

## Lenovo ThinkEdge SE350 V2 Server

### Product Guide

The ThinkEdge SE350 V2 is a purpose-built server that is half the width and significantly shorter than a traditional server, making it ideal for deployment in tight spaces. It can be mounted on a wall, ceiling mount, placed on a desk or mounted in a rack. The ThinkEdge SE350 V2 puts increased processing power, storage and network closer to where data is generated, allowing actions resulting from the analysis of that data to take place more quickly.

Target workloads for the manufacturing, industrial and retail markets: hybrid clouds at the edge deployment, virtualization, NFV, workload consolidation, web host, management server, edge storage server.

Figure 1. Lenovo ThinkEdge SE350 V2

[360° View](#)
[Full 3D Tour](#)

### Did you know?

The ThinkEdge SE350 V2 fits those customers that want to install a server outside the data center looking for reduced latency by processing at the edge, avoiding transmission of data between the core and edge where possible and also adhering to the regulatory security requirements of the geography and industry by storing and analyzing data at the edge. The ThinkEdge SE350 V2 has a compact design, low power usage, and high performance are just the right combination for edge locations. It can be wall mounted, placed on a desk or installed in a rack. It is also designed to operate in a semi rugged environment, 0°C to 55°C, dust and vibration.

## Key features

The ThinkEdge SE350 V2 is a purpose-built server that is half the width and significantly shorter than a traditional server, making it ideal for deployment in tight spaces. The 3.2 liter case can be mounted on a wall, ceiling mount, placed on desk or mounted in a rack.

The ThinkEdge SE350 V2 puts increased processing power, storage and network closer to where data is generated, allowing actions resulting from the analysis of that data to take place more quickly. The server has wired connections up to 25GbE.

Since these edge servers are typically deployed outside of secure data centers, they include technology that encrypts the data stored on the device if it is tampered with, only enabling authorized users to access it.

## Scalability and performance

The SE350 V2 offers numerous features to boost performance, improve scalability and reduce costs:

- Support a single processor from the Intel Xeon D Processor family. Supports processors up to 16 cores, core speeds of up to 2.1 GHz, and TDP ratings of up to 100W.
- Intelligent and adaptive system performance with Intel Technology 2.0 allows processor cores to run at maximum speeds during peak workloads by temporarily going beyond processor TDP.
- Intel Hyper-Threading Technology boosts performance for multithreaded applications by enabling simultaneous multithreading within each processor core, up to two threads per core.
- Intel Virtualization Technology integrates hardware-level virtualization hooks that allow operating system vendors to better use the hardware for virtualization workloads.
- Support for up to 4 TruDDR4 memory DIMMs and up to 256 GB of memory using 64 GB DIMMs.
- Up to 4 x SATA/NVMe 2.5-inch 7mm HS drives; 2 x 2.5-inch 15mm HS drives.
- Supports 1 or 2 additional M.2 NVMe drives for OS boot and applications (RAID 1), allowing the convenience of separating application code from data.
- The use of NVMe drives increased performance over SATA drives, in terms of throughput, bandwidth, and latency.
- 1GbE I/O board or 10 GbE/25GbE SFP28 I/O board to support low and high-speed networking to back-end servers.
- No PCIe slot (no GPU support, no optional Network Adapters support).

## Availability and serviceability

The SE350 V2 provides many features to simplify serviceability and increase system uptime:

- Supports remote management, including remote control functions down to the UEFI level (most models) makes managing the edge servers easy even without onsite IT personnel.
- ECC memory and memory RAS features.
- Two redundant external AC Adapter power supplies and three fans to provide improved availability.
- Built-in XClarity Controller continuously monitors system parameters, triggers alerts, and performs recovery actions in case of failures to minimize downtime.
- Built-in diagnostics in UEFI, using Lenovo XClarity Provisioning Manager, speed up troubleshooting tasks to reduce service time.
- Lenovo XClarity Provisioning Manager collects and saves service data to USB key drive or remote CIFS share folder, for troubleshooting and to reduce service time.
- Auto restart in the event of a loss of AC power
- Support for the XClarity Administrator Mobile app running on a supported smartphone and connected to the server through the service-enabled USB port, enables additional local systems management functions.
- Three-year customer-replaceable unit and onsite limited warranty, 9 x 5 next business day. Optional

service upgrades are available.

## **Manageability and security**

Systems management features simplify local and remote management of the SE350 V2:

- The server includes XClarity Controller 2 (XCC2) to monitor server availability. Optional upgrade to XCC Platinum to provide remote control (keyboard video mouse) functions, support for the mounting of remote media files (ISO and IMG image files), boot capture, power capping and new XCC2 Platinum features. New XCC2 Platinum features include System Guard, new security modes including a CNSA-compliant mode, FIPS 140-3 and NIST 800-193 support, and a new Neighbor Group feature.
- Lenovo XClarity Administrator offers comprehensive hardware management tools that help to increase uptime, reduce costs and improve productivity through advanced server management capabilities.
- IT Administrators can securely claim and activate the SE350 V2 remotely through the ThinkShield Key Vault Portal, available on the web. They can also manage and unlock their global IoT edge fleet for initial operation and in case of tamper. The ThinkShield Edge Mobile Management app enables Edge Users to securely claim and activate the ThinkSystem SE350 V2 in an easy to use Web UI.
- New UEFI-based Lenovo XClarity Provisioning Manager, accessible from F1 during boot, provides system inventory information, graphical UEFI Setup, platform update function, RAID Setup wizard, operating system installation function, and diagnostic functions.
- Support for Lenovo XClarity Energy Manager, which captures real-time power and temperature data from the server and provides automated controls to lower energy costs.
- Integrated Trusted Platform Module (TPM) 2.0 support enables advanced cryptographic methods, such as digital signatures and remote attestation.
- Supports Secure Boot to ensure only a digitally signed operating system can be used.
- Industry-standard Advanced Encryption Standard (AES) NI support for faster, stronger encryption.
- Intel Execute Disable Bit functionality can prevent certain classes of malicious buffer overflow attacks when combined with a supported operating system.
- Intel Trusted Execution Technology provides enhanced security through hardware-based resistance to malicious software attacks, allowing an application to run in its own isolated space, protected from all other software running on a system.

## View in Augmented Reality

View the SE350 V2 in augmented reality (AR) using your smartphone or tablet.

Simply follow these steps:

1. Scan the QR code\* with the camera app on your phone
2. Point your phone at a flat surface
3. Wait a few seconds for the model to appear

Once the server appears, you can move your phone around it. You can also drag or rotate the server to reposition it.

For more information about the AR viewer, see the article "Introducing the Augmented Reality Viewer for Lenovo Servers", available from <https://lenovopress.lenovo.com/lp1952>

\* If you're viewing this document on your phone or tablet, simply tap the QR code

## Components and connectors

The ports on the front of the ThinkEdge SE350 V2 server depend on which network module is installed.

The following figure shows server with the 1GbE network module installed. With this network module, the server has wired connectivity capabilities. Four 1GbE Ethernet ports, two 2.5 Gigabit Ethernet ports, and 1 port for management LAN.

Figure 2. Front view of the ThinkEdge SE350 V2 server with 4 x 7mm 2.5" HS and 1GbE network module

The following figure shows server with the 10/25 GbE network module installed. With this network module, the server has wired connectivity capabilities. Four 10/25 GbE SFP28 ports, two 2.5 Gigabit Ethernet ports, and 1 port for management LAN.

Figure 3. Front view of the ThinkEdge SE350 V2 server with 4 x 7mm 2.5" HS and 10/25 GbE network module

The following figure shows server with 1GbE module, 1GbE Ethernet ports, two 2.5 Gigabit Ethernet ports, and 1 port for management LAN.

Figure 4. Front view of the ThinkEdge SE350 V2 server with 2 x 15mm 2.5" HS and 1GbE network module.

The following two figures show supported power options for the server.

Figure 5. Rear view of the ThinkEdge SE350 V2 with DC power

Figure 6. Rear view of the ThinkEdge SE350 V2 with AC power

The following figure shows the locations of key components inside the server.

Figure 7. Internal view of the ThinkEdge SE350 V2

## System architecture

The following figure shows the architectural block diagram of the SE350 V2 system, showing the major components and connections.

**Tip:** The wrench icons show where the local and remote management functions are enabled

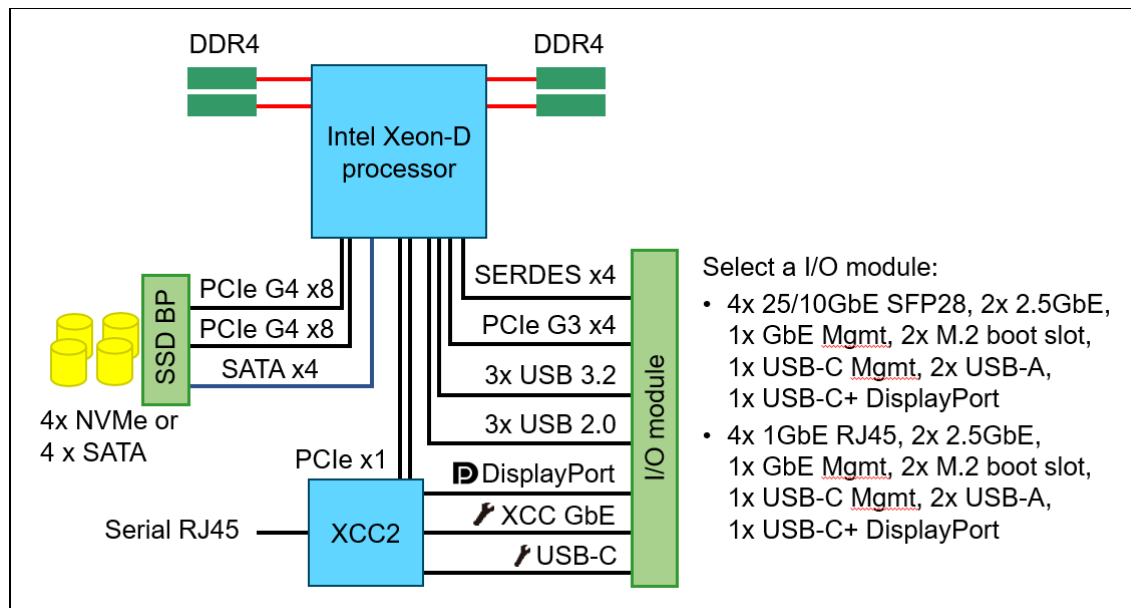

Figure 8. SE350 V2 system board - architectural block diagram

The system board connects to a network module which provides all wired network connections. Two network modules are offered. The block diagrams are shown in the following figures. All wired connections are at the front of the server.

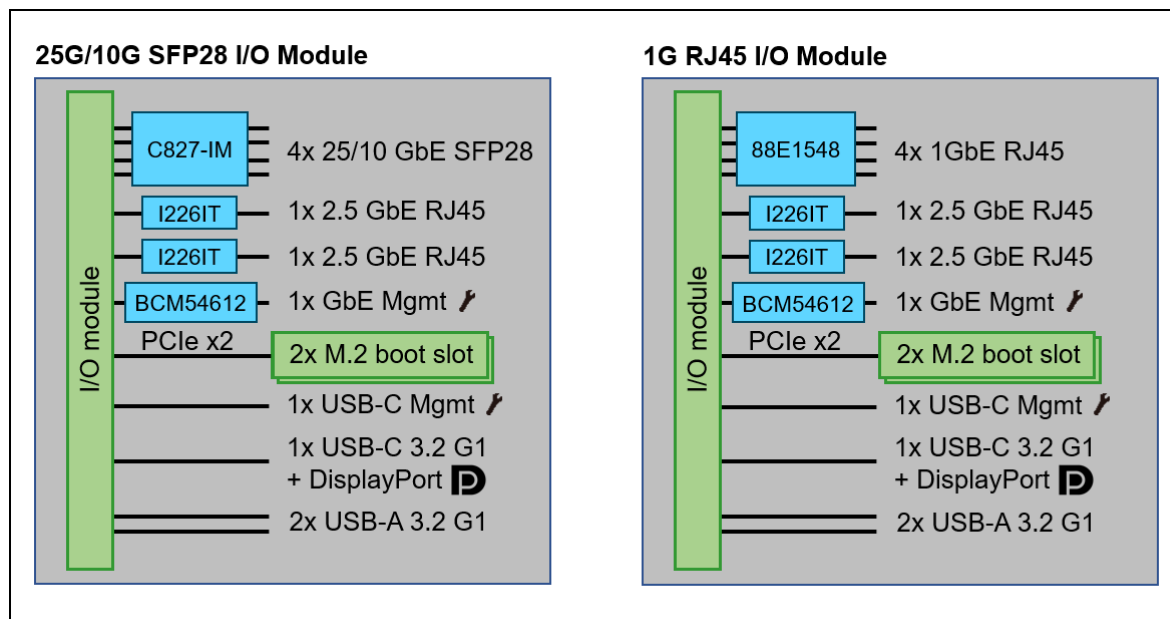

Figure 9. SE350 V2 network modules - architectural block diagrams

## Standard specifications

The following table lists the standard specifications.

