

System x3650 M4 HD

Product Guide (withdrawn product)

The System x3650 M4 HD is a 2-socket 2U rack-optimized server. It supports up to 32 internal drives and features an innovative design that delivers an optimal balance of performance, uptime, and dense storage. It offers excellent reliability, availability, and serviceability (RAS) for an improved business environment. The System x3650 M4 HD is designed for easy deployment, integration, service, and management.

Suggested use: Big data applications, cloud-computing deployments, data management, and business-critical workloads

The following figure shows the System x3650 M4 HD configured with 24 hot-swap 2.5-inch drive bays.

Figure 1. The System x3650 M4 HD

Did you know?

The x3650 M4 HD offers a flexible design that supports up to 26 2.5-inch drives (24 in the front, two accessible from the rear), or 16 2.5-inch drives and 16 1.8-inch solid-state drive bays. Combined with Intel E5-2600 v2 processors, up to 768 GB of memory, 12 Gbps SAS controllers, and up to 6 PCIe 3.0 slots, you have a system that can handle big data applications. Comprehensive systems management tools with the next-generation Integrated Management Module II (IMM2) make the server easy to deploy, integrate, service, and manage.

Key features

The x3650 M4 HD is an outstanding 2U two-socket business-critical server, offering improved performance and pay-as-you grow flexibility along with new features that improve server management capability. This powerful system is designed for your most important business applications and cloud deployments.

Combining balanced performance and flexibility, the x3650 M4 HD is a great choice for small and medium businesses up to the large enterprise. It can provide outstanding uptime to keep business-critical applications and cloud deployments running safely. Ease of use and comprehensive systems management tools make it easy to deploy. Outstanding RAS and high-efficiency design improve your business environment and help save operational costs.

Scalability and performance

The x3650 M4 HD offers numerous features to boost performance, improve scalability, and reduce costs:

- Featuring the Intel Xeon processor E5-2600 v2 product family, which improves productivity by offering superior system performance with up to 12 core per processors, core speeds up to 3.5 GHz, L3 cache up to 30 MB, and QPI interconnect links of up to 8 GTps.
- Two processors, up to 24 cores, and 48 threads maximize the concurrent execution of multi-threaded applications.
- Intelligent and adaptive system performance with Intel Turbo Boost Technology 2.0 allows CPU cores to run at maximum speeds during peak workloads by temporarily going beyond processor thermal design power (TDP).
- Intel Hyper-Threading Technology boosts performance for multi-threaded applications by enabling simultaneous multi-threading within each processor core, up to two threads per core.
- Intel Virtualization Technology integrates hardware-level virtualization hooks that allow operating system vendors to better use the hardware for virtualization workloads.
- Intel Advanced Vector Extensions (AVX) improve floating-point performance for compute-intensive technical and scientific applications.
- Supports up to 24 Load Reduced DIMMs (LRDIMMs) of 1866 MHz DDR3 ECC memory, which provide speed, high availability, and a memory capacity of up to 768 GB (running at 1066 MHz).
- The use of solid-state drives (SSDs) instead of, or along with, traditional hard disk drives (HDDs) can improve I/O performance. An SSD can support up to 100 times more I/O operations per second (IOPS) than a typical HDD.
- Up to 26x 2.5-inch bays or a combination of up to 16x 2.5-inch bays and 16x 1.8-inch SSD bays provide a flexible and scalable platform to meet your increasing demands.
- The server has four integrated Gigabit Ethernet ports and two optional 10 Gb Ethernet (or InfiniBand) ports with mezzanine cards that do not use PCIe slots.
- The server offers PCI Express 3.0 I/O expansion capabilities that improve the theoretical maximum bandwidth by 60% (8 GTps per link) compared to the previous generation of PCI Express 2.0.
- With Intel Integrated I/O Technology, the PCI Express 3.0 controller is integrated into the Intel Xeon processor E5 family. This integration helps to reduce I/O latency dramatically and increase overall system performance.
- Support for up to two NVIDIA Quadro graphics processing units (GPUs) to maximize computing power.

Availability and serviceability

The x3650 M4 HD provides many features to simplify serviceability and increase system uptime:

- The server offers memory mirroring and memory rank sparing for redundancy in the event of a non-correctable memory failure.
- Tool-less cover removal provides easy access to upgrades and serviceable parts, such as CPU,

memory, and adapters.

- The server offers hot-swap drives, supporting RAID redundancy for data protection and greater system uptime.
- The server has up to two redundant hot-swap power supplies and four hot-swap dual-motor redundant fans (two fan zones with an N+1 fan design) to provide availability for business-critical applications.
- A light path diagnostics panel and individual light path LEDs quickly lead the technician to failed (or failing) components, which simplifies servicing, speeds up problem resolution, and helps improve system availability.
- Predictive Failure Analysis (PFA) detects when system components (processors, VRMs, memory, HDDs, fans, and power supplies) operate outside of standard thresholds and generates proactive alerts in advance of a possible failure, therefore increasing uptime.
- SSDs offer better reliability than traditional HDDs for greater uptime.
- The built-in Integrated Management Module Version II (IMM2) continuously monitors system parameters, triggers alerts, and performs recovery actions in case of failures to minimize downtime.
- Built-in diagnostics, using Dynamic Systems Analysis (DSA) Preboot, speed up troubleshooting tasks to reduce service time.
- Three-year customer-replaceable unit and onsite limited warranty, 9x5 next business day. Optional service upgrades are available.

