SW GPU Cable Option Kit • 3x Power cables for SW GPUs and the RTX A4500 (SBB7A44786) • 3x Power Y-cable when 2x single-wide GPUs installed on one riser (SBB7A23757)

Cooling

The SR665 V3 server has up to six 60 mm hot-swap variable-speed fans. Five fans are needed when one processor is installed and six fans are required when two processors are installed. The server offers N+1 redundancy. The server also has one or two additional fans integrated in each of the two power supplies.

Depending on the configuration, the server will need either Standard fans (single-rotor 17K RPM) or Performance fans (dual-rotor 21K RPM).

Under all of the following conditions, standard fans can be used:

- CPUs have a TDP < 240W
- No GPUs
- No Mellanox ConnectX-6 or ConnectX-7 adapters
- No Broadcom 57454 10GBASE-T 4-port OCP adapter
- No 3DS RDIMMs
- No front 12x 3.5-inch drive bays
- No mid-chassis drive bays
- No rear drive bays

If any conditions are not met, Performance fans are required.

Ordering information for the fans is listed in the following table.

Table 80. Fan ordering information

Part number	Feature code	Description	Quantity required
4F17A14497	BH8F	ThinkSystem V3 2U Standard Fan Option Kit	1x CPU: 5 2x CPUs: 6
4F17A82884	BLL6	ThinkSystem V3 2U Performance Fan Option Kit	1x CPU: 5 2x CPUs: 6

Power supplies

The SR665 V3 supports up to two redundant hot-swap power supplies.

The power supply choices are listed in the following table. Both power supplies used in server must be identical.

Tip: When configuring a server in the DCSC configurator, power consumption is calculated precisely by interfacing with Lenovo Capacity Planner. You can therefore select the appropriate power supply for your configuration. However, do consider future upgrades that may require additional power needs.

Table 81. Power supply options

Part number	Feature code	Description	Connector	Max quantity	110V AC	220V AC	240V DC PRC only	-48V DC

-48V DC input power								
4P57A89415	CCTL	ThinkSystem 1100W -48V DC Hot-Swap Gen2 Power Supply v2	DC	2	No	No	No	Yes

Supported power supplies are auto-sensing dual-voltage units, supporting both 110V AC (100-127V 50/60 Hz) and 220V AC (200-240V 50/60 Hz) power. For China customers, all power supplies support 240V DC.

AC power supplies up to 1800W have a C14 connector. AC power supplies 2400W and above have a C20 connector. Power supply options do not include a line cord. For server configurations, the inclusion of a power cord is model dependent. Configure-to-order models can be configured without power cords if desired.

The ThinkSystem 1100W -48V DC Hot-Swap Gen2 Power Supply v2 (4P57A89415) has a Weidmuller TOP 4GS/3 7.6 terminal as shown in the following figure.

Figure 20. Connector on the ThinkSystem 1100W -48V DC Hot-Swap Gen2 Power Supply v2 (4P57A89415)

Power supply LEDs

The supported hot-swap power supplies have the following LEDs:

- Power input LED:
 - Green: The power supply is connected to the AC power source
 - Off: The power supply is disconnected from the AC power source or a power problem has occurred
- Power output LED:
 - Green: The server is on and the power supply is working normally
 - Blinking green: The power supply is in Zero-output/Standby mode (see below)
 - Off: The server is powered off, or the power supply is not working properly
- Power supply error LED:
 - Off: The power supply is working normally
 - Yellow: The power supply has failed

Power cords (C13 connectors)

Line cords and rack power cables with C13 connectors can be ordered as listed in the following table.

115V customers: If you plan to use the 1100W power supply with a low-range (100-127V) power source, select a power cable that is rated above 10A. Power cables that are rated at 10A or below are not supported with low-range power.

Table 82. Power cords

-48V DC power cord

For the -48V DC Power Supply, the following power cable is supported.

Table 84. -48V DC power cable

Part number	Feature code	Description
4X97A59831	BE4V	2.5m, -48VDC Interconnecting Cable

Systems management

The SR665 V3 contains an integrated service processor, XClarity Controller 2 (XCC), which provides advanced control, monitoring, and alerting functions. The XCC2 is based on the AST2600 baseboard management controller (BMC) using a dual-core ARM Cortex A7 32-bit RISC service processor running at 1.2 GHz.

Topics in this section:

- [System I/O Board](#)
- [Local management](#)
- [System status with XClarity Mobile](#)
- [Remote management](#)
- [XCC2 Platinum](#)
- [Lenovo XClarity Provisioning Manager](#)
- [Lenovo XClarity One](#)
- [Lenovo XClarity Administrator](#)
- [Lenovo XClarity Integrators](#)
- [Lenovo XClarity Essentials](#)
- [Lenovo XClarity Energy Manager](#)
- [Lenovo Capacity Planner](#)

System I/O Board

The SR665 V3 implements a separate System I/O Board that connects to the Processor Board. The location of the System I/O Board is shown in the [Components and connectors](#) section. The System I/O Board contains all the connectors visible at the rear of the server as shown in the following figure.

Figure 21. System I/O Board

The board also has the following components:

- XClarity Controller 2, implemented using the ASPEED AST2600 baseboard management controller (BMC).

- Root of Trust (RoT) module - a daughter card that implements Platform Firmware Resiliency (PFR) hardware Root of Trust (RoT) which enables the server to be NIST SP800-193 compliant. For more details about PFR, see the [Security](#) section.
- Connector to enable an additional redundant Ethernet connection to the XCC2 controller. The connector is used in conjunction with the ThinkSystem V3 Management NIC Adapter Kit (4XC7A85319). For details, see the [Remote management](#) section.
- Internal USB port - to allow the booting of an operating system from a USB key. The VMware ESXi preloads use this port for example. Preloads are described in the [Operating system support](#) section.
- MicroSD card port to enable the use of a MicroSD card for additional storage for use with the XCC2 controller. XCC2 can use the storage as a Remote Disc on Card (RDOC) device (up to 4GB of storage). It can also be used to store firmware updates (including N-1 firmware history) for ease of deployment.

Tip: Without a MicroSD card installed, the XCC2 controller will have 100MB of available RDOC storage.

Ordering information for the supported USB drive and Micro SD card are listed in the following table.

Table 85. Media for use with the System I/O Board

Part number	Feature code	Description
4X77A77065	BNWN	ThinkSystem USB 32GB USB 3.0 Flash Drive
4X77A77064	BNWP	ThinkSystem MicroSD 32GB Class 10 Flash Memory Card
4X77A92672	C0BC	ThinkSystem MicroSD 64GB Class 10 Flash Memory Card

Local management

The SR665 V3 offers a front operator panel with key LED status indicators, as shown in the following figure.

Tip: The Network LED only shows network activity of the installed OCP network adapter.

Figure 22. Front operator controls are on the left and right side of the server

Light path diagnostics

The server offers light path diagnostics. If an environmental condition exceeds a threshold or if a system component fails, XCC lights LEDs inside the server to help you diagnose the problem and find the failing part. The server has fault LEDs next to the following components:

- Each memory DIMM
- Each drive bay
- Each power supply

Front VGA and External Diagnostics ports

The VGA port at the rear of the server is included in all models, however the VGA port at the front of the server is optional. When the front VGA is in use, the rear VGA port is automatically disabled.

Also optional is the External Diagnostics port which enables the use of the External Diagnostics Handset, described in the next section.

To configure either the VGA port or the External Diagnostics port at the front of the server, select one of the following feature codes when configuring the server.

Table 86. Front VGA port

Part number	Feature code	Description	Front VGA port	External diagnostics port
CTO only	BQQ2	ThinkSystem 2U V3 EIA Latch Standard	No	No
4XH7A86164	BQQ1	ThinkSystem 2U V3 EIA Latch with VGA & External Diagnostics Ports	Included	Included
4XH7A86816	BQQ4	ThinkSystem 2U V3 EIA Latch with External Diagnostics Port	No	Included
4XH7A86817	BQQ3	ThinkSystem 2U V3 EIA Latch with VGA Port	Included	No

External Diagnostics Handset

The SR665 V3 optionally has a port to connect an External Diagnostics Handset as described in the preceding section. The External Diagnostics Handset has the same functions as the Integrated Diagnostics Panel but has the advantages of not consuming space on the front of the server plus it can be shared among many servers in your data center. The handset has a magnet on the back of it to allow you to easily mount it on a convenient place on any rack cabinet.

Figure 23. External Diagnostics Handset

Ordering information for the External Diagnostics Handset with is listed in the following table.

Table 87. External Diagnostics Handset ordering information

Part number	Feature code	Description
4TA7A64874	BEUX	ThinkSystem External Diagnostics Handset

Integrated Diagnostics Panel for 8x 2.5-inch and 16x 2.5-inch drive bay configurations

For configurations with 8x 2.5-inch or 16x 2.5-inch drive bays at the front, the server can optionally be configured to have a pull-out Integrated Diagnostics Panel. The following figure shows the standard (fixed) operator panel and the optional Integrated Diagnostics Panel.

Figure 24. Operator panel choices for the 8x 2.5-inch drive bay configuration

The Integrated Diagnostics Panel allows quick access to system status, firmware, network, and health information. The LCD display on the panel and the function buttons give you access to the following information:

- Active alerts
- Status Dashboard
- System VPD: machine type & mode, serial number, UUID string
- System firmware levels: UEFI and XCC firmware
- XCC network information: hostname, MAC address, IP address, DNS addresses
- Environmental data: Ambient temperature, CPU temperature, AC input voltage, estimated power consumption
- Active XCC sessions
- System reset action

The Integrated Diagnostics Panel can be configured as listed in the following table. It is only available configure-to-order (CTO); not available as a field upgrade.

Table 88. Ordering information for the Integrated Diagnostics Panel

Part number	Feature code	Description
CTO only	BMJA	ThinkSystem 2U 16x2.5" Front Operator Panel v2

Information pull-out tab

The front of the server also houses an information pull-out tab (also known as the network access tag). See [Figure 2](#) for the location. A label on the tab shows the network information (MAC address and other data) to remotely access the service processor.