Table 1. Standard specifications

Components	Specification
Machine types	7DA9 - SE350 V2 - 3 year warranty 7DBK - Lenovo ThinkEdge SE350 V2 1U2N and 2U2N Enclosure - 3 year warranty
Form factor	Edge server, 1U high
Processor	One Intel Xeon D-2700 Series processor (formerly codenamed "Icelake D"). Supports processors up to 16 cores, core speeds of up to 2.1 GHz, and TDP ratings of up to 100W. Processor is soldered onto system board.
Memory	4 DIMM slots. The processor has 4 memory channels, with 1 DIMM per channel. Lenovo TruDDR4 DIMMs operating at 3200 MHz. RDIMMs are supported
Memory maximum	Up to 256GB with 4x 64 GB RDIMMs
Memory protection	ECC, SDDC (for x4-based memory DIMMs)
Drive bays	2.5-inch 7mm drive bays: <ul style="list-style-type: none"> <li>Up to 4x 2.5-inch 7mm hot-swap bays (NVMe/SATA)</li> </ul> 2.5-inch 15mm drive bays: <ul style="list-style-type: none"> <li>Up to 2x 2.5-inch 15mm hot-swap bays (NVMe)</li> </ul> Internal drives for OS boot: <ul style="list-style-type: none"> <li>I/O module supporting up to two 2280 NVMe M.2 drives</li> </ul>
Maximum data storage	NVMe drives: <ul style="list-style-type: none"> <li>122.88TB using 2x 61.44TB 15mm NVMe drives or 4x 3.84 7mm NVMe drives</li> </ul> SATA drives: <ul style="list-style-type: none"> <li>30.72TB using 4x7.68TB 7mm SATA drives</li> </ul>
Storage controller	<ul style="list-style-type: none"> <li>Boot drives: <ul style="list-style-type: none"> <li>Onboard NVMe controller supporting RAID 0, 1 (with Intel VROC RAID support)</li> </ul> </li> <li>Data drives: <ul style="list-style-type: none"> <li>Onboard SATA/NVMe controller supporting RAID 0, 1, 5, 10 (with Intel VROC RAID support)</li> </ul> </li> </ul>
Network interfaces	Networking depends the network module selected: <ul style="list-style-type: none"> <li>10/25GbE I/O module <ul style="list-style-type: none"> <li>4x 25GbE or 10GbE SFP28 ports (depends on CPU), 2x 2.5GbE RJ45 ports, 1x 1GbE RJ45 dedicated port for remote management.</li> </ul> </li> <li>1GbE I/O module <ul style="list-style-type: none"> <li>4x 1GbE RJ45 ports, 2x 2.5GbE RJ45 ports, 1x 1GbE RJ45 dedicated port for remote management.</li> </ul> </li> </ul>
PCI Expansion slots	None

Components	Specification
Ports	<p>Front: 2x USB 3.2 G1 Type-A ports, 1x USB 3.2 G1 Type-C port (for display), 1x USB 2.0 G1 Type-C port for local systems management.</p> <p>Rear: power connectors, 1x RJ-45 RS-232 serial console connector for OS/BIOS or XCC, PMB status LED, 2x threaded studs for grounding.</p>
Cooling	Three non-hot-swap 40 mm fans (all 3 standard), N+1 redundant in most configurations.
Video	Embedded graphics with 16 MB memory with 2D hardware accelerator, integrated into the XClarity Controller 2 management controller. Maximum resolution is 1920x1200 32bpp at 60Hz.
Power supply	<p>Choices for power input:</p> <ul style="list-style-type: none"> <li>• External AC Power Supply (230V/115V) (5°C to 40°C with node, 5°C to 30°C on rack)</li> <li>• Direct DC Power Connection (12-48V) (0°C to 55°C)</li> <li>• Internal AC Power Supply (230V/115V) (0°C to 55°C)</li> </ul>
Systems management	Operator panel with status LEDs. Dedicated ports for local management (USB type-C for use with mobile app) and remote management (RJ45 Ethernet ports). Remote management can also be performed. XClarity Controller 2 (XCC2) embedded management controller, XClarity Administrator centralized infrastructure delivery, XClarity Integrator plugins, and XClarity Energy Manager centralized server power management. Optional XClarity Controller Advanced to enable remote control functions. ThinkShield Edge Mobile Management mobile app and XClarity Mobile app for local onsite SE350 V2 server management.
Security features	ThinkShield Key Vault Portal web site for security management. Trusted Platform Module, supporting TPM 2.0. In China only, optional Nationz TPM 2.0. Front Security bezel, Kensington cable slot with intelligent lock position switch, G-sensor trigger for motion detection, intrusion detection, self-encrypting drive (SED) support, power-on password, administrator's password.
Operating systems supported	Microsoft Windows Server, Red Hat Enterprise Linux, SUSE Linux Enterprise Server, VMware ESXi. Ubuntu Server certification. See the <a href="#">Operating system support</a> section for specifics.
Mounting options	DIN rail wall mount, ceiling mount, 1U rack mount (2 servers), 2U short-depth rack mount (2 servers). Available Security bezel with dust filter.
Limited warranty	Three-year customer-replaceable unit and onsite limited warranty with 9x5 next business day (NBD).
Service and support	Optional service upgrades are available through Lenovo Services: 4-hour or 2-hour response time, 6-hour fix time, 1-year or 2-year warranty extension, software support for Lenovo hardware and some third-party applications.
Dimensions	Height: 41.7 mm (1.64 in.), width: 209 mm (8.23 in.), depth: 384 mm (15.12 in.)
Volume	3.2 liters
Weight	Maximum: 3.75 kg (8.3 lb)

## Models

ThinkEdge SE350 V2 models can be configured by using the [Lenovo Data Center Solution Configurator \(DCSC\)](#).

Topics in this section:

- [CTO models](#)
- [Preconfigured models](#)

### CTO models

ThinkEdge SE350 V2 models can be configured by using the [Lenovo Data Center Solution Configurator \(DCSC\)](#).

Configure-to-order (CTO) models are used to create models with factory-integrated server customizations. One CTO model is available for the SE350 V2 as listed in the following table:

- The CTO1WW base CTO model is for general business and is selectable by choosing **General Purpose** mode in DCSC.

Table 2. Base CTO models

Description	Machine Type/Model General purpose
ThinkEdge SE350 V2 - 3 year Warranty	7DA9CTO1WW
Lenovo ThinkEdge SE350 V2 1U2N Enclosure	7DBKCTO1WW
Lenovo ThinkEdge SE350 V2 2U2N Enclosure	7DBKCTO2WW

## Preconfigured models

The following tables list the available models, grouped by region.

- [Models for Asia Pacific region](#)
- [Models for Australia and New Zealand](#)
- [Models for EMEA](#)
- [Models for Japan](#)
- [Models for USA and Canada](#)

Refer to the Specifications section for information about standard features of the server.

### Models for Asia Pacific region

Table 3. Models for Asia Pacific

Model	Network module	Intel Xeon-D	Memory	Drive Contr	Boot drives	Data drives	Pwr supp	Pwr cord	XCC2	Tamper	Mount

\*On Board SATA Software RAID (AVV0) - [adapter reference](#)

## Processors

The SE350 V2 supports processors in the Intel Xeon D-2700 family of processors (formerly codenamed "Icelake D"). The server supports one processor and the processor is soldered on the system board.

The table below lists the supported processors.

All supported processors have the following characteristics:

- AI capable: Intel AVX-512, VNNI, OpenVINO
- Intel Turbo Boost 3.1
- Intel Hyper-Threading Technology
- Intel Virtualization Technology (VT-c, VT-x, VT-d)
- Intel AES New Instructions
- Intel Trusted Execution Technology
- Converged Boot Guard (CBnT)
- Intel Software Guard Extensions (SGX)
- Intel Boot Guard
- Faster Boot with Slim Bootloader
- Time Coordinated Computing (TCC)

**Part numbers:** There are no part numbers for processors because there are no field upgrades supported.

Table 8. Processor options for the SE350 V2

Feature code*	Description
BS3V / BS40	ThinkEdge SE350 V2/SE360 V2 Planar with Intel Xeon D-2712T 4C 65W 1.9 GHz
BS3W / BS41	ThinkEdge SE350 V2/SE360 V2 Planar with Intel Xeon D-2733NT 8C 80W 2.1 GHz
BS3X/ BS42	ThinkEdge SE350 V2/SE360 V2 Planar with Intel Xeon D-2775TE 16C 100W 2.0 GHz

\* The second feature code is for CTO orders from NA and LA geographies, and for Brazil

The following table lists the features of the supported processors.

Table 9. Processor specifications

Intel model	Cores / Threads	HT	TB	Base Frequency	Max Turbo Frequency	L3 Cache	Ethernet mode	Memory channels	Memory bus	TDP
D-2712T	4 / 8	Y	Y	1.90 GHz	3.0 GHz	15 MB	50 G	4	2667 MHz	65 W
D-2733NT	8 / 16	Y	Y	2.10 GHz	3.2 GHz	15 MB	50 G	4	2667 MHz	80 W
D-2775TE	16 / 32	Y	Y	2.00 GHz	3.1 GHz	25 MB	100 G	4	2933 MHz	100 W

Note: 10/25GbE I/O module LAN speed depend on CPU ethernet mode, 4x 10GbE (max 50 G) or 4x 25GbE (max 100G)

Note: **20-core processor support:** The server also supports 20-core processors. The 20-core is only available on demand. Please contact your Lenovo sales representative

## Memory options

The server uses processors with 4 memory channels and supports 1 DIMM per channel, for a total of 4 DIMMs. The server supports up to 256GB of memory using 4x 64 GB RDIMMs.

The following table lists the memory options that are available for the server.

Lenovo TruDDR4 memory uses the highest quality components that are sourced from Tier 1 DRAM suppliers and only memory that meets the strict requirements of Lenovo is selected. It is compatibility tested and tuned to maximize performance and reliability. From a service and support standpoint, Lenovo TruDDR4 memory automatically assumes the system warranty, and Lenovo provides service and support worldwide.

Table 10. Supported memory options

Part number	Feature code	Description	Minimum supported	Maximum supported
RDIMMs				
4X77A08634	B965	ThinkSystem 32GB TruDDR4 3200 MHz (2Rx8 1.2V) RDIMM	1	4
4X77A08633	B964	ThinkSystem 32GB TruDDR4 3200 MHz (2Rx4 1.2V) RDIMM	1	4
4X77A08632	B963	ThinkSystem 16GB TruDDR4 3200 MHz (2Rx8 1.2V) RDIMM	1	4
4X77A08635	B966	ThinkSystem 64GB TruDDR4 3200 MHz (2Rx4 1.2V) RDIMM	1	4

The following rules apply when selecting the memory configuration:

- DIMM installation sequence 1, 4, 2 & 3
- One DIMM per channel only
- Three DIMMs are not supported
- The server supports RDIMMs
- Mix of 2Rx4 and 2Rx8 based DIMMs across channels are not supported
- Mix of 16GB 2Rx8 & 32GB 2Rx8 across channels are supported
- Mix of 32GB 2Rx4 & 64GB 2Rx4 across channels are supported
- Memory mirroring and memory rank sparing are not supported
- Server supports Independent mode
- Rank sparing, ADDC, channel mirroring, hemisphere modes, and 2LM are not supported with Software Guard Extensions (SGX)

The following memory protection technologies are supported:

- ECC detection/correction
- SDDC (for x4-based memory DIMMs; look for "x4" in the DIMM description)

## I/O expansion

The SE350 V2 does not support PCIe I/O slots.

## Internal storage

The internal storage of the SE350 V2 server is implemented as follows:

- Up to 4x SATA/NVMe 2.5-inch 7mm drives or 2x NVMe 2.5-inch 15mm drives.
- NVMe 2.5-inch drives with PCIe 4.0 interface.
- Boot drives are installed on I/O module with dedicated slot, either one or two 2280 NVMe M.2 drives with PCIe gen3 are supported.

The following modules are supported.

Table 11. SSD module options

Part number	Feature code	Description	7mm SSD	15mm SSD
4XF7A86281	BS48	ThinkEdge SE350 V2 7mm SSD Module	0-4 (NVMe/SATA)	--
4XF7A86280	BS47	ThinkEdge SE350 V2 15mm SSD Module	--	0-2 (all NVMe)

## Controllers for internal storage

The SE350 V2 supports the following for internal storage:

- Onboard NVMe controller supporting RAID 0, 1 (with Intel VROC RAID support) - boot drives
- Onboard SATA/NVMe controller supporting RAID 0, 1, 5, 10 (with Intel VROC RAID support) - data drives

### Intel VROC onboard RAID

Intel VROC (Virtual RAID on CPU) is a feature of the Intel processor that enables RAID support. There are two separate functions of VROC in the SE350 V2:

- Intel VROC SATA RAID, formerly known as Intel RSTe
- Intel VROC NVMe RAID

VROC SATA RAID (RSTe) is available and supported with all SATA drives, both SATA SSDs and SATA HDDs. It offers a 6 Gb/s connection to each drive and on the SE350 V2 implements RAID levels 0, 1, 5, and 10. RAID 1 is limited to 2 drives per array, and RAID 10 is limited to 4 drives per array. Hot-spare functionality is also supported.

VROC NVMe RAID offers RAID support for any NVMe drives directly connected to the ports on the server's system board. On the SE350 V2, it implements RAID levels 0, 1, 5, and 10. RAID 1 is limited to 2 drives per array, and RAID 10 is limited to 4 drives per array. Hot-spare functionality is also supported.

The following options are available as follows:

- VROC NVMe RAID on the SE350 V2 by default is disabled and does not support NVMe RAID. In configurator selecting "none" would mean default, same as JBOD.
- Selecting VROC Standard, feature code BR9B, to support RAID-0/1/10.
- Selecting VROC Premium, feature code B96G, to support RAID-0/1/5/10.

VROC Standard or Premium are fulfilled as a Feature on Demand (FoD) license and is activated via the XCC management processor user interface.