Manageability and security

Powerful systems management features simplify local and remote management of the x3650 M4 HD:

- Local console ports are standard at the rear of the server. Front video and USB ports are available through an optional console breakout cable.
- The server includes an Integrated Management Module II (IMM2) to monitor server availability and perform remote management.
- An Integrated industry-standard Unified Extensible Firmware Interface (UEFI) enables improved setup, configuration, and updates, and simplifies error handling.
- Integrated Trusted Platform Module (TPM) 1.2 support enables advanced cryptographic functionality, such as digital signatures and remote attestation.
- Industry-standard Advanced Encryption Standard (AES) NI support for faster, stronger encryption.
- IBM Systems Director is included for proactive systems management. It offers comprehensive systems management tools that help increase uptime, reduce costs, and improve productivity through advanced server management capabilities.
- Intel Execute Disable Bit functionality can prevent certain classes of malicious buffer overflow attacks when combined with a supported operating system.
- Intel Trusted Execution Technology provides enhanced security through hardware-based resistance to malicious software attacks, allowing an application to run in its own isolated space, protected from all other software running on a system.

Energy efficiency

The x3650 M4 HD offers the following energy-efficiency features to save energy, reduce operational costs, increase energy availability, and contribute to a green environment:

- Energy-efficient system board components help lower operational costs.
- The x3650 M4 HD is Energy Star 2.0 compliant. Energy Star is the trusted, US government-backed symbol for energy efficiency, with the goal of helping customers save money and protect the environment through energy efficient products and practices. For the Power and Performance Data Sheet, see <http://ibm.com/systems/x/hardware/energy-star>

- There are highly efficient 550 W, 750 W, and 900 W AC power supplies with 80 PLUS Platinum certification. A 750W DC power option is available.
- The Intel Xeon processor E5-2600 v2 product family offers better performance over the previous generation while fitting into the same thermal design power (TDP) limits.
- Intel Intelligent Power Capability powers individual processor elements on and off as needed to reduce power draw.
- Low-voltage Intel Xeon processors draw less energy to satisfy the demands of power and thermally constrained data centers and telecommunication environments.
- Low-voltage 1.35 V DDR3 memory RDIMMs consume 15% less energy compared to 1.5 V DDR3 RDIMMs.
- SSDs use as much as 80% less power than traditional 2.5-inch HDDs.
- The server uses hexagonal ventilation holes, which are a part of Calibrated Vectors Cooling™ technology. Hexagonal holes can be grouped more densely than round holes, providing more efficient airflow through the system.
- IBM Systems Director Active Energy Manager™ provides advanced data center power notification and management to help achieve lower heat output and reduced cooling needs.

Standard specifications

The following table lists the standard specifications.

Table 1. Standard specifications

Components	Specification
Machine type	5460
Form factor	2U rack.
Processor	Up to two Intel Xeon processor E5-2600 v2 product family CPUs. Two QPI links up to 8.0 GTps each. Up to 1866 MHz memory speed. Twelve cores up to 2.7 GHz and 30 MB L3 cache Ten cores up to 3.0 GHz and 25 MB L3 cache Eight cores up to 3.3 GHz and 25 MB L3 cache Six cores up to 3.5 GHz and 25 MB L3 cache Four cores up to 3.5 GHz and 15 MB L3 cache
Chipset	Intel C602J.
Memory	Up to 24 DIMM sockets (12 DIMMs per processor). RDIMMs, UDIMMs, and LRDIMMs (Load Reduced DIMMs) are supported, but memory types cannot be intermixed. Memory speed up to 1866 MHz.
Memory maximums	With RDIMMs: Up to 384 GB with 24x 16 GB RDIMMs and two processors. With UDIMMs: Up to 128 GB with 16x 8 GB UDIMMs and two processors. With LRDIMMs: Up to 768 GB with 24x 32 GB LRDIMMs and two processors.
Memory protection	ECC, Chipkill, memory mirroring, and memory rank sparing.
Disk drive bays	Up to 26x 2.5-inch hot-swap bays supporting HDDs or SSDs (24 bays front accessible and 2 bays rear accessible); or 16x 2.5-inch HDDs/SSDs (front) plus 16x 1.8-inch SSDs (front accessible).
Maximum internal storage	Up to 41.6 TB with 26x 1.6TB 2.5" SSDs. Up to 31.2 TB with 26x 1.2TB SAS HDDs. An intermix of SAS/SATA is supported.
RAID support	RAID 0, 1, and 10 with integrated ServeRAID M5210e. Optional upgrades to RAID 5 and 50 are available with zero-cache, 1 GB cache without battery, or 1 GB or 2 GB flash-backed cache. Optional upgrade to RAID 6 or 60.
Optical drive bays	No internal bays; use an external USB drive. See http://support.lenovo.com/en/documents/pd011281 for options.
Tape drive bays	None.
Network interfaces	Four integrated Gigabit Ethernet 1000BASE-T ports (RJ-45): Two embedded 10 Gb Ethernet ports (10GBASE-T RJ-45 or 10GBASE-SR SFP+ based) on an optional 10 Gb Ethernet mezzanine card (does not use a PCIe slot).
PCI Expansion slots	Up to six slots depending on the riser cards that are installed. The slots are as follows: <ul style="list-style-type: none"> Slot 1: PCIe 3.0 x8; full-height, full-length Slot 2: PCIe 3.0 x8; full-height, half-length Slot 3: PCIe 3.0 x8; full-height, half-length Slot 4: Optional, requires second processor and second riser card Slot 5: Optional, requires second processor and second riser card Slot 6: Optional, requires second processor and second riser card Optional riser cards available through CTO with PCIe x8 or PCIe x16 or PCI-X slots. Slots 1 and 2 can be replaced with two 2.5-inch hot-swap drive bays through CTO.