System status with XClarity Mobile

The XClarity Mobile app includes a tethering function where you can connect your Android or iOS device to the server via USB to see the status of the server.

The steps to connect the mobile device are as follows:

1. Enable USB Management on the server, by holding down the ID button for 3 seconds (or pressing the dedicated USB management button if one is present)
2. Connect the mobile device via a USB cable to the server's USB port with the management symbol

3. In iOS or Android settings, enable Personal Hotspot or USB Tethering
4. Launch the Lenovo XClarity Mobile app

Once connected you can see the following information:

- Server status including error logs (read only, no login required)
- Server management functions (XClarity login credentials required)

Remote management

The server offers a dedicated RJ45 port at the rear of the server for remote management via the XClarity Controller management processor. The port supports 10/100/1000 Mbps speeds.

Remote server management is provided through industry-standard interfaces:

- Intelligent Platform Management Interface (IPMI) Version 2.0
- Simple Network Management Protocol (SNMP) Version 3 (no SET commands; no SNMP v1)
- Common Information Model (CIM-XML)
- Representational State Transfer (REST) support
- Redfish support (DMTF compliant)
- Web browser - HTML 5-based browser interface (Java and ActiveX not required) using a responsive design (content optimized for device being used - laptop, tablet, phone) with NLS support

The SR665 V3 also supports the use of an OCP adapter that provides an additional redundant Ethernet connection to the XCC2 controller. Ordering information is listed in the following table.

Table 89. Redundant System Management Port Adapter

Part number	Feature code	Description	Maximum quantity
4XC7A85319	BTMQ	ThinkSystem V3 Management NIC Adapter Kit	1

The use of this adapter allows concurrent remote access using both the connection on the adapter and the onboard RJ45 remote management port provided by the server. The adapter and onboard port have separate IP addresses.

Configuration rules:

- The Redundant System Management Port Adapter is installed in the OCP adapter slot at the rear of the server and is mutually exclusive with any OCP network adapter.
- It is not supported installed in the front OCP slot (if the front OCP slot is configured)
- If the Redundant System Management Port Adapter is installed in the rear slot, then the front OCP slot (if configured) cannot be used.

The following figure shows the server with the Redundant System Management Port Adapter installed in the OCP slot.

Figure 25. SR665 V3 with the Redundant System Management Port Adapter installed

IPMI via the Ethernet port (IPMI over LAN) is supported, however it is disabled by default. For CTO orders you can specify whether you want to the feature enabled or disabled in the factory, using the feature codes listed in the following table.

Table 90. IPMI-over-LAN settings

Feature code	Description
B7XZ	Disable IPMI-over-LAN (default)
B7Y0	Enable IPMI-over-LAN

XCC2 Platinum

The XCC2 service processor in the SR665 V3 supports an upgrade to the Platinum level of features. Compared to the XCC functions of ThinkSystem V2 and earlier systems, Platinum adds the same features as Enterprise and Advanced levels in ThinkSystem V2, plus additional features.

XCC2 Platinum adds the following Enterprise and Advanced functions:

- Remotely viewing video with graphics resolutions up to 1600x1200 at 75 Hz with up to 23 bits per pixel, regardless of the system state
- Remotely accessing the server using the keyboard and mouse from a remote client
- International keyboard mapping support
- Syslog alerting
- Redirecting serial console via SSH
- Component replacement log (Maintenance History log)
- Access restriction (IP address blocking)
- Lenovo SED security key management
- Displaying graphics for real-time and historical power usage data and temperature
- Boot video capture and crash video capture
- Virtual console collaboration - Ability for up to 6 remote users to be log into the remote session simultaneously
- Remote console Java client
- Mapping the ISO and image files located on the local client as virtual drives for use by the server
- Mounting the remote ISO and image files via HTTPS, SFTP, CIFS, and NFS
- System utilization data and graphic view
- Single sign on with Lenovo XClarity Administrator
- Update firmware from a repository

- License for XClarity Energy Manager

Note: The SR665 V3 does not support Power capping.

XCC2 Platinum also adds the following features that are new to XCC2:

- System Guard - Monitor hardware inventory for unexpected component changes, and simply log the event or prevent booting
- Enterprise Strict Security mode - Enforces CNSA 1.0 level security
- Neighbor Group - Enables administrators to manage and synchronize configurations and firmware level across multiple servers

Ordering information is listed in the following table. XCC2 Platinum is a software license upgrade - no additional hardware is required.

Table 91. XCC2 Platinum license upgrade

Part number	Feature code	Description
7S0X000KWW	SBCV	Lenovo XClarity Controller 2 (XCC2) Platinum Upgrade

With XCC2 Platinum, for CTO orders, you can request that System Guard be enabled in the factory and the first configuration snapshot be recorded. To add this to an order, select feature code listed in the following table. The selection is made in the Security tab of the DCSC configurator.

Table 92. Enable System Guard in the factory (CTO orders)

Feature code	Description
BUT2	Install System Guard

For more information about System Guard, see https://pubs.lenovo.com/xcc2/NN1ia_c_systemguard

Lenovo XClarity Provisioning Manager

Lenovo XClarity Provisioning Manager (LXPM) is a UEFI-based application embedded in ThinkSystem servers and accessible via the F1 key during system boot.

LXPM provides the following functions:

- Graphical UEFI Setup
- System inventory information and VPD update
- System firmware updates (UEFI and XCC)
- RAID setup wizard
- OS installation wizard (including unattended OS installation)
- Diagnostics functions

Lenovo XClarity One

Lenovo XClarity One is a hybrid cloud-based unified Management-as-a-Service (MaaS) platform, built for growing enterprises. XClarity One is powered by Lenovo Smarter Support, a powerful AI-driven platform that leverages predictive analytics to enhance the performance, reliability, and overall efficiency of Lenovo servers.

XClarity One is the next milestone in Lenovo's portfolio of systems management products. Now you can leverage the benefits of a true next-generation, hybrid cloud-based solution for the deployment, management, and maintenance of your infrastructure through a single, centralized platform that delivers a

consistent user experience across all Lenovo products.

Key features include:

- **AI-powered Automation**

Harnesses the power of AI and predictive analytics to enhance the performance and reliability of your infrastructure with proactive protection.

- **AI-Powered Predictive Failure Analytics** - predict maintenance needs before the failure occurs, with the ability to visualize aggregated actions in customer dashboard.
- **AI-Powered Call-Home** - A Call-Home serviceable event opens a support ticket automatically, leveraging AI technology for problem determination and fast resolution.
- **AI-Powered Premier Support with Auto CRU** - uses AI to automatically dispatch parts and services, reducing service costs and minimizing downtime.

- **Secure Management Hub**

Lenovo's proprietary Management Hub is an on-premises virtual appliance that acts as the bridge between your infrastructure and the cloud.

- **On-Premises Security with Cloud Flexibility** - your infrastructure has no direct connection to the cloud, greatly reducing your attack surface from external threats while still having the deployment benefits, flexibility, and scalability of a cloud solution.
- **Authentication and Authorization** - built on a Zero Trust Architecture and requiring OTP Application authentication for all users to handle the support of all customers' servers and client devices. Role-based access controls help define and restrict permissions based on user roles.

- **AI-Powered Management**

Go beyond standard system management leveraging AI algorithms to continuously learn from data patterns to optimize performance and predict potential issues before they impact operations.

- **AI Customizable Insights and Reporting** - Customize AI-generated insights and reports to align with specific business objectives, enabling data-driven decision-making and strategic planning.
- **AI-driven scalability and flexibility** - Guided with AI-driven predictions, the platform supports dynamic scaling of resources based on workload demands.
- **Monitor and Change** - AI Advanced analytics capabilities providing deep insights into server performance, resource utilization, and security threats, to detect anomalies and suggest optimizations in real-time. NLP capabilities enabling administrators to interact with the platform using voice commands or text queries.
- **Upward Integration** - Integrated with Lenovo Open Cloud Automation (LOC-A), Lenovo Intelligent Computer Orchestration (LiCO) and AIOps engines providing an end-to-end management architecture across Lenovo infrastructure and devices solutions.
- **Cross-Platform Compatibility** - Compatibility across different server types and cloud environments

Lenovo XClarity One is an optional management component. License information for XClarity One is listed in the following table.

Table 93. XClarity One license information

Part number	Feature code	Description
7S0X000LWW	SCJC	XClarity One - Managed Device, Per Endpoint w/1 Yr SW S&S
7S0X000MWW	SCJD	XClarity One - Managed Device, Per Endpoint w/3 Yr SW S&S
7S0X000NWW	SCJE	XClarity One - Managed Device, Per Endpoint w/5 Yr SW S&S

For more information, see these resources:

- Lenovo XClarity One datasheet:
<https://lenovopress.lenovo.com/ds0188-lenovo-xclarity-one>
- Lenovo XClarity One product guide:
<https://lenovopress.lenovo.com/lp1992-lenovo-xclarity-one>

Lenovo XClarity Administrator

Lenovo XClarity Administrator is a centralized resource management solution designed to reduce complexity, speed response, and enhance the availability of Lenovo systems and solutions. It provides agent-free hardware management for ThinkSystem servers. The administration dashboard is based on HTML 5 and allows fast location of resources so tasks can be run quickly.

Because Lenovo XClarity Administrator does not require any agent software to be installed on the managed endpoints, there are no CPU cycles spent on agent execution, and no memory is used, which means that up to 1GB of RAM and 1 - 2% CPU usage is saved, compared to a typical managed system where an agent is required.

Lenovo XClarity Administrator is an optional software component for the SR665 V3. The software can be downloaded and used at no charge to discover and monitor the SR665 V3 and to manage firmware upgrades.