Table 12. VROC upgrade

Part number	Feature code	Description
4L47A39164	B96G / BS7N	Intel VROC (VMD NVMe RAID) Premium
4L47A83669	BR9B / BS7M	Intel VROC (VMD NVMe RAID) Standard

VROC Premium is only needed on the SE350 V2 for RAID-5 support with NVMe drives. You do not need the VROC Premium license upgrade under any of the following conditions:

- If you have SATA drives connected to the onboard SATA ports, you do not need VROC Premium.
- If you are using RAID 0, 1 or 10 with NVMe drives, you do not need VROC Premium.

**Virtualization support:** Virtualization support for Intel VROC is as follows:

- **VROC SATA RAID (RSTe)** : VROC SATA RAID is not supported by virtualization hypervisors such as ESXi, KVM, Xen, and Hyper-V. Virtualization is only supported on the onboard SATA ports in AHCI (non-RAID) mode.
- **VROC (VMD) NVMe RAID** : VROC (VMD) NVMe RAID is supported by ESXi, KVM, Xen, and Hyper-V. ESXi support is limited to RAID 1 only; other RAID levels are not supported. Windows and Linux OSes support VROC RAID NVMe, both for host boot functions and for guest OS function, and RAID-0, 1, 5, and 10 are supported.

## Internal drive options

The following tables list the drive options for internal storage of the server.

2.5-inch hot-swap drives:

- [2.5-inch hot-swap PCIe 5.0 NVMe SSDs](#)
- [2.5-inch hot-swap PCIe 4.0 NVMe SSDs](#)

2.5-inch 7mm hot-swap drives:

- [7mm 2.5-inch hot-swap 6 Gb SATA SSDs](#)
- [7mm 2.5-inch hot-swap PCIe 4.0 NVMe SSDs](#)

M.2 drives:

- [M.2 PCIe 4.0 NVMe drives](#)
- [M.2 PCIe 3.0 NVMe drives](#)

**SED support:** The tables include a column to indicate which drives support SED encryption. The encryption functionality can be disabled if needed. Note: Not all SED-enabled drives have "SED" in the description.

Table 13. 2.5-inch hot-swap PCIe 5.0 NVMe SSDs

Part number	Feature code	Description	SED support	Max Qty
<b>2.5-inch SSDs - U.2 PCIe 5.0 NVMe - Mixed Use/Mainstream (3-5 DWPD)</b>				
4XB7A93097	C1WM	ThinkSystem 2.5" U.2 PM9D5a 800GB Mixed Use NVMe NVMe PCIe 5.0 x4 HS SSD	Support	2
4XB7A93098	C1WN	ThinkSystem 2.5" U.2 PM9D5a 1.6TB Mixed Use NVMe NVMe PCIe 5.0 x4 HS SSD	Support	2

**SED hot swap configuration notes:**

- 1. Update firmware code to:
  - UEFI: IYE118E-6.20
  - XCC: IYX342K-7.10
- 2. The following are not supported with the hot swap feature:

**OS reboot is required to make OS detect that there's a new plug-in SSD as below SED enabled scenario.**

- 1. 2.5" SATA SSD
- 2. Any SSD under VROC/Raid control as such drives are controlled by system's UEFI

## Optical drive

The server supports the external USB optical drive listed in the following table.

Table 19. External optical drive

Part number	Feature code	Description
7XA7A05926	AVV8	ThinkSystem External USB DVD RW Optical Disk Drive

The drive is based on the Lenovo Slim DVD Burner DB65 drive and supports the following formats: DVD-RAM, DVD-RW, DVD+RW, DVD+R, DVD-R, DVD-ROM, DVD-R DL, CD-RW, CD-R, CD-ROM.

## Serial port

The server supports RJ45 connector at rear side with RS-232 serial port function.

Below console cable able to provide DB-9 female interface connection.

Table 20. RJ45 to DB-9 female cable

Part number	Feature code	Description
CTO only	B6EX	ThinkEdge 1.2m RJ45 to RS232 Console Cable

## Network Modules

The network ports on the front of the SE350 V2 are provided by a Network Module, a board that plugs into the system board by a dedicated connector. See the [Internal view](#) for the location of the connector. The Network Modules are listed in the following table.

Table 21. Network Modules

Part number	Feature code	Description
CTO only	BS3U	SE350 V2 1Gb x4 I/O Module board
CTO only	BS3T	SE350 V2 25G/10G IO Module board

The Network Modules have the following characteristics:

- 1GbE I/O module board
  - Two USB 3.2 Gen 1 Type-A connectors
  - USB 3.2 Gen 1 Type-C connector (supporting display)
  - USB 2.0 Gen 1 Type-C connector with Lenovo XClarity Controller (XCC) management
  - Four 1GbE RJ-45 connectors
    - No support for 10 Mbps speed
    - Support 100Mbps if link peer does not force speed on 100Mbps since processor doesn't support 100M half-duplex and link LED is always green status, while ACT LED keeps green and wont blinking when transferring data
    - Ports 3-6: 1G Base-T from Intel CPU Embedded LAN-E823. Port 6: can also be configured as shared NIC port for Lenovo XClarity Controller
  - Two 2.5GbE RJ-45 connectors
    - Support 1G speed with LED normal behavior
    - Support 100Mbps data transfer, but link speed LED keep dark
    - No support for 10 Mbps speed
- 10/25GbE SFP28 I/O module board
  - Two USB 3.2 Gen 1 Type-A connectors
  - USB 3.2 Gen 1 Type-C connector (supporting display)
  - USB 2.0 Gen 1 Type-C connector with Lenovo XClarity Controller (XCC) management
  - One XCC system management port (1GbE RJ-45)
  - Four 25Gb/10Gb SFP28/SFP+ from Intel CPU Embedded LAN-E823 connectors
    - No support for 10 Mbps / 100 Mbps speeds
    - One port can also be configured as shared NIC port
  - Two 2.5GbE RJ-45 connectors
    - Support 1G speed with LED normal behavior
    - Support 100Mbps data transfer, but link speed LED keep dark
    - No support for 10 Mbps speed

**Note:** When the shipping bracket is installed, the front operator panel is not accessible.

The network modules are shown in the following figure.

Figure 10. Ports of the available Network Modules

The block diagrams of the Network Modules are shown in the [System architecture](#) section.

The specifications of the connections in the two Wired Network Modules are as follows:

- Front IO with 25G/10G x4
  - Front Op-Panel
  - 4x 10Gb/25Gb SFP28 (SFP28 from CPU embedded LAN)
  - 2x 2.5Gb RJ45 (RJ45 from intel I226)
  - 1x XCC Management Port (dedicate RJ45 Management port for XCC)
  - 1x USB Type-C port (USB Management port for XCC)
  - 1x USB Type-C port (USB 3.0/2.0 from CPU for display)
  - 2x USB Type-A port (USB 3.0/2.0 from CPU)
- Front IO with 1G x4
  - Front Op-Panel
  - 4x 1Gb RJ45 (RJ45 from CPU embedded LAN)
  - 2x 2.5Gb RJ45 (RJ45 from intel I226)
  - 1x XCC Management Port (dedicated RJ45 Management port for XCC)
  - 1x USB Type-C port (USB Management port for XCC)
  - 1x USB Type-C port (USB 3.0/2.0 from CPU for display)
  - 2x USB Type-A port (USB 3.0/2.0 from CPU)

The SFP28 ports in the Wired Network Module support the transceivers listed in the following table.

Table 22. Transceivers for Network Modules

Part number	Feature code	Description
10Gb transceivers		
4TC7A78615	BNDR	ThinkSystem Accelink 10G SR SFP+ Ethernet transceiver
46C3447	5053	SFP+ SR Transceiver
00MY034	ATTJ	Lenovo Dual Rate 1G/10GB SFP Transceiver

## Network adapters

The SE350 V2 does not support additional network adapters. There is no PCIe slot available.

## GPU adapters

The SE350 V2 does not support any graphics processing units (GPUs). There is no PCIe slot available.

## Cooling

The SE350 V2 server has three 40 mm non-hot-swap fans. All three are standard and support N+1 redundancy.

## Power supplies

The SE350 V2 supports three type of power input path as following components and options:

- External AC Power Supply (230V/115V) (5°C to 40°C)
  - Details regarding the use of AC adapters:
    - One or two AC adapters are supported.
    - When two AC adapters are connected, the second AC adapter is redundant.
    - In case of failure of an AC adapter, system will throttle if power budget is above adapter capacity.
    - To connect AC Adapters to system directly a bridge cable is required.
    - AC Adapters do not include a line cord. See the next section for available power cords.
- Direct DC Power Connection (12-48V) (0°C to 55°C)
  - Details regarding the use of DC power:
    - One or two DC power input source are supported.
    - When two DC power input are connected, the second DC input is redundant.
    - In case of failure of DC input, system will throttle if power budget is above DC input capacity.
    - DC Terminal block cable for DC power source connection with system.
- Internal AC Power Supply (230V/115V) (0°C to 55°C)
  - Details regarding the use of AC power:
    - One AC power input source is supported only.
    - Internal AC Power supply does not support power redundancy or hot swap.
    - Power supply do not include a line cord. See the next section for available power cords.

Select internal AC input solution if CELP(China Environmental Labelling Program) certification is needed, this is for China Market only.

Ordering information is listed in the following table.

Table 26. Power options

Part number	Feature code	Description	Maximum supported
External AC Power Supply (230V/115V)			
CTO only	BU98	ThinkEdge SE350 V2 12-48V DC Power Module Board	1

## Systems management

The SE350 V2 contains an integrated service processor, XClarity Controller 2 (XCC2), which provides advanced control, monitoring, and alerting functions. The XCC2 is based on the AST2600 baseboard management controller (BMC) using a dual-core ARM Cortex A9 service processor.

Topics in this section:

- [Local management](#)
- [Lenovo XClarity Mobile](#)
- [Remote management](#)
- [XCC2 Platinum](#)
- [Lenovo XClarity Provisioning Manager](#)
- [Lenovo XClarity Administrator](#)
- [Lenovo XClarity Essentials](#)
- [Lenovo XClarity Energy Manager](#)
- [Lenovo Capacity Planner](#)

## Local management

The SE350 V2 offers a front operator panel with key LED status indicators, as shown in the following figure.

Figure 11. Front operator panel

The buttons on the front of the server:

- Power button
- Identification button - turns on the LED housed within the button as well as passing the signal to the XCC for display remotely in XClarity Administrator
- NMI reset pinhole - sends a NMI signal to the processor thereby causing a blue-screen trap of the operating system

The LEDs on the front of the server are as follows:

- Power LED (green) - indicated activation and power status, as follows:
  - Off - Server does not have power applied
  - Fast flash (4 times per second) - Either server has just had power applied and is not ready to be powered on yet, or the server has not been activated yet
  - Slow flash (once per second) - Server is ready to be powered on
  - On solid - Server is powered on
- Identification LED (blue) - lights when the button is pressed or when the function is activated remotely in XClarity Controller.
- Security LED - (green) - indicates system security status.
  - Solid on - the server is operating with security enabled
  - Blinking - the server is in lockdown mode. Activate or unlock the system for operation or activation. See [activate or unlock](#) system.
  - Off - No security feature is enabled on the server.

The front of the server also houses an information pull-out tab (also known as the network access tag). See [Figure 2](#) for the location. A label on the tab shows the network information (MAC address and other data) to remotely access the XCC service processor.

The SE350 V2 also supports optional connection to local VGA monitor.

Table 28. USB type-C to VGA cable

Part number	Feature code	Description
4X97A86591	BS4E	ThinkEdge 130mm USB-C to VGA Display Cable

## System status with XClarity Mobile

The SE350 V2 also supports local systems management using the XClarity Mobile app. The app includes a tethering function where you can connect your Android or iOS device to the server via the micro-USB port on the server.

You will need a mobile device with a supported operating system installed (iOS 12 or later, Android 5.0 or later), plus the USB charging cable that comes with your phone. You will also need the USB type-C to USB type-A cable that ships with the SE350 V2.

The steps to connect the mobile device are as follows:

1. Connect the mobile device via your USB cable and the supplied USB-to USB type-C cable to the SE350 V2's USB type-C port with the management symbol 
2. In iOS or Android settings, enable Personal Hotspot or USB Tethering
3. Launch the Lenovo XClarity Mobile app

Once connected you can see the following information:

- Server status including error logs (read only, no login required)
- Server management functions (XClarity login credentials required)

The supported USB cable is listed in the following table.

Table 29. USB type-C to USB type-A cable

Part number	Feature code	Description
4X97A88620	BS4D	ThinkEdge USB-C to USB-A Console Cable

## Remote management

The server offers a dedicated RJ45 port at the rear of the server for remote management via the XClarity Controller management processor. The port supports 10/100/1000 Mbps speeds.

Remote server management is provided through industry-standard interfaces:

- Intelligent Platform Management Interface (IPMI) Version 2.0
- Simple Network Management Protocol (SNMP) Version 3 (no SET commands; no SNMP v1)
- Common Information Model (CIM-XML)
- Representational State Transfer (REST) support
- Redfish support (DMTF compliant)
- Web browser - HTML 5-based browser interface (Java and ActiveX not required) using a responsive design (content optimized for device being used - laptop, tablet, phone) with NLS support

The SE350 V2 offers a MicroSD card port on the system board to enable the use of a MicroSD card for additional storage for use with the XCC2 controller. XCC2 can use the storage as a Remote Disc on Card (RDOC) device (up to 32GB of storage). It can also be used to store firmware updates (including N-1 firmware history) for ease of deployment.

**Tip:** Without a MicroSD card installed, the XCC2 controller will have 100MB of available RDOC storage.

Ordering information for the supported Micro SD card is listed in the following table.