Components	Specification
Ports	Front: A breakout cable port offers two USB 2.0 ports and one DB-15 video. Four USB 2.0, one DB-15 video, one DB-9 serial, one RJ-45 systems management, four RJ-45 GbE network ports, two optional RJ-45 or SFP+ 10 GbE network ports on rear. One internal USB port for embedded hypervisor.
Cooling	Calibrated Vectored Cooling with up to four redundant hot swap fans (all standard; two fan zones with N+1 fan design; each fan has two motors).
Power supply	Up to two redundant hot-swap 550 W AC, 750 W AC, or 900 W AC power supplies (all 80 PLUS Platinum certification), or -48V 750 W DC power supply options.
Video	Matrox G200eR2 with 16 MB memory integrated into the IMM2. Maximum resolution is 1600x1200 at 75 Hz with 16 M colors.
Hot-swap parts	Hard disk drives, power supplies, and fans.
Systems management	UEFI, Integrated Management Module II (IMM2), Predictive Failure Analysis, Light Path Diagnostics, Automatic Server Restart, Systems Director and Active Energy Manager, and ServerGuide. Optional IMM Advanced Upgrade software feature for remote presence.
Security features	Power-on password, administrator's password, and Trusted Platform Module (TPM).
Operating systems supported	Microsoft Windows Server 2012, 2008 R2 and 2008, Red Hat Enterprise Linux 6, SUSE Linux Enterprise Server 11, and VMware vSphere 5.1
Limited warranty	Three-year customer-replaceable unit and onsite limited warranty with 9x5 next business day (NBD).
Service and support	Optional service upgrades are available through ServicePac® offerings: Four-hour or two-hour response time, eight-hour fix time, one-year or two-year warranty extension, remote technical support for Lenovo hardware and some Lenovo and third-party applications.
Dimensions	Height: 86 mm (3.4 in.), width: 445 mm (17.5 in.), depth: 746 mm (29.4 in.)
Weight	Minimum configuration: 25 kg (55 lb), maximum: 30 kg (65 lb)

The x3650 M4 HD servers are shipped with the following items:

- Statement of Limited Warranty
- Important Notices
- Rack Installation Instructions
- Documentation CD that contains the *Installation and Service Guide*
- System x® Gen-III Slides Kit
- System x Gen-III Cable Management Arm (CMA)
- 2.8 m (9.18 in.) C13-C14 power cord (one for models with one power supply, and two for models with two power supplies)

Memory options

Lenovo DDR3 memory is compatibility tested and tuned for optimal System x performance and throughput. Lenovo memory specifications are integrated into the light path diagnostics for immediate system performance feedback and optimum system uptime. From a service and support standpoint, Lenovo memory automatically assumes the system warranty, and Lenovo provides service and support worldwide.

The System x3650 M4 HD supports DDR3 memory. The server supports up to 12 DIMMs when one processor is installed and up to 24 DIMMs when two processors are installed. Each processor has four memory channels, and there are three DIMMs per channel.

The following rules apply when selecting the memory configuration:

- The server supports UDIMMs, RDIMMs, and LRDIMMs.
- Mixing different types of memory (UDIMMs, RDIMMs, and LRDIMMs) is not supported.
- Mixing 1.5 V and 1.35 V DIMMs is supported; in such a case, all DIMMs operate at 1.5 V.
- The maximum number of ranks per one channel is eight (except for Load Reduced DIMMs, where more than eight ranks are supported, because one quad-rank LRDIMM provides the same electrical

load on a memory bus as a single-rank RDIMM).

- The maximum quantity of DIMMs that can be installed in the server depends on the number of CPUs, DIMM type, rank, and operating voltage, as shown in the "Max. qty supported" row in Table 5.
- All DIMMs in the server operate at the same speed, which is determined as the lowest value of the following items:
 - Memory speed that is supported by the specific CPU.
 - Lowest of maximum operating speeds for selected memory configuration that depends on rated speed, operating voltage, and quantity of DIMMs per channel, as shown under the "Maximum operating speed" section in Table 5.