If software support is required for Lenovo XClarity Administrator, or premium features such as configuration management and operating system deployment are required, Lenovo XClarity Pro software subscription should be ordered. Lenovo XClarity Pro is licensed on a per managed system basis, that is, each managed Lenovo system requires a license.

The following table lists the Lenovo XClarity software license options.

Table 94. Lenovo XClarity Pro ordering information

Part number	Feature code	Description
00MT201	1339	Lenovo XClarity Pro, per Managed Endpoint w/1 Yr SW S&S
00MT202	1340	Lenovo XClarity Pro, per Managed Endpoint w/3 Yr SW S&S
00MT203	1341	Lenovo XClarity Pro, per Managed Endpoint w/5 Yr SW S&S
7S0X000HWW	SAYV	Lenovo XClarity Pro, per Managed Endpoint w/6 Yr SW S&S
7S0X000JWW	SAYW	Lenovo XClarity Pro, per Managed Endpoint w/7 Yr SW S&S

Lenovo XClarity Administrator offers the following standard features that are available at no charge:

- Auto-discovery and monitoring of Lenovo systems
- Firmware updates and compliance enforcement
- External alerts and notifications via SNMP traps, syslog remote logging, and e-mail
- Secure connections to managed endpoints
- NIST 800-131A or FIPS 140-3 compliant cryptographic standards between the management solution and managed endpoints
- Integration into existing higher-level management systems such as cloud automation and orchestration tools through REST APIs, providing extensive external visibility and control over hardware resources
- An intuitive, easy-to-use GUI
- Scripting with Windows PowerShell, providing command-line visibility and control over hardware resources

Lenovo XClarity Administrator offers the following premium features that require an optional Pro license:

- Pattern-based configuration management that allows to define configurations once and apply repeatedly without errors when deploying new servers or redeploying existing servers without disrupting the fabric
- Bare-metal deployment of operating systems and hypervisors to streamline infrastructure provisioning

For more information, refer to the Lenovo XClarity Administrator Product Guide:

<http://lenovopress.com/tips1200>

Lenovo XClarity Integrators

Lenovo also offers software plug-in modules, Lenovo XClarity Integrators, to manage physical infrastructure from leading external virtualization management software tools including those from Microsoft and VMware.

These integrators are offered at no charge, however if software support is required, a Lenovo XClarity Pro software subscription license should be ordered.

Lenovo XClarity Integrators offer the following additional features:

- Ability to discover, manage, and monitor Lenovo server hardware from VMware vCenter or Microsoft System Center
- Deployment of firmware updates and configuration patterns to Lenovo x86 [rack servers](#) and Flex System from the virtualization management tool
- Non-disruptive server maintenance in clustered environments that reduces workload downtime by dynamically migrating workloads from affected hosts during rolling server updates or reboots
- Greater service level uptime and assurance in clustered environments during unplanned hardware events by dynamically triggering workload migration from impacted hosts when impending hardware failures are predicted

For more information about all the available Lenovo XClarity Integrators, see the Lenovo XClarity Administrator Product Guide: <https://lenovopress.com/tips1200-lenovo-xclarity-administrator>

Lenovo XClarity Essentials

Lenovo offers the following XClarity Essentials software tools that can help you set up, use, and maintain the server at no additional cost:

- Lenovo Essentials OneCLI

OneCLI is a collection of server management tools that uses a command line interface program to manage firmware, hardware, and operating systems. It provides functions to collect full system health information (including health status), configure system settings, and update system firmware and drivers.

- Lenovo Essentials UpdateXpress

The UpdateXpress tool is a standalone GUI application for firmware and device driver updates that enables you to maintain your server firmware and device drivers up-to-date and help you avoid unnecessary server outages. The tool acquires and deploys individual updates and UpdateXpress System Packs (UXSPs) which are integration-tested bundles.

- Lenovo Essentials Bootable Media Creator

The Bootable Media Creator (BOMC) tool is used to create bootable media for offline firmware update.

For more information and downloads, visit the Lenovo XClarity Essentials web page:

<http://support.lenovo.com/us/en/documents/LNVO-center>

Lenovo XClarity Energy Manager

Lenovo XClarity Energy Manager (LXEM) is a power and temperature management solution for data centers. It is an agent-free, web-based console that enables you to monitor and manage power consumption and temperature in your data center through the management console.

LXEM is a licensed product. A single-node LXEM license is included with the XClarity Controller Platinum upgrade as described in the [XCC2 Platinum](#) section. If your server does not have the XCC Platinum upgrade, Energy Manager licenses can be ordered as shown in the following table.

Table 95. Lenovo XClarity Energy Manager

Part number	Description
4L40E51621	Lenovo XClarity Energy Manager Node License (1 license needed per server)

Note: The SR665 V3 does not support the following Energy Manager functions:

- Power capping
- Policy-based management

For more information about XClarity Energy Manager, see the following resources:

- Lenovo Support page:
<https://datacentersupport.lenovo.com/us/en/solutions/lnvo-lxem>
- User Guide for XClarity Energy Manager:
<https://pubs.lenovo.com/lxem/>

Lenovo Capacity Planner

Lenovo Capacity Planner is a power consumption evaluation tool that enhances data center planning by enabling IT administrators and pre-sales professionals to understand various power characteristics of racks, servers, and other devices. Capacity Planner can dynamically calculate the power consumption, current, British Thermal Unit (BTU), and volt-ampere (VA) rating at the rack level, improving the planning efficiency for large scale deployments.

For more information, refer to the Capacity Planner web page:

<http://datacentersupport.lenovo.com/us/en/solutions/lnvo-lcp>

Security

Topics in this section:

- [Security features](#)
- [Platform Firmware Resiliency - Lenovo ThinkShield](#)
- [Security standards](#)

Security features

The SR665 V3 server offers the following electronic security features:

- Secure Boot function of the AMD EPYC processor
- Support for Platform Firmware Resiliency (PFR) hardware Root of Trust (RoT) - see the [Platform Firmware Resiliency](#) section
- Firmware signature processes compliant with FIPS and NIST requirements
- System Guard (part of [XCC Platinum](#)) - Proactive monitoring of hardware inventory for unexpected component changes
- Administrator and power-on password
- Integrated Trusted Platform Module (TPM) supporting TPM 2.0
- Self-encrypting drives (SEDs) with support for enterprise key managers - see the [SED encryption key management](#) section

The server is NIST SP 800-147B compliant.

The SR665 V3 server also offers the following physical security features:

- Optional chassis intrusion switch
- Optional lockable front security bezel

The optional lockable front security bezel is shown in the following figure and includes a key that enables you to secure the bezel over the drives and system controls thereby reducing the chance of unauthorized or accidental access to the server.

Front PCIe slots: The use of the security bezel is not supported when the server has front PCIe slots.

Figure 26. Lockable front security bezel

The dimensions of the security bezel are:

- Width: 437 mm (17.2 in.)
- Height: 87 mm (3.4 in.)
- Width: 23 mm (0.9 in.)

The following table lists the security options for the SR665 V3.

Table 96. Security features

Part number	Feature code	Description
4X97A90518	BVGB	ThinkSystem SR665 V3 Intrusion Cable
4XH7A09886	B8M2	ThinkSystem V2 2U Security Bezel Option Kit
4XH7A90300	BXBQ	ThinkSystem V3 2U Security Bezel Option Kit

Tip: The only difference between security bezels 4XH7A09886 and 4XH7A90300 is the Lenovo logo: On 4XH7A09886, the logo is made from plastic; on 4XH7A90300, the logo is made from aluminum alloy.

Platform Firmware Resiliency - Lenovo ThinkShield

Lenovo's ThinkShield Security is a transparent and comprehensive approach to security that extends to all dimensions of our data center products: from development, to supply chain, and through the entire product lifecycle.

The ThinkSystem SR665 V3 includes Platform Firmware Resiliency (PFR) hardware Root of Trust (RoT) which enables the system to be NIST SP800-193 compliant. This offering further enhances key platform subsystem protections against unauthorized firmware updates and corruption, to restore firmware to an integral state, and to closely monitor firmware for possible compromise from cyber-attacks.

PFR operates upon the following server components:

- UEFI image – the low-level server firmware that connects the operating system to the server hardware
- XCC image – the management “engine” software that controls and reports on the server status separate from the server operating system
- FPGA image – the code that runs the server’s lowest level hardware controller on the motherboard

The Lenovo Platform Root of Trust Hardware performs the following three main functions:

- Detection – Measures the firmware and updates for authenticity
- Recovery – Recovers a corrupted image to a known-safe image
- Protection – Monitors the system to ensure the known-good firmware is not maliciously written

These enhanced protection capabilities are implemented using a dedicated, discrete security processor whose implementation has been rigorously validated by leading third-party security firms. Security evaluation results and design details are available for customer review – providing unprecedented transparency and assurance.

The SR665 V3 includes support for Secure Boot, a UEFI firmware security feature developed by the UEFI Consortium that ensures only immutable and signed software are loaded during the boot time. The use of Secure Boot helps prevent malicious code from being loaded and helps prevent attacks, such as the installation of rootkits. Lenovo offers the capability to enable secure boot in the factory, to ensure end-to-end protection. Alternatively, Secure Boot can be left disabled in the factory, allowing the customer to enable it themselves at a later point, if desired.

The following table lists the relevant feature code(s).

Table 97. Secure Boot options

Part number	Feature code	Description	Purpose
CTO only	BPKQ	TPM 2.0 with Secure Boot	Configure the system in the factory with Secure Boot enabled.
CTO only	BPKR	TPM 2.0	Configure the system without Secure Boot enabled. Customers can enable Secure Boot later if desired.

Tip: If Secure Boot is not enabled in the factory, it can be enabled later by the customer. However once Secure Boot is enabled, it cannot be disabled.