Table 30. MicroSD card

Part number	Feature code	Description
4X77A77064	BNWP	ThinkSystem MicroSD 32GB Class 10 Flash Memory Card
4X77A92672	C0BC	ThinkSystem MicroSD 64GB Class 10 Flash Memory Card

## XCC2 Platinum

The XCC2 service processor in the SE350 V2 supports an upgrade to a Platinum level of features. Compared to the XCC functions of ThinkSystem and earlier systems, Platinum adds the same features as Enterprise and Advanced levels in ThinkSystem, plus additional features.

XCC2 Platinum adds the following Enterprise and Advanced functions:

- Remotely viewing video with graphics resolutions up to 1600x1200 at 75 Hz with up to 23 bits per pixel, regardless of the system state
- Remotely accessing the server using the keyboard and mouse from a remote client
- International keyboard mapping support
- Syslog alerting
- Redirecting serial console via SSH
- Component replacement log (Maintenance History log)
- Access restriction (IP address blocking)
- Lenovo SED security key management
- Displaying graphics for real-time and historical power usage data and temperature
- Boot video capture and crash video capture
- Virtual console collaboration - Ability for up to 6 remote users to be log into the remote session simultaneously
- Remote console Java client
- Mapping the ISO and image files located on the local client as virtual drives for use by the server
- Mounting the remote ISO and image files via HTTPS, SFTP, CIFS, and NFS
- Power capping
- System utilization data and graphic view
- Single sign on with Lenovo XClarity Administrator
- Update firmware from a repository
- License for XClarity Energy Manager

XCC2 Platinum also adds the following features that are new to XCC2:

- System Guard - Monitor hardware inventory for unexpected component changes, and simply log the event or prevent booting
- Enterprise Strict Security mode - Enforces CNSA 1.0 level security
- Neighbor Group - Enables administrators to manage and synchronize configurations and firmware level across multiple servers

Ordering information is listed in the following table. XCC2 Platinum is a software license upgrade - no additional hardware is required.

Table 31. XCC2 Platinum license upgrade

Part number	Feature code	Description
CTO only	BRPJ	XCC Platinum

With XCC Platinum, for CTO orders, you can request that System Guard be enabled in the factory and the first configuration snapshot be recorded. To add this to an order, select feature code listed in the following table. The selection is made in the Security tab of the DCSC configurator.

Table 32. Enable System Guard in the factory (CTO orders)

Feature code	Description
BUT2	Install System Guard

For more information about System Guard, see [https://pubs.lenovo.com/xcc2/NN1ia\\_c\\_systemguard](https://pubs.lenovo.com/xcc2/NN1ia_c_systemguard)

## Lenovo XClarity Provisioning Manager

Lenovo XClarity Provisioning Manager (LXPM) is a UEFI-based application embedded in ThinkSystem servers and accessible via the F1 key during system boot.

LXPM provides the following functions:

- Graphical UEFI Setup
- System inventory information and VPD update
- System firmware updates (UEFI and XCC)
- RAID setup wizard
- OS installation wizard (including unattended OS installation)
- Diagnostics functions

## Lenovo XClarity Administrator

Lenovo XClarity Administrator is a centralized resource management solution designed to reduce complexity, speed response, and enhance the availability of Lenovo systems and solutions. It provides agent-free hardware management for ThinkSystem servers. The administration dashboard is based on HTML 5 and allows fast location of resources so tasks can be run quickly.

Because Lenovo XClarity Administrator does not require any agent software to be installed on the managed endpoints, there are no CPU cycles spent on agent execution, and no memory is used, which means that up to 1GB of RAM and 1 - 2% CPU usage is saved, compared to a typical managed system where an agent is required.

Lenovo XClarity Administrator is an optional software component for the SE350 V2. The software can be downloaded and used at no charge to discover and monitor the SE350 V2 and to manage firmware upgrades.

If software support is required for Lenovo XClarity Administrator, or premium features such as configuration management and operating system deployment are required, Lenovo XClarity Pro software subscription should be ordered. Lenovo XClarity Pro is licensed on a per managed system basis, that is, each managed Lenovo system requires a license.

The following table lists the Lenovo XClarity software license options.

Table 33. Lenovo XClarity Pro ordering information

Part number	Feature code	Description
00MT201	1339	Lenovo XClarity Pro, per Managed Endpoint w/1 Yr SW S&S
00MT202	1340	Lenovo XClarity Pro, per Managed Endpoint w/3 Yr SW S&S
00MT203	1341	Lenovo XClarity Pro, per Managed Endpoint w/5 Yr SW S&S
7S0X000HWW	SAYV	Lenovo XClarity Pro, per Managed Endpoint w/6 Yr SW S&S
7S0X000JWW	SAYW	Lenovo XClarity Pro, per Managed Endpoint w/7 Yr SW S&S

Lenovo XClarity Administrator offers the following standard features that are available at no charge:

- Auto-discovery and monitoring of Lenovo systems
- Firmware updates and compliance enforcement
- External alerts and notifications via SNMP traps, syslog remote logging, and e-mail
- Secure connections to managed endpoints
- NIST 800-131A or FIPS 140-3 compliant cryptographic standards between the management solution and managed endpoints
- Integration into existing higher-level management systems such as cloud automation and orchestration tools through REST APIs, providing extensive external visibility and control over hardware resources
- An intuitive, easy-to-use GUI
- Scripting with Windows PowerShell, providing command-line visibility and control over hardware resources

Lenovo XClarity Administrator offers the following premium features that require an optional Pro license:

- Pattern-based configuration management that allows to define configurations once and apply repeatedly without errors when deploying new servers or redeploying existing servers without disrupting the fabric
- Bare-metal deployment of operating systems and hypervisors to streamline infrastructure provisioning

For more information, refer to the Lenovo XClarity Administrator Product Guide:

<http://lenovopress.com/tips1200>

## Lenovo XClarity Integrators

Lenovo also offers software plug-in modules, Lenovo XClarity Integrators, to manage physical infrastructure from leading external virtualization management software tools including those from Microsoft and VMware.

These integrators are offered at no charge, however if software support is required, a Lenovo XClarity Pro software subscription license should be ordered.

Lenovo XClarity Integrators offer the following additional features:

- Ability to discover, manage, and monitor Lenovo server hardware from VMware vCenter or Microsoft System Center
- Deployment of firmware updates and configuration patterns to Lenovo x86 [rack servers](#) and Flex System from the virtualization management tool
- Non-disruptive server maintenance in clustered environments that reduces workload downtime by dynamically migrating workloads from affected hosts during rolling server updates or reboots
- Greater service level uptime and assurance in clustered environments during unplanned hardware events by dynamically triggering workload migration from impacted hosts when impending hardware failures are predicted

For more information about all the available Lenovo XClarity Integrators, see the Lenovo XClarity Administrator Product Guide: <https://lenovopress.com/tips1200-lenovo-xclarity-administrator>

## Lenovo XClarity Essentials

Lenovo offers the following XClarity Essentials software tools that can help you set up, use, and maintain the server at no additional cost:

- Lenovo Essentials OneCLI

OneCLI is a collection of server management tools that uses a command line interface program to manage firmware, hardware, and operating systems. It provides functions to collect full system health information (including health status), configure system settings, and update system firmware and drivers.

- Lenovo Essentials UpdateXpress

The UpdateXpress tool is a standalone GUI application for firmware and device driver updates that enables you to maintain your server firmware and device drivers up-to-date and help you avoid unnecessary server outages. The tool acquires and deploys individual updates and UpdateXpress System Packs (UXSPs) which are integration-tested bundles.

- Lenovo Essentials Bootable Media Creator

The Bootable Media Creator (BOMC) tool is used to create bootable media for offline firmware update.

For more information and downloads, visit the Lenovo XClarity Essentials web page:

<http://support.lenovo.com/us/en/documents/LNVO-center>

## Lenovo XClarity Energy Manager

Lenovo XClarity Energy Manager (LXEM) is a power and temperature management solution for data centers. It is an agent-free, web-based console that enables you to monitor and manage power consumption and temperature in your data center through the management console. It enables server density and data center capacity to be increased through the use of power capping.

LXEM is a licensed product. A single-node LXEM license is included with the XClarity Controller Enterprise upgrade as described in the [Remote Management](#) section. If your server does not have the XCC Enterprise upgrade, Energy Manager licenses can be ordered as shown in the following table.

Table 34. Lenovo XClarity Energy Manager

Part number	Description
4L40E51621	Lenovo XClarity Energy Manager Node License (1 license needed per server)

For more information about XClarity Energy Manager, see the following resources:

- Lenovo Support page:  
<https://datacentersupport.lenovo.com/us/en/solutions/lxvo-lxem>
- User Guide for XClarity Energy Manager:  
<https://pubs.lenovo.com/lxem/>

## Lenovo Capacity Planner

Lenovo Capacity Planner is a power consumption evaluation tool that enhances data center planning by enabling IT administrators and pre-sales professionals to understand various power characteristics of racks, servers, and other devices. Capacity Planner can dynamically calculate the power consumption, current, British Thermal Unit (BTU), and volt-ampere (VA) rating at the rack level, improving the planning efficiency for large scale deployments.

For more information, refer to the Capacity Planner web page:  
<http://datacentersupport.lenovo.com/us/en/solutions/Invo-lcp>

## Security

The SE350 V2 offers a number of security features, both electronic and physical.

Figure 12. Security features of the SE350 V2

Physical security features:

- Support for a Kensington lock and cable

The server has a slot on the side of the server which a customer-supplied Kensington lock and cable can be attached to, to help prevent theft of the server.

- Intrusion arm/disarm feature

The Kensington cable slot can also double as an electronic switch to disarm the intrusion switch detection, so that authorized servicing of the hardware can be performed without triggering the security actions. Available as the Anti-Tampering Keylock Kit, CTO only. The kit includes a Kensington lock (without cable) that is attached to the outside of the server.

**Note:** This intrusion arm/disarm feature is not supported with the 1U or 2U rack enclosure mounting options, due to physical restrictions with the Kensington lock.

- Front bezel with key lock

Optional component that mounts on the front of the server that restricts access to networking connectors on the front of the server. See "mounting options" section for more information.

Electronic security features include:

- Self-encrypting (SED) on M.2 and 2.5" SSD drives that ensure data is secured when the drives are powered off
- Administrator password and a power-on password in UEFI
- Onboard Trusted Platform Module (TPM) supporting TPM 2.0 enables advanced cryptographic functionality in the operating system and applications.
- For China users, the server has an internal TCM port that supports a Nationz TPM 2.0 module.

Available CTO only.

The server is NIST SP 800-147B compliant.

Ordering information for the security components is listed in the following table.

Table 35. Security components

Part number	Feature code	Description
4XF7A88717	BS4J	ThinkEdge SE350 V2 Anti-Tampering Keylock Kit <ul style="list-style-type: none"><li>• Internal lock mechanism with electronic switch</li><li>• Cable and routing tray</li><li>• Kensington lock with key</li></ul>
CTO only	B8LE	ThinkSystem NationZ TPM 2.0 for PRC

## System Lockdown Mode

System Lockdown Mode is an optional security feature of the SE350 V2 that ensures that the system is only used by its intended recipient and that all data and applications remains secure.

System Lockdown Mode is an optional feature that can be remotely managed in two ways:

- ThinkShield Key Vault Portal Managed. This provides a centralised remote management approach, allowing the administrator to remotely managed multiple systems and to register ownership of systems to their company, which reduces the system's value is stolen.
- XClarity Controller Managed. This provides remote management level control to an individual system using XCC web interface, OneCLI or Redfish.

To select ThinkShield Key Vault Portal Managed in factory orders, select feature BYBR, as listed in the following table. The default in DCSC is to select XClarity Controller Managed, feature BYBQ.

Table 36. Feature codes to activate System Lockdown mode

Feature code	Description	Purpose
BYBR	ThinkShield Key Vault Portal Managed	System Lockdown Mode is enabled in the factory (Activation required on delivery). The server remains secured and in System Lockdown Mode until registered and activated with the ThinkEdge Key Vault Portal. Unauthorized tampering of the server will result in the server being locked down and the data secured, and will remain in this state until reauthenticated with the Key Vault Portal.
BYBQ	XClarity Controller Managed	Default choice in DCSC. System Lockdown Mode is not enabled in the factory. Configures the server security to be managed by the XCC2 management processor. Server will boot at first power on and, by default, will not be locked down on any tamper event. You can configure tamper detection in the XCC2 interface if desired. The server can be converted to be managed ThinkShield Key Vault Portal at a later stage if desired (one-way conversion).

If System Lockdown is enabled in the factory, the system will be delivered in system lockdown mode and will require activation before operation. There are three ways the server can be activated:

- Using a mobile device (iOS or Android) connect to the server to the USB management port on the front of the server and running the [ThinkShield Edge Mobile Management app](#).
- Connecting the system to the Internet via the XCC management port on the front of the server and accessing the [ThinkShield Key Vault Portal](#) from a web browser on another system.
- In a disconnected mode, where neither a mobile device or an internet connection to the SE350 V2 are

available.

For more information, see ThinkEdge Security, available from:

<https://lenovopress.lenovo.com/lp1725-thinkedge-security>

**Converting from XCC Managed to Portal Managed** : It is possible to convert a system from XCC Managed security to ThinkShield Key Vault Portal Managed via the XCC management interface, however the reverse is not possible. Once a server is in ThinkShield Key Vault Portal Managed mode, it cannot be converted back to XClarity Controller Managed.