The following table (Parts 1 and 2) shows the characteristics of the supported DIMMs. Tables cells that are highlighted with a gray background indicate when the combination of DIMM voltage and the number of DIMMs per channel still allows the DIMMs to operate at a rated speed.

3 DIMMs per channel	No support	No support	1066 MHz

* The maximum quantity that is supported is shown for two processors installed.

The following memory protection technologies are supported:

- ECC
- Chipkill (for x4-based memory DIMMs)
- Memory mirroring
- Memory rank sparing

If memory mirroring is used, DIMMs must be installed in pairs (minimum of one pair per each CPU), and both DIMMs in a pair must be identical in type and size.

If memory rank sparing is used, then a minimum of one quad-rank DIMM or two single-rank or dual-rank DIMMs must be installed per populated channel (the DIMMs do not need being identical). In rank sparing mode, one rank of a DIMM in each populated channel is reserved as spare memory. The size of a rank varies depending on the DIMMs that are installed.

The following table lists the memory options that are available for x3650 M4 HD server.

Internal storage

System x3650 M4 HD server supports 1.8-inch and 2.5-inch drives. The server supports the following drive configurations:

- 16x 2.5-inch hot-swap drive bays (front of server)
- 16x 2.5-inch hot-swap drive bays (front) + 2x 2.5-inch hot-swap drive bays (rear)
- 24x 2.5-inch hot-swap drive bays (front)
- 24x 2.5-inch hot-swap drive bays (front) + 2x 2.5-inch hot-swap drive bays (rear)
- 16x 2.5-inch hot-swap drive bays (front) + 16x 1.8-inch hot-swap drive bays (front)

Note: The combination of 16x 2.5-inch hot-swap drive bays (front) + 16x 1.8-inch hot-swap drive bays (front) + 2x 2.5-inch hot-swap drive bays (rear) is not supported.

The following figure shows these drive bay configurations.

Figure 5. Internal drive configurations

Backplanes and enablement kits

All standard models ship with 16x 2.5-inch hot-swap drive bays (feature code A3NR). Model H3x also ships with 2x 2.5-inch bays in the rear of the server (feature code A3NQ).

Backplane and enablement kits are listed in the following table. All backplanes operate at 6 Gbps SAS.

† The ServeRAID M5200 Series RAID 6 Upgrade (47C8706) requires one of the RAID 5 upgrades with cache (47C8656, 47C8660, 47C8664).

The integrated ServeRAID M5210e SAS/SATA Controller has the following specifications:

- Two x4 mini-SAS HD internal connectors (SFF8643)
- Supports RAID levels 0, 1, and 10
- Supports RAID levels 5 and 50 with optional M5200 Series RAID 5 upgrades
- Supports RAID 6 and 60 with the optional M5200 Series RAID 6 Upgrade
- Supports 1 GB cache (no battery backup) or 1 GB or 2 GB flash-backed cache
- Supports performance upgrades through Features on Demand
- 12 Gbps throughput per port
- PCIe x8 Gen 3 host interface
- Based on the LSI SAS3108 12 Gbps ROC controller

The ServeRAID M5210 SAS/SATA Controller has the following specifications:

- Eight internal 12 Gbps SAS/SATA ports
- Two x4 mini-SAS HD internal connectors (SFF8643)
- Supports connections to SAS/SATA drives and SAS Expanders
- Supports RAID levels 0, 1, and 10
- Supports RAID levels 5 and 50 with optional M5200 Series RAID 5 upgrades
- Supports RAID 6 and 60 with the optional M5200 Series RAID 6 Upgrade
- Supports 1 GB cache (no battery backup) or 1 GB or 2 GB flash-backed cache
- Supports performance upgrades through Features on Demand

- 12 Gbps throughput per port
- PCIe 3.0 x8 host interface
- Based on the LSI SAS3108 12 Gbps ROC controller
- IBM PowerPC® 476 1.2GHz dual core processor

The ServeRAID H1110 adapter has the following specifications:

- Four internal 6 Gbps SAS/SATA ports
- One x4 mini-SAS internal connector (SFF8087)
- 6 Gbps throughput per port
- Based on the LSI SAS2004 6 Gbps RAID on Chip (ROC) controller
- PCIe 2.0 x4 host interface
- Supports RAID 0, 1, 1E, and 10
- Connects to up to four SAS or SATA drives (SAS expanders are not supported.)

The N2215 SAS/SATA host bus adapter has the following specifications:

- Two internal mini-SAS HD x4 connectors (SFF8643)
- MD2 small form factor
- PCI Express x8 3.0 host interface
- SAS Controller: LSI SAS3008
- 12 Gbps per port data transfer rate
- No RAID support, no cache
- UEFI support

Internal backup units

The server does not support an internal tape drive.

Optical drives

No internal bays; use an external USB drive. See <http://support.lenovo.com/en/documents/pd011281> for options.