Security standards

The SR665 V3 supports the following security standards and capabilities:

- **Industry Standard Security Capabilities**

- AMD CPU Enablement
 - AES-NI (Advanced Encryption Standard New Instructions)
 - GMET (Guest Mode Execute Trap)
 - Hardware-based side channel attack resilience enhancements
 - NX (No eXecute)
 - PSB (Platform Secure Boot)
 - Shadow Stack
 - SEV (Secure Encrypted Virtualization)
 - SEV-ES (Encrypted State register encryption)
 - SEV-SNP (Secure Nested Paging)
 - SME (Secure Memory Encryption)
 - SVM (Secure Virtual Machine)
 - UMIP (User Mode Instruction Prevention)
- Microsoft Windows Security Enablement
 - Credential Guard
 - Device Guard
 - Host Guardian Service
- TPM 2.0 (Trusted Platform Module 2.0)
- UEFI (Unified Extensible Firmware Interface) Forum Secure Boot

- **Hardware Root of Trust and Security**

- Independent security subsystem providing platform-wide NIST SP800-193 compliant Platform Firmware Resilience (PFR)
- Host domain RoT supplemented by AMD Platform Secure Boot (PSB)
- Management domain RoT provided by the Secure Boot feature of the AST2600 Baseboard Management Controller (BMC)

- **Platform Security**

- Boot and run-time firmware integrity monitoring with rollback to known-good firmware (e.g., “self-healing”)
- Non-volatile storage bus security monitoring and filtering
- Resilient firmware implementation, such as to detect and defeat unauthorized flash writes or SMM (System Management Mode) memory incursions
- Patented IPMI KCS channel privileged access authorization (USPTO Patent# 11,256,810)
- Host and management domain authorization, including integration with CyberArk for enterprise password management
- KMIP (Key Management Interoperability Protocol) compliant, including support for IBM SKLM and Thales KeySecure
- Reduced “out of box” attack surface
- Configurable network services
- FIPS 140-3 (in progress) validated cryptography for XCC
- CNSA Suite 1.0 Quantum-resistant cryptography for XCC

- Lenovo System Guard

For more information on platform security, see the paper “How to Harden the Security of your ThinkSystem Server and Management Applications” available from <https://lenovopress.com/lp1260-how-to-harden-the-security-of-your-thinksystem-server>.

- **Standards Compliance and/or Support**

- NIST SP800-131A rev 2 “Transitioning the Use of Cryptographic Algorithms and Key Lengths”
- NIST SP800-147B “BIOS Protection Guidelines for Servers”
- NIST SP800-193 “Platform Firmware Resiliency Guidelines”
- ISO/IEC 11889 “Trusted Platform Module Library”
- Common Criteria TCG Protection Profile for “PC Client Specific TPM 2.0”
- European Union Commission Regulation 2019/424 (“ErP Lot 9”) “Ecodesign Requirements for Servers and Data Storage Products” Secure Data Deletion
- Optional FIPS 140-2 validated Self-Encrypting Disks (SEDs) with external KMIP-based key management

- **Product and Supply Chain Security**

- Suppliers validated through Lenovo’s Trusted Supplier Program
- Developed in accordance with Lenovo’s Secure Development Lifecycle (LSDL)
- Continuous firmware security validation through automated testing, including static code analysis, dynamic network and web vulnerability testing, software composition analysis, and subsystem-specific testing, such as UEFI security configuration validation
- Ongoing security reviews by US-based security experts, with attestation letters available from our third-party security partners
- Digitally signed firmware, stored and built on US-based infrastructure and signed on US-based Hardware Security Modules (HSMs)
- TAA (Trade Agreements Act) compliant manufacturing, by default in Mexico for North American markets with additional US and EU manufacturing options
- US 2019 NDAA (National Defense Authorization Act) Section 889 compliant

Rack installation

The following table lists the rack installation options that are available for the SR665 V3.

Table 98. Rack installation options

Part number	Feature	Description
Rail Kits		
4XF7A99129	C4TL	ThinkSystem Toolless Stab-in Slide Rail Kit V3
4XF7A99131	C4TN	ThinkSystem Toolless Stab-in Slide Rail Kit V3 with 2U CMA
4M17A13564	BK7W	ThinkSystem SR250/SR150 Toolless Friction Rail
4M17A11754	B8LA	ThinkSystem Toolless Slide Rail Kit v2
4M17A11756	B91Y	ThinkSystem Toolless Slide Rail Kit v2 with 2U CMA
Enhanced Rail Kits for > 34 kg server weight*		
4M17A11755	B8LB	ThinkSystem Toolless Slide Rail Kit v2 Enhanced
4M17A11757	B97N	ThinkSystem Toolless Slide Rail Kit v2 Enhanced with 2U CMA
Separate Cable Management Arm		
7M27A05698	B135	ThinkSystem 2U CMA Upgrade Kit for Toolless Slide Rail

* The Enhanced Slide Rail Kits are used when the server is shipped in a rack and the server is 34 kg or heavier (configuration with 20x 3.5-inch HDDs for example)

For the specification of the rail kits, see the ThinkSystem and ThinkEdge Rail Kit Reference:
<https://lenovopress.lenovo.com/lp1838-thinksystem-and-thinkedge-rail-kit-reference#sr665-v3-support=SR665%2520V3>

Operating system support

The SR665 V3 with 5th Gen AMD EPYC processors supports the following operating systems:

- Microsoft Windows 10 (x64)
- Microsoft Windows 11
- Microsoft Windows Server 2019
- Microsoft Windows Server 2022
- Microsoft Windows Server 2025
- Red Hat Enterprise Linux 8.10
- Red Hat Enterprise Linux 9.4
- Red Hat Enterprise Linux 9.5
- Red Hat Enterprise Linux 9.6
- Red Hat Enterprise Linux 9.7
- Red Hat Enterprise Linux 10.0
- Red Hat Enterprise Linux 10.1
- SUSE Linux Enterprise Server 15 SP6
- SUSE Linux Enterprise Server 15 SP7
- SUSE Linux Enterprise Server 16
- Ubuntu 22.04 LTS 64-bit
- Ubuntu 24.04 LTS 64-bit
- VMware ESXi 8.0 U3
- VMware ESXi 9.0

The SR665 V3 with 4th Gen AMD EPYC processors supports the following operating systems:

- Microsoft Windows 10 (x64)
- Microsoft Windows 11
- Microsoft Windows Server 2019
- Microsoft Windows Server 2022
- Microsoft Windows Server 2025
- Red Hat Enterprise Linux 8.6
- Red Hat Enterprise Linux 8.7
- Red Hat Enterprise Linux 8.8
- Red Hat Enterprise Linux 8.9
- Red Hat Enterprise Linux 8.10
- Red Hat Enterprise Linux 9.0
- Red Hat Enterprise Linux 9.1
- Red Hat Enterprise Linux 9.2
- Red Hat Enterprise Linux 9.3
- Red Hat Enterprise Linux 9.4
- Red Hat Enterprise Linux 9.5
- Red Hat Enterprise Linux 9.6
- Red Hat Enterprise Linux 9.7
- Red Hat Enterprise Linux 10.0
- Red Hat Enterprise Linux 10.1
- SUSE Linux Enterprise Server 15 SP4
- SUSE Linux Enterprise Server 15 SP5
- SUSE Linux Enterprise Server 15 SP6
- SUSE Linux Enterprise Server 15 SP7
- SUSE Linux Enterprise Server 15 Xen SP4
- SUSE Linux Enterprise Server 15 Xen SP5
- SUSE Linux Enterprise Server 16
- Ubuntu 20.04 LTS 64-bit
- Ubuntu 22.04 LTS 64-bit
- Ubuntu 24.04 LTS 64-bit
- VMware ESXi 7.0 U3

- VMware ESXi 8.0
- VMware ESXi 8.0 U1
- VMware ESXi 8.0 U2
- VMware ESXi 8.0 U3
- VMware ESXi 9.0

For a complete list of supported, certified and tested operating systems, plus additional details and links to relevant web sites, see the Operating System Interoperability Guide:

- 5th Gen AMD EPYC: <https://lenovopress.lenovo.com/osig#servers=sr665-v3-5th-gen-epyc-7d9b-7d9a&support=all>
- 4th Gen AMD EPYC: <https://lenovopress.lenovo.com/osig#servers=sr665-v3-4th-gen-epyc-7d9b-7d9a&support=all>

For configure-to-order configurations, the SR665 V3 can be preloaded with VMware ESXi. Ordering information is listed in the following table.

Table 99. VMware ESXi preload

Part number	Feature code	Description
CTO only	BMEY	VMware ESXi 7.0 U3 (Factory Installed)
CTO only	BYC7	VMware ESXi 8.0 U2 (Factory Installed)
CTO only	BZ97	VMware ESXi 8.0 U3 (Factory Installed)
CTO only	C91V	VMware ESXi 9.0 (Factory Installed)

Configuration rule:

- An ESXi preload cannot be selected if the configuration includes an NVIDIA GPU (ESXi preload cannot include the NVIDIA driver)

You can download supported VMware vSphere hypervisor images from the following web page and install it using the instructions provided:

https://vmware.lenovo.com/content/custom_iso/

Windows 10 and Windows 11

The SR665 V3 can now run Windows 10 and Windows 11, however only a subset of adapters and drives can be installed. For ease of configuration, additional Base CTO models 7D9ACTO2WW and 7D9BCTO2WW have been created to assist building a configuration that can be used with the client operating systems. See the [Models](#) section for details.

The XClarity management toolset is supported with Windows 10 and Windows 11.

Windows client license: A Windows client license for the system cannot be ordered from Lenovo nor can the OS be preloaded on the system in the factory. For the Windows license and for preloads, please contact your Lenovo business partner. A Windows Pro license is required as a qualifying base OS license in order to use a client Volume License offering.

See the part number tables in the following sections to see which adapters are supported with Windows 10 and Windows 11:

- [Controllers for internal storage](#)
- [M.2 adapters](#)
- [Network adapters](#)
- [GPU adapters](#)

GPU recommended: Lenovo recommends that if you plan to install Windows 10 or 11 on this server to run graphics-intensive applications, then you should selected a dedicated graphics adapter (GPU).