The SE350 V2 offers a Security LED that indicates the status of the server:

- LED on: Security is enabled; System is operational.
- LED blinking: Security is enabled and the server is in lockdown, either due to being delivered from the factory in lockdown mode or has entered lockdown as a result of a tamper event. System must be activated or reactivated before becoming operational.
- LED off: Security is disabled; System is operational.

### SED encryption in factory orders

The SE350 V2 also optionally supports enabling SED drive encryption in the factory using feature BYBS as listed in the following table. This feature enables SED on the selected drives and sets and SED Authentication Key (SED AK).

**Tip:** SED encryption is a function that is independent of System Lockdown Control.

Table 37. System Lockdown

Feature code	Description	Purpose
BYBS	SED Enabled	Enables SED drive encryption on all factory installed drives and sets an SED Authentication Key (AK).

### System Guard

The System Guard feature takes a snapshot of the hardware component inventory as trusted reference, then monitors for any deviation from the reference snapshot.

When deviation occurs, it can report an event to the user, optionally, can also prevent the server from booting into the OS and prompt the user for response.

- System Guard is only enabled with XCC2 on V3 code
- Server supports this feature (BUT2) when XCC Platinum enabled only.
- The System Guard feature is disabled by default

System Guard is a feature of XCC Platinum. Sytem Guard (BUT2) should only be selectable if XCC Platinum (BRPJ) is selected.

Table 38. XCC platinum and System Guard details

Feature code	Description
BRPJ	XCC Platinum
BUT2	Enable System Guard

### Platform Firmware Resiliency - Lenovo ThinkShield

Lenovo's ThinkShield Security is a transparent and comprehensive approach to security that extends to all dimensions of our data center products: from development, to supply chain, and through the entire product lifecycle.

The ThinkEdge SE350 V2 includes Platform Firmware Resiliency (PFR) hardware Root of Trust (RoT) which enables the system to be NIST SP800-193 compliant. This offering further enhances key platform subsystem protections against unauthorized firmware updates and corruption, to restore firmware to an integral state, and to closely monitor firmware for possible compromise from cyber-attacks.

PFR operates upon the following server components:

- UEFI image – the low-level server firmware that connects the operating system to the server hardware
- XCC image – the management “engine” software that controls and reports on the server status separate from the server operating system
- FPGA image – the code that runs the server’s lowest level hardware controller on the motherboard

The Lenovo Platform Root of Trust Hardware performs the following three main functions:

- Detection – Measures the firmware and updates for authenticity
- Recovery – Recovers a corrupted image to a known-safe image
- Protection – Monitors the system to ensure the known-good firmware is not maliciously written

These enhanced protection capabilities are implemented using a dedicated, discrete security processor whose implementation has been rigorously validated by leading third-party security firms. Security evaluation results and design details are available for customer review – providing unprecedented transparency and assurance.

The SE350 V2 includes support for Secure Boot, a UEFI firmware security feature developed by the UEFI Consortium that ensures only immutable and signed software are loaded during the boot time. The use of Secure Boot helps prevent malicious code from being loaded and helps prevent attacks, such as the installation of rootkits. Lenovo offers the capability to enable secure boot in the factory, to ensure end-to-end protection. Alternatively, Secure Boot can be left disabled in the factory, allowing the customer to enable it themselves at a later point, if desired.

The following table lists the relevant feature code(s).

Table 39. Secure Boot options

Part number	Feature code	Description	Purpose
CTO only	AUK7	TPM 2.0 and Secure Boot	Configure the system in the factory with Secure Boot enabled.
CTO only	B0MK	Enable TPM 2.0	Configure the system without Secure Boot enabled. Customers can enable Secure Boot later if desired.
CTO only	C1GD	ST45 V3 TPM 2.0 for WW	

**Tip:** If Secure Boot is not enabled in the factory, it can be enabled later by the customer. However once Secure Boot is enabled, it cannot be disabled.

## Mounting options

The SE350 V2 is designed to be used in a variety of locations -- wall, ceiling, DIN-rail, table top -- as well as in a rack mount.

In this section:

- [Mounting components - Node sleeve](#)

- Desktop mount
- Stacked mount
- Wall, ceiling or DIN mount
- Security bezel
- 1U rack installation
- Short-depth 2U rack installation
- Mounting options and power

For additional information on node sleeve and DIN Rail installation, see the Configuration Installation Guide:  
[https://pubs.lenovo.com/se350-v2/install\\_a\\_node\\_to\\_din](https://pubs.lenovo.com/se350-v2/install_a_node_to_din)

For additional information on wall mount/ceiling mount see the Configuration Installation Guide:  
[https://pubs.lenovo.com/se350-v2/wall\\_config](https://pubs.lenovo.com/se350-v2/wall_config)

## Mounting components - Node sleeve

Many of the mounting options share the same components.

### Node sleeve

The node sleeve, shown below, holds the SE350 V2 server when mounted on the wall or connected to DIN rail. The server is then slid into the node sleeve and secured with additional thumbscrews.

Figure 13. Node sleeve image

Table 40. Node Sleeve ordering information

Part number	Feature code	Description	Quantity required
4M17A37607	B6EZ	ThinkEdge Node Sleeve (VESA mount)	1 per server

### Desktop mount

Desktop mounting has the server oriented horizontally with self-adhesive rubber pads mounted to its underside.

Figure 14. SE350 V2 with Rubber Feet option

**Note:** The server ships with 4x rubber pads/rubber feet. Pads can be placed to the node underside or to the node sleeve underside. If installing a node onto node sleeve, install rubber pads on the node sleeve underside only.

The rubber feet are also orderable separately as listed in the following table.

Table 41. Desktop mount components

Part number	Feature code	Description	Quantity required
4M17A37610	B6Q3	ThinkEdge Rubber Feet (contains 4 rubber pads)	1

## Stacked mount

Multiple SE350 V2 servers can be each installed into a node sleeve and then stacked horizontally up to 3 high. The node sleeves are secured together using thumbscrews. The bottom node sleeve has rubber feet mounted to its underside.

**Note:** Stacked mount is supported in certain use cases, like for retail and office. However, it is not supported for vehicle and marine use cases.

Figure 15. Stacked mount SE350 V2 (with optional locking bezels)

The components needed for the stacked mount are shown in the following table. See the [Mounting components](#) section for details about the node sleeve install.

Table 42. Stacked mount components

Part number	Feature code	Description	Quantity required
Stacked mount mode			
4M17A37607	B6EZ	ThinkEdge Node Sleeve	1 per server
Security Bezel			
4B37A86282	BS4F	ThinkEdge SE350 V2 Security Bezel for 10/25GbE I/O Module	Optional, 1 per server
4B37A86283	BS4G	ThinkEdge SE350 V2 Security Bezel for 1GbE I/O Module	Optional, 1 per server
4XF7A86284	BS4H	ThinkEdge SE350 V2 Security Bezel Dust Filter	Optional, 1 per server

## Wall, ceiling or DIN mount

When wall, ceiling or DIN mounted, the server must be installed onto a sleeve first. For DIN mount, the optional DIN mount kit is required. Server also supports security bezel placement on the front of the node sleeve to help prevent physical access to the front components.

SE350 V2 supports two types of security bezels for each of the two I/O module boards. Bezels include:

- A lock-and-key mechanism for security also support dust filter with optional (4XF7A86284).
- Filter cover the backplane area for SSD and the network area to reduce the dust that can enter the server through the front air holes.

- Security bezel can prevent LAN cable plug or unplug after installed on node sleeve.

**Tip:** 300W external adapter not supported in Wall / DIN mounting

Table 43. Wall or DIN mount

Part number	Feature code	Description	Quantity required
Wall mount mode			
4M17A37607	B6EZ	ThinkEdge Node Sleeve	1 per server
DIN Rail mount mode			
4M17A37607	B6EZ	ThinkEdge Node Sleeve	1 per server
4M17A37285	B87S	ThinkEdge DIN Mount Kit (Extreme Shock & Vibe)	Optional, for DIN rail only, 1 per server
Security Bezel			
4B37A86282	BS4F	ThinkEdge SE350 V2 Security Bezel for 10/25GbE I/O Module	Optional, 1 per server
4B37A86283	BS4G	ThinkEdge SE350 V2 Security Bezel for 1GbE I/O Module	Optional, 1 per server
4XF7A86284	BS4H	ThinkEdge SE350 V2 Security Bezel Dust Filter	Optional, 1 per server

The DIN Rail Kit contains two brackets, as shown in the following figure.

Figure 16. DIN Rail Kit

### Security bezel

The security bezel is an optional component that mounts on the front of the node sleeve to help prevent physical access to the front components of the server. The bezel includes a lock-and-key mechanism for security. The bezel covers the front slots area and the network area to reduce the dust that can enter the server through the front air holes. For part number and feature code detail refer to [Wall or DIN mount](#) table above.

**Tip:** The use of the security bezel requires a node sleeve.

Figure 17. Security Bezel

### 1U rack installation

Two SE350 V2 servers can be mounted in a 1U space, in a rack server. The components are mounted in the Lenovo ThinkEdge SE350 V2 1U2N Enclosure.

ThinkEdge SE350 V2 1U2N Enclosure have two different enclosure to support three type of power input path. Make sure enclosure and server selection leverage the same power input path for installation.

#### Notes:

- Lenovo ThinkEdge SE350 V2 1U2N Enclosure is available in DCSC using CTO base model 7DBKCTO1WW
- The 1U2N Enclosure comes with two node fillers to ensure correct airflow if a node space is not populated

The following figure shows two SE350 V2 servers installed in the 1U2N Enclosure.

Figure 18. Lenovo ThinkEdge SE350 V2 1U2N Enclosure with external adapter

The following figure shows the components used in the 1U rack installation.

Figure 19. Lenovo ThinkEdge SE350 V2 1U2N Enclosure with external adapter components

**Tip:** The ThinkSystem Friction 2-Post Screw-in Rail Kit (B6H2) with external 300W AC power adapters is not supported in a 2-post rack.

The following figure shows the 1U short rack.

Figure 20. Lenovo ThinkEdge SE350 V2 1U2N Enclosure with Internal AC Power supply Input and DC direct

The following table lists the components used in the 1U rack installation.

**Tip:** The top cover of the SE350 V2 is removed before installing the server in the enclosure.

Table 44. Components for the 1U2N Enclosure

Part number	Feature code	Description	Quantity required
Toolless Slide Rail Kit and CMA			
CTO/model only*	7DBK AVAX	CMA (1U)	1 per Enclosure
4M17A11683	7DBK AVAL	1U and 2U Slide Rail	1 per Enclosure

4M17A37105	7DBK B6H2	ThinkSystem Friction 2-Post Screw-in Rail Kit	1 per Enclosure
1U2N Enclosure components			
CTO/model only*	7DBK BSMC	ThinkEdge SE350 V2 1U2N Enclosure (DC or External PSU)	1 per Enclosure
CTO/model only*	7DBK BVGY	ThinkEdge SE350 V2 1U2N Enclosure (AC)	1 per Enclosure
CTO/model only*	7DBK B6EE	ThinkEdge Enclosure AC Adapter Support Bracket	1 per Enclosure
4XF7A94043	7DBK BSML	ThinkEdge SE350 V2 Enclosure Shipping Bracket	1 per Enclosure
4XF7A86286	7DBK BSMD	ThinkEdge SE350 V2 Enclosure - Rack Dust Filter	1 for each server

\* Available via configure-to-order (CTO)

The following figure shows the components included in the Front Shipping Bracket.

Figure 21. 1U2N Enclosure Front Shipping Bracket

The following table summarizes the specifications of the two available rail kits

Table 45. Specifications of 1U and 2U Slide Rail

Feature	Slide Rail Kit
Part number	4M17A11683
CMA	Optional, CTO/model only* (7DBK AVAX)
Rail length	807 mm (31.8 in.)
Rail type	Full-out slide (ball bearing)
Slide travel	810 mm (31.9 in.)
Tool-less installation	Yes
In-rack server maintenance	Yes
1U PDU support	Yes
0U PDU support	Yes
Rack type	IBM and Lenovo 4-post, IEC standard-compliant
Mounting holes	Square or round
Mounting flange thickness	2 mm (0.08 in.) – 3.3 mm (0.13 in.)
Max distance between front and rear mounting flanges	864 mm (34.0 in.)

\* Available via configure-to-order (CTO)

### Short-depth 2U rack installation

Two SE350 V2 servers and the four companion AC Adapter power supplies can also be mounted in a short-depth rack or a 2-post rack. In such a configuration, the servers occupy 2U of rack space, the two servers in 1U and the AC Adapters mounted in the 1U space above. The components are mounted in the Lenovo ThinkEdge SE350 V2 2U2N Enclosure, machine type 7DBK.

Note: 2U2N enclosure supports SE350 V2 server and external 300W PSU adapter only.

**Notes:**

- Lenovo ThinkEdge SE350 V2 2U2N Enclosure is available in DCSC using CTO base model 7DBKCTO2WW
- The 2U2N Enclosure comes with two node fillers to ensure correct airflow if a node space is not populated

The following figure shows two SE350 V2 servers installed in the Lenovo ThinkEdge SE350 V2 2U2N Enclosure.

Figure 22. Lenovo ThinkEdge SE350 V2 2U2N Enclosure components (rail in open position)

The following table lists the components used in the 1U rack installation.