I/O expansion options

The server supports up to six PCIe slots with different riser cards that are installed into two riser sockets on the system board (one riser socket supports the installation of one riser card). Riser 1 supplies slots 1, 2, and 3. Riser 2 supplies slots 4, 5, and 6. Standard models have Riser card 1 installed with three PCIe 3.0 x8 slots. To enable slots 4 - 6, install a second processor and a second riser card.

These options are available through CTO only. Slots 1 and 2 can be replaced with a two-bay 2.5-inch hot-swap drive kit, feature A3NQ. The kit includes a 1-card riser for a RAID card that is installed in slot 3.a

The following table lists the PCI riser card options that are available.

Table 12. PCI riser card options

* CTO only.

† The use of Riser card slot 2 requires a second processor to be installed.

The locations of the PCIe slots are shown in the following figure.

Figure 7. Slot dimensions

The specific slots that are available depend on the riser cards that are installed in Riser socket 1 and Riser socket 2, as shown in the following table. Standard models except for model H3x have 00Y7759 installed in Riser socket 1.

Tip: All slots support full-height adapters. Slots 1, 4, and 5 support full-length adapters, and slots 2, 3, and 6 (when present) support half-length adapters.

Note: Slots 4, 5, and 6 require a second processor to be installed.

Network adapters

x3650 M4 HD supports four integrated Gigabit Ethernet ports. Optionally, two 10 Gb Ethernet ports or InfiniBand can be added by installing one of the available dual-port mezzanine cards that are listed in the following table. These cards use a dedicated connector on the system board and do not use a PCI expansion slot.

Integrated NICs have the following features:

- Intel I350AM4 chip
- Four GbE ports
- TCP Offload Engine (TOE) support
- Wake on LAN support
- 802.1Q VLAN tagging support
- NIC Teaming (load balancing and failover)

The following table lists additional supported network adapters.

Storage HBAs and external RAID controllers

The following table lists the storage HBAs that are supported by the x3650 M4 HD server. The maximum quantity that is listed is for configurations with two processors installed. If one processor is installed, the maximum quantity that is supported is half of the listed value.

* 1 Features on Demand (FoD) upgrade will enable all M5200 series adapters installed in the server

The ServeRAID M5225 SAS/SATA Controller has the following specifications:

- Eight external 12 Gbps SAS/SATA ports
- Supports 12, 6, and 3 Gbps SAS and 6 and 3 Gbps SATA data transfer rates
- Two external x4 mini-SAS HD connectors (SFF-8644)
- Supports 2 GB flash-backed cache (standard)
- Supports RAID levels 0, 1, 5, 10, and 50 (standard)
- Supports RAID 6 and 60 with the optional M5200 Series RAID 6 Upgrade
- Supports optional M5200 Series Performance Accelerator and SSD Caching upgrades
- PCIe x8 Gen 3 host interface
- Based on the LSI SAS3108 12 Gbps ROC controller
- Supports connectivity to the EXP2512 and EXP2524 storage expansion enclosures

PCIe SSD adapters

The server supports the High IOPS SSD adapters that are listed in the following table.

Table 17. SSD adapters

Part number	Feature code	Description	Maximum supported
00AE983	ARYK	1250GB Enterprise Value io3 Flash Adapter for System x	4
00AE986	ARYL	1600GB Enterprise Value io3 Flash Adapter for System x	4
00AE989	ARYM	3200GB Enterprise Value io3 Flash Adapter for System x	4

00JY001	ARYR	2600GB Enterprise io3 Flash Adapter for System x	4
00JY004	None*	5200GB Enterprise io3 Flash Adapter for System x	4

* These adapters cannot be ordered via CTO. They must be ordered as options and shipped separately from the server.

For details about these adapters, see the Lenovo Press Product Guides in the Internal Storage category: <http://lenovopress.com/systemx/internalstorage>

GPU adapters

The server supports graphics processing units (GPUs).

The following table lists the supported GPUs. Certain riser cards are needed as listed in the table. The server supports up to two NVIDIA adapters, one in each riser card. The use of the second GPU requires that the second processor be installed. GPUs are available through CTO only. Additional cables and other components are included by the configurator.

Table 18. GPU adapters

Part number	Feature code	Description	Riser used	Maximum supported
None*	A3WJ	NVIDIA Quadro K2000	GPU riser, 00Y7760	2
None*	A3WH	NVIDIA Quadro K600	PCIe x16 riser, 00Y7757	2

* CTO only.

Power supplies

The server supports up to two redundant power supplies. Standard models come with one or two power supplies (model dependent). The following table lists the power supplies.

Table 19. Power supplies

Part number	Feature code	Description	Maximum supported	Standard models where used
94Y6667	A2EB	System x 900W High Efficiency Platinum AC Power Supply	2	M3x, 83x
94Y6669	A1H5	System x 750W High Efficiency Platinum AC Power Supply	2	All other models
94Y6668	A1H6	System x 550W High Efficiency Platinum AC Power Supply	2	
94Y7631	A39N	System x 750W High Efficiency -48 V DC Power Supply	2	-

An AC power supply ships standard with one 2.8 m C13 - C14 power cord.

All CFF power supplies are compliant with and exceed 80 Plus Platinum standard, as shown in the following table. Maximum power efficiency is achieved at 50% load.