The following components are not supported:

- Fibre Channel adapters
- InfiniBand and VPI adapters
- External storage adapters
- Flash storage adapters

Physical and electrical specifications

The SR665 V3 has the following overall physical dimensions, excluding components that extend outside the standard chassis, such as EIA flanges, front security bezel (if any), and power supply handles:

- Width: 445 mm (17.5 inches)
- Height: 87 mm (3.4 inches)
- Depth: 766 mm (30.1 inches)

The following table lists the detailed dimensions. See the figure below for the definition of each dimension.

Table 100. Detailed dimensions

Dimension	Description
482 mm	X_a = Width, to the outsides of the front EIA flanges
435 mm	X_b = Width, to the rack rail mating surfaces
445 mm	X_c = Width, to the outer most chassis body feature
87 mm	Y_a = Height, from the bottom of chassis to the top of the chassis
698 mm	Z_a = Depth, from the rack flange mating surface to the rearmost I/O port surface
732 mm	Z_b = Depth, from the rack flange mating surface to the rearmost feature of the chassis body
732 mm ($\leq 1100W$) 755 mm (1800W) 781 mm (2400W)	Z_c = Depth, from the rack flange mating surface to the rearmost feature such as power supply handle
34 mm	Z_d = Depth, from the forwardmost feature on front of EIA flange to the rack flange mating surface
46 mm	Z_e = Depth, from the front of security bezel (if applicable) or forwardmost feature to the rack flange mating surface

Figure 27. Server dimensions

The shipping (cardboard packaging) dimensions of the SR665 V3 are as follows:

- Width: 592 mm (23.3 inches)
- Height: 282 mm (11.1 inches)
- Depth: 992 mm (39.1 inches)

The server has the following weight:

- Maximum weight: 38.8 kg (85.5 lb)

Electrical specifications for AC input power supplies:

- Input voltage:
 - 100 to 127 (nominal) Vac, 50 Hz or 60 Hz
 - 200 to 240 (nominal) Vac, 50 Hz or 60 Hz
 - 180 to 300 Vdc (China only)
- Inlet current: See the following table.

Table 101. Maximum inlet current

Part number	Description	100V AC	200V AC	220V AC	240V DC
AC input power - 80 PLUS Titanium efficiency					
4P57A82019	ThinkSystem 750W 230V Titanium Hot-Swap Gen2 Power Supply v3	No support	4A	3.6A	3.3A
4P57A72666	ThinkSystem 1100W 230V Titanium Hot-Swap Gen2 Power Supply	No support	5.9A	5.3A	5A
4P57A78359	ThinkSystem 1800W 230V Titanium Hot-Swap Gen2 Power Supply	No support	9.7A	8.7A	8.3A

Part number	Description	100V AC	200V AC	220V AC	240V DC
4P57A72667	ThinkSystem 2600W 230V Titanium Hot-Swap Gen2 Power Supply v4	No support	13.2A	13A	11.9A
AC input power - 80 PLUS Platinum efficiency					
4P57A72670	ThinkSystem 750W 230V/115V Platinum Hot-Swap Gen2 Power Supply v3	8.4A	4.1A	3.69A	3.5A
4P57A72671	ThinkSystem 1100W 230V/115V Platinum Hot-Swap Gen2 Power Supply v3	12A	6A	5.4A	5.1A
4P57A78362	ThinkSystem 1800W 230V Platinum Hot-Swap Gen2 Power Supply v2	No support	10A	9.1A	9A
4P57A26295	ThinkSystem 2400W 230V Platinum Hot-Swap Gen2 Power Supply	No support	14A	12.6A	12A

Electrical specifications for DC input power supply:

- Input voltage: -48 to -60 Vdc
- Inlet current (1100W power supply): 26 A

Operating environment

The SR665 V3 server complies with ASHRAE Class A2 specifications with most configurations, and depending on the hardware configuration, also complies with ASHRAE Class A3 and Class A4 specifications. System performance may be impacted when operating temperature is outside ASHRAE A2 specification.

Depending on the hardware configuration, the SR665 V3 server also complies with ASHRAE Class H1 specification. System performance may be impacted when operating temperature is outside ASHRAE H1 specification.

Topics in this section:

- [Ambient temperature requirements](#)
- [Water requirements](#)
- [Temperature and humidity](#)
- [Acoustical noise emissions](#)
- [Shock and vibration](#)
- [Particulate contamination](#)

Ambient temperature requirements

The restrictions to ASHRAE support are as follows (cooling by air):

- The ambient temperature must be limited to 35°C or lower if the server has any of the following components:
 - Broadcom 57416 10GBASE-T 2-port OCP
 - Broadcom 57454 10GBASE-T 4-port OCP
 - Network interface cards (NICs) at a rate greater than or equal to 100 Gb
 - Parts with AOC and at the rate of 25 Gb
- The ambient temperature must be limited to 30°C or lower if the server has any of the following components:
 - 24 x 2.5" or 12 x 3.5" front bay with middle or rear bay
 - GPU (except front 24 x 2.5" configurations and configurations with Group E processors)
 - Parts with AOC and at a rate greater than 25 Gb
 - 9654(P)/9554(P)/9174F/9754/9734/9684X/9555/9655 processors using performance heat sinks in a front 8 x 2.5"/8 x 3.5"/16 x 2.5" standard configuration.
 - Group E processors using advanced heat sinks in a front 12 x 3.5"/24 x 2.5" configuration without middle/rear bay
- The ambient temperature must be limited to 25°C or lower if the server has any of the following components:
 - 9274F/9374F/9474F/9575F using performance heat sinks in a front 8 x 2.5"/8 x 3.5"/16 x 2.5" standard configuration
 - 9654(P)/9554(P)/9174F/9754/9734/9555/9655 using performance heat sinks in a front 24 x 2.5" configuration without middle/rear bay
 - 9654(P)/9554(P)/9174F/9754/9734/9684X/9555/9655 in a front 8 x 2.5"/8 x 3.5"/16 x 2.5" + GPU configuration
 - 24 x 2.5" front bay + GPU
 - Gen5 7.68 TB or larger capacity NVMe in a configuration with middle/rear bay
 - Group A (240 W < cTDP ≤ 300 W) processor in a configuration with middle/rear bay
 - ThinkSystem 256GB TruDDR5 4800MHz (8Rx4) 3DS RDIMM-A v1
 - H100 NVL GPU adapter
 - ThinkSystem NVIDIA BlueField-3 VPI QSFP112 2P 200G PCIe Gen5 x16

The restrictions to ASHRAE support are as follows (cooling by Direct Water Cooling Module (DWCM)):

- The ambient temperature must be limited to 35°C or lower if the server has any of the following components:

- Broadcom 57416 10GBASE-T 2-port OCP
- Broadcom 57454 10GBASE-T 4-port OCP
- Network interface cards (NICs) at a rate greater than or equal to 100 GB
- Network adapters with AOC and at the rate of 25 GB
- The ambient temperature must be limited to 30°C or lower if the server has any of the following components:
 - Gen5 7.68 TB or larger capacity NVMe in a configuration with middle/rear bay
 - 3x 300 W or 350 W GPUs installed in a configuration with 16 x 2.5" or 8 x 3.5" front bay
 - 3x 300 W GPUs installed in an 8 x 2.5" + FIO or 16 x 2.5" + FIO configuration
 - 3x H100/L40S GPUs installed in a configuration with 24 x 2.5" front bay or in an 8 x 2.5" + FIO or 16 x 2.5" + FIO configuration
 - ThinkSystem 96GB TruDDR5 4800MHz (2Rx4) RDIMM-A installed in a GPU configuration
 - ThinkSystem 128GB TruDDR5 4800MHz (4Rx4) 3DS RDIMM-A v1 installed in a GPU configuration
 - ThinkSystem 256GB TruDDR5 4800MHz (8Rx4) 3DS RDIMM-A v1 installed in a standard configuration with standard fans or a storage configuration with 24 x 2.5" front bay and standard fans
 - Network adapters with AOC and at a rate greater than 25 GB
 - H100 NVL GPU adapter
- The ambient temperature must be limited to 25°C or lower if the server has any of the following components:
 - 3x A40 or L40 GPUs installed in a configuration with 24 x 2.5" front bay or in an 8 x 2.5" + FIO or 16 x 2.5" + FIO configuration
 - ThinkSystem 256GB TruDDR5 4800MHz (8Rx4) 3DS RDIMM-A v1 installed in a configuration with 12 x 3.5" front bay and performance fans
 - ThinkSystem NVIDIA BlueField-3 VPI QSFP112 2P 200G PCIe Gen5 x16

For detailed thermal information, see the Thermal rules sections in the product documentation:
https://pubs.lenovo.com/sr665-v3/thermal_rules

Note:

- Group B processors: $200\text{ W} \leq \text{cTDP} \leq 240\text{ W}$
- Group A processors: $240\text{ W} < \text{cTDP} \leq 300\text{ W}$
- Group E processors: $320\text{ W} \leq \text{cTDP} \leq 400\text{ W}$

Server shutdown: When the ambient temperature is greater than the supported max temperature (ASHARE A4 45°C), the server will shut down. The server will not power on again until the ambient temperature falls within the supported temperature range.

Water requirements

ThinkSystem SR665 V3 is supported in the following environment:

- Maximum pressure: 3 bars
- Water inlet temperature and flow rates:
 - For 50°C (122°F) inlet water: 1.5 liters per minute (lpm) per server
 - For 45°C (113°F) inlet water: 1 lpm per server
 - For 40°C (104°F) or lower inlet water: 0.5 lpm per server

Note: The water required to initially fill the system side cooling loop must be reasonably clean, bacteria-free water (<100 CFU/ml) such as de-mineralized water, reverse osmosis water, de-ionized water, or distilled water. The water must be filtered with an in-line 50 micron filter (approximately 288 mesh). The water must be treated with anti-biological and anti-corrosion measures.