**Tip:** The top cover of the SE350 V2 is removed before installing the server in the enclosure.

Table 46. Components for the 2U2N Enclosure

Part number	Feature code	Description	Quantity required
Rail kit selections (choose 1)			
4M17A37105	7DBK B6H2	ThinkSystem Friction 2-Post Screw-in Rail Kit	1 per enclosure
4XF7A83645	7DBK BS30	ThinkSystem Enclosure Universal Short Rack Rail Kit	1 per enclosure
2U2N Enclosure components			
CTO/model only*	7DBK BY35	ThinkEdge SE350 V2 2U2N Enclosure (External PSU)	1 per Enclosure
CTO/model only*	7DBK B6EE	ThinkSystem Enclosure AC Adapter Support Bracket	1 per Enclosure
4XF7A94043	7DBK BSML	ThinkEdge SE350 V2 Enclosure Shipping Bracket	1 per Enclosure
4XF7A86286	7DBK BSMD	ThinkEdge SE350 V2 Enclosure - Rack Dust Filter	1 for each server

\* Available via configure-to-order (CTO)

The following figure shows the components included in the Front Shipping Bracket.

Figure 23. ThinkEdge SE350 V2 Enclosure Shipping Bracket

The following table summarizes the specifications of the two available rail kits

Table 47. Specifications of rail kits for short-depth installations

Feature	Short Rack Rail Kit	2-Post Screw-in Rail Kit
Part number	4XF7A83645	4M17A37105
CMA	None	None
Rail length	484 mm (19.1 in.)	484 mm (19.1 in.)
Rail type	Half-out slide (friction)	Half-out slide (friction)
Slide travel	270 mm (10.6 in.)	270 mm (10.6 in.)
Tool-less installation	Yes	No
In-rack server maintenance	No	No
1U PDU support	Yes	Yes
0U PDU support	Yes	Not applicable
Rack type	14-inch to 24-inch depth	2-post, EIA standard-compliant (3-inch to 8-inch)
Mounting holes	Square, round, or threaded	Square, round, or threaded
Mounting flange thickness	2 mm (0.08 in.) – 3.3 mm (0.13 in.)	2 mm (0.08 in.) – 3.3 mm (0.13 in.)
Max distance between front and rear mounting flanges	609 mm (24 in.)	Not applicable

For additional information on rack mount installation, see the Configuration Installation Guide:

[https://pubs.lenovo.com/se350-v2/install\\_a\\_node\\_to\\_rack](https://pubs.lenovo.com/se350-v2/install_a_node_to_rack)

## Mounting options and power

The following table list supported mounting options and their corresponding supported power type.

Table 48. Mounting options and supported power type

Power type / PSU	Desktop	DIN rail (wall/ceiling)	Rack 1U2N	Rack 2U2N
AC & 300W external	Yes	No	Yes	Yes
DC only	Yes	Yes	Yes	No
AC only	Yes	Yes	Yes	No

## Operating system support

The SE350 V2 supports the following operating systems:

- Microsoft Windows Server 2019
- Microsoft Windows Server 2022
- Microsoft Windows Server 2025
- Red Hat Enterprise Linux 8.6
- Red Hat Enterprise Linux 8.8
- Red Hat Enterprise Linux 8.10
- Red Hat Enterprise Linux 9.0
- Red Hat Enterprise Linux 9.2
- Red Hat Enterprise Linux 9.4
- Red Hat Enterprise Linux 9.5
- Red Hat Enterprise Linux 9.6
- Red Hat Enterprise Linux 10.0
- SUSE Linux Enterprise Server 15 SP4
- SUSE Linux Enterprise Server 15 SP5
- SUSE Linux Enterprise Server 15 SP6
- SUSE Linux Enterprise Server 15 Xen SP4
- SUSE Linux Enterprise Server 15 Xen SP5
- Ubuntu 20.04 LTS 64-bit
- Ubuntu 22.04 LTS 64-bit
- Ubuntu 24.04 LTS 64-bit
- VMware ESXi 7.0 U3
- VMware ESXi 8.0 U1
- VMware ESXi 8.0 U2
- VMware ESXi 8.0 U3
- VMware ESXi 9.0

The SE350 V2 is also tested with Windows 10 and Windows 11.

For a complete list of supported, certified and tested operating systems, plus additional details and links to relevant web sites, see the Operating System Interoperability Guide:

<https://lenovopress.lenovo.com/osig#support=all>

For configure-to-order configurations, the SE350 V2 can be preloaded with VMware ESXi. Ordering information is listed in the following table.

Table 49. VMware ESXi preload

Part number	Feature code	Description
CTO only	BMEY	VMware ESXi 7.0 U3 (Factory Installed)
CTO only	BYC7	VMware ESXi 8.0 U2 (Factory Installed)
CTO only	BZ97	VMware ESXi 8.0 U3 (Factory Installed)

Configuration rule:

- An ESXi preload cannot be selected if the configuration includes an NVIDIA GPU (ESXi preload cannot include the NVIDIA driver)

You can download supported VMware vSphere hypervisor images from the following web page and install it using the instructions provided:

[https://vmware.lenovo.com/content/custom\\_iso/](https://vmware.lenovo.com/content/custom_iso/)

## Hyperconverged infrastructure support

Lenovo ThinkEdge systems can be used in hyperconverged solutions either as part of a Lenovo configured and optimized Lenovo ThinkAgile solution, or as a user-configured system.

Refer to the following links for full details.

### VMware vSAN

SE350 V2 supports vSAN OSA. For more information refer to this page:  
[vSAN Original Storage Architecture \(OSA\)](#)

SE350 V2 supports vSAN ESA. For more information refer to this page:  
[vSAN Express Storage Architecture \(ESA\) ReadyNode Configurator](#)

### Microsoft Azure Local

SE350 V2 is listed in Microsoft Azure Local catalog. For more information refer to this page:  
<https://azurestackhcisolutions.azure.microsoft.com/#!/catalog/details/d047fc7e-5df1-43d1-97f5-907f0bc65004>

## Physical and electrical specifications

Dimensions and weight of the SE350 V2 server:

- Height 41.7 mm (1.64 in.)
- Width: 209 mm (8.2 in.)
- Depth: 384 mm (15.12 in.)
- Maximum weight: 3.75 kg (8.3 lb)

Dimensions and weight of the 1U2N Enclosure, with external power adapter (4x AC adapter bracket):

- Height: 43 mm (1.7 in.)
- Width: 439.2 mm (17.3 in.) (from EIA bracket to EIA bracket)
- Depth: 773.1 mm (30.44 in.)
- Maximum (with 2 nodes and 4 external power adapters): 16.88 kg (37.2 lbs)

Dimensions and weight of the 1U2N Enclosure, with internal power supply:

- Height: 43 mm (1.7 in.)
- Width: 439.2 mm (17.3 in.) (from EIA bracket to EIA bracket)
- Depth: 476.1 mm (18.7 in.)
- Maximum (with 2 nodes and internal power supplies):
  - DC power input: 9.85 kg (21.67 lbs)
  - AC power input: 10.03 kg (22.11 lbs)

Dimensions and weight of the 2U2N Enclosure (with AC adapter bracket):

- Height: 86.9 mm (3.4 in.)
- Width: 439.2 mm (17.3 in.) (from EIA bracket to EIA bracket)
- Depth: 476.1 mm (18.74 in.)
- Maximum (with 2 nodes and 4 external power adapters): 16.92 kg (37.30 lbs)

The shipping (cardboard packaging) dimensions of the SE350 V2 are as follows:

- Width: 338 mm (13.3 inches)
- Height: 179 mm (7.0 inches)
- Depth: 569 mm (22.4 inches)

The shipping (cardboard packaging) dimensions of the SE350 V2 1U Enclosure are as follows:

- Width: 587 mm (23.1 inches)
- Height: 225 mm (8.9 inches)
- Depth: 998 mm (39.3 inches)

Electrical specifications:

- Electrical Input - 20V 300W external adapters
  - 90 to 137 (low range) V AC, 47 Hz to 63 Hz
  - 180 to 265 (high range) V AC, 47Hz or 63 Hz
- The models with internal power supply (AC power module board):
  - Single 500W (230V/115V) AC power source input with electric parameters:
  - 90 to 265 (full range voltage) V AC, 47Hz to 63Hz
- Models with DC/DC power module board (output 12V):
  - Dual 12-48V variable DC power source input
  - Up to two 300W (230V/115V) external power adapters
- Supported external power adapters:
  - ThinkEdge 300W 230V/115V External Power Supply

## Operating environment

Summary of the environmental specifications of server. Depending on the model, some features might not be available, or some specifications might not apply.

Topics in this section:

- [Acoustical noise emissions](#)
- [Acoustical mode](#)
- [Ambient temperature management](#)
- [Environment](#)
- [Shock and vibration](#)
- [Particulate contamination](#)
- [Replacement port dust covers](#)
- [Coin battery](#)

### Acoustical noise emissions

The server has the following acoustic noise emissions declaration:

- **Sound power level ( $L_{WA}$ ):**
  - Idling:
    - Minimum: 4.0 bels
    - Typical: 4.0 bels
    - Maximum: 4.0 bels
  - Operating:
    - Minimum: 5.3 bels
    - Typical: 5.8 bels
    - Maximum: 5.8 bels
- **Sound pressure level ( $L_{pAm}$ ):**
  - Idling:
    - Minimum: 26.0 dBA
    - Typical: 26.2 dBA
    - Maximum: 26.2 dBA
  - Operating:
    - Minimum: 39.7 dBA
    - Typical: 44.2 dBA
    - Maximum: 44.2 dBA

Note:

- These sound levels were measured in controlled acoustical environments according to procedures specified by ISO 7779 and are reported in accordance with ISO 9296. The operating profile is represented by 80% CPU TDP or 70%/30% storage read/write.
- The declared acoustic noise levels are based on the following configurations, which may change depending on configurations/conditions.
  - Minimum: 1x 65W CPU, 2x 16GB RDIMMs, 1GbEx4 + 2.5GbE I/O module board, 1x NVMe M.2 boot drive, 2x SATA SSDs, DC PMB, SE350 V2 Desktop mount.
  - Typical: 1x 80W CPU, 4x 64GB RDIMMs, 25/10GbEx4 + 2.5GbE I/O module board, 2x NVMe M.2 boot drives, 4x NVMe SSDs, DC PMB, SE350 V2 Desktop mount.
  - Maximum: 1x 100W CPU, 4x 64GB RDIMMs, 25/10GbEx4 + 2.5GbE I/O module board, 2x NVMe M.2 boot drives, 4x NVMe SSDs, DC PMB, SE350 V2 Desktop mount.
- Government regulations (such as those prescribed by OSHA or European Community Directives) may govern noise level exposure in the workplace and may apply to you and your server installation. The actual sound pressure levels in your installation depend upon a variety of factors, including the number of racks in the installation; the size, materials, and configuration of the room; the noise levels from other equipment; the room ambient temperature, and employee's location in relation to the equipment. Further, compliance with such government regulations depends on a variety of additional factors,

including the duration of employees' exposure and whether employees wear hearing protection. Lenovo recommends that you consult with qualified experts in this field to determine whether you are in compliance with the applicable regulations.

## Acoustical mode

ThinkEdge SE350 V2 supports three acoustic modes with different acoustic performance.

- **Disabled:** The server operates at default fan speeds. The server will not actively cap noise levels.
- **Mode 1:** The operation of system fans is optimized to lower the overall noise level of the server.
  - Mode 1 supports ambient temperature lower than 35°C.
  - Performance degradation may occur at heavy workloads.
- **Mode 2:** The operation of system fans is optimized to lower the overall noise level of the server further than Mode 1.
  - Mode 2 supports configurations with 4-core processor at ambient temperature lower than 35°C.
  - Mode 2 supports 2 slot #1 and slot #3
  - Performance degradation may occur at heavy workloads.

To change the acoustic mode, enter the Setup Utility and go to **System settings > Operating Modes > Acoustic mode**.

The SE350 V2 supports different acoustic modes, which optimize the operation of system fans to lower the overall noise level of the server. This is achieved by closely monitoring components to ensure they operate within the cooling available.

User can specify or change the acoustic mode in UEFI. During server operation, power capping may be enabled, if needed, to ensure that noise limits are met.

## Ambient temperature management

Adjust ambient temperature when specific components are installed:

- Keep the ambient temperature to 45°C or lower when one or more NVMe drives are installed. If the ambient temperature is over 45°C, the server will have performance degradation.
- Keep the ambient temperature to 40°C or lower when AC adapters are installed.
- Keep the ambient temperature to 30°C or lower to avoid performance degradation when choosing the rack mount with the SE350 V2 1U2N Enclosure. It is advised that the ambient temperature should be kept under 27°C when AC adapters are installed.

For CTO orders, specify the operational temperature requirement and the shock & vibration requirement, by selecting the feature codes listed in the following table. Selecting the higher temperature and shock/vibration values will ensure the correct heat/vibration tolerant components are selected.