Table 20. Power supply efficiencies

Power supply unit	20% load	50% load	100% load
80 PLUS Platinum standard			
	90.00%	94.00%	91.00%
Power supplies			
System x 900W High Efficiency Platinum AC Power Supply	90.45%	94.02%	91.89%
System x 750W High Efficiency Platinum AC Power Supply	92.32%	94.31%	93.14%
System x 550W High Efficiency Platinum AC Power Supply	92.94%	94.21%	92.74%

For power supply selection, use the following rule-of-thumb:

Select 550W power supplies if all of the following items are true:

- 8 or fewer DIMMs (no LRDIMMs)
- 16 or fewer HDDs
- One CPU 115W or lower
- 1 or 2 PCIe adapters
- No High IOPS adapters
- No GPUs

Select 750 W power supplies if all of the following items are true:

- 16 or fewer DIMMs (no LRDIMMs)
- 24 or fewer drives
- Two CPUs 115 W or lower
- No High IOPS adapters
- No GPUs

Select 900 W power supplies if all of the following items are true:

- More than 16 DIMMs
- 26 or 32 drives

- CPUs above 115 W
- High IOPS adapters
- GPU adapters

For accurate power supply selection, use the Power Configurator:
<http://ibm.com/systems/bladecenter/resources/powerconfig.html>

Integrated virtualization

The server supports VMware ESXi that is installed on a USB memory key. The key is installed in a USB socket inside the server. The following table lists the virtualization options.

Table 21. Virtualization options

Part number	Feature code	Description	Maximum supported	Standard models where used
41Y8298	A2G0	Blank USB Memory Key for VMware ESXi Downloads	1	None

Local server management

The x3650 M4 HD offers local console access USB ports and a video port on the rear of the server, as shown in Figure 3. Console access from the front of the server is available through an optional console breakout cable that is connected to a port on the front of the server as shown in the following figure.

Figure 8. Optional console breakout cable

The console breakout cable can be ordered by using the information in the following table.

Table 22. Console breakout cable

Part number	Feature code	Description	Maximum supported	Standard models where used
00Y8325	A47X	x3650 M4 HD Video and USB Breakout Cable	1	None

To aid with problem determination, the server includes basic light path diagnostics, which are a set of LEDs on the front of the server and inside the server that show you which component is failing. The LEDs are shown in the following figure.

Figure 9. Power button and system LEDs

When an error occurs, the system error LED lights up. You can review the logs through the web interface of the IMMv2 (see the "Remote management" section).

Remote management

The server contains Integrated Management Module II (IMM2), which provides advanced service-processor control, monitoring, and an alerting function. If an environmental condition exceeds a threshold or if a system component fails, the IMM2 lights LEDs to help you diagnose the problem, records the error in the event log, and alerts you to the problem. Optionally, the IMM2 also provides a virtual presence capability for remote server management capabilities.

The x3650 M4 HD offers a dedicated Ethernet port at the rear of the server for remote access to the IMM2. Alternatively, one of the four Ethernet ports that are accessible by the operating system can be shared with IMM2 access. This feature is enabled through the system setup in UEFI.

The IMM provides remote server management through industry-standard interfaces:

- Intelligent Platform Management Interface (IPMI) Version 2.0
- Simple Network Management Protocol (SNMP) Version 3
- Common Information Model (CIM)
- Web browser

The optional Integrated Management Module Advanced Upgrade is required to enable the remote presence and blue-screen capture features. The remote presence feature provides the following functions:

- Remotely viewing video with graphics resolutions up to 1600x1200 at 75 Hz with up to 23 bits per pixel colors, regardless of the system state
- Remotely accessing the server using the keyboard and mouse from a remote client
- Mapping the CD or DVD drive, diskette drive, and USB flash drive on a remote client, and mapping ISO and diskette image files as virtual drives that are available for use by the server
- Uploading a diskette image to the IMM memory and mapping it to the server as a virtual drive

The blue-screen capture feature captures the video display contents before the IMM restarts the server when the IMM detects an operating system hang condition. A system administrator can use the blue-screen capture to assist in determining the cause of the hang condition. The following table lists the remote management option ordering information.

Table 23. Remote management option

Part number	Feature code	Description	Maximum supported	Models where used
90Y3901	A1ML	Integrated Management Module Advanced Upgrade	1	None

Supported operating systems

The server supports the following operating systems:

- Microsoft Windows Server 2008 R2
- Microsoft Windows Server 2008, Datacenter x64 Edition
- Microsoft Windows Server 2008, Datacenter x86 Edition
- Microsoft Windows Server 2008, Enterprise x64 Edition
- Microsoft Windows Server 2008, Enterprise x86 Edition