Temperature and humidity

The server is supported in the following environment:

- Air temperature:
 - Operating:
 - ASHRAE Class A2: 10°C to 35°C (50°F to 95°F); the maximum ambient temperature decreases by 1°C for every 300 m (984 ft) increase in altitude above 900 m (2,953 ft).
 - ASHRAE Class A3: 5°C to 40°C (41°F to 104°F); the maximum ambient temperature decreases by 1°C for every 175 m (574 ft) increase in altitude above 900 m (2,953 ft).
 - ASHRAE Class A4: 5°C to 45°C (41°F to 113°F); the maximum ambient temperature decreases by 1°C for every 125 m (410 ft) increase in altitude above 900 m (2,953 ft).
 - ASHRAE Class H1: 5°C to 25°C (41 °F to 77 °F); Decrease the maximum ambient temperature by 1°C for every 500 m (1640 ft) increase in altitude above 900 m (2,953 ft).
 - Server off: 5°C to 45°C (41°F to 113°F)
 - Shipment/storage: -40°C to 60°C (-40°F to 140°F)
- Maximum altitude: 3,050 m (10,000 ft)
- Relative Humidity (non-condensing):
 - Operating
 - ASHRAE Class A2: 8% to 80%; maximum dew point: 21°C (70°F)
 - ASHRAE Class A3: 8% to 85%; maximum dew point: 24°C (75°F)
 - ASHRAE Class A4: 8% to 90%; maximum dew point: 24°C (75°F)
 - ASHRAE Class H1: 8% to 80%; Maximum dew point: 17°C (63°F)
 - Shipment/storage: 8% to 90%

Acoustical noise emissions

The server has the following acoustic noise emissions declaration:

- Sound power level (L_{WA}):
 - Idling: 5.9 Bel (Min), 6.5 Bel (Typical), 7.3 Bel (GPU rich), 7.3 Bel (Storage rich)
 - Operating: 6.5 Bel (Min), 8.1 Bel (Typical), 8.7 Bel (GPU rich), 7.5 Bel (Storage rich)
- Sound pressure level (L_{pAm}):
 - Idling: 41.5 dBA (Min), 51 dBA (Typical), 60.2 dBA (GPU rich), 60.2 dBA (Storage rich)
 - Operating: 48.3 dBA (Min), 66.6 dBA (Typical), 71.9 dBA (GPU rich), 61.3 dBA (Storage rich)

Notes:

- These sound levels were measured in controlled acoustical environments according to procedures specified by ISO7779 and are reported in accordance with ISO 9296.
- The declared acoustic sound levels are based on the following configurations, which may change depending on configuration/conditions :
 - Min: 2x 240W CPU, 12x 64GB RDIMMs, 8x SAS HDDs, RAID 940-8i, Intel E810-DA2 10/25GbE SFP28 2-Port OCP, 2x 1100W PSU
 - Typical: 2x 300W CPU, 24x 64GB RDIMMs, 16x SAS HDDs, RAID 940-8i, Intel E810-DA2 10/25GbE SFP28 2-Port OCP, 2x 1800W PSU
 - GPU rich: 2x 300W CPU, 24x 64GB RDIMMs, 16x SAS HDDs, RAID 940-16i, Intel E810-DA2 10/25GbE SFP28 2-Port OCP, 3x A100 80G GPUs, 2x 2400W PSU
 - Storage rich: 2x 240W CPU, 12x 64GB RDIMMs, 16x SAS HDDs, RAID 940-8i, Intel E810-DA2 10/25GbE SFP28 2-Port OCP, 2x 1800W PSU
- Government regulations (such as those prescribed by OSHA or European Community Directives) may govern noise level exposure in the workplace and may apply to you and your server installation. The actual sound pressure levels in your installation depend upon a variety of factors, including the number of racks in the installation; the size, materials, and configuration of the room; the noise levels from other equipment; the room ambient temperature, and employee's location in relation to the equipment. Further, compliance with such government regulations depends on a variety of additional factors, including the duration of employees' exposure and whether employees wear hearing protection. Lenovo recommends that you consult with qualified experts in this field to determine whether you are in compliance with the applicable regulations.

Shock and vibration

The server has the following vibration and shock limits:

- Vibration:
 - Operating: 0.21 G rms at 5 Hz to 500 Hz for 15 minutes across 3 axes
 - Non-operating: 1.04 G rms at 2 Hz to 200 Hz for 15 minutes across 6 surfaces
- Shock:
 - Operating: 15 G for 3 milliseconds in each direction (positive and negative X, Y, and Z axes)
 - Non-operating:
 - 23 kg - 31 kg: 35 G for 152 in./sec velocity change across 6 surfaces (3x GPU config, 2.5" config)
 - 32 kg - 68 kg: 35 G for 136 in./sec velocity change across 6 surfaces (20x 3.5" HDD config)

Particulate contamination

Airborne particulates (including metal flakes or particles) and reactive gases acting alone or in combination with other environmental factors such as humidity or temperature might damage the system that might cause the system to malfunction or stop working altogether.

The following specifications indicate the limits of particulates that the system can tolerate:

- Reactive gases:
 - The copper reactivity level shall be less than 200 Angstroms per month ($\text{\AA}/\text{month}$)
 - The silver reactivity level shall be less than 200 $\text{\AA}/\text{month}$
- Airborne particulates:
 - The room air should be continuously filtered with MERV 8 filters.
 - Air entering a data center should be filtered with MERV 11 or preferably MERV 13 filters.
 - The deliquescent relative humidity of the particulate contamination should be more than 60% RH
 - Environment must be free of zinc whiskers

For additional information, see the Specifications section of the documentation for the server, available from the Lenovo Documents site, <https://pubs.lenovo.com/>

Water infrastructure for the Lenovo Neptune Processor DWC Module

The Lenovo Processor Neptune Core Module is the liquid-based processor cooling offering for the SR665 V3, as described in the [Lenovo Processor Neptune Core Module](#) section.

The open-loop cooling module requires the following water infrastructure components in the rack cabinet and data center:

- Supported 42U or 48U rack cabinet

The 42U or 48U Heavy Duty Rack Cabinet (machine types 7D6D or 7D6E) are supported. Two 0U mounting points are required for the water manifolds, at the rear of the rack cabinet, one either side.

For information about the 42U and 48U Heavy Duty Rack Cabinets, see the product guide: <https://lenovopress.lenovo.com/lp1498-lenovo-heavy-duty-rack-cabinets>

- 38-port water manifold (machine type 7DE6), installed in the rear of the rack cabinet

The manifold provides quick-disconnect couplings that each server in the rack are connected to. Ordering information is in the table below.

- Coolant distribution unit (CDU), either in-rack or in-row

In-rack CDUs are installed at the bottom of the rack cabinet.

In-row CDUs are separate cabinets that are typically installed at the end of a row of rack cabinets. Examples of suitable in-row CDUs include (but not limited to):

- Vertiv XDU450 CDU
- Vertiv XDU600 CDU
- Vertiv XDU100 CDU

- Hose kit to connect to the CDU to the manifold

Ordering information is in the table below.

The following figure shows the major components of the solution.

Figure 28. Water manifold connections

Configuration requirements:

- Maximum number of SR665 V3 servers supported in a rack:
 - 48U rack: 19 servers
 - 42U rack with in-rack CDU: 18 servers
 - 42U rack without in-rack CDU: 19 servers
- Inlet water flow rate:
 - 0.5 LPM: Maximum 40°C inlet water temperature
 - 1.0 LPM: Maximum 45°C inlet water temperature
 - 1.5 LPM: Maximum 50°C inlet water temperature
- Water pressure requirement:
 - Maximum operating node inlet pressure = 43.5 psi (3 bars)

Note: Water quality must be maintained over the lifetime of the system to receive warranty and support on affecting components. For water quality requirement, see [Lenovo Neptune Direct Water-Cooling Standards](#)

The 38-drop water manifold and hoses can be ordered as listed in the following table.

Table 102. Water infrastructure ordering information

Part number	Feature code	Description
Manifold for 42U and 48U rack cabinet		
4XF7A90061	C5YW	ThinkSystem Neptune 38-Port Rack Manifold
Hoses to connect the manifold to an in-rack CDU		

Part number	Feature code	Description
4XF7A90232	C5YX	Connection Set, 38/45 Ports Manifold with in-rack CDU
4XF7A90233	C5YY	Connection Set, 38-Port Manifold with in-rack CDU for 48U Rack
Hoses to connect the manifold to an in-row CDU		
4XF7A90234	C5YZ	Hose Set, 1 inch EPDM, 1.3m, for Rack Manifold with in-row CDU
4XF7A90235	C5Z0	Hose Set, 1 inch EPDM, 2.3m, for Rack Manifold with in-row CDU

Configuration notes:

- This water connection solution described here cannot be used with the DW612S and N1380 enclosures as the water requirements are different.
- The hoses for in-row CDUs that are listed in the table above have Eaton FD83 quick-disconnect couplings

Warranty upgrades and post-warranty support

The SR665 V3 has a 1-year or 3-year warranty based on the machine type of the system:

- 7D9B - 1 year warranty
- 7D9A - 3 year warranty

Our global network of regional support centers offers consistent, local-language support enabling you to vary response times and level of service to match the criticality of your support needs:

- **Standard Next Business Day** – Best choice for non-essential systems requiring simple maintenance.
- **Premier Next Business Day** – Best choice for essential systems requiring technical expertise from senior-level Lenovo engineers.
- **Premier 24x7 4-Hour Response** – Best choice for systems where maximum uptime is critical.
- **Premier Enhanced Storage Support 24x7 4-Hour Response** – Best choice for storage systems where maximum uptime is critical.

For more information, consult the brochure [Lenovo Operational Support Services for Data Centers Services](#).

Services

Lenovo Data Center Services empower you at every stage of your IT lifecycle. From expert advisory and strategic planning to seamless deployment and ongoing support, we ensure your infrastructure is built for success. Our comprehensive services accelerate time to value, minimize downtime, and free your IT staff to focus on driving innovation and business growth.

