

Brocade 2-port 10GbE Converged Network Adapter for BladeCenter

Product Guide (withdrawn product)

The Brocade 2-port 10GbE Converged Network Adapter together with the Brocade Converged 10GbE Switch Module is a part of a leading Converged Ethernet solution for BladeCenter that offers native Ethernet and Fibre Channel connectivity, maximum bandwidth and performance, and simplicity in a converged environment.

This card combines the functions of a Host Bus Adapter (HBA) and Network Interface Card (NIC) on one PCIe 2.0 x8 card. It supports full Fibre Channel over Ethernet (FCoE) protocol offload and allows Fibre Channel traffic to converge onto 10 Gbps Converged Enhanced Ethernet (CEE) networks. FCoE and 10 Gbps CEE operations run simultaneously. Figure 1 shows the expansion card.

Did you know?

The Brocade CNA and Brocade Converged 10GbE Switch Module for BladeCenter form the industry's first truly converged FCoE BladeCenter solution with native Fibre Channel and Ethernet ports built into one switch module. The FCoE switching provides up-front reduction in SAN/LAN cost and complexity and increases rack utilization. It requires less cabling, cooling, and power, which means up-front reduction in network investment.