- Microsoft Windows Server 2008, Web x64 Edition
- Microsoft Windows Server 2008, Web x86 Edition
- Microsoft Windows Server 2012
- Microsoft Windows Server 2012 R2
- Red Hat Enterprise Linux 6 Server Edition
- Red Hat Enterprise Linux 6 Server x64 Edition
- Red Hat Enterprise Linux 7
- SUSE LINUX Enterprise Server 11 for AMD64/EM64T
- SUSE LINUX Enterprise Server 11 for x86
- SUSE LINUX Enterprise Server 11 with Xen for AMD64/EM64T
- SUSE Linux Enterprise Server 12
- SUSE Linux Enterprise Server 12 with XEN
- VMware vSphere 5.1 (ESXi)
- VMware vSphere 5.5 (ESXi)

Physical and electrical specifications

Dimensions and weight:

- Height: 86.5 mm (3.4 in.)
- Width: 445 mm (17.5 in.)
- Depth: 746 mm (29.4 in.)
- Weight:
 - Minimum configuration: 25 kg (55 lb)
 - Maximum configuration: 30 kg (65 lb)

Supported environment:

The System x3650 M4 HD complies with ASHRAE class A3 specifications.

- Power on:
 - Temperature: 5 °C to 40 °C (41 °F to 104 °F) up to 950 m (3,117 ft)
 - Above 950 m, de-rated maximum air temperature 1 °C / 175 m
 - Humidity, non-condensing: -12 °C dew point (10.4 °F) and 8% - 85% relative humidity

- Maximum dew point: 24 °C (75 °F)
- Maximum altitude: 3050 m (10,000 ft) and 5 °C to 28 °C (41 °F to 82 °F)
- Maximum rate of temperature change: 20 °C/hr (68 °F/hr) for HDDs
- Power off:
 - Temperature: 5 °C to 45 °C (41 °F to 113 °F)
 - Relative humidity: 8% - 85%
 - Maximum dew point: 27 °C (80.6 °F)
- Storage (non-operating):
 - Temperature: 1 °C to 60 °C (33.8 °F to 140 °F)
 - Altitude: 3050 m (10,000 ft)
 - Relative humidity: 5% - 80%
 - Maximum dew point: 29 °C (84.2 °F)
- Shipment (non-operating):
 - Temperature: -40 °C to 60 °C (-40 °F to 140 °F)
 - Altitude: 10,700 m (35,105 ft)
 - Relative humidity: 5% - 100%
 - Maximum dew point: 29 °C (84.2 °F)
- Electrical:
 - Models with 900 W power supplies:
 - 100 to 127 (nominal) V AC; 50 Hz or 60 Hz; 10 A
 - 200 to 240 (nominal) V AC; 50 Hz or 60 Hz; 5 A
 - Input kilovolt-amperes (kVA) (approximately):
 - Minimum configuration: 0.15 kVA
 - Maximum configuration: 1.2 kVA
 - Models with 750 W AC power supplies:
 - 100 to 127 (nominal) V AC; 50 Hz or 60 Hz; 8.9 A
 - 200 to 240 (nominal) V AC; 50 Hz or 60 Hz; 4.5 A
 - Input kilovolt-amperes (kVA) (approximately):
 - Minimum configuration: 0.15 kVA
 - Maximum configuration: 0.99 kVA
 - Models with 550 W power supplies:
 - 100 to 127 (nominal) V AC; 50 Hz or 60 Hz; 6.5 A
 - 200 to 240 (nominal) V AC; 50 Hz or 60 Hz; 3.3 A
 - Input kilovolt-amperes (kVA) (approximately):
 - Minimum configuration: 0.16 kVA
 - Maximum configuration: 0.73 kVA
- BTU output:
 - Minimum configuration: 525 Btu/hr (154 watts)
 - Maximum configuration: 4053 Btu/hr (1188 watts)
- Noise level:
 - 6.6 bels (operating)
 - 6.4 bels (idle)

Warranty options

The System x3650 M4 HD has a three-year warranty with 24x7 standard call center support and 9x5 Next Business Day onsite coverage. Also available are Lenovo Services warranty maintenance upgrades and post-warranty maintenance agreements, with a well-defined scope of services, including service hours, response time, term of service, and service agreement terms and conditions.

Lenovo warranty service upgrade offerings are country-specific. Not all warranty service upgrades are available in every country. For more information about Lenovo warranty service upgrade offerings that are available in your country, visit the Lenovo Services website:

The following table explains warranty service definitions in more detail.

Table 24. Warranty service definitions

Term	Description
On-site service	A service technician will arrive at the client's location for equipment service.
24x7x2 hour	A service technician is scheduled to arrive at the client's location within two hours after remote problem determination is completed. Lenovo provides service around the clock, every day, including Lenovo holidays.
24x7x4 hour	A service technician is scheduled to arrive at the client's location within four hours after remote problem determination is completed. Lenovo provides service around the clock, every day, including Lenovo holidays.
9x5x4 hour	A service technician is scheduled to arrive at the client's location within four business hours after remote problem determination is completed. Lenovo provides service 8:00 am - 5:00 pm in the client's local time zone, Monday-Friday, excluding Lenovo holidays. For example, if a customer reports an incident at 3:00 pm on Friday, the technician will arrive by 10:00 am the following Monday.
9x5 next business day	A service technician is scheduled to arrive at the client's location on the business day after remote problem determination is completed. Lenovo provides service 8:00 am - 5:00 pm in the client's local time zone, Monday - Friday, excluding Lenovo holidays. Calls received after 4:00 pm local time require an extra business day for service dispatch. Next business day service is not guaranteed.
Committed Repair	Problems receive priority handling so that repairs are completed within the committed time of 6, 8, or 24 hours. Lenovo provides service 24 hours/day, every day, including Lenovo holidays.