Table 50. Environmental requirements for CTO orders

Feature code	Description
Operational temperature selections	
BW2H	System Operational Temperature 5C to 40C / 41F to 104F
B8ZU	System Operational Temperature 0C to 55C / 32F to 131F

## Environment

ThinkEdge SE350 V2 complies with ASHRAE Class A4 specifications. System performance may be impacted when operating temperature is outside AHSARE A4 specification or fan failed condition over 30°C ambient temperature. ThinkEdge SE350 V2 is supported in the following environment:

- **Air temperature:**

- **Operating**
  - ASHRAE Class H1: 5°C to 25°C (41°F to 77°F); the maximum ambient temperature decreases by 1°C for every 500 m (1640 ft) increase in altitude above 900 m (2,953 ft).
  - ASHRAE Class A2: 10°C to 35°C (50°F to 95°F); the maximum ambient temperature decreases by 1°C for every 300 m (984 ft) increase in altitude above 900 m (2,953 ft).
  - ASHRAE Class A3: 5°C to 40°C (41°F to 104°F); the maximum ambient temperature decreases by 1°C for every 175 m (574 ft) increase in altitude above 900 m (2,953 ft).
  - ASHRAE Class A4: 5°C to 45°C (41°F to 113°F); the maximum ambient temperature decreases by 1°C for every 125 m (410 ft) increase in altitude above 900 m (2,953 ft).
  - The ambient temperature can be extended to 0°C to 55°C (32°F to 131°F) with the following restrictions of configuration:
    - No AC adapter installed
    - NVMe drives may have performance degradation
- **Server off:** 0°C to 55°C (32°F to 131°F)
- **Shipping/storage:** -40°C to 65°C (-40°F to 149°F)
- **Maximum altitude:** 3,050 m (10,000 ft)
- **Relative Humidity (non-condensing):**
  - **Operating:** 8% to 90%, maximum dew point : 24°C (75.2°F)
  - **Shipment/storage:** 8% to 90%, maximum dew point : 27°C (80.6°F)
  - **Non-operating (unpacked) storage** can pass the following condition: 5% to 95% at 38.7°C (101.7°F) maximum dry-bulb temperature for 48 hrs.
- **Particulate contamination**
  - Depending on the specific configuration, SE350 V2 supports a dust filter installed at the front of the enclosure. The dust filter has a Minimum Efficiency Rating Value (MERV) of 5, per ASHRAE 52.2-2017 / 80% Average Arrestance per ASHRAE 52.1-1992.

**Note:** Airborne particulates and reactive gases acting alone or in combination with other environmental factors such as humidity or temperature might pose a risk to the server. For information about the limits for particulates and gases, see [Particulate contamination](#).

## Shock and vibration

The following information is a summary of the shock and vibration specifications of the server. Depending on the model, some features might not be available, or some specifications might not apply.

Table 51. Shock and vibration specifications

Mounting type	Shock (when the server is in operation)	Shock (when the server is not in operation, such as in shipping)	Vibration (when the server is in operation)	Vibration (when the server is not in operation, such as in shipping)
<b>Desktop mount (standing alone)</b>	Half-sine wave, 15G 11ms	Trapezoidal wave, 50G 180 inch/sec	5-100 Hz, 0.15 Grms, 30 mins	2-200 Hz, 1.04 Grms, 15 mins
<b>Rack mount (1U2N and 2U2N)</b>	Half-sine wave, 15G 3ms	<ul style="list-style-type: none"> <li>Free-fall drop height: 100mm</li> <li>Equivalent shock: 70 inch/sec, 2-3 ms</li> </ul>	5-500 Hz, 0.21 Grms, 15mins	2-200Hz, 0.8 Grms, 15mins
<b>DIN-rail mount</b>	Half-sine wave, 15G 11ms	Not applicable	5-100 Hz, 0.15 Grms, 30 mins	Not applicable
<b>Wall mount</b>	<ul style="list-style-type: none"> <li><b>All configurations:</b> <ul style="list-style-type: none"> <li>Half-sine wave, 40G 6ms</li> <li>Half-sine wave, 30G 11ms</li> </ul> </li> <li><b>Configurations with 7mm drives:</b> <ul style="list-style-type: none"> <li>Half-sine wave, 30G 18ms</li> </ul> </li> </ul>	Not applicable	<ul style="list-style-type: none"> <li>1.91 Grms, 10-500 Hz, 30 mins</li> <li>1.04 Grms, 10-500 Hz, 1 hr</li> </ul>	Not applicable
<b>Ceiling mount</b>	Not applicable	Not applicable	<ul style="list-style-type: none"> <li>1.91 Grms, 10-500z, 30 mins</li> <li>1.04 Grms, 10-500z, 1 hr</li> </ul>	Not applicable

The following table indicates what environmental conditions (ambient temperature) are supported with SSD drives.

Table 52. Drive support based on environmental selections (ambient temperature)

Part number	Description	5°C to 35°C	36°C to 40°C	41°C to 45°C	46°C to 50°C	51°C to 55°C

† Performance might slightly decrease with this temperature region

## Particulate contamination

Depending on the specific configuration, SE350 V2 supports a dust filter installed at the front of the enclosure. The dust filter has a Minimum Efficiency Rating Value (MERV) of 5, per ASHRAE 52.2-2017 / 80% Average Arrestance per ASHRAE 52.1-1992.

**Attention:** Airborne particulates (including metal flakes or particles) and reactive gases acting alone or in combination with other environmental factors such as humidity or temperature might pose a risk to the device that is described in this document.

Risks that are posed by the presence of excessive particulate levels or concentrations of harmful gases include damage that might cause the device to malfunction or cease functioning altogether. This specification sets forth limits for particulates and gases that are intended to avoid such damage. The limits must not be viewed or used as definitive limits, because numerous other factors, such as temperature or moisture content of the air, can influence the impact of particulates or environmental corrosives and gaseous contaminant transfer. In the absence of specific limits that are set forth in this document, you must implement practices that maintain particulate and gas levels that are consistent with the protection of human health and safety. If Lenovo determines that the levels of particulates or gases in your environment have caused damage to the device, Lenovo may condition provision of repair or replacement of devices or parts on implementation of appropriate remedial measures to mitigate such environmental contamination. Implementation of such remedial measures is a customer responsibility.

Table 53. Limits for particulates and gases.

Contaminant	Limits
Reactive gases	<p>Severity level G1 as per ANSI/ISA 71.04-1985<sup>1</sup>:</p> <ul style="list-style-type: none"> <li>The copper reactivity level shall be less than 200 Angstroms per month (<math>\text{\AA}/\text{month} \approx 0.0035 \mu\text{g}/\text{cm}^2\text{-hour weight gain}</math>).<sup>2</sup></li> <li>The silver reactivity level shall be less than 200 Angstroms per month (<math>\text{\AA}/\text{month} \approx 0.0035 \mu\text{g}/\text{cm}^2\text{-hour weight gain}</math>).<sup>3</sup></li> <li>The reactive monitoring of gaseous corrosivity must be conducted approximately 5 cm (2 in.) in front of the rack on the air inlet side at one-quarter and three-quarter frame height off the floor or where the air velocity is much higher.</li> </ul>
Airborne particulates	<p>Data centers must meet the cleanliness level of ISO 14644-1 class 8.</p> <p>For data centers without airside economizer, the ISO 14644-1 class 8 cleanliness might be met by choosing one of the following filtration methods:</p> <ul style="list-style-type: none"> <li>The room air might be continuously filtered with MERV 8 filters.</li> <li>Air entering a data center might be filtered with MERV 11 or preferably MERV 13 filters.</li> </ul> <p>For data centers with airside economizers, the choice of filters to achieve ISO class 8 cleanliness depends on the specific conditions present at that data center.</p> <ul style="list-style-type: none"> <li>The deliquescent relative humidity of the particulate contamination should be more than 60% RH.<sup>4</sup></li> <li>Data centers must be free of zinc whiskers<sup>5</sup></li> </ul>

Notes:

<sup>1</sup>ANSI/ISA-71.04-1985.*Environmental conditions for process measurement and control systems: Airborne contaminants*. Instrument Society of America, Research Triangle Park, North Carolina, U.S.A.

<sup>2</sup>The derivation of the equivalence between the rate of copper corrosion growth in the thickness of the corrosion product in  $\text{\AA}/\text{month}$  and the rate of weight gain assumes that  $\text{Cu}_2\text{S}$  and  $\text{Cu}_2\text{O}$  grow in equal proportions

<sup>3</sup>The derivation of the equivalence between the rate of silver corrosion growth in the thickness of the corrosion product in  $\text{\AA}/\text{month}$  and the rate of weight gain assumes that  $\text{Ag}_2\text{S}$  is the only corrosion product.

<sup>4</sup>The deliquescent relative humidity of particulate contamination is the relative humidity at which the dust absorbs enough water to become wet and promote ionic conduction.

<sup>5</sup>Surface debris is randomly collected from 10 areas of the data center on a 1.5 cm diameter disk of sticky electrically conductive tape on a metal stub. If examination of the sticky tape in a scanning electron microscope reveals no zinc whiskers, the data center is considered free of zinc whiskers.

Table 54. Environmental requirements for CTO orders

Feature code	Description

B8ZU	System Operational Temperature 0C to 55C / 32F to 131F

## Replacement port dust covers

By default, the server includes dust covers for all front I/O ports, to reduce the impact of dust in your environment. If needed, you can order replacement covers. Ordering information is listed in the following table.

Table 55. Replacement port dust covers

Part number	Description	Contents
4XF7A94042	ThinkEdge SE350 V2/SE360 V2 Port Dust Cover Kit	<ul style="list-style-type: none"><li>• Eight RJ45 port covers</li><li>• Four SFP28 port covers</li><li>• Two USB Type-A port covers</li><li>• Two USB Type-C port covers</li><li>• Two power connector port covers for SE350 V2</li><li>• One Bluetooth antenna port covers for SE360 V2</li><li>• One safety screw for SE350 V2</li></ul>

## Coin battery

Ordering information for coin battery field upgrades are listed in the following table.

**Tip:** The server ships with the necessary coin batteries.

Table 56. Field upgrade options

Part number	Description
4X57A87776*	ThinkEdge CR2032 3V High Temperature (-40C to 125C) Coin Battery

\* This option allows customers to stock additional batteries as spare parts should they be needed

## Warranty upgrades and post-warranty support

The ThinkEdge SE350 V2 has 3-year warranty based on the machine type of the system:

- 7DA9 - 3 year warranty

ThinkEdge SE350 V2 1U2N Enclosure Lenovo and ThinkEdge SE350 V2 2U2N Enclosure have the following warranty:

- 7DBK - 3 year warranty

Our global network of regional support centers offers consistent, local-language support enabling you to vary response times and level of service to match the criticality of your support needs:

- **Standard Next Business Day** – Best choice for non-essential systems requiring simple maintenance.
- **Premier Next Business Day** – Best choice for essential systems requiring technical expertise from senior-level Lenovo engineers.
- **Premier 24x7 4-Hour Response** – Best choice for systems where maximum uptime is critical.
- **Premier Enhanced Storage Support 24x7 4-Hour Response** – Best choice for storage systems where maximum uptime is critical.

For more information, consult the brochure [Lenovo Operational Support Services for Data Centers Services](#).

## Services

Lenovo Data Center Services empower you at every stage of your IT lifecycle. From expert advisory and strategic planning to seamless deployment and ongoing support, we ensure your infrastructure is built for success. Our comprehensive services accelerate time to value, minimize downtime, and free your IT staff to focus on driving innovation and business growth.

**Note:** Some service options may not be available in all markets or regions. For more information, go to <https://lenovolocator.com/>. For information about Lenovo service upgrade offerings that are available in your region, contact your local Lenovo sales representative or business partner.

In this section:

- [Lenovo Advisory Services](#)
- [Lenovo Plan & Design Services](#)
- [Lenovo Deployment, Migration, and Configuration Services](#)
- [Lenovo Support Services](#)
- [Lenovo Managed Services](#)
- [Lenovo Sustainability Services](#)

## Lenovo Advisory Services

Lenovo Advisory Services simplify the planning process, enabling customers to build future-proofed strategies in as little as six weeks. Consultants provide guidance on projects including VM migration, storage, backup and recovery, and cost management to accelerate time to value, improve cost efficiency, and build a flexibly scalable foundation.

- **Assessment Services**

An Assessment helps solve your IT challenges through an onsite, multi-day session with a Lenovo technology expert. We perform a tools-based assessment which provides a comprehensive and thorough review of a company's environment and technology systems. In addition to the technology based functional requirements, the consultant also discusses and records the non-functional business requirements, challenges, and constraints. Assessments help organizations like yours, no matter how large or small, get a better return on your IT investment and overcome challenges in the ever-changing technology landscape.

- **Design Services**

Professional Services consultants perform infrastructure design and implementation planning to support your strategy. The high-level architectures provided by the assessment service are turned into low level designs and wiring diagrams, which are reviewed and approved prior to implementation. The implementation plan will demonstrate an outcome-based proposal to provide business capabilities through infrastructure with a risk-mitigated project plan.

## Lenovo Plan & Design Services

Unlock faster time to market with our tailored, strategic design workshops to align solution approaches with your business goals and technical requirements. Leverage our deep solution expertise and end-to-end delivery partnership to meet your goals efficiently and effectively.

## Lenovo Deployment, Migration, and Configuration Services

Optimize your IT operations by shifting labor-intensive functions to Lenovo's skilled technicians for seamless on-site or remote deployment, configuration, and migration. Enjoy peace of mind, faster time to value, and comprehensive knowledge sharing with your IT staff, backed by our best-practice methodology.

- **Deployment Services for Storage and ThinkAgile**

A comprehensive range of remote and onsite options tailored specifically for your business needs to ensure your storage and ThinkAgile hardware are fully operational from the start.

- **Hardware Installation Services**

A full-range, comprehensive setup for your hardware, including unpacking, inspecting, and positioning components to ensure your equipment is operational and error-free for the most seamless and efficient installation experience, so you can quickly benefit from your investments.

- **DM/DG File Migration Services**

Take the burden of file migration from your IT's shoulders. Our experts will align your requirements and business objectives to the migration plans while coordinating with your team to plan and safely execute the data migration to your storage platforms.

- **DM/DG/DE Health Check Services**

Our experts perform proactive checks of your Firmware and system health to ensure your machines are operating at peak and optimal efficiency to maximize up-time, avoid system failures, ensure the security of IT solutions and simplify maintenance.

- **Factory Integrated Services**

A suite of value-added offerings provided during the manufacturing phase of a server or storage system that reduces time to value. These services aim at improving your hardware deployment experience and enhance the quality of a standard configuration before it arrives at your facility.