Note: Some service options may not be available in all markets or regions. For more information, go to <https://lenovocator.com/>. For information about Lenovo service upgrade offerings that are available in your region, contact your local Lenovo sales representative or business partner.

In this section:

- [Lenovo Advisory Services](#)
- [Lenovo Plan & Design Services](#)
- [Lenovo Deployment, Migration, and Configuration Services](#)
- [Lenovo Support Services](#)
- [Lenovo Managed Services](#)
- [Lenovo Sustainability Services](#)

Lenovo Advisory Services

Lenovo Advisory Services simplify the planning process, enabling customers to build future-proofed strategies in as little as six weeks. Consultants provide guidance on projects including VM migration, storage, backup and recovery, and cost management to accelerate time to value, improve cost efficiency, and build a flexibly scalable foundation.

- **Assessment Services**

An Assessment helps solve your IT challenges through an onsite, multi-day session with a Lenovo technology expert. We perform a tools-based assessment which provides a comprehensive and thorough review of a company's environment and technology systems. In addition to the technology based functional requirements, the consultant also discusses and records the non-functional business requirements, challenges, and constraints. Assessments help organizations like yours, no matter how large or small, get a better return on your IT investment and overcome challenges in the ever-changing technology landscape.

- **Design Services**

Professional Services consultants perform infrastructure design and implementation planning to support your strategy. The high-level architectures provided by the assessment service are turned into low level designs and wiring diagrams, which are reviewed and approved prior to implementation. The implementation plan will demonstrate an outcome-based proposal to provide business capabilities through infrastructure with a risk-mitigated project plan.

Lenovo Plan & Design Services

Unlock faster time to market with our tailored, strategic design workshops to align solution approaches with your business goals and technical requirements. Leverage our deep solution expertise and end-to-end delivery partnership to meet your goals efficiently and effectively.

Lenovo Deployment, Migration, and Configuration Services

Optimize your IT operations by shifting labor-intensive functions to Lenovo's skilled technicians for seamless on-site or remote deployment, configuration, and migration. Enjoy peace of mind, faster time to value, and

comprehensive knowledge sharing with your IT staff, backed by our best-practice methodology.

- **Deployment Services for Storage and ThinkAgile**

A comprehensive range of remote and onsite options tailored specifically for your business needs to ensure your storage and ThinkAgile hardware are fully operational from the start.

- **Hardware Installation Services**

A full-range, comprehensive setup for your hardware, including unpacking, inspecting, and positioning components to ensure your equipment is operational and error-free for the most seamless and efficient installation experience, so you can quickly benefit from your investments.

- **DM/DG File Migration Services**

Take the burden of file migration from your IT's shoulders. Our experts will align your requirements and business objectives to the migration plans while coordinating with your team to plan and safely execute the data migration to your storage platforms.

- **DM/DG/DE Health Check Services**

Our experts perform proactive checks of your Firmware and system health to ensure your machines are operating at peak and optimal efficiency to maximize up-time, avoid system failures, ensure the security of IT solutions and simplify maintenance.

- **Factory Integrated Services**

A suite of value-added offerings provided during the manufacturing phase of a server or storage system that reduces time to value. These services aim at improving your hardware deployment experience and enhance the quality of a standard configuration before it arrives at your facility.

Lenovo Support Services

In addition to response time options for hardware parts, repairs, and labor, Lenovo offers a wide array of additional support services to ensure your business is positioned for success and longevity. Our goal is to reduce your capital outlays, mitigate your IT risks, and accelerate your time to productivity.

- **Premier Support for Data Centers**

Your direct line to the solution that promises the best, most comprehensive level of support to help you fully unlock the potential of your data center.

- **Premier Enhanced Storage Support (PESS)**

Gain all the benefits of Premier Support for Data Centers, adding dedicated storage specialists and resources to elevate your storage support experience to the next level.

- **Committed Service Repair (CSR)**

Our commitment to ensuring the fastest, most seamless resolution times for mission-critical systems that require immediate attention to ensure minimal downtime and risk for your business. This service is only available for machines under the Premier 4-Hour Response SLA.

- **Multivendor Support Services (MVS)**

Your single point of accountability for resolution support across vast range of leading Server, Storage, and Networking OEMs, allowing you to manage all your supported infrastructure devices seamlessly from a single source.

- **Keep Your Drive (KYD)**

Protect sensitive data and maintain compliance with corporate retention and disposal policies to ensure your data is always under your control, regardless of the number of drives that are installed in your Lenovo server.

- **Technical Account Manager (TAM)**

Your single point of contact to expedite service requests, provide status updates, and furnish reports to track incidents over time, ensuring smooth operations and optimized performance as your business grows.

- **Enterprise Software Support (ESS)**

Gain comprehensive, single-source, and global support for a wide range of server operating systems and Microsoft server applications.

For more information, consult the brochure [Lenovo Operational Support Services for Data Centers](#).

Lenovo Managed Services

Achieve peak efficiency, high security, and minimal disruption with Lenovo's always-on Managed Services. Our real-time monitoring, 24x7 incident response, and problem resolution ensure your infrastructure operates seamlessly. With quarterly health checks for ongoing optimization and innovation, Lenovo's remote active monitoring boosts end-user experience and productivity by keeping your data center's hardware performing at its best.

Lenovo Managed Services provides continuous 24x7 remote monitoring (plus 24x7 call center availability) and proactive management of your data center using state-of-the-art tools, systems, and practices by a team of highly skilled and experienced Lenovo services professionals.

Quarterly reviews check error logs, verify firmware & OS device driver levels, and software as needed. We'll also maintain records of latest patches, critical updates, and firmware levels, to ensure you systems are providing business value through optimized performance.

Lenovo Sustainability Services

- **Asset Recovery Services**

Lenovo Asset Recovery Services (ARS) provides a secure, seamless solution for managing end-of-life IT assets, ensuring data is safely sanitized while contributing to a more circular IT lifecycle. By maximizing the reuse or responsible recycling of devices, ARS helps businesses meet sustainability goals while recovering potential value from their retired equipment. For more information, see the [Asset Recovery Services offering page](#).

- **CO2 Offset Services**

Lenovo's CO2 Offset Services offer a simple and transparent way for businesses to take tangible action on their IT footprint. By integrating CO2 offsets directly into device purchases, customers can easily support verified climate projects and track their contributions, making meaningful progress toward their sustainability goals without added complexity.

- **Lenovo Certified Refurbished**

Lenovo Certified Refurbished offers a cost-effective way to support IT circularity without compromising on quality and performance. Each device undergoes rigorous testing and certification, ensuring reliable performance and extending its lifecycle. With Lenovo's trusted certification, you gain peace of mind while making a more sustainable IT choice.

Lenovo TruScale

Lenovo TruScale XaaS is your set of flexible IT services that makes everything easier. Streamline IT procurement, simplify infrastructure and device management, and pay only for what you use – so your business is free to grow and go anywhere.

Lenovo TruScale is the unified solution that gives you simplified access to:

- The industry's broadest portfolio – from pocket to cloud – all delivered as a service
- A single-contract framework for full visibility and accountability
- The global scale to rapidly and securely build teams from anywhere
- Flexible fixed and metered pay-as-you-go models with minimal upfront cost
- The growth-driving combination of hardware, software, infrastructure, and solutions – all from one single provider with one point of accountability.

For information about Lenovo TruScale offerings that are available in your region, contact your local Lenovo sales representative or business partner.

Regulatory compliance

The SR665 V3 conforms to the following standards:

- ANSI/UL 62368-1
- IEC 62368-1 (CB Certificate and CB Test Report)
- CSA C22.2 No. 62368-1
- Mexico NOM-019
- India BIS 13252 (Part 1)
- Germany GS
- TUV-GS (EN62368-1, and EK1-ITB2000)
- Brazil INMETRO
- Ukraine UkrCEPRO
- Morocco CMIM Certification (CM)
- Russia, Belorussia and Kazakhstan, TP EAC 037/2016 (for RoHS)
- Russia, Belorussia and Kazakhstan, EAC: TP TC 004/2011 (for Safety); TP TC 020/2011 (for EMC)
- CE, UKCA Mark (EN55032 Class A, EN62368-1, EN55024, EN55035, EN61000-3-2, EN61000-3-3, (EU) 2019/424, and EN IEC 63000 (RoHS))
- FCC - Verified to comply with Part 15 of the FCC Rules, Class A
- Canada ICES-003, issue 7, Class A
- CISPR 32, Class A, CISPR 35
- Korea KN32, Class A, KN35
- Japan VCCI, Class A
- Taiwan BSMI CNS15936, Class A; CNS15598-1; Section 5 of CNS15663
- Australia/New Zealand AS/NZS CISPR 32, Class A; AS/NZS 62368.1
- UL Green Guard, UL2819
- [Energy Star 4.0](#)
- EPEAT (NSF/ ANSI 426) Bronze
- Japanese Energy-Saving Act
- China CCC certificate, GB17625.1; GB4943.1; GB/T9254
- China CECP certificate, CQC3135
- China CELP certificate, HJ 2507-2011

External drive enclosures

The server supports attachment to external drive enclosures using a RAID controller with external ports or a SAS host bus adapter. Adapters supported by the server are listed in the [SAS adapters for external storage](#) section.