The following Lenovo warranty service upgrades are available:

- Warranty and maintenance service upgrades:
 - Three, four, or five years of 9x5 or 24x7 service coverage
 - Onsite response from next business day to 2 or 4 hours
 - Committed repair service
 - Warranty extension of up to 5 years
 - Post warranty extensions
- Committed Repair Service

Committed Repair Services enhances the level of Warranty Service Upgrade or Post Warranty/Maintenance Service offering associated with the selected systems. Offerings vary and are available in select countries.

 - Priority handling to meet defined time frames to restore the failing machine to good working condition
 - Committed repair service levels are measured within the following coverage hours:
 - 24x7x6: Service performed 24 hours per day, 7 days per week, within 6 hours
 - 24x7x8: Service performed 24 hours per day, 7 days per week, within 8 hours
 - 24x7x24: Service performed 24 hours per day, 7 days per week, within 24 hours
- Hard Drive Retention

Lenovo's Hard Drive Retention service is a multi-drive hard drive retention offering that ensures your data is always under your control, regardless of the number of hard drives that are installed in your Lenovo server. In the unlikely event of a hard drive failure, you retain possession of your hard drive while Lenovo replaces the failed drive part. Your data stays safely on your premises, in your hands. The Hard Drive Retention service can be purchased in convenient bundles with our warranty upgrades and extensions.
- Microcode Support

Keeping microcode current helps prevent hardware failures and security exposure. There are two levels of service: analysis of the installed base and analysis and update where required. Offerings vary by country and can be bundled with other warranty upgrades and extensions.

- Remote Technical Support Services (RTS)
RTS provides comprehensive technical call center support for covered servers, storage, operating systems, and applications. Providing a single source for support of hardware and software issues, RTS can reduce problem resolution time, decreasing the cost to address technical problems and increasing uptime. Offerings are available for Windows, Linux, IBM Systems Director, VMware, Microsoft business applications, and Lenovo System x storage devices, and IBM OEM storage devices.

Regulatory compliance

The server conforms to the following standards:

- Energy Star 2.0
- FCC - Verified to comply with Part 15 of the FCC Rules, Class A
- Canada ICES-003, issue 5, Class A
- UL/IEC 60950-1
- CSA C22.2 No. 60950-1
- NOM-019
- Argentina IEC60950-1
- Japan VCCI, Class A
- Australia/New Zealand AS/NZS CISPR 22, Class A; AS/NZS 60950.1
- IEC 60950-1(CB Certificate and CB Test Report)
- China CCC GB4943.1, GB9254 Class A, and GB17625.1
- Taiwan BSMI CNS13438, Class A; CNS14336-1
- Korea KN22, Class A; KN24

- IEC 60950-1 (CB Certificate and CB Test Report)
- CE Mark (EN55022 Class A, EN60950-1, EN55024, EN61000-3-2, and EN61000-3-3)
- CISPR 22, Class A
- TUV-GS (EN60950-1 /IEC60950-1, EK1-ITB2000)

External drive enclosures

The server supports attachment to external drive enclosures using a RAID controller with external ports or a SAS host bus adapter. Adapters supported by the server are listed in the [SAS adapters for external storage](#) section.

The following table lists the 6 Gbps SAS external drive enclosures that are offered by Lenovo that can be used with the server for storage expansion.

Lenovo Financial Services

Lenovo Financial Services reinforces Lenovo's commitment to deliver pioneering products and services that are recognized for their quality, excellence, and trustworthiness. Lenovo Financial Services offers financing solutions and services that complement your technology solution anywhere in the world.

We are dedicated to delivering a positive finance experience for customers like you who want to maximize your purchase power by obtaining the technology you need today, protect against technology obsolescence, and preserve your capital for other uses.

We work with businesses, non-profit organizations, governments and educational institutions to finance their entire technology solution. We focus on making it easy to do business with us. Our highly experienced team of finance professionals operates in a work culture that emphasizes the importance of providing outstanding customer service. Our systems, processes and flexible policies support our goal of providing customers with a positive experience.

We finance your entire solution. Unlike others, we allow you to bundle everything you need from hardware and software to service contracts, installation costs, training fees, and sales tax. If you decide weeks or months later to add to your solution, we can consolidate everything into a single invoice.

Our Premier Client services provide large accounts with special handling services to ensure these complex transactions are serviced properly. As a premier client, you have a dedicated finance specialist who manages your account through its life, from first invoice through asset return or purchase. This specialist develops an in-depth understanding of your invoice and payment requirements. For you, this dedication provides a high-quality, easy, and positive financing experience.

For your region-specific offers, please ask your Lenovo sales representative or your technology provider about the use of Lenovo Financial Services. For more information, see the following Lenovo website:
