

Level Up Your Business: Enterprise Performance Without Enterprise Complexity

Article

For small and medium-sized businesses, every technology investment needs to count. Whether you're a startup coding the next big app from your house, an accounting firm serving local clients, or a retail store expanding to new locations – your success depends on having reliable technology that can help you compete.

But here's the challenge many companies face: How do you get the right technology to power your applications and scale your operations without complications and costs? How do you choose technology that works for today's needs while being ready for tomorrow's opportunities? The answer lies in finding that sweet spot between performance and practicality.

That's why Lenovo is excited to introduce the [ThinkSystem ST45 V3](#), a compact and reliable server with features that are designed to support your business as it grows, while safeguarding your valuable data. Powered by an AMD EPYC™ 4004 processor, this server offers a winning combination of performance, efficiency, and affordability.

A Server Built with Growing Businesses in Mind

The ThinkSystem ST45 V3 is designed to meet the needs of businesses looking for powerful, dependable technology without breaking the bank. Here's why it stands out:

- **Budget-Smart:** Get enterprise capabilities without the price shock - perfect for startups watching their seed funding and businesses with limited capital
- **Compact and Quiet:** Perfect for small offices or remote locations, its low-noise design fits right in without causing disruptions
- **Energy Efficient:** With ENERGY STAR 4.0 certification, it offers outstanding performance per watt.
- **Easy to Set Up and Manage:** Simplifying the process, Lenovo makes it quick to get started and manage your server
- **Reliable and Secure:** Built with Lenovo ThinkShield Security, it provides peace of mind as your business grows

Supporting Your Business Journey

Whether you're a team of one or expanding your footprint, the ThinkSystem ST45 V3 is equipped to handle a broad range of workloads including:

- Supporting local file, mail, and print services
- Running essential business applications
- Powering e-commerce with reliable performance for web servers
- Maintaining needed data backups

Wherever your ambitions take you, this server is ready to keep up and is scalable for future growth.

Lenovo and AMD: A Partnership for Growth

The collaboration between Lenovo and AMD means you get cutting-edge technology backed by trusted brands. AMD EPYC™ processors are known for their efficiency and performance, giving you the tools to tackle challenges and seize opportunities.