Note: Information provided in this section is for ordering reference purposes only. For the operating system and adapter support details, refer to the interoperability matrix for a particular storage enclosure that can be found on the Lenovo Data Center Support web site:

<http://datacentersupport.lenovo.com>

Table 103. External drive enclosures

Model	Description
4587HC1	Lenovo Storage D1212 Disk Expansion Enclosure (2U enclosure with 12x LFF drive bays)
4587HC2	Lenovo Storage D1224 Disk Expansion Enclosure (2U enclosure with 24x SFF drive bays)
7DAHCTO1WW	Lenovo ThinkSystem D4390 Direct Attached Storage (4U enclosure with 90x LFF drive bays)

For details about supported drives, adapters, and cables, see the following Lenovo Press Product Guides:

- Lenovo Storage D1212 and D1224
<http://lenovopress.lenovo.com/lp0512>
- Lenovo ThinkSystem D4390
<https://lenovopress.lenovo.com/lp1681>

External storage systems

Lenovo offers the ThinkSystem DE Series, ThinkSystem DG Series, ThinkSystem DM Series and ThinkSystem DS Series external storage systems for high-performance storage. See the DE Series, DG Series and DM Series product guides for specific controller models, expansion enclosures and configuration options:

- ThinkSystem DE Series Storage
<https://lenovopress.com/storage/thinksystem/de-series#rt=product-guide>
- ThinkSystem DS Series Storage
<https://lenovopress.lenovo.com/storage/thinksystem/ds-series>
- ThinkSystem DM Series Storage
<https://lenovopress.com/storage/thinksystem/dm-series#rt=product-guide>
- ThinkSystem DG Series Storage
<https://lenovopress.com/storage/thinksystem/dg-series#rt=product-guide>

External backup units

The following table lists the external backup options that are offered by Lenovo.

Table 104. External backup options

Part number	Description
External RDX USB drives	
4T27A10725	ThinkSystem RDX External USB 3.0 Dock
External SAS tape backup drives	
6160S8E	IBM TS2280 Tape Drive Model H8S
6160S9E	IBM TS2290 Tape Drive Model H9S
External SAS tape backup autoloaders	
6171S8R	IBM TS2900 Tape Autoloader w/LTO8 HH SAS
6171S9R	IBM TS2900 Tape Autoloader w/LTO9 HH SAS
External tape backup libraries	
6741B1F	IBM TS4300 3U Tape Library Base Unit - Max 48U
6741B3F	IBM TS4300 3U Tape Library Expansion Unit - Max 48U
SAS backup drives for TS4300 Tape Library	
01KP937	LTO 7 HH SAS Drive

Lenovo Financial Services

Why wait to obtain the technology you need now? No payments for 90 days and predictable, low monthly payments make it easy to budget for your Lenovo solution.

- **Flexible**

Our in-depth knowledge of the products, services and various market segments allows us to offer greater flexibility in structures, documentation and end of lease options.

- **100% Solution Financing**

Financing your entire solution including hardware, software, and services, ensures more predictability in your project planning with fixed, manageable payments and low monthly payments.

- **Device as a Service (DaaS)**

Leverage latest technology to advance your business. Customized solutions aligned to your needs. Flexibility to add equipment to support growth. Protect your technology with Lenovo's Premier Support service.

- **24/7 Asset management**

Manage your financed solutions with electronic access to your lease documents, payment histories, invoices and asset information.

- **Fair Market Value (FMV) and \$1 Purchase Option Leases**

Maximize your purchasing power with our lowest cost option. An FMV lease offers lower monthly payments than loans or lease-to-own financing. Think of an FMV lease as a rental. You have the flexibility at the end of the lease term to return the equipment, continue leasing it, or purchase it for the fair market value. In a \$1 Out Purchase Option lease, you own the equipment. It is a good option when you are confident you will use the equipment for an extended period beyond the finance term. Both lease types have merits depending on your needs. We can help you determine which option will best meet your technological and budgetary goals.

Ask your Lenovo Financial Services representative about this promotion and how to submit a credit application. For the majority of credit applicants, we have enough information to deliver an instant decision and send a notification within minutes.

Seller training courses

The following sales training courses are offered for employees and partners (login required). Courses are listed in date order.

1. **Partner Technical Webinar - Mainstream CPUs**

2025-09-29 | 40 minutes | Employees and Partners

In this 40-minute replay, Brad Violand, Lenovo ISG Category team, reviewed the strategy to optimize the CPU portfolio and ensuing changes to DCSC planned for October 1, 2025.

Tags: Server

Published: 2025-09-29

Length: 40 minutes

Start the training:

Employee link: [Grow@Lenovo](#)

Partner link: [Lenovo 360 Learning Center](#)

Course code: SEP2625

2. **Partner Technical Webinar - ISG Portfolio - Wayne's World**

2025-09-25 | 60 minutes | Employees and Partners

In this 60-minute replay, Wayne Pecht, Lenovo Channel SA, shared his extensive experience and unique approach to the ISG Portfolio "Wayne's World for Lenovo ISG"!

Tags: Channel, Technical Sales

Published: 2025-09-25

Length: 60 minutes

4. **Think AI Weekly: ISG & SSG Better Together: Uniting AI Solutions & Services for Smarter Outcomes**

2025-08-01 | 55 minutes | Employees Only

View this session to hear from our speakers Allen Holmes, AI Technologist, ISG and Balaji Subramaniam, AI Regional Leader-Americas, SSG.

Topics include:

- An overview of ISG & SSG AI CoE Offerings with Customer Case Studies
- The Enterprise AI Deal Engagement Flow with ISG and SSG
- How sellers can leverage this partnership to differentiate with Enterprise clients.
- NEW COURSE: From Inception to Execution: Evolution of an AI Deal

7. Family Portfolio: Server Component Options

2025-07-21 | 20 minutes | Employees and Partners

This course covers opportunities that are available to upsell server components. By upselling the correct components, you can increase the size and revenue of the original sale.

After completing this course, you should be able to:

- Identify the opportunities for an upsell
- Recognize when specific products should be discussed
- Emphasize how a product benefits the customer
- Identify keywords that indicate upsell opportunities

10. **Lenovo Data Center Product Portfolio**

2025-06-11 | 20 minutes | Employees and Partners

This course introduces the Lenovo data center portfolio, and covers servers, storage, storage networking, and software-defined infrastructure products. After completing this course about Lenovo data center products, you will be able to identify product types within each data center family, describe Lenovo innovations that this product family or category uses, and recognize when a specific product should be selected.

Course objectives:

1. Identify product types within each data center family
2. Describe the features of the product family or category
3. Recognize when a specific product should be selected

14. **Lenovo Cloud Architecture VTT: Supercharge Your Enterprise AI with NVIDIA AI Enterprise on Lenovo Hybrid AI Platform**

2025-04-17 | 75 minutes | Employees and Partners

Join us for an in-depth webinar with Justin King, Principal Product Marketing Manager for Enterprise AI exploring the power of NVIDIA AI Enterprise, delivering Generative and Agentic AI outcomes deployed with Lenovo Hybrid AI platform environments.

In today's data-driven landscape, AI is evolving at high speed, with new techniques delivering more accurate responses. Enterprises are seeking not just an understanding but also how they can achieve AI-driven business outcomes.

With this, the demand for secure, scalable, and high-performing AI operations-and the skills to deliver them-is top of mind for many. Learn how NVIDIA AI Enterprise, a comprehensive software suite optimized for NVIDIA GPUs, provides the tools and frameworks, including NVIDIA NIM, NeMo, and Blueprints, to accelerate AI development and deployment while reducing risk-all within the control and security of your Lenovo customer's hybrid AI environment.

16. **ThinkSystem Rack and Tower Introduction for ISO Client Managers**

2024-12-10 | 20 minutes | Employees Only

In this course, you will learn about Lenovo's Data Center Portfolio, its ThinkSystem Family and the key features of the Rack and Tower servers. It will equip you with foundational knowledge which you can then expand upon by participating in the facilitated session of the curriculum.

Course Objectives:

- By the end of this course, you should be able to:
- Identify Lenovo's main data center brands.
- Describe the key components of the ThinkSystem Family servers.
- Differentiate between the Rack and Tower servers of the ThinkSystem Family.
- Understand the value Rack and Tower servers can provide to customers.

Any reference to a Lenovo product, program, or service is not intended to state or imply that only that Lenovo product, program, or service may be used. Any functionally equivalent product, program, or service that does not infringe any Lenovo intellectual property right may be used instead. However, it is the user's responsibility to evaluate and verify the operation of any other product, program, or service. Lenovo may have patents or pending patent applications covering subject matter described in this document. The furnishing of this document does not give you any license to these patents. You can send license inquiries, in writing, to:

Lenovo (United States), Inc.
8001 Development Drive
Morrisville, NC 27560
U.S.A.

LENOVO PROVIDES THIS PUBLICATION "AS IS" WITHOUT WARRANTY OF ANY KIND, EITHER EXPRESS OR IMPLIED, INCLUDING, BUT NOT LIMITED TO, THE IMPLIED WARRANTIES OF NON-INFRINGEMENT, MERCHANTABILITY OR FITNESS FOR A PARTICULAR PURPOSE. Some jurisdictions do not allow disclaimer of express or implied warranties in certain transactions, therefore, this statement may not apply to you.

This information could include technical inaccuracies or typographical errors. Changes are periodically made to the information herein; these changes will be incorporated in new editions of the publication. Lenovo may make improvements and/or changes in the product(s) and/or the program(s) described in this publication at any time without notice.

The products described in this document are not intended for use in implantation or other life support applications where malfunction may result in injury or death to persons. The information contained in this document does not affect or change Lenovo product specifications or warranties. Nothing in this document shall operate as an express or implied license or indemnity under the intellectual property rights of Lenovo or third parties. All information contained in this document was obtained in specific environments and is presented as an illustration. The result obtained in other operating environments may vary. Lenovo may use or distribute any of the information you supply in any way it believes appropriate without incurring any obligation to you.

Any references in this publication to non-Lenovo Web sites are provided for convenience only and do not in any manner serve as an endorsement of those Web sites. The materials at those Web sites are not part of the materials for this Lenovo product, and use of those Web sites is at your own risk. Any performance data contained herein was determined in a controlled environment. Therefore, the result obtained in other operating environments may vary significantly. Some measurements may have been made on development-level systems and there is no guarantee that these measurements will be the same on generally available systems. Furthermore, some measurements may have been estimated through extrapolation. Actual results may vary. Users of this document should verify the applicable data for their specific environment.