## Lenovo Support Services

In addition to response time options for hardware parts, repairs, and labor, Lenovo offers a wide array of additional support services to ensure your business is positioned for success and longevity. Our goal is to reduce your capital outlays, mitigate your IT risks, and accelerate your time to productivity.

- **Premier Support for Data Centers**

Your direct line to the solution that promises the best, most comprehensive level of support to help you fully unlock the potential of your data center.

- **Premier Enhanced Storage Support (PESS)**

Gain all the benefits of Premier Support for Data Centers, adding dedicated storage specialists and resources to elevate your storage support experience to the next level.

- **Committed Service Repair (CSR)**

Our commitment to ensuring the fastest, most seamless resolution times for mission-critical systems that require immediate attention to ensure minimal downtime and risk for your business. This service is only available for machines under the Premier 4-Hour Response SLA.

- **Multivendor Support Services (MVS)**

Your single point of accountability for resolution support across vast range of leading Server, Storage, and Networking OEMs, allowing you to manage all your supported infrastructure devices seamlessly from a single source.

- **Keep Your Drive (KYD)**

Protect sensitive data and maintain compliance with corporate retention and disposal policies to ensure your data is always under your control, regardless of the number of drives that are installed in your Lenovo server.

- **Technical Account Manager (TAM)**

Your single point of contact to expedite service requests, provide status updates, and furnish reports to track incidents over time, ensuring smooth operations and optimized performance as your business grows.

- **Enterprise Software Support (ESS)**

Gain comprehensive, single-source, and global support for a wide range of server operating systems and Microsoft server applications.

For more information, consult the brochure [Lenovo Operational Support Services for Data Centers](#).

## Lenovo Managed Services

Achieve peak efficiency, high security, and minimal disruption with Lenovo's always-on Managed Services. Our real-time monitoring, 24x7 incident response, and problem resolution ensure your infrastructure operates seamlessly. With quarterly health checks for ongoing optimization and innovation, Lenovo's remote active monitoring boosts end-user experience and productivity by keeping your data center's hardware performing at its best.

Lenovo Managed Services provides continuous 24x7 remote monitoring (plus 24x7 call center availability) and proactive management of your data center using state-of-the-art tools, systems, and practices by a team of highly skilled and experienced Lenovo services professionals.

Quarterly reviews check error logs, verify firmware & OS device driver levels, and software as needed. We'll also maintain records of latest patches, critical updates, and firmware levels, to ensure your systems are providing business value through optimized performance.

## Lenovo Sustainability Services

- **Asset Recovery Services**

Lenovo Asset Recovery Services (ARS) provides a secure, seamless solution for managing end-of-life IT assets, ensuring data is safely sanitized while contributing to a more circular IT lifecycle. By maximizing the reuse or responsible recycling of devices, ARS helps businesses meet sustainability goals while recovering potential value from their retired equipment. For more information, see the [Asset Recovery Services offering page](#).

- **CO2 Offset Services**

Lenovo's CO2 Offset Services offer a simple and transparent way for businesses to take tangible action on their IT footprint. By integrating CO2 offsets directly into device purchases, customers can easily support verified climate projects and track their contributions, making meaningful progress toward their sustainability goals without added complexity.

- **Lenovo Certified Refurbished**

Lenovo Certified Refurbished offers a cost-effective way to support IT circularity without compromising on quality and performance. Each device undergoes rigorous testing and certification, ensuring reliable performance and extending its lifecycle. With Lenovo's trusted certification, you gain peace of mind while making a more sustainable IT choice.

## **Lenovo TruScale**

Lenovo TruScale XaaS is your set of flexible IT services that makes everything easier. Streamline IT procurement, simplify infrastructure and device management, and pay only for what you use – so your business is free to grow and go anywhere.

Lenovo TruScale is the unified solution that gives you simplified access to:

- The industry's broadest portfolio – from pocket to cloud – all delivered as a service
- A single-contract framework for full visibility and accountability
- The global scale to rapidly and securely build teams from anywhere
- Flexible fixed and metered pay-as-you-go models with minimal upfront cost
- The growth-driving combination of hardware, software, infrastructure, and solutions – all from one single provider with one point of accountability.

For information about Lenovo TruScale offerings that are available in your region, contact your local Lenovo sales representative or business partner.

## Regulatory compliance

The SE350 V2 conforms to the following standards:

- ANSI/UL62368-1
- IEC 62368-1 (CB Certificate and CB Test Report)
- FCC - Verified to comply with Part 15 of the FCC Rules, Class A
- Canada ICES-003, issue 7, Class A
- CSA C22.2 No. 62368-1

## Rack cabinets

The SE350 V2 supports installation in a rack when mounted in either the 1U E1 Enclosure or the 2U E2 Enclosure. See [Mounting options](#) for details.

**Note:** The E2 Enclosure is not supported in the 12U and 18U Micro Data Center rack cabinets.

The following table lists the supported rack cabinets.

Table 59. Rack cabinets

Model	Description
93072RX	25U Standard Rack (1000mm)
93072PX	25U Static S2 Standard Rack (1000mm)
7D6DA007WW	ThinkSystem 42U Onyx Primary Heavy Duty Rack Cabinet (1200mm)
7D6DA008WW	ThinkSystem 42U Pearl Primary Heavy Duty Rack Cabinet (1200mm)

93074RX	42U Standard Rack (1000mm)

For specifications about these racks, see the Lenovo Rack Cabinet Reference, available from: <https://lenovopress.com/lp1287-lenovo-rack-cabinet-reference>

For more information, see the list of Product Guides in the Rack cabinets category: <https://lenovopress.com/servers/options/racks>

### Notes:

- The following racks do not support the use of the cable management arm (CMA):
  - 25U racks, type 9307
  - 42U racks, type 9307

## KVM console options

The following table lists the supported KVM consoles.

Table 60. KVM console

Part number	Description
4XF7A84188	ThinkSystem 18.5" LCD console (with US English keyboard)

The following table lists the available KVM switches and the options that are supported with them.

Table 62. KVM switches and options

Part number	Description
KVM Console switches	
1754D1X	Global 2x2x16 Console Manager (GCM16)
1754A2X	Local 2x16 Console Manager (LCM16)
1754A1X	Local 1x8 Console Manager (LCM8)
Cables for GCM and LCM Console switches	
46M5383	Virtual Media Conversion Option Gen2 (VCO2)
46M5382	Serial Conversion Option (SCO)

For more information, see the list of Product Guides in the KVM Switches and Consoles category:

<http://lenovopress.com/servers/options/kvm>

## Lenovo Financial Services

Why wait to obtain the technology you need now? No payments for 90 days and predictable, low monthly payments make it easy to budget for your Lenovo solution.

- **Flexible**

Our in-depth knowledge of the products, services and various market segments allows us to offer greater flexibility in structures, documentation and end of lease options.

- **100% Solution Financing**

Financing your entire solution including hardware, software, and services, ensures more predictability in your project planning with fixed, manageable payments and low monthly payments.

- **Device as a Service (DaaS)**

Leverage latest technology to advance your business. Customized solutions aligned to your needs. Flexibility to add equipment to support growth. Protect your technology with Lenovo's Premier Support service.

- **24/7 Asset management**

Manage your financed solutions with electronic access to your lease documents, payment histories, invoices and asset information.

- **Fair Market Value (FMV) and \$1 Purchase Option Leases**

Maximize your purchasing power with our lowest cost option. An FMV lease offers lower monthly payments than loans or lease-to-own financing. Think of an FMV lease as a rental. You have the flexibility at the end of the lease term to return the equipment, continue leasing it, or purchase it for the fair market value. In a \$1 Out Purchase Option lease, you own the equipment. It is a good option when you are confident you will use the equipment for an extended period beyond the finance term. Both lease types have merits depending on your needs. We can help you determine which option will best meet your technological and budgetary goals.

Ask your Lenovo Financial Services representative about this promotion and how to submit a credit application. For the majority of credit applicants, we have enough information to deliver an instant decision and send a notification within minutes.

## Seller training courses

The following sales training courses are offered for employees and partners (login required). Courses are listed in date order.

1. **Lenovo Data Centerテクニカルセールス認定試験学習ガイド**

2025-07-02 | 10 minutes | Employees and Partners

Japanese translated study guide for LENU-322C

このガイドには、Lenovo データセンター技術演習 (LENU-322P) および認定試験 (LENU-322C) の準備に役立つ情報が含まれています。

タグ: データセンター製品

Tags: DataCenter Products

Published: 2025-07-02

Length: 10 minutes

**Start the training:**

## 4. **Lenovo Data Center Product Portfolio**

2025-06-11 | 20 minutes | Employees and Partners

This course introduces the Lenovo data center portfolio, and covers servers, storage, storage networking, and software-defined infrastructure products. After completing this course about Lenovo data center products, you will be able to identify product types within each data center family, describe Lenovo innovations that this product family or category uses, and recognize when a specific product should be selected.

Course objectives:

1. Identify product types within each data center family
2. Describe the features of the product family or category
3. Recognize when a specific product should be selected

## 5. **VTT Edge: News from the Edge - Portfolio Update May 2025**

2025-06-10 | 60 minutes | Employees Only

What's happening at the Edge? The ThinkEdge SE100 has made its debut, but what else is happening in the Lenovo Edge family? Join Mike Chu and Chris Lafferty as they discuss the latest news on our Edge servers and the view moving forward. Topics will include:

- SE350 and SE360
- The competition
- ThinkEdge Roadmap

Tags: ThinkEdge

## 6. **Family Introduction: Edge Servers**

2025-05-16 | 18 minutes | Employees and Partners

This course introduces the concept of edge servers. Edge servers are used at the edge of an IoT environment, where they perform pre-processing of data, and data forwarding to core environments.

Course Objectives:

- Describe the Internet of Things (IoT)
- Define an edge server
- Discuss edge server features

## 7. **VTT Edge: Viva Energy, The Battle that Won the Deal March 2025**

2025-04-07 | 60 minutes | Employees Only

Join us as Richard Jenkins walks through the sales journey winning the deal with Viva Energy, Australia's leading energy company. Viva Energy recently pivoted their business strategy to become the largest convenience retailer.

Richard will cover:

- Complexities of the business transition
- Critical aspects and requirements for the solution
- Partnerships and competition
- Why Viva Energy chose Lenovo
- Next steps

Tags: Australia, Oil and Gas, Retail, ThinkEdge

Published: 2025-04-07

#### 10. **Family Portfolio Edge Servers Powered by Intel**

2025-02-28 | 25 minutes | Employees and Partners

This course describes the Edge servers, such as the Lenovo ThinkEdge SE350 V2, SE360 V2, SE100 and ThinkEdge SE450, that are used at the edge of an IoT environment and may be part of an edge solution. Solutions such as those using software from Scale Computing typically use more traditional Lenovo servers.

After completing this course, you will be able to list the edge solutions in the Lenovo portfolio, describe the features of each solution and determine which solution is best suited to a specific environment.

2024-08-05 | 60 minutes | Employees Only

The Lenovo ThinkEdge Team is collaborating with eco-system partners to design and validate Edge AI solutions across verticals. Join this session to learn about these efforts and the architecture of the first Lenovo Validated Design for Public Sector Safety and Security. The session will cover the following topics:

- Overview of the Lenovo Validated Designs (LVD) for Vertical Edge
- Public Sector Safety and Security LVD
- Business Key drivers and solution benefits
- Architecture and Technology Overview
- Relevant use cases
- Components and sizing details
- Validation results and pricing model

## 22. **Business Problems Addressed with Lenovo Data & Analytics Solutions**

2024-01-31 | 20 minutes | Employees and Partners

Data is the quantities, characters, or symbols on which operations are performed by a computer, which is then stored and transmitted in the form of electrical signals and recorded on magnetic, optical, solid state, or mechanical recording media. All different types of organizations rely more and more on their data to gain valuable insights and improve their business. As expected, they will have challenges with gaining this insight. In this course we will discuss those challenges and problems our customers face and describe how Lenovo Data and Analytics Solutions can help customers solve each problem.

After completing this training, you will be able to define the following common problems for databases and big data and describe how Lenovo can help customers solve each problem: scalability, management, performance, protection, security, knowledge/skill, and technology evolution.

After completing this training, you will be able to define the following common problems for databases and big data and describe how Lenovo can help customers solve each problem: scalability, management, performance, protection, security, knowledge/skill, and technology evolution.

24. **The 10-minute Edge conversation for Lenovo Sellers**

2023-12-14 | 20 minutes | Employees and Partners

The purpose of this course is to enable sellers to have a 10 to 15-minute customer conversation addressing the relevancy of Edge solutions to the customer business.

Learning Objectives:

- Prepare for the initial customer conversation
- Hold a 10-minute Edge Operational Technology (OT) conversation
- Take the appropriate steps to progress the sale

36. **Lenovo FY24Q2 AI Announcement QH**

2023-06-07 | 3 minutes | Employees and Partners

This Quick Hit covers the exciting announcements Lenovo is making about its commitment to AI. Lenovo has pledged to invest \$1B in AI over the next three years, and has committed \$100M to bolster the Lenovo AI Innovators Program to develop AI-Ready solutions faster. Two new servers are being added to the already impressive Lenovo Edge portfolio – the ThinkEdge SE350 V2 and ThinkEdge SE360 V2. These servers offer a wide operating temperature range and the ruggedness to handle shock, vibration, and airborne contaminants. The SE360 V2 supports GPUs, making it ideal for AI at the edge. Both servers support the new time-sensitive networking protocol, TSN, to ensure that response times are low and deterministic.

Note: This course is presented as audio only. There are no slides or video.
